In the MiCUP summer program, you will learn by doing - the best approach to succeeding in STEM disciplines. MiCUP can show you what it is like to live and study on a university campus, how to navigate the challenges, and how to make the most of opportunities.

You will also participate in recreational activities, social events, tutoring sessions, and weekly meetings.

MiCUP is a partnership of Michigan Technological University, Delta College, Grand Rapids Community College, and Wayne County Community College District.
Summer Research

MiCUP supports you in your journey through higher education after community college. If you come from a low-income background or are the first in your family to go to college, MiCUP makes transitioning into a 4-year university an achievable goal. Selected students from Delta College, Grand Rapids Community College, and Wayne County Community College District attend a unique summer research internship that includes:

- living in a residence hall on campus
- taking a 1-credit university course
- Working directly with a faculty member on a research project

Requirements

If interested, you must:

- have a minimum of 2.80 GPA at your community college
- have completed at least one year at your community college (24 credits)
- wish to continue your education at a four-year institution
- be a US citizen or permanent resident
- be a resident of Michigan

Contact the MiCUP Coordinator at your college for more information.

Benefits

As a part of the MiCUP Summer Program you will receive:

- housing and meals in a Michigan Tech residence hall
- a scholarship for a 1-credit university summer course
- a $2500 stipend for your participation in research
- an opportunity to develop a professional research poster alongside a faculty member
- greater earning potential! The Bureau of Labor estimates that people with a bachelor’s degree earn about 20 percent more per week than those with an associate’s degree.
