

Andrew J. Burton – Professor of Forest Ecology

College of Forest Resources and Environmental Science
Michigan Technological University
1400 Townsend Drive
Houghton, MI 49931

Phone: (906) 487-2566 Email: ajburton@mtu.edu

[Training and Experience](#) [Awards](#) [Teaching](#) [Advising](#) [Research Projects](#)
[Research Grants](#) [Publications](#) [Presentations](#) [Service](#)

Research Interests:

Forest responses to global change factors Belowground processes
Carbon and nutrient cycling Physiological ecology of tree roots
Undergraduate involvement in research

Education:

Ph.D. 1997 Forest Science (Forest Ecology), Michigan Technological University
M.S. 1986 Forestry (Soils and Hydrology), Michigan State University
B.S. 1983 Forestry, Michigan State University

Professional Experience:

2018 to Present Associate Dean and Coordinator of Interdisciplinary, Multi-Institutional Research, College of Forest Resources and Environmental Science, Michigan Technological University

2012 to present Professor of Forest Ecology, College of Forest Resources and Environmental Science, Michigan Technological University

2008 to present Director, Ecosystem Science Center, Michigan Technological University. The Ecosystem Science Center (ESC) is designed to advance our understanding of how ecosystems function and how human activities influence ecosystem processes. The Center's two main objectives are to: (1) foster ecosystem research and (2) educate graduate and undergraduate students in the area of ecosystem science. Current initiatives designed to meet these objectives include: graduate and undergraduate research grants, graduate and undergraduate travel awards, an annual Student Research Forum poster session, an international faculty exchange, co-sponsorship of the Distinguished Ecologist Lecture Series, and co-sponsoring equipment purchases in conjunction with the University's REF Infrastructure Enhancement grants.

2018 to present Director, Microanalytical Facility (MAF), one of Michigan Tech's shared facilities. The MAF Laboratories specialize in molecular, elemental, and isotopic analyses for environmental, biomedical, health, and materials

research. Hands-on training in trace analytic chemistry for large projects or sample analyses for smaller studies are provided to encourage collaborations with Michigan Tech and external investigators.

- 2019 to present Director, Natural Resources, Water and Energy Tech Forward Initiative, Michigan Technological University.
- 2012 to 2015 Director, Ford Center and Research Forest, Michigan Technological University. The conference center and forest properties are used extensively for forest and wildlife ecology education, outreach, research and management demonstrations conducted by the School of Forest Resources and Environmental Science.
- 2008 to 2012 Associate Professor, School of Forest Resources and Environmental Science, Michigan Technological University
- 2008 to 2012 Co-Director, Aspen FACE Project/ Northern Forest Ecosystem Experiment (NFEE). The Aspen FACE (Free-Air Carbon Dioxide Enrichment) Experiment was a multidisciplinary study to assess the effects of increasing tropospheric ozone and carbon dioxide levels on the structure and function of northern forest ecosystems. This project, led by Michigan Tech and the US Forest Service, with primary funding from DOE and the USFS, was one of the leading global change research efforts in the world and involved collaboration among scientists from 8 countries. Over 100 Aspen FACE scientific users worked together for more than a decade to produce over 120 peer-reviewed publications.
- 2007 to 2012 Director, Midwestern Regional Center of the DOE National Institute for Climatic Change Research. The Center solicited, reviewed and administered funding and reporting of selected climatic change research projects in a thirteen state region. During its history, NICCR Midwest made 39 research awards to universities, with a total value of \$8.2 million. Research supported by the Center included: 1) field manipulations of temperature and moisture designed to reduce uncertainty about potential effects of climatic change on terrestrial ecosystems; 2) measurements of contemporary exchanges of mass and energy between the atmosphere and terrestrial ecosystems to reduce uncertainty about effects of an altered terrestrial carbon cycle and/or surface energy exchange on global and/or regional climate; and 3) synthesis of existing data and modeling to better understand or forecast potential effects of climatic change on ecological systems and/or feedbacks from terrestrial ecosystems to climate.
- 2005 to 2008 Research Associate Professor and Lecturer, School of Forest Resources and Environmental Science, Michigan Technological University
- 2005 to 2007 Assistant Director, Midwestern Regional Center of the DOE National Institute for Climatic Change Research
- 2001 to 2005 Research Assistant Professor, School of Forestry and Wood Products, Michigan Technological University

1994 to 2001	Research Scientist, Forest Ecology Lab, School of Forestry and Wood Products, Michigan Technological University.
1995	Lecturer, School of Natural Resources & Environment, University of Michigan. (Winter Semester only)
1987 to 1994	Research Specialist, Forest Ecology Lab, Department of Forestry, Michigan State University.
1984 to 1986	Graduate Research Assistant, Department of Forestry, Michigan State University.

Awards and Honors:

Inducted into Michigan Tech's Academy of Teaching Excellence, April, 2011

Finalist for Michigan Tech's Distinguished Teaching Award, Professor/Associate Professor category, 2011, 2012, 2013, 2018 and 2019

Certified Senior Ecologist by the Ecological Society of America since 2003

Certified Forester (#3355) by the Society of American Foresters since 2003

Member of honorary societies Sigma Xi, Phi Kappa Phi, and Xi Sigma Pi

Best paper, 2019 Soil Science Society of America meeting (Forest, Range and Wildland Soils Division, Session 139)

Best paper, 2016 Soil Science Society of America meeting (Forest, Range and Wildland Soils Division, Session 119)

Best paper, 2014 Soil Science Society of America meeting (Forest, Range and Wildland Soils Division, Session 130)

Best paper, 2010 Soil Science Society of America meeting (Division S-7, Session 125)

Best paper, 2005 Soil Science Society of America meeting (Division S-7, Session 193)

Best paper, 2003 Soil Science Society of America meeting (Division S-7, Session 13)

Best paper, 1998 Soil Science Society of America meeting (Division S-7, Session 8)

Included in Who's Who Among America's Teachers for 2004 and 2005. Must be nominated by student on The National Dean's List. Only 2% of teachers are included in more than one edition.

