

CURRICULUM VITAE

[Lucas Emil Nave, Ph.D.](#)

Research Associate Professor
Michigan Technological University
Northern Institute of Applied Climate Science
(419) 310-1203 lnave@mtu.edu

EDUCATION

<u>Institution</u>	<u>Major / Topic</u>	<u>Degree / Date</u>
Michigan Technological University	Postdoctoral research in soil organic matter dynamics (advisor: C. Swanston)	2010-2012
University of Michigan Biological Station	Postdoctoral research in forest ecology and biogeochemistry (advisor: K. Nadelhoffer)	2008-2012
Ohio State University	Postdoctoral research in forest ecology and management (advisor: P. Curtis)	2007-2009
Ohio State University	Evolution, Ecology, and Organismal Biology (advisor: P. Curtis)	Ph.D., 2007
Wittenberg University	Biology (dept. honors; <i>cum laude</i> advisor: R. deLanglade)	B.A., 2002

SCIENTIFIC INTERESTS

Forest ecology and management, forest soils, biogeochemistry, field botany and mycology, global change biology, isotopic techniques, data synthesis and meta-analysis

PROFESSIONAL APPOINTMENTS AND EXPERIENCE

2022 – present	-- -- --	Research Associate Professor, Michigan Technological University, College of Forest Resources and Environmental Science
2018 – 2022	-- -- --	Associate Research Scientist, University of Michigan, Biol. Station (UMBS) and Dept. of Ecol. and Evol. Biology
2012 – 2018	-- -- --	Assistant Research Scientist, University of Michigan, Biol. Station and Dept. of Ecol. and Evol. Biology
2010 – present	-- -- --	Scientist, Northern Institute of Applied Climate Science
2010 – 2017	-- -- --	Coordinator, International Soil Carbon Network
2008 – 2009	-- -- --	Adjunct Instructor, North Central Michigan College
2008 – 2012	-- -- --	Research Fellow, University of Michigan Biol. Station
2007 – 2009	-- -- --	Postdoctoral Researcher, Ohio State University
2002 – 2007	-- -- --	NSF-IGERT Ph.D. Fellow, Research Assistant, Teaching Assistant, Ohio State University and University of Michigan Biological Station
2001	-- -- --	Seasonal Technician, USDA-Forest Service, Huron-Manistee National Forest, Mio, MI
1999 – 2002	-- -- --	Student Manager, Wittenberg University greenhouse and herbarium facilities, Springfield, OH
1996 – 1998	-- -- --	Farmhand, Rothlisberger Dairy, Upper Sandusky, OH

PEER-REVIEWED PUBLICATIONS

WORKSHOPS AND CONFERENCE SESSIONS

17. Organizer of a poster session, and co-chair of an oral symposium at the ASA-CSSA-SSSA International Annual Meeting, 7-10 November 2021. Soil in the Era of Big Data: Meta-analyses, Syntheses, and Databases. Over 100 participants.
16. Organizer and chair of a breakout session at the 2017 Joint AmeriFlux and North American Carbon Program Principal Investigators Meeting. Title: Soil carbon science and data support carbon cycle management and policy. Bethesda, MD, 28 March 2017. Twenty-five participants.
15. Organizer and co-chair of oral (B31L, B32E) and poster (B21I) sessions at the 2016 American Geophysical Union Fall Meeting (12-16 December 2016). Soil carbon dynamics: Soil carbon change across scales. Over 200 attended to view 36 presentations.
14. Organizer and co-chair of oral (B31F) and poster (B43I) sessions at the 2015 American Geophysical Union Fall Meeting (16 and 17 December). Soil carbon stocks, fluxes, and vulnerability at large spatial scales. Over 100 participants attended.
13. *Invited participant in an NSF-supported undergraduate curriculum development workshop. Project EDDIE: Environmental Data-Driven Inquiry and Exploration. 26-28 June 2015.
12. Organizer and co-chair of a breakout session at the 2015 North American Carbon Program Principal Investigators Meeting, 28 January 2015. Large stocks, larger uncertainties: The role of soils in the North American Carbon Cycle. Panel discussion featuring presentations by scientists from Natural Resources Canada (NRCAN), the U.S. Department of Energy (DOE), and Colegio de Postgraduados (COLPOS). Sixty participants convened to discuss ongoing projects and collaboration opportunities.
11. Organizer and co-chair of a Town Hall meeting at the American Geophysical Union Fall Meeting (18 December 2014). International Soil Carbon Network: Data and collaboration in support of carbon cycle science. Forty participants convened to share information about and discuss active projects, data synthesis, and continued collaboration.
10. Organizer and co-chair of oral and poster sessions at the American Geophysical Union Fall Meeting, 15-17 December 2014. Soil organic matter dynamics: novel techniques, big data, and functional models. Over 500 participants attended to view 63 presentations.
9. Organizer and co-chair of an oral symposium at the ASA-CSSA-SSSA International Annual Meeting, 3 November 2014. Evolution of forest soil science: perspectives and prospects. Over 100 participants attended the symposium.

