

Michigan Tech Research Forest Lands Ecoregion Map

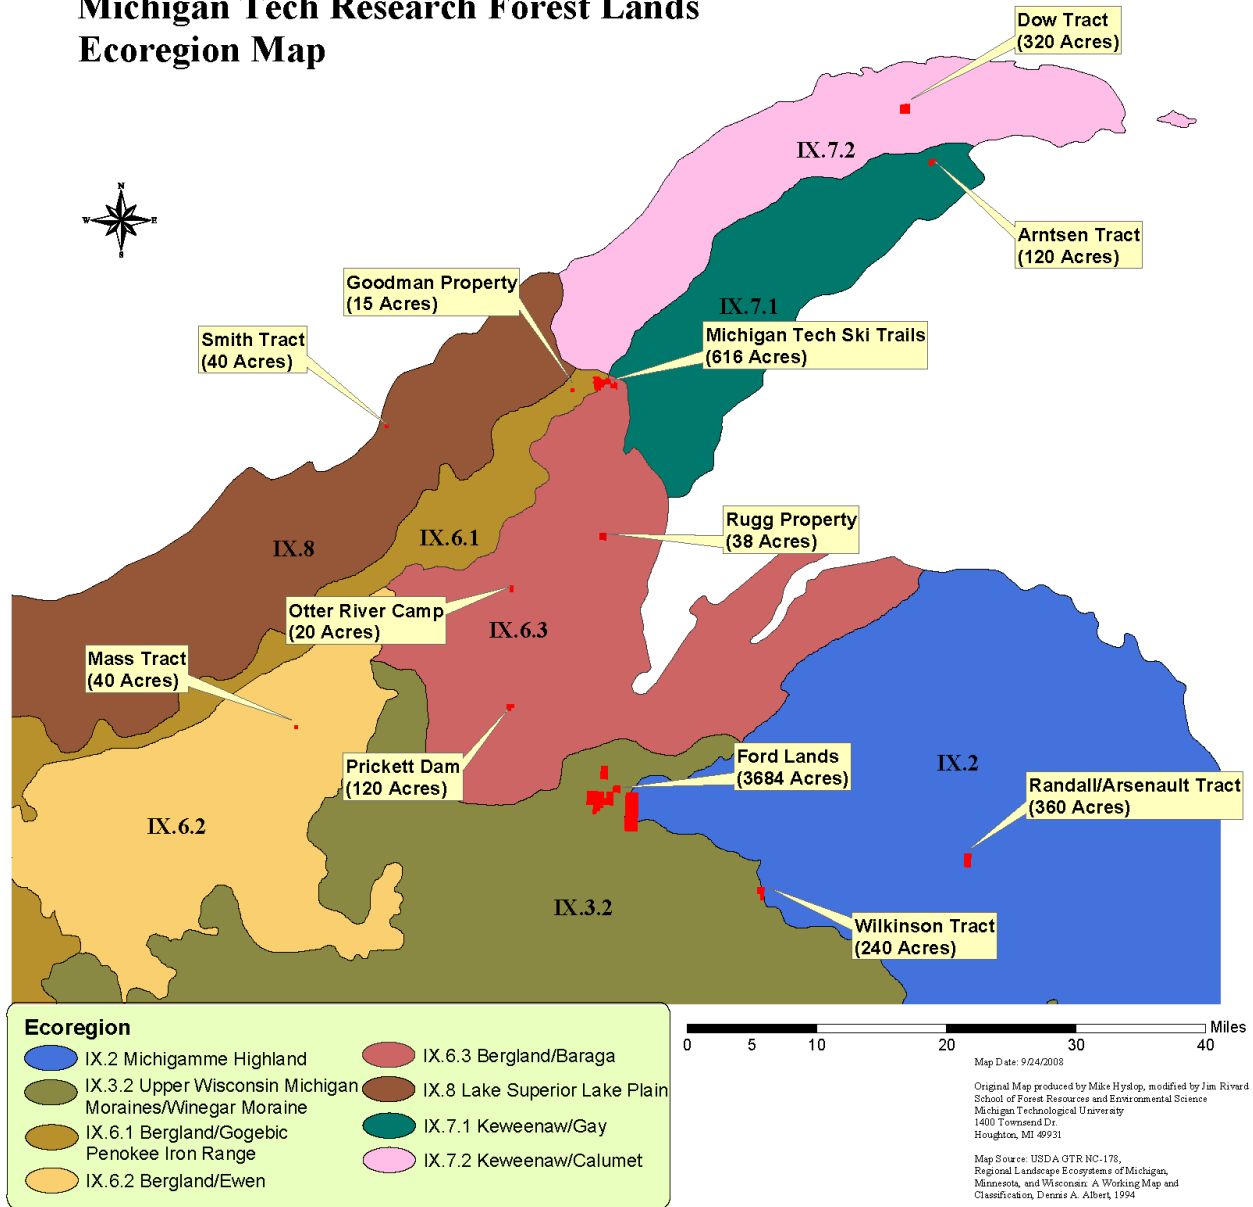

Figure 3. Locations of properties managed by the FCF as part of the Ford Forest.

Notes: The figure does *not* show the Lake Bailey and Calabro properties (small acreages) as well as recent donations on Misery Bay (2.3 acres) and the Sukow property in northern Wisconsin (240 acres). The Arntsen and Randall/Arsenault (Log Lake) tracts have been sold by MTU. The FCF does not have managerial responsibilities for lands associated with the Michigan Tech Ski Trails, but does provide timber management services to MTU for this property.