Top 10% of MTU instructors on student evaluation forms (Fall 2003, Fall 2018)

National Merit Scholar (1979)

Michigan State University Board of Trustees Award-placed 2nd among 1,901 Fall 1983 graduates

Teaching:

Courses Taught at Michigan Tech:

2008-present	FW3020, "Forest Ecology", Fall Semester. Redesigned the lectures and labs of this existing course. 3 credits (2 hr lecture, three 3-hr labs)
2009-present (every other year)	FW5100, "Advanced Terrestrial Ecology", Spring Semester. Developed this course examining current topics in terrestrial ecosystem ecology, including lab and field analytical techniques. 3 credits (3 hr lecture)
2020	FW1050, "The Natural Resources Profession, Spring Semester. 2 credits (2 hr lecture)
2011-2017	FW4810, "Integrated Resource Assessment", Fall Semester. Developed lab sections and advised one to two student project teams annually in this senior capstone class. Was overall course coordinator from 2013-2015.
2016-2017	FW4800, "Communication for Natural Resource Professionals", Fall Semester. Developed and delivered a two week module on grant writing for this new course targeted specifically at developing needed communications skills for students in natural resource fields.
2012-2016	FW5040, "Ecological Processes of Forests", Fall Semester. 2 credits (2 hr lecture, 3-hr lab).
2016	FW5800/FW6800, "Graduate Seminar", Spring Semester. Coordinated seminars by graduate students, provided mentoring on presentation techniques and feedback on presentation strengths and weaknesses.
2006-2007	FW3330, "Soil Science", Fall Semester. 4 credits (3 hr lecture, three 3-hr lab sections).
2005	FW3190, "Multi-resource Assessment", Fall Semester. Significantly revised this existing course in the Integrated Field Practicum. 3 credits.
2005	FW3180, "Geomorphology, Landscapes and Ecosystems", Fall Semester, Revised the landscape and ecosystem portions of this existing course in the Integrated Field Practicum. 2 credits.
2004-2007	FW2020, "Basic Ecology Field Skills", Semester. Developed and implemented this one-week short course held prior to Fall Semester to prepare transfer students for taking Forest and Landscape Ecology and its prerequisites simultaneously. 1 credit.
2000-2004	FW2050, "Measuring Forest Resources", Fall Semester. Developed and implemented this new course for Fall Semester 2000. 3 credits (2 hr lecture and three to four 3-hr labs)

Summary of Teaching Evaluations:

Students' responses to question: "Taking everything into account, I would consider this instructor to be an excellent teacher" (Rated 1 - 5, with 5 being excellent or strongly agree)
Average score of 4.70 for all courses taught at Michigan Tech (44 courses, 1202 students)
Average score of 4.80 for all Ecology courses taught (18 courses, 661 students)

Average of 7 Dimensions scores since its inception in 2014, based on students' responses to questions on Evaluation Form (Rated 1 - 5, with 5 being excellent or strongly agree).

Average score of 4.52 for all courses taught at Michigan Tech (16 courses, 451 students)
Average score of 4.63 for all Ecology courses taught (9 courses, 339 students)

Other Course Instruction:

Lecturer NR432, "Hydrology and Watershed Management", School of Natural Resources & Environment, University of Michigan, Winter 1995.

Teaching Assistant Forest Hydrology (2 years), Dendrology, and Forest Ecology at Michigan State University

Graduate Student Advising/Mentoring

Major Advisor – Doctoral Students

Eileen Reeves	January 2020 to present.
Samuel Mensah-Opoku	August 2019 to present.
Elizabeth Barnes	January 2017 to present.
Akwasi Duah-Gyamfi	Ph.D. May 2017. Dissertation "Effects of Selective Logging on Carbon Dynamics: Variation in Aboveground Biomass and Soil Respiration in Pre- and Post-Logging Forest Stands in a Moist Tropical Forest in Ghana". Dr. Duah-Gyamfi is currently a Research Scientist with the Forestry Research Institute in Ghana (FORIG).
Mickey Jarvi	Ph.D. May 2015. Dissertation: "Ecophysiological Responses of Sugar Maple roots to Climatic Conditions". Dr. Jarvi is a Lecturer in the College of Forest Resources and Environmental Science at Michigan Tech.
Carley Kratz	Ph.D. May 2014. Erik Lilleskov co-Advisor. Dissertation: "Impacts of Climate Change on Soil Microorganisms in northern hardwood forests". Dr. Kratz is currently working as the program coordinator for the River Raisin Watershed Council and teaching at Adrian Community College.
Emmanuel Ebanyenle	Ph.D. December 2012. Andrew Storer co-Advisor. Dissertation "Effects of Elevated Atmospheric CO ₂ and O ₃ on Wood Density, Anatomical Properties and Decomposition of Northern Hardwoods". Dr. Ebanyenle is currently a Senior Research Scientist with the Forestry Research Institute in Ghana (FORIG).

Major Advisor – Master’s Students

- Jeffrey Selan MS Aug 2019. Report “Are the Effects of Ecosystem Nitrogen Saturation, Induced by Chronic Simulated N Deposition, Rapidly Reversible?”
- Bethany Lyons MS December 2012. Thesis “Nitrogen Deposition Effects on Production and Decomposition of Coarse Woody Debris”.
- Lilli Kaarakka MS December 2012. Thesis “The Long-term Effects of Whole-tree Harvest at Final Felling on Soil Properties in a Norway Spruce (*Picea abies* (L) *karst.*) Stand”.
- Mickey Jarvi MS December 2011. Thesis “The Effects of a Changing Climate on Root Respiration of Woody Plants in Sugar Maple Forests and Northern Peatlands”. Dr. Jarvi is currently an Assistant Professor at the College of the Redwoods, Eureka, California.
- Daniel Yeboah MS August 2011. Andrew Storer co-Advisor. Thesis “Carbon Sequestration Potential of African Tropical Plantation Species”. Daniel Yeboah recently completed a doctoral program at Lakehead University in Thunder Bay, Ontario, Canada.
- Adam Airoidi MS December 2010. Thesis “Forest-Limit Fluctuation in Response to Land Use and Climate Variability: A History of the Alpine Forest Regions Around Røros, Sør-Trøndelag, Norway, and the Social and Ecological Implications of Past Industrialization”. Adam Airoidi is currently the City Arborist in Medford, Oregon.
- Lisa Rouse MS December 2008. Thesis “Characterizing Ozone Tolerance in Trembling Aspen: Implications for Improving Carbon Sequestration Potential in Populus” . Lisa Rouse is currently a Biological Science Technician in the Subtropical Plant Pathology Unit of the USDA Agriculture Research Service in Fort Pierce Florida.
- Jill Katakowski MS December 2007 (coursework option). Jill (Katakowski) Dohner is currently Nursery Operations Manager at The Greening of Detroit.

