GUIDELINES

Sometimes there can be a lull in a professional relationship after the initial ‘get to know each other’ questions. Check out the conversation starters and questions for possible topics for your emails.

Often, it can be as simple as starting your email each week with a summary of how your week went. If you encountered any struggles, or succeeded in fulfilling any of your goals, or even sharing your accomplishments can ignite conversations and even prompt questions from your mentor. Feel free to share commonalities that are experienced by all Tech students, like having a class in the same building or with the same professor as your mentor. You can also talk about some of our current classes and whether your mentor had to take similar ones and if they use the information learned in their job.

Be sure to do some research before you start your initial emails to your mentor. Asking questions you could have easily found answers to elsewhere will be a waste of time for both of you and is unlikely to make a good impression. Avoid letting your emails become a survey in which your mentor simply answers the questions as their response. In learning the answers to these questions through the medium of conversation you will gain a much better understanding of their position and the field of work you are looking into.

You can check out their LinkedIn (www.linkedin.com) or other professional profile before you meet them, and then ask them to elaborate on the basics through the medium of conversation.
SAMPLE QUESTIONS
These questions are grouped according to different career values.

1. ACHIEVEMENT
   • What gives you a sense of accomplishment in this occupation?
