

## BACHELOR OF SCIENCE IN NURSING ADMISSION REQUIREMENTS

Michigan Tech offers an on-campus 4-year Bachelor of Science in Nursing degree. Students enter MTU as pre-nursing students. Pre-nursing courses are completed the first year before admission to the nursing major. Students formally apply to the nursing major during the spring semester. Application is once per year for the upcoming academic year with each cohort starting the Fall semester.

To be considered for the nursing major, students must have:

1. Met the general requirements for admission to Michigan Tech University.
2. Satisfactorily completed, or have reasonable expectations of completing, the following courses prior to admission into the Nursing Major. A minimum grade of “C” is required in all pre-nursing courses:

- BL1200/1210 General Biology II: Introduction to Cellular and Molecular Biology
- BL2010/2011 Anatomy and Physiology I & lab
- BL2020/2021 Anatomy and Physiology II & lab
- BL1710 Medical Terminology
- CH1000 Introduction to Chemistry
- MA1020 Quantitative Reasoning (or higher)
- PSY2000 Introductory Psychology
- SSXXXX Social Responsibility Elective
- UN1015 Composition
- UN1025 Global Issues

3. Achieved a cumulative Michigan Technological University pre-nursing grade point average of 2.85 or better; or receive a grade point average of 2.85 or better in pre-nursing course work at colleges other than Michigan Technological University.
4. Adhered to the MTU policy that allows required courses to be repeated only once. Students must receive the required grade in the repeated course (second attempt) to be eligible for admission into the Nursing Major.
5. Submitted an application to the MTU Nursing Program by March 1<sup>st</sup> for the following fall semester. Applications are available from the nursing office ([nursing@mtu.edu](mailto:nursing@mtu.edu)) starting February 1<sup>st</sup> of each year.

Admitted students are required to comply with, and provide documentation of, all Health Compliance expectation including, but not limited to: physical examination, verification of immunizations, TB testing, criminal background check and drug screen, and CPR certification. Students must not have been convicted of a felony or misdemeanor that will

prevent them from becoming licensed as a registered nurse or from participating in a required clinical rotation.

Students who fall out of sequence while in the nursing curriculum must apply for re-entry. Re-admission is granted on a space available basis.

Students who are denied admission to the Nursing Major must file a new application for admission to the Nursing Major prior to subsequent admission deadlines.

Students transferring to MTU, including students who already have bachelor's degrees, also follow the pre-nursing sequence and application process.