Doctoral Committee Service

- Rob Tunison January 2020 to present. M. Cavaleri, advisor.
- Dominic Uhelski August 2019 to present. E. Kane, advisor.
- James Raschendorfer December 2019 to...(currently inactive), C. Kulheim, advisor.
- Angela Walczyk September 2018 to present. E. Hersch-Green, advisor.
- Michelle Cisz-Brill January 2013 to present. R. Chimner and S. Resh, advisors.
- Kelsey Carter Ph.D. Dec 2019. M. Cavaleri, advisor. Dissertation “Ecophysiological Responses of Tropical Woody Species to Ambient and Elevated Temperatures”
- Scott Hillard PhD May 2017. R. Froese, advisor. Dissertation “Evaluation of hybrid poplar management, production potential, and estimation of impacts to water resources in the upper Great Lakes Region”

- Josh Davis PhD August 2016. T. Pypker, advisor. Dissertation “Vegetation Dynamics and Nitrogen Cycling Responses to Simulated Emerald Ash Borer Infestation in *Fraxinus nigra*- Dominated Wetlands of Upper Michigan, USA”
- Alex Collins PhD August 2015. M. Cavaleri, advisor. Dissertation “Investigating the Effects of Short- and Long-Term Climatic Variation on the Water Use of Three Northern Hardwood Tree Species”
- Adam Coble PhD May 2015. M. Cavaleri, advisor. Dissertation “Investigating Within-Canopy Variation of Functional Traits and Cellular Structure of Sugar Maple (*Acer saccharum*) Leaves”
- Carrie Andrew PhD August 2009. E. Lilleskov, advisor. Dissertation “Response of Ectomycorrhizal Fungi to Elevated Atmospheric CO₂ and O₃ within Northern Deciduous Forests”.
- Linda van Diepen PhD December 2008. E. Lilleskov & K. Pregitzer, advisor. Dissertation “The role and diversity of arbuscular mycorrhizal fungi in *Acer saccharum* dominated forests under natural and N-amended conditions”.
- Alan Talhlem PhD December 2010 (Univ Idaho). K. Pregitzer, advisor. I provided detailed advising to Alan during field sampling he conducted during 2004 and 2005 and subsequent analysis of the samples for bulk density and soil C and N contents. I served on Alan’s committee for his proposal defense and comprehensive exams at Michigan Tech (2004-2007) and continued to work with him after the transfer of his Ph.D. program in 2007.

Master’s Committee Service

- Elisabeth Stimmel MS, February 2019 to present. F. Liu, advisor.
- Jeffrey Selan MF, May 2019. Tara Bal, advisor.
- Elizabeth Barnes MF, December 2019. Tara Bal, advisor.
- Angela Walczyk MS Aug 2018. E. Hersch-Green, advisor. Thesis “Evaluating the Interactive Role of Soil Nutrients and Ploidy Level on Competitive Outcomes of *Chamerion angustifolium*”
- Gwen Jacobson MS Aug 2017. C. Huckins, advisor. Thesis “The influence of native woody species *Combretum glutinosum* and *Piliostigma reticulatum* on soil fertility in Dialacoto, Senegal”
- Stella Dee MF Dec 2016
- Nathan Pinti MF Dec 2015
- Alida Mau MS May 2015. M. Cavaleri, advisor. Thesis “Instantaneous Photosynthetic Response to Temperature of Mature Forest Canopies and Experimentally Warmed Seedlings”
- Mehjabeen Rahman MS May 2015. A. Wellstead, advisor. Thesis “Examining Policy Capacity Initiatives Within Climate Change Frameworks in Three US and Canadian Sectors Using NVIVO Content Analysis”

Jesse Lehner	MF 2013
Betsy Tahtinen	MS December 2012. C. Tarasoff, advisor. Thesis “Influence of white-tailed deer on nitrogen cycling and vegetative community change in canopy gaps in a hemlock-northern hardwood forest”
Evan Anderson	MS December 2012. B. Orr, advisor. Thesis “The Impact of Balsamo (<i>Myroxylon balsamum</i> L. Harms) on Coffee Yield and Household Income in El Balsamar, El Salvador”
Nicholas Jensen	MS August 2009. C. Webster, advisor. Thesis “Ungulate Winter Habitat Selection as a Driver of Heterogeneity in Ground-Layer Plant Communities”
Adam Gahagan	MS May 2007. C. Giardina, advisor. Thesis “Carbon Cycling and Storage after 60 Years of Stand Development in Red Pine (<i>Pinus resinosa</i>) Plantations and Mixed Hardwood Stands in Northern Michigan Old Fields”
Forrest Gibeault	MF 2005
Amanda Holey	MF 2005
Josh Watten	MF 2005
Jennifer Eikenberry	MS 2004. K. Pregitzer, advisor. Thesis “Chronic Nitrate-Addition Alters Northern Hardwood Root and Leaf Litter Chemistry”
Jeff Crawford	MS 2002. K. Pregitzer, advisor. Thesis “The Effects of Nitrogen Amendments on Belowground Carbon Cycling in Second Growth Sugar Maple Forests Along a Climatic and N-Deposition Gradient in Michigan”

Other Advising/Mentoring

Post-doctoral Associates

Dr. Joseph Darbah May 2010 to May 2012. Dr. Mark Kubiske, USDA Forest Service, co-advisor. Research Topic “Response of regenerating northern forests to elevated tropospheric CO₂ and O₃”.

Recent Undergraduate Research Mentoring

Kath Schneider NSF REU Supplement. May 2018 to present. “First year effects of cessation of long-term experimental N deposition on mycorrhizal fungi and soil microbial community composition”.

Ashley Berton NSF REU Supplement. May 2017 to Dec 2018. “Effects of long-term nitrogen additions on litter of common northern hardwood forest species”.

Peter Hoch NSF REU Supplement. May 2015 to April 2017. “Reversibility of warming responses of sugar maple root and soil respiration to the cessation of experimental warming”.

Michael Stanley NSF REU Supplement. May 2014 to April 2015. “Chronic N addition effects on wood decomposing fungi”. Michael is currently working for the US Forest Service.

