OFFICE OF INNOVATION
AND INDUSTRY ENGAGEMENT
eNEWSWIRE

Welcome to Michigan Technological University's **Office of Innovation and Industry Engagement (IIE) eNewswire**. This periodic briefing will provide an update on University recruiting, research, licensing, and professional development news/programs of interest to industry stakeholders.

The mission of the IIE eNewswire is to create awareness of University programs and resources that will help companies and industry achieve their strategic goals. Together, through strong partnerships with industry, Michigan Tech students, faculty, and staff will create the future.

Featured Partner:

Brocade Hosts Silicon Valley Experience

Selected from a pool of over 50 applicants, first-year to PhD students competed in an elevator pitch event to earn a spot on the 3rd annual Silicon Valley Spring Break Experience sponsored by Brocade Communications. The school of business organizes the competition and hosts the event, while the office of corporate development orchestrates the week of tours and experiences with industry. → [Read More...](#)

Featured Program:

Mind Trekkers

"I really don't like learning about science at school, but I like actually doing it," said a fifth-grade student from the Green Bay area. That's music to the ears of Mind Trekkers coordinators and volunteers—and the corporate partners, including Bemis, Mercury Marine, and Plexus, who join forces with Tech at the events to spread interest in STEM. → [Read More...](#)

Featured Technology:

Students Skin Patch Warns of Sunburn

A Michigan Technological University Senior Design team has devised a sensor that tells you when it's time to seek shelter, long before your skin gets red and tender. The nickle-sized skin patch gradually darkens when exposed to the type of light that causes sunburn and skin cancer. → [Read More...](#)

Featured Research:

Bioabsorbable Stents

Permanent stents are lifesavers, but they can also cause health problems when they are in the body for a long time. Michigan Tech material science and engineering researchers, Professor

Jaroslav Drelich and PhD student Patrick Bowen, in close collaboration with Jeremy Goldman, Associate Professor of biomedical engineering, are investigating a new stent material, zinc, that would dissolve safely after the artery has healed. To support this project, or other innovative research at the University, contact [Mike Morley](#), at 906-487-2228. → [Read More...](#)

Featured Researcher:

Joshua Pearce

Dr. Joshua Pearce, an Associate Professor in the Department of Material Science and Engineering, is challenging society and our own individual creativity with his 3D Printers for Peace Contest.
