• Garden level: University Marketing and administrative offices, including:
  • Building—1
  • Building—10, 17
  • Memorial Union Building—34

A popular student gathering space, the Memorial Union Building was named to honor student volunteer work. Originally the president’s residence, the Memorial Union Building was constructed in 1908 as the first residence hall on campus. The tower broke ground spring 2018 and was completed in summer 2020. The tower is 9 stories tall and has 100,000 square feet of living space. Elevators will provide access to all floors. The tower features 170 units of studio, single, double, and quadruple occupancy. The building includes modern common areas for lounging, studying, and socializing, as well as two large ballrooms for events and gatherings. The tower also includes a fitness center, study rooms, and a large outdoor terrace with views of the campus and surrounding area.

On the first floor of the tower, the bell tower is located. The bell tower was originally located on the roof of the Old Main building. The bell, known as “The Old Main Bell,” was cast in 1920 and was used in the tower until the Old Main was demolished in 1960. The bell was then moved to the tower of the Memorial Union Building. The bell is 12 feet tall and weighs 5,500 pounds. It is made of bronze and has a diameter of 2.5 feet. The bell is rung by a mechanical device called a clapper, which hits the bell against a brass plate.

On the second floor, the bell tower is operated by the students and faculty of the College of Arts and Sciences. The bell is rung for various occasions, including sporting events, academic achievements, and special events. It is also used to signal the end of classes and other important events.

In addition to the bell tower, the tower includes a 400-seat event space, a 200-seat meeting space, and a 100-seat meeting room. These spaces are available for use by the university community, including students, faculty, staff, and community members. The tower is a hub for social and cultural events, including concerts, lectures, and other educational programs. The tower also includes a rooftop terrace with views of the campus and surrounding area.
**University Basketball Building—34**  A popular student gathering space, the University Basketball Building was named in honor of alumni who died in World War I. The second-largest building on campus, it contains the Fitness Center, located in the basement, and the Main Ballroom, which hosts the annual Student Government Ball. The building has also been home to the Alumni Center, which is located in the Mezzanine. The building includes three floors of student amenities, including dining options, study spaces, and fitness facilities.

**Academic Office Building—5**  Located adjacent to the Science and Technology building, the Academic Office Building houses offices for the Department of Biological Sciences, the Department of Chemistry, the Department of Civil and Environmental Engineering, the Department of Electrical Engineering and Computer Science, the Department of Geology and Geophysical Sciences, the Department of Mathematics and Statistics, the Department of Mechanical and Materials Engineering, the Department of Physics and Astronomy, and the Department of Psychological and Brain Sciences. The building also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**RTOC Building—5**  Our Army and Air Force ROTC programs are housed in the University’s oldest building, originally constructed in 1924, which was part of the original university construction. The building was later renovated and modernized.

**Chemical and Engineering Building—1**  Originally the site of the College of Arts and Sciences, the building now houses the Department of Chemical and Biological Engineering. The first floor includes a large lecture hall, office space, and a seminar room. The second floor includes a large classroom and laboratory space. The third floor includes offices for faculty and staff, and research laboratories.

**E1B Mechanical Engineering**  Located in the heart of campus, the E1B Mechanical Engineering Building is the second largest building on campus. It houses offices for the Department of Mechanical Engineering, the Department of Materials Science and Engineering, and the Department of Electrical and Computer Engineering. The building includes a large lecture hall, a seminar room, and office space for faculty and staff. The building also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**Keweenaw Waterway**  Named for the Keweenaw Peninsula, the MEEM consists of 11 floors and houses over 1,000 students. The first floor includes a large lecture hall, office space, and a seminar room. The second floor includes a large classroom and laboratory space. The third floor includes offices for faculty and staff, and research laboratories. The building also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**Hall of Fame**  Located in the heart of campus, the Hall of Fame is dedicated to honoring alumni who have made significant contributions to the University. The hall includes interactive multimedia exhibits, including digital displays and touchscreens, that highlight the accomplishments of the student body.

**Academic Office Building—5**  Located adjacent to the Science and Technology building, the Academic Office Building houses offices for the Department of Biological Sciences, the Department of Chemistry, the Department of Civil and Environmental Engineering, the Department of Electrical Engineering and Computer Science, the Department of Geology and Geophysical Sciences, the Department of Mathematics and Statistics, the Department of Mechanical and Materials Engineering, the Department of Physics and Astronomy, and the Department of Psychological and Brain Sciences. The building also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**RTOC Building—5**  Our Army and Air Force ROTC programs are housed in the University’s oldest building, originally constructed in 1924, which was part of the original university construction. The building was later renovated and modernized.