8. *Invited participant in an NSF Critical Zone Exploration Network workshop. EarthCube Domain Workshop on Big Data. 21-23 January 2013.
7. *Invited participant in an NSF science synthesis workshop. Novus Research Coordination Network: Paleo Reconstructions of Biogeochemical Environments. 19-21 April 2012.
6. Organizer of a Town Hall Meeting and oral presentations describing applications of the International Soil Carbon Network Database. American Geophysical Union Fall Meeting, 5 December 2012. (30 participants).
5. Organizer of oral and poster sessions on forest soil carbon at BIOGEOMON 2012: 7th International Symposium on Ecosystem Behavior. Northport, ME. 17 July 2012. (100 participants).
4. Organizer and co-chair of oral (B24A) and poster (B31A) sessions at the American Geophysical Union Fall Meeting focusing on the use of ¹⁴C methodologies in terrestrial C cycle research, 6-7 December 2011. (250 participants.)
3. Co-organizer of an international workshop to initiate data sharing and synthesis work among a group of 23 scientists utilizing radiocarbon techniques. Berkeley, CA, DOE Lawrence Berkeley National Lab, 20-21 July 2011.
2. Organizer of a Town Hall meeting and oral presentations to promote soil carbon data synthesis at the American Geophysical Union Fall Meeting. 16 December 2010. (20 participants).
1. Organizer of a workshop to develop K-12 outreach materials from NSF-funded research at UMBS (8 participants), 6-8 July 2010.

FUNDING (\$5,285,484 cumulative total)

19. Institutional PI of a multi-institutional collaborative award from U.S. Department of Energy (DE-AC02-05CH11231; \$837,302 institutional, \$1,234,236 total). Title: UM Biological Station AmeriFlux Core Site Project (2021-2022; subsequent change to co-PI).
18. PI of USDA-Forest Service, Northern Research Station award (19-CR-11242306-096; \$183,163). Title: Forest Soil Carbon Stewardship (2020-2023).
17. PI of Battelle Memorial Institute award (US001-0000757206; \$60,000). Title: Archival of National Ecological Observatory Network (NEON) Soils (2019-2020).
16. PI of NSF-BIO award (DEB-1856319; \$594,691). Title: LTREB Renewal: Drivers of forest carbon storage from canopy closure through successional time (2019-2024).
15. PI of USDA-Forest Service, Northern Research Station award (19-CR-11242306-007; \$21,978). Title: Forest Soil Carbon Partnership (2019).
14. PI of USDA-Forest Service, Northern Research Station award (17-CR-11242306-028; \$97,000). Title: Applied research to support forest carbon management. (2017-2022).
13. PI of NSF-BIO award (DBI-1624205; \$154,900). Title: FSML: Enhancing long-term research through improved sample archiving at the University of Michigan Biological Station. (2016-2018).
12. PI of USDA-Forest Service, Northern Research Station award (16-CR-11242306-071; \$82,638). Title: International Soil Carbon Network. (2016-2021).
11. PI on a grant from the Water Center at the University of Michigan, Graham Sustainability Institute (2015; \$8,805). Title: Advancing watershed research at the University of Michigan Biological Station.