- Sarah Harttung Michigan Tech Summer Undergraduate Research Fellowship. May 2014 to April 2015. “Do genetic differences in drought tolerance and phenology contribute to species divergence in oaks?” (co-advisor, with O. Gailing as lead advisor)
- Ethan Bell NSF REU Supplement. May 2013 to April 2015. “Effect of chronic N and salt additions on canopy phenology and soil solution DOC”.
- Kenneth Carruthers NSF REU Supplement. May 2011 to April 2012. Research Topic “Variation among peatland woody species in specific root respiration rates and root biomass”.
- Alex Mehne Michigan Tech Summer Undergraduate Research Fellowship. May 2011 to April 2012. Research Topic “Performance of non-local tree species planted in Baraga County, MI”. Alex is currently a doctoral student at the University of Minnesota
- Jerry Jondreau NSF REU Supplement. May 2010 to present. Research Topic “Root respiration rates and growing season C allocation to fine root respiration for common forest ecosystems in the upper Lake States”
- Julie Jarvey NSF REU Supplement. May 2009 to December 2010. Research Topic “Response of root nitrogen concentration and respiration to 15 years of chronic nitrogen deposition”. Julie’s findings were included in a Global Change Biology article that she co-authored. She is currently working on a PhD at the University of Michigan.

Other Research Mentoring

- Siona Beaudoin High School Researcher. June 2018 to May 2019. “Do the Effects of Simulated Nitrogen Deposition on a Hardwood Forest in Michigan Persist After Deposition is Stopped”. Siona, a student at Lake Linden-Hubbell High School, presented her summer 2018 results at the regional Junior Science and Humanities Symposium at Treehaven in Tomahawk, Wisconsin on January 26th, 2019. Her paper and presentation placed 3rd, earning her a \$1,000 scholarship and a paid trip to the national competition in Albuquerque, NM in April 2019.
- Xuehau Xu Dr. Xu, an Associate Professor in the College of Forestry of the Agricultural University of Hebei in Baoding, China, was a visiting scholar in my lab from September 2018 through September 2019. He examined effects of long-term chronic N deposition on root system biomass and nitrogen content by analyzing archived samples from over two decades of N additions. A poster describing his findings was presented at the 2019 ESA annual meeting in Louisville, KY.

Current Research Projects:

Michigan Gradient Study - Long Term Nitrogen Deposition (1987 - present). Nitrogen (N) saturation of terrestrial ecosystems is one of the most important contemporary ecological issues. Researchers at Michigan Technological University and the University of Michigan added nitrate (NO_3^-) to northern hardwood forests in Michigan to learn how this common Lakes States forest type responded to chronic N additions. The Michigan Gradient study was established in 1987 to examine the effects of climate and atmospheric deposition on ecosystem processes in the Great Lakes region and continued through 2018 with support from NSF. Four northern hardwood study sites extend 500 km from northwestern Upper Michigan to southern Lower Michigan. From 1994 to 2017, these study sites received experimental N additions ($3 \text{ g NO}_3^- \text{-N m}^{-2} \text{ y}^{-1}$), intended to simulate high levels of chronic atmospheric N deposition. The purpose of this field experiment was to understand the mechanisms controlling carbon (C) and N cycling in the face of chronic N deposition and the long-term consequences of N saturation. In 2018, N additions were ended, but the study continued in order to determine if much lower, but still somewhat elevated, ambient N deposition was sufficient to maintain a state of N saturation at the study sites and its impacts on ecosystem processes.

The FACE Wood Decomposition Experiment – FWDE (2011 - present). This continental-scale project is utilizing wood of trembling aspen, paper birch, and loblolly pine produced under both ambient and elevated CO_2 in long-term FACE (Free Air CO_2 Enrichment). In 2011, small logs of these species were deployed in nine Experimental Forests, representing different bioclimatic zones, across the US. Wood grown under elevated CO_2 treatments in the FACE experiments contains a distinct ^{13}C isotopic signature, which enables tracking of C as it moves into different soil fractions or is returned to the atmosphere during the decay process. This approach will provide information only possible from utilizing this unique FACE biomass. The data is providing new insights on the processes involved in wood decomposition and the formation of stable soil C.

Measurement and Simulation of Carbon Stocks in African Mangroves (2016 to present). Coastal Blue Carbon ecosystems such as mangroves, salt marshes and seagrass beds have the highest total carbon densities of all ecosystems. Their high carbon sequestration coupled with their high risk of destruction make mangroves a prime candidate for carbon mitigation initiatives such as the United Nations Collaborative Program on Reducing Emissions from Deforestation and Degradation in Developing Countries (UN-REDD and REDD+). However, due to the remote nature of mangroves, it is very difficult to monitor and measure changes in their carbon stocks. This collaborative project will develop and test a process-based biogeochemical model to simulate carbon dynamics in mangrove forests. The Wetland DNDC model will serve as the basis for a new model – Mangrove Carbon Assessment Tool. Field inventories of mangroves in Mozambique, Tanzania, and Gabon will be used to test the model and provide ground-based data on carbon stocks. The inventory data will also be analyzed to develop allometric relationships of forest biomass with stand height, to support linkages with remote sensing data.

Past Research Projects:

Sustainable Forest-Based Biofuel Pathways (2012 to 2017). The Wood to Wheels (W2W) Sustainable Energy Pathways (SEP) project conducts multidisciplinary, comprehensive, and integrated research in the area of forest-based infrastructure-compatible liquid biofuel for vehicular transportation. New knowledge generated will span the entire value chain, from forest biomass production to thermochemical processing, fuel combustion, and systems-level sustainability analyses. Project deliverables will help establish a new forest-based biofuels industry featuring high productivity forest energy crops, sustainable forest management practices, catalysts and process technologies, innovations in engine systems, sustainable decision-making databases, and analysis methods/software tools. Researchers from multiple disciplines are working at the cusp of emerging discoveries to develop new knowledge about complex coupled natural/industrial/societal systems. The project's research will focus on the production of "infrastructure compatible green diesel" derived from a novel two-stage torrefaction / fast-pyrolysis treatment and catalytic conversion of primary woody feedstocks. The resulting fuel product will be a direct hydrocarbon replacement for fossil diesel.