**Chemical and Engineering Building—1**  Originally the site of the College of Arts and Sciences, the building now houses the Department of Chemical and Biological Engineering. The first floor includes a large lecture hall, office space, and a seminar room. The second floor includes a large classroom and laboratory space. The third floor includes offices for faculty and staff, and research laboratories.

**Springfield Process Control Center**  Located on the first floor of the Springfield Process Control Center, the control room is where the building’s systems are monitored and controlled. The building also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**Second floor**  The exhibit area on the second floor features interactive multimedia exhibits, including digital displays and touchscreens, that highlight the accomplishments of the student body.

**First floor**  The exhibit area on the first floor features interactive multimedia exhibits, including digital displays and touchscreens, that highlight the accomplishments of the student body.

**Administration and Student Services Building—1**  This building serves as the headquarters for the Office of the President, the Office of the Provost, and the Office of the Chancellor. The building includes offices for the Dean of Students, the Vice President for Finance and Administration, the Vice President for Research, the Vice President for Information Technology, and the Vice President for Marketing and Communications. The building also includes the University Bookstore, the University Police Department, and the University Library. The building also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**Outdoor Adventure and Wellness Program Rental Center**  Located on the first floor of the Outdoor Adventure and Wellness Program Rental Center, the center offers a variety of rentals, including kayaks, snowshoes, and tents. The center also offers a variety of outdoor adventure programs, including camping trips and mountain biking tours. The center also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**Wickup Hall—37**  Located on the central campus, Wickup Hall is home to the College of Arts and Sciences, the Department of Finance, the Department of History, the Department of Economics, the Department of Political Science, and the Department of Sociology. The building includes a large lecture hall, a seminar room, and office space for faculty and staff. The building also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**McNair Hall—38, 40**  Named after former Michigan Tech president Minor F. McNair, the building is located on the north side of campus. The building includes a large lecture hall, a seminar room, and office space for faculty and staff. The building also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**McNair Hall—38, 40**  Named after former Michigan Tech president Minor F. McNair, the building is located on the north side of campus. The building includes a large lecture hall, a seminar room, and office space for faculty and staff. The building also includes a state-of-the-art interactive multimedia lab and classroom in the basement.

**McNair Hall—38, 40**  Named after former Michigan Tech president Minor F. McNair, the building is located on the north side of campus. A. E. Seaman Mineral Museum—103
The museum houses a collection of more than 6,000 specimens of minerals, fossils, and meteorites. It is located in the McAllister Welcome Center.

Gates Tennis Center—51
Gates Tennis Center offers five indoor courts where you can play for free. These courts are open year-round, so you can enjoy tennis no matter the weather. The facility also includes a pro shop and a ticket office for those who wish to purchase admission to events.

Portage Lake Golf Course—36
Portage Lake Golf Course is a challenging 18-hole course located in Houghton, Michigan. It opened in 1904 and is one of the oldest golf courses still in operation in the state. The course is known for its beautiful scenery and challenging layout. The course is open to the public, so you can play for free all year long. The course offers a driving range, pro shop, and the Par and Grill lounge.

Student Development Complex—24
Our Student Development Complex includes the Student Development Center, along with our residential facilities that include five dorms: MacInnes Dr., 25th Ave., 40th Ave., 50th Ave., and 60th Ave. Students enjoy free admission to sporting events through Experience Tech. They also have free access to the 500-acre Ford Center, about 30 miles south of campus. They work on fieldwork with rentals and a concession area. Ski equipment, night skiing, and a terrain and mountain biking.

U.S. Mint—94
The U.S. Mint is home to the Michigan Mining School during the copper-mining boom of the Keweenaw Peninsula.

Welcome to Michigan Technological University
The campus you see today has grown and changed over a lot since 1882, when we were founded as the Michigan Mining School during the copper-mining boom of the Keweenaw Peninsula.

We have expanded to include more than 100 undergraduate and graduate degree programs in engineering, natural resources, computer science, mathematics, health professions, technology, business, economics, related physical and environmental sciences, arts, humanities, and social sciences. More than 7,100 students come from, or where they serve in the Michigan upper Peninsula. Students come from, or where they serve in the Michigan upper Peninsula. Students come from, or where they serve in the Michigan upper Peninsula. Students come from, or where they serve in the Michigan upper Peninsula.

The building is also home to the US Mint. The US Mint is home to the Michigan Mining School during the copper-mining boom of the Keweenaw Peninsula.
Welcome to Michigan Technological University. The campus you see today has grown and changed dramatically since 1885, when we were founded as the Michigan Mining School during the copper-mining boom on the Keweenaw Peninsula.

We have expanded to include more than 130 undergraduate and graduate degree programs in engineering, natural resources, computing, mathematics, health professions, technology, business, economics, health physical, and environmental sciences; arts; humanities; and social sciences. More than 7,700 students from across the nation and more than 50 countries around the world attend Michigan Tech to begin their careers and create the future.
