

Positions available for research study

Several undergraduate student researchers will be recruited and paid hourly to work on tomato plants under the guidance of a senior PhD student. The work includes mainly growing tomato plants, extracting DNA and RNA for PCR and qRT-PCR, and taking pictures of the tomato plants, organs, and fruits.

Interested students please contact the senior graduate student, Haiping Liu (email: haipingl@mtu.edu) or Dr. Guiliang Tang (email: gtang1@mtu.edu).