Carbon Sequestration in Tropical Forests (2009 to 2017). Studies on the effects of logging on ecosystem C storage and soil C efflux in moist semi-deciduous tropical forests in Ghana was initiated in 2012, with doctoral student Akwasi Duah-Gyamfi leading these efforts. The research examines the factors controlling ecosystem biomass and the components of soil respiration both before and after selective logging. In addition to managed natural forests, tropical forest plantations have the potential to play an important role in carbon sequestration and the mitigation of climate change. From 2009 to 2014, I was a carbon consultant on the project "Capacity Building for CDM Forestry in the Framework of SFM Emphasizing Community Forests and Poverty Alleviation in Ghana", sponsored by the International Tropical Timber Organization (ITTO), with additional in-kind support provided by the Forestry Research Institute of Ghana (FORIG) and Samartex. The project helped develop the capacity for Clean Development Mechanism-Forestry in Ghana via a community rehabilitation of Ghana's degraded forests targeted at poverty alleviation in conjunction with sustainable forest management (SFM). Both the private sector and native communities were involved. Methods were developed for assessing the carbon content of trees growing in plantations, up to twelve years in age, established in wet evergreen forest as part of the Oda-Kotomso Community Agroforestry Project (OCAP). This effort was completed by MS student Daniel Yeboah. The OCAP model will be used in establishing new plantations in degraded dry semi-deciduous forests in Ghana's Pamu Berekum Forest Reserve.

Soil Warming in Northern Forests (2008 to 2017). We assessed the degree to which temperature acclimation occurs in root systems of a variety of woody plants and determined if such acclimation was a short-term, direct physiological adjustment to warmer temperatures (days to months) or a longer term response as the ecosystem adjusts to long-term warming (years). Partial acclimation of root respiration did occur with experimental soil warming of 4 to 5 °C from 2010 to 2014 in northern hardwood forests, apparently as the result of adenylate control. However this partial acclimation did not fully offset the influence of warmer temperatures, thus root and soil respiration remained elevated. Soil moisture had a strong influence on respiration rates, which at times were lower in the heated plots due to very dry conditions. Experimental water additions were able to offset this effect. Overall, forests had mechanisms to avoid excessive allocation of C to root systems in warmer soil, by either reducing root/mycorrhizal

biomass or by partial acclimation of tissue respiration rates. Still, C returned to the atmosphere as soil CO₂ efflux remained slightly elevated, even after ecosystems had adjusted. From 2015 to 2017, we examined the recovery of root and soil respiration following cessation of the treatments and found that temperature acclimation of roots was a plastic, rapidly reversible response to warming. Soil respiration was lower in previously warmed soil, indicating that labile organic matter had been depleted during the four plus years of warming.

Facilities Improvements for Ecological Research at Michigan Tech's Ford Center and Research Forest (2012 to 2015). This project created a wet laboratory facility, established short and long range Wi-Fi capability, and improved lodging facilities for cold-season use at the Ford Center and Forest (FCF), located 42 miles south of the main Michigan Technological University campus. The entire range of forest community-soil associations common in the upper Great Lakes is available for research and instruction on the FCF property.

Aspen FACE/Northern Forest Ecosystem Experiment (2008 to 2013). From 1998 to 2009, this project examined the interacting effects of elevated CO₂ and O₃ on ecosystem processes in an aggrading northern forest ecosystem. My direct involvement did not begin until 2008, with the passing of the project's director, Dr. David Karnosky. This study utilized a free-air carbon dioxide enrichment (FACE) facility in Rhinelander, Wisconsin to compare the responses of rapid-growing shade intolerant species (trembling aspen [*Populus tremuloides* Michx.] and paper birch [*Betula papyrifera* Marsh.]) to that of a slower growing shade tolerant species (sugar maple [*Acer saccharum* Marsh.]). After the original aggrading forest was harvested, treatment effects on the regrowing, coppice forest were followed for one year as the Northern Forest Ecosystem Experiment, after which the experiment infrastructure was dismantled.

Midwestern Regional Center of the National Institute for Climatic Change Research (2005 to 2012). The National Institute for Climate Change Research (NICCR) was sponsored by the U.S. Department of Energy's (DOE's) Office of Biological and Environmental Research (BER). The Midwestern Region supports work in the following states: North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Minnesota, Iowa, Missouri, Wisconsin, Illinois, Michigan, Indiana, and Ohio. The Midwestern Regional Center funded proposals that used a variety of approaches to answer questions relevant to the DOE's climate change research program. These included experiments that manipulated temperature, moisture and other global change factors; studies that sought to understand how the distribution of species and ecosystems might change under future climates; studies that used measurements and modeling to examine current ecosystem fluxes of energy and mass and those that would exist under future conditions; and studies that synthesized existing data sets to improve our understanding of the effects of climatic change on terrestrial ecosystems. The broad variety of projects the Midwestern Regional Center supports gave us a unique opportunity to greatly improve our ability to predict the future health, composition and function of important agricultural and natural terrestrial ecosystems within the Midwestern Region. The NICCR Midwestern Regional Center funded 39 climatic change research projects with a total value of more than \$8.2 million. These projects resulted in over 100 peer-reviewed publications.

Treeline Change in Norway (2009 to 2010). This project, initiated by MS Student Adam Airoidi, examines the recent rebound in treeline elevation in Norway in response to changes in land use and climate. It also assesses the potential C sequestration as alpine forests redevelop in their former range in the absence of grazing and mining pressure.

REU Site for Ecosystems in Transition (PI). 2004 - 2006. Each summer, ten Research Experiences for Undergraduates (REU) students spend the summer at Michigan Technological University examining ecosystems in transition. The students work with faculty mentors on existing large-scale, long-term, interdisciplinary experiments examining the responses of forest ecosystems to climatic variations, anthropogenic pollutants, changing wildlife populations, exotic species invasions and ecosystem restoration efforts.

Cross-Site Study: A cross-biome examination of belowground C allocation (Co-PI). 1997 - 2001. How does belowground allocation of carbon respond to environmental variables, such as temperature and moisture, and to altered availability of resources, such as nitrogen? To address these questions, researchers in the Forest Ecology group at Michigan Tech quantified root and soil respiration, root system architecture, root production and mortality, and mycorrhizal community composition in ten common North American forest ecosystems.

Carbon and Nutrient Cycling in Olympic National Park (Co-PI). 1998-2002. Eleven diverse study sites were used to learn how soil CO₂ efflux (soil respiration) and the production of dissolved organic carbon (DOC) and dissolved organic nitrogen (DON) were affected by seasonal changes in temperature and moisture availability at a given location and by climatic differences that existed along mountain elevation gradients.