10. Co-PI of USDA-NIFA, McIntire-Stennis Cooperative Forestry Research Program award (2014-32100-06099; \$55,000). Title: Small watershed studies to understand effects of anthropogenic and climatic forcings on forest ecosystem services (2014-2016).
9. Institutional PI of a multi-institutional collaborative award from NSF-MacroSystems Biology (EF-1340681; \$350,382 institutional, \$1,781,236 total). Title: Collaborative Research: Determining how organic matter is stabilized using a unique set of soil samples from across the U.S. (2014-2020).
8. Co-PI of NSF-BIO award (DEB-1353908; \$448,585). Title: LTREB: Drivers of forest carbon storage from canopy closure through successional time (2014-2019).
7. PI of USDA-Forest Service, Northern Research Station award (13-CR-11242306-077, \$159,574). Title: Coordination and Support of the International Soil Carbon Network (2013-2017).
6. As a postdoc, developed and wrote a proposal to the USDA-Forest Service, Northern Research Station (10-CR-11243206-113; \$20,395) under PI Knute Nadelhoffer. Title: Literature synthesis and meta-analysis of soil carbon changes with afforestation (2010- 2011).
5. As a postdoc, developed and wrote a supplemental proposal for NSF-DEB-0947329 under PI Knute Nadelhoffer, funded to host outreach activities with high school science students and educators at UMBS (\$11,320; 2010-2013).
4. As a postdoc, contributed significantly to developing and writing a proposal to NSF-DEB (DEB-0947329; \$299,951) under PI Knute Nadelhoffer. Title: Combined use of ¹⁵N natural abundances and tracers to elucidate above- and belowground C and N cycle linkages (2009-2013).
3. Awarded a graduate student research grant from UMBS (2005; \$2,012).
2. Awarded two competitive Ohio State University Janice Carson Beatley Herbarium Fund grants (2004 & 2005; \$2,000 total) for graduate fieldwork expenses.
1. Secured an interdisciplinary NSF Ph.D. Fellowship (IGERT: Biosphere-Atmosphere Research and Training; 2004-2006), which provided a \$30,000 per annum stipend, \$5,000 for equipment, \$2,000 for supplies, and \$1,000 for conference travel.

TEACHING, MENTORING, AND EDUCATIONAL RESOURCE DEVELOPMENT

Adaptation Planning and Practices for Forest Carbon Management (2022): This 8-week online course provided 39 participants with applied science, tools and resources that facilitated their efforts to define climate adaptation and carbon management goals, objectives, strategies, approaches, and tactics for unique, place-based projects. I served as one of three primary instructors for the course, whose participants included private landowners and forest managers from nonprofit, State, and Federal entities from 12 states. This course was one in a series of online trainings offered by NIACS, and was the first to emphasize carbon. Based on demand and interest, additional iterations of the course are expected in the future.

Belowground Carbon Methods Workshop (2013, 2014, 2015, 2016, 2017, 2019, 2021): Over the course of these annual workshops, I have designed, implemented, and evolved this 10-day intensive course that provides a complete, immersive experience in methods of forest soil resource inventory and assessment. The primary objective of the course is to develop international capacity in soil carbon research and monitoring for nations throughout the Western Hemisphere. Working through interpreters and alongside other technical instructors, I give lectures and hands-on training in experimental design, field methods, lab procedures, and data analysis. I have collaborated with partners from federal agencies (Forest Service, NRCS, USAID) and universities to deliver wide-ranging perspectives and techniques during the six iterations of this event, which has trained 82 scientists (from advanced undergraduates to resource professionals) from Belize, Colombia, Costa Rica, Dominican Republic, Ecuador, Guatemala, Honduras,

Jamaica, Mexico, Nicaragua, Panama, Paraguay, and Peru. In 2021, the workshop was adapted to a virtual format, which reached a total of >100 participants from these same countries.

