Mind Trekkers, Moving to Texas?

San Jacinto College hosted over 4,500 middle school students, teachers and community members at the fourth annual “Adventures in STEM” festival in Pasadena, Texas on March 8-9, 2018. But this is a Michigan Tech blog, so why are we covering news from a college campus 1500 miles south of Houghton?

Atomic Zoom: Michigan Tech's Scanning Transmission Electron Microscope

Housed in a specially constructed brick building at the south end of Michigan Technological University's campus is the FEI 200kV Titan Themis Scanning Transmission Electron Microscope (S-TEM). One of only two Titans in the state of Michigan, the microscope is capable of imaging at the atomic scale, providing chemical information from a sample and can also operate as a transmission electron microscope.

The American Center for Mobility Career Explorations

Michigan Technological University would like to thank The American Center for Mobility, acmwillowrun.org, for hosting its Career Explorations.

We need professionals to serve as distinguished judges!

Design Expo 2018

Be a Judge

If you have any question feel free to contact [Zack Fredin](#)

Huskies Hit the Road

Over Michigan Tech's spring break, in typical husky fashion, the Michigan Technological University Robotics Systems Enterprise (RSE) AutoDrive Challenge Team will hit the road and the track. With their autonomous vehicle in tow, the team, called Prometheus Borealis after the Greek deity responsible for bringing technology to man and the greek deity representing the north wind, will head to Road America in Elkhart Lake, Wisconsin, to run tests on their autonomous vehicle.

After the Hurricanes Came: Revitalizing Research After a Natural Disaster

Ours is a resilient world; when hurricanes devastate landscapes, mere months afterward new growth appears. Also resilient are researchers; when hurricanes devastate research sites, scientists find ways to turn catastrophe into opportunity.