Research Grants: (\$16,840,067 as PI, \$7,361,633 as co-PI)

Active Grants:

- 1/2020 – 12/2020 Michigan Tech Research Excellence Funds “State-of-the-Science Plant Gas Exchange Measurements for Ecological Research”, \$59,350 (includes \$34,350 in cost share). M.A. Cavalieri (PI), **A.J. Burton**, C. Kulheim, and E. Hersch-Green
- 7/2019 – 6/2024 Michigan Tech “Tech Forward – Natural Resources, Water and Energy Initiative”, \$70,000. **A.J. Burton (PI)**
- 7/2019 – 6/2020 Michigan Tech Shared Facility Grant to the Microanalytical Facility, \$79,419. **A.J. Burton (PI)**, M. Gretz, and L. Mazzoleni.
- 5/2019 – 12/2021 National Science Foundation “REU Supplement to Collaborative Proposal: Impact of microbial and termite communities on transfer of decaying wood C to stable and protected mineral soil C pools”, \$6,250, **A.J. Burton (PI)**
- 2/2019 – 11/2020 USDA Forest Service “Application of MCAT in Estimating Total Ecosystem Carbon in Blue Carbon Ecosystems”, \$199,410 (includes \$53,226 in cost share), **A.J. Burton (PI)** and Z. Dai.
- 1/2019 – 12/2021 National Science Foundation “Collaborative Proposal: Impact of microbial and termite communities on transfer of decaying wood C to stable and protected mineral soil C pools”, \$889,455 (\$677,541 for Michigan Tech), **A.J. Burton (PI)**, M.F. Jurgensen, A.J. Storer, C. Trettin, B. Forschler, D. Lindner, D. Page-Dumroese, and J. Schilling
- 9/2017 – 8/2021 White Pine Copper Refinery “Analysis of Electroplating Solutions and Filtered Cake by ICP-OES”, \$10,434. **A.J. Burton (PI)**, and J.R. Eikenberry.
- 10/2015 – 9/2020 USDA McIntire-Stennis “Effects of Climate Change on Northern Hardwood Productivity: Influences of Landscape Position and Population Genetics”, \$58,420 (includes \$20,420 in waived overhead). **A.J. Burton (PI)**

Previously Funded Grants:

- 8/2016 – 6/2019 USDA Forest Service (subaward on DOE grant) “Wood Decomposition: Understanding Processes Regulating Carbon Transfer to Soil Carbon Pools Using FACE Wood at Multiple Scales”, \$219,896. **A.J. Burton (PI)**, and M.F. Jurgensen.
- 7/2017 – 8/2018 Michigan Tech Research Excellence Funds “Understanding feedbacks between ecosystems and the genetics of a dominant plant (*Solidago gigantea*, Asteraceae)”, \$15,000. E. Hersch-Green (PI), **A.J. Burton (co-PI)**

- 7/2016 – 8/2017 Michigan Tech Research Excellence Funds “Precise and Efficient Position Data Acquisition for Forests, Streams, and Wetlands”, \$13,835, **A.J. Burton (PI)**, R.A. Chimner, R.E. Froese, C.J. Huckins, J.W. Wagenbrenner, and C.R. Webster.
- 6/2016 – 12/2017 USDA Forest Service “Measurement and Simulation of Carbon Stocks in African Mangroves”, \$150,613 (includes \$30,119 in cost share). **A.J. Burton (PI)**
- 7/2015 – 8/2016 Michigan Tech Research Excellence Funds “Remote Data Acquisition from Forests, Streams and Wildlife for Research and Instruction”, \$52,333, **A.J. Burton (PI)**, Y.L. Dickinson, R.E. Froese, A.M. Marcarelli, and J.W. Wagenbrenner.
- 12/2014 – 9/2015 MITREE Wood Energy Grant Program “Wood Energy for Michigan Tech’s Ford Center”, \$155,388 (including \$82,388 in cost share), **A.J. Burton (PI)**
- 9/2013 – 12/2017 USDA Forest Service “Assessment of the Microbiome during Early Stages of Wood Decomposition”, \$89,125 (includes \$31,625 in cost-share), **A.J. Burton (PI)**, C.C. Trettin, D. Linder, W. Mohn, D. Page-Domroese, and M.F. Jurgensen
- 9/2013 – 8/2018 National Science Foundation “Collaborative LTREB Renewal: Long-Term Ecosystem Response to Chronic Atmospheric Nitrate Deposition”, \$156,056, **A.J. Burton (PI)**
- 9/2013 – 8/2018 National Science Foundation “REU Supplements to: Collaborative LTREB Renewal: Long-Term Ecosystem Response to Chronic Atmospheric Nitrate Deposition”, \$25,000 **A.J. Burton (PI)**
- 10/2012 – 9/2015 USDA McIntire-Stennis “Effects of Climatic Variability and Change on Forest Ecosystem Productivity”, \$32,550 (includes \$11,550 in waived overhead). **A.J. Burton (PI)**
- 9/2012 – 8/2017 National Science Foundation “SEP: Sustainable Forest-Based Biofuel Pathways to Hydrocarbon Transportation Fuels: Biomass Production, Torrefaction, Pyrolysis, Catalytic Upgrading, and Combustion”, \$1,800,000. D.R. Shonnard (PI), E. Bar Ziv, **A.J. Burton (co-PI, Thrust 1 leader)**, A.L. Mayer, and J.D. Naber
- 8/2012 – 9/2015 USDA Forest Service “Stable Isotope Analysis of Pine Samples”, \$14,976 (includes \$4,416 in cost share), **A.J. Burton (PI)** and J.R. Eikenberry
- 8/2012 – 7/2015 National Science Foundation “Facilities Improvements for Ecological Research at Michigan Tech’s Ford Center and Research Forest”, \$343,639. **A.J. Burton (PI)**, R. Froese, O. Gailing, L. Artman, and K. Price,
- 7/2011 – 4/2013 Michigan Tech Research Excellence Funds - Infrastructure Enhancement “Improving Michigan Tech’s Ability to Quantify Stable Isotopes of Water” \$18,000 **A.J. Burton (PI)**, R.A. Chimner, M.A. Cavaleri, T.G. Pypker

