Record Number of Teams for Clean Snowmobile Challenge

Mobility TechTalks

For the 14th year running, the Keweenaw Research Center at Michigan Tech is bringing talented student engineers to compete over spring break for the quietest, cleanest snowmobile. The events, part of a sanctioned SAE International competition, range from an endurance run to emissions and noise tests to acceleration and handling courses.

The students would like to thank event partner Dassault Systemes SOLIDWORKS.

An additional thank you to all our sponsors AVL, Faurecia, MacLean-Fogg, Denso, John Deere Power Systems, CAMSO, Horiba, PCB, Fiat Chrysler Automotive, Boss Snow Plow, Gage Products, Sensors, and [more](#).

TechTalks are rapid-paced samplings of work from a number of faculty; they showcase both published and unpublished work. In this special session, seven presenters shared their mobility research in four slides in four minutes. So, just what is mobility?
