Michigan Technological University
Department of Chemical Engineering

Technical Electives

2014-2015 Academic Year

To fulfill your departmental requirements, you must take 10 credits of approved technical electives. With these 10 credits, you must take:

- A minimum of three credits from the chemical engineering list (Traditional Chemistry Option).

----------OR----------

- A minimum of two credits from the chemical engineering list (Applied Chemistry Option).

Also, the following restriction applies:

- A maximum of four credits may be used from the Math, Science, and Applied Business (MSAB) list. Students are not required to take courses from the MSAB list.

Note that many of the courses listed below are not offered every semester and most have prerequisites. **A "*" indicates courses that do not require additional prerequisites** other than classes ChE majors must already take. It is best to plan out your technical electives ahead of time.