- 8/2010 – 5/2011 Michigan Tech Research Excellence Funds - Infrastructure Enhancement “Enhancing Michigan Tech’s ability to assess ecosystem sustainability and trace metal movement in upland, wetland and aquatic ecosystems” \$34,000 **A.J. Burton (PI)**, R. Froese, J. Bump, R. Chimner
- 5/2010 – 4/2015 USDA Forest Service “The Northern Forest Ecosystem Experiment”, \$546,412 (includes \$141,111 in cost share). **A.J. Burton (PI)**
- 8/2009 – 8/2014 USDA Forest Service “Climate change science delivery, adaptation, and ecological assessment”, \$1,079,725 (includes \$224,516 in cost share), P. Butler (PI), R.E. Froese, **A.J. Burton (co-PI)**, T.G. Pypker, and A.J. Storer
- 10/2008 – 5/2012 USDA McIntire-Stennis “Ecosystem constraint of belowground autotrophic respiration: Maintaining positive NPP in a changing world”, \$43,680 (includes 15,680 in waived overhead). **A.J. Burton (PI)**
- 9/2008 – 8/2013 National Science Foundation “Collaborative LTREB Proposal: Long-Term Ecosystem Response to Chronic Atmospheric Nitrate Deposition”, \$151,628, **A.J. Burton (PI)**
- 4/2009 – 9/2013 USDA Forest Service “Carbon, water and soils research support”, \$269,812 (includes \$34,263 in waived overhead), T.G. Pypker (PI), R.A. Chimner and **A.J. Burton (co-PI)**
- 5/2009 – 8/2013 National Science Foundation “REU Supplements to: Collaborative LTREB Proposal: Long-Term Ecosystem Response to Chronic Atmospheric Nitrate Deposition”, \$27,750 **A.J. Burton (PI)**
- 4/2008 – 11/2013 US Department of Energy-National Institute for Climatic Change Research “Short and long-term temperature acclimation of roots systems in woody plants and the moderation of warming-induced enhancement of soil CO₂ efflux”, \$540,387, **A.J. Burton (PI)** and E.A. Lilleskov.
- 4/2008 – 3/2013 US Department of Energy “Impacts of interacting elevated atmospheric CO₂ and O₃ on the structure and functioning of a northern forest ecosystem: Operating and decommissioning the Aspen FACE Project. \$3,893,313, D.F. Karnosky (PI, deceased), K.S. Pregitzer, and D.R. Zak. **A.J. Burton (PI beginning 11/2008)**
- 6/2007 – 8/2009 US Department of Energy (via subcontract from University of Nevada-Reno) “Ecosystem response to elevated tropospheric CO₂ and O₃ is regulated by plant-microbe interactions in soil”, \$201,178. **A.J. Burton (MTU PI)**, K.S. Pregitzer and D.R. Zak
- 6/2007 – 8/2009 National Science Foundation (via subcontract from University of Nevada-Reno) “From genes to ecosystems: mechanisms controlling long-term ecosystem response to nitrogen deposition”, \$168,327, **A.J. Burton (MTU PI)**, E.A. Lilleskov, K.S. Pregitzer and D.R. Zak

- 12/2005 – 11/2013 US Department of Energy “Midwestern Regional Center for the National Institute of Climatic Change Research” (Center administration), \$817,222 (includes \$240,976 in waived overhead), **A.J. Burton (PI 2007-2012)**, K.S. Pregitzer (PI through June 2007)
- 12/2005 – 11/2013 US Department of Energy “Supplements to Midwestern Regional Center for the National Institute of Climatic Change Research” (to fund subcontracts at Universities throughout the Midwest to conduct research projects selected by the NICCR Midwestern Center), \$7,766,784, **A.J. Burton (PI 2007-2012)**, K.S. Pregitzer (PI through June 2007)
- 3/2004 – 3/2006 National Science Foundation “REU site for ecosystems in transition: the role of research in assessing ecosystem responses to a changing environment”, \$155,463, **A.J. Burton (PI)** and K.S. Pregitzer
- 9/2003 – 2/2009 National Science Foundation “Nitrogen saturation: mechanisms and consequences of altered ecosystem metabolism” \$923,739 (includes \$113,739 in waived overhead), **A.J. Burton (PI from June 2007 to 2009, co-PI prior)**, K.S. Pregitzer (PI prior to June 2007), D.R. Zak
- 6/2000 – 12/2003 National Science Foundation “Plant-microbe interactions and the production of dissolved organic carbon and nitrogen”, \$883,480, K.S. Pregitzer (PI), **A.J. Burton (co-PI)**, and D.R. Zak
- 9/2000 – 9/2003 National Science Foundation “The movement of elements through ecosystems: major research instrumentation for the integration of research and education”, \$894,130, K.S. Pregitzer, **A.J. Burton (co-PI)**, DJ Flaspohler, S.A. Green, and W.C. Kerfoot
- 6/1998 – 6/2002 US Environmental Protection Agency “Collaborative research on belowground ecosystem function: merging long-term climate monitoring with soil, root and foodweb dynamics to understand mechanisms regulating C and N transformations”, \$387,595, K.S. Pregitzer (PI), **A.J. Burton (co-PI)**, P. Rygielwicz, R. Stottlemeyer, S. Green, J. Chen, and E. Hobbie.
- 3/1997 – 2/2001 National Science Foundation “Factors regulating belowground carbon allocation in terrestrial ecosystems: a cross-site experiment”, \$261,302, K.S. Pregitzer (PI), **A.J. Burton (co-PI)**, M.F. Allen, R.L. Hendrick, and R.W. Ruess
- 9/1996 – 8/2000 National Science Foundation “Cycling of NO₃-N in northern hardwood forests: regulation and consequences of N saturation”, \$690,000, K.S. Pregitzer (PI), **A.J. Burton (co-PI)**, and D.R. Zak
- 1996 – 2003 National Science Foundation REU supplements to existing grants for undergraduate summer research projects. Funding for nine students was received. \$47,000 (wrote the supplement requests for projects on which I was a co-PI)

Publications

For all publications my graduate advisees are indicated by *, graduate students whose committees I served on are indicated by **, post-doctoral associates are indicated by §, and undergraduate students are indicated by †.

1. **Burton, A.**, D. Urie, and J.B. Hart, Jr. 1985. Nitrogen cycling and potential nitrate groundwater pollution. Oral presentation and published summary at Conference on Forest Land Application of Wastewater Sludge, Grayling, Michigan, Sep. 11-12.

Professional Service

University Committee and Administrative Service:

Director, Ecosystem Science Center, December 2008 to present

Director, Microanalytical Facility, September 2018 to present.

Leader of the Natural Resources, Water, and Energy Initiative of Michigan Tech's Tech Forward program, December 2018 to present.

Supervisor of the Laboratory for Ecological Analyses in Forests (LEAF, managed by Jennifer Eikenberry), which provides analytical services within and outside the University on a fee per sample basis. Analytical capabilities include elemental analysis of solids (C, N, S, O), stable isotopes of C and N in solid, liquid and gas samples, gas chromatography (CO₂, CH₄, PLFAs), rapid flow analysis of NO₃⁻, NH₄⁺, and PO₄³⁻ in liquids. In 2014, this lab became part of the University core facility MAF (Microanalytical Facility). June 2007 to present.

Faculty Rep on the Michigan Tech Alumni Board of Directors, August 2016 to present

Advisory Committee for the Distinguished Professor Award and the University Professor Award at Michigan Tech, 2017 to 2019

Research Advisory Council, 2017 to 2019

Internal member of external review team for Biological Sciences department, October to December, 2018.

Member of the University Safety Advisory Council (formerly Presidential Committee on University Safety and Environmental Health), 1998 to 2018.

SFRES Academic Advisor Search Committee, spring 2016

Strategic Plan Ad Hoc Committee, SFRES, August 2016 to March 2017

Tenure, Promotion and Review (TPR) Committee, August 2015 to May 2018, Chair in 2017/18 academic year

Ford Center and School Research Forest Committee, August 2015 to May 2018.

Curriculum Committee, School of Forest Resources and Environmental Science, August 2012 to May 2016 (Chair in 2015/2016 academic year)

Facilities Engineer Search Committee, December 2014 to May 2015.

Forest Management Faculty Search Committee, October 2014 to April 2015.

Shared Research Equipment and Core Facilities Working Group, Office of the Vice President for Research, December 2012 to June 2013

Interschool Tenure, Promotion and Reappointment Committee, January 2013 to April 2014.

University Assessment Council Member, December 2010 to May 2012

Cognate Review of six Strategic Faculty Hiring Initiative candidates, November 2011

Graduate Dean Review Committee, Spring 2011

Graduate Studies Committee, School of Forest Resources and Environmental Science,
August 2008 to May 2011 (Chair in 2010/2011 academic year)

Member of Host Committee for two candidates for the Strategic Hiring Initiative in
Sustainability (Spring 2008)

Chemical Hygiene Officer, School of Forest Resources and Environmental Science, 1998
to 2004

National Committee and Administrative Service:

Ecological Society of America Board of Professional Certification (January 2011 to
December, 2013, Chair in 2012)

Aspen FACE co-Director and member of Aspen FACE Steering Committee (November
2008 to December 2012)

Director of the Midwestern Regional Center of the DOE National Institute for Climatic
Change Research (June 2007 to December 2012)

Assistant Director of the Midwestern Regional Center of the DOE National Institute for
Climatic Change Research (December 2005 to June 2007)

Moderated session at the North American Forest Biology Workshop (July 13, 2004)

Moderated session at the Carbon in Northern Forests meeting in Traverse City (June 11,
2009)

Co-organizer for Carbon in Northern Forests meeting and field in Traverse City,
Michigan, June 10-12, 2009

Member of professional societies:

Society of American Foresters

Ecological Society of America

Soil Science Society of America

Council on Undergraduate Research

Proposal reviews proposals for: (I have performed 129 proposal reviews for funding agencies. Note that 81 of these reviews were performed for the NICCR Midwestern Regional Center panel)

- 2002: USDA NRI Soils and Soil Biology
NSF DEB
- 2003: USDA NRI Soils and Soil Biology (2)
USDA NRI Plant Responses to the Environment
NSF DEB
NSF BE: Coupled Biogeochemical Cycles
- 2004: NSF DBI Undergraduate mentoring in biology
US Civilian Research and Development Foundation
- 2005: NSF DBI-REU
NSF DEB (2)
NSF OISE (Global Scientists and Engineers)
- 2006 NSF DEB
NICCR Midwestern Regional Center (RFP01: 24 proposals, 260 preproposals)
- 2007 NSF DEB
NICCR Midwestern Regional Center (RFP02: 17 proposals, 141 preproposals)
NICCR Midwestern Regional Center (RFP03: 15 proposals, 211 preproposals)
- 2008 NSF DEB
NSF DEB-RUI
NICCR Midwestern Regional Center (RFP04: 14 proposals, 217 preproposals)
- 2009 NSF DEB
NICCR Midwestern Regional Center (RFP05: 11 proposals, 151 preproposals)
NSF IOS
- 2010 FWF (Austrian Science Fund)
NSF IOS
- 2011 NASA ICVC11 (2)
- 2012 NSF IOS (2)
- 2013 DOE BER (9 – also panel member)
- 2014 DOE BER SBIR (3)
- 2019 DOE BER (10)

Manuscript reviews for: (I have performed 138 manuscript reviews for 39 refereed journals and four pre-submission reviews for U.S. Forest Service personnel. In the list below, numbers in parentheses indicate multiple reviews for that year.)

Arctic, Antarctic and Alpine Research 2017
American Midland Naturalist 2002
Annals of Forest Science 2009
Biogeochemistry 2014, 2017

2015, 2017, 2019, 2019
USFS Internal Review 2003, 2011, 2018, 2018

Associate Editor, *Ecological Processes*, 2016 - present (6 manuscripts handled)
Editorial Review Board of *Tree Physiology*, 2000 - 2002
Guest Editor for Special Issue of *Forest Science*, 2011

Public Service

Co-developer and primary instructor for the Global Change Teachers Institute held each summer at Michigan Tech. From 2004 through 2016, one hundred and forty-five middle and high school teachers have learned the latest in global change news and research techniques during the one-week summer institute. Topics include climate change consequences, mitigation and adaptation and impacts on terrestrial systems of elevated atmospheric CO₂ and O₃, acid rain/chronic N deposition, and invasive species. Participants receive three graduate credits towards recertification or a Master's degree and visit active global change research locations as part of the Institute, extending knowledge of the research into many classrooms in the Lake States as well as locations in California, New York, Maryland, Missouri, Ohio, Illinois, Connecticut, and Mexico. One participant, Jenn Carlson, highlighted her experience in the Institute in a paper entitled "Thinking Like an Ecologist", published in 2008 in the National Science Teachers Association journal *The Science Teacher*.

Judge at the Western UP Science Fair for grade 7 and 8 science projects (March 2003, 2004 and 2005).

Taught forest measurements to visiting Korean High School teachers, August 5 and 8, 2003.

Taught middle and secondary school teachers plant ID and forest measurements as part of a Forestry Institute for secondary school teachers (July 2004 and 2005).

Arranged for participants at the REU Site that I directed to spend 8 person-days assisting the Summer Youth Program (SYP) at Michigan Tech during the summer of 2004. The REU students assisted SYP instructors in teaching ecology and environmental science to SYP students and also presented results of their research to the students.