Undergraduate teaching and mentoring (2003-2022): During my years at UMBS, I have been a one-on-one research mentor to over 60 undergraduate students involved in formal research experiences. These include UM students enrolled in for-credit research experiences during the academic year, such as the Undergraduate Research Opportunity (UROP) or Michigan Science, Technology, Engineering and Mathematics (M-STEM) programs, as well as undergraduates from a wide range of universities who have participated in NSF-supported Research Experience for Undergraduates (REU) programs during summers at UMBS. My role in the educational and scientific development of these students has been to teach each individual how to do research by cultivating her/his unique strengths and interests, while encouraging growth in new areas and exposing each student to a wide range of disciplines and approaches. I teach research as a defined process that includes learning how to search and read scientific literature, articulate questions, design studies, perform techniques, analyze data, interpret results, and communicate inferences. All students involved in these programs have delivered final products (papers, theses, presentations), many for a grade, and some have coauthored publications with me (even years after their initial experience). In addition to these sustained mentoring relationships, I have taught hundreds more students through guest lectures and labs in UMBS-based and visiting undergraduate courses, mostly in the realm of forest ecology and soil science. In this capacity, I have designed and delivered self-contained learning exercises and labs that complement the goals of the broader course, always with a focus on the hands-on learning and data collection that characterizes coursework at UMBS.

Undergraduate curriculum development (2015): I served as an invited participant in a multi-year project to create, implement, and refine data-driven curriculum and educational resources for use in undergraduate environmental sciences courses. My direct role during a 3-day intensive workshop held as part of the EDDIE (Environmental Data-Driven Inquiry and Exploration) Project ([LINK](#)) was to create a module related to the terrestrial carbon cycle (soil respiration) and provide feedback on other modules; subsequently, I have served as a point person for instructors who have utilized the soil respiration module in their teaching.

Biosphere-Atmosphere Short Course (2009): As a postdoctoral researcher at the University of Michigan Biological Station, I worked with senior faculty and other postdocs to design and implement a short course series that trained graduate students and research technicians enrolled in a later cohort of my interdisciplinary Ph.D. fellowship program. In the short course series, I served as a co-instructor of the forest ecophysiology section (10 students), for which I delivered lectures, designed and led field exercises to teach concepts and applications in forest nutrient cycling and tree physiology.

North Central Michigan College (2008-2009): Shortly after completing my Ph.D., I began an Adjunct Instructor affiliation in the Biology Department at NCMC, where I taught Introduction to Biology (BIO 101). Following consultation with the Department Chair to concur on expectations and ensure consistency with past versions of the course, I independently designed and discharged all course responsibilities including lectures, labs, and student assessment (22 students). I did not subsequently teach at NCMC due to the increasing demands of my research program.

University of Michigan Biological Station (2006, 2007): Teaching Assistant, General Ecology (EEB 381). During the latter two years of my Ph.D. research, during which I was based at UMBS year-round, I served as a TA for spring term General Ecology (20-25 students). My responsibilities included giving lectures, organizing and leading field trips, discussions, and labs, grading assignments and tests, and providing one-on-one and small group student mentoring on data analysis, lab reports, and presentations. I also closely advised student research groups (2 per year) in the design and execution of course-based research projects, which are required of all undergraduates enrolled at UMBS.

Ohio State University (2002-2004): Graduate Teaching Assistant, Evolution (EEOB 400), Introduction to Ecology (EEOB 413, twice), and Vertebrate Histology (EEOB 630). Before securing a Ph.D. fellowship that allowed me to focus on research, I was a TA for three upper-level courses for majors in my

department. In these courses, I gave lab-based lectures, organized and led field trips, ran discussion and lab sections, and wrote and graded assignments, quizzes, and tests.

Wittenberg University (1999-2002): Lab Assistant, Our Natural World (Biology 100); Teaching Assistant, Morphology of Vascular Plants (Biology 205). As a sophomore, I set up microscopy and lab activities, graded assignments and quizzes for BIO 100. While serving as my major professor's student assistant as a junior and senior, I set up for and assisted during lab sessions, collected and preserved plant specimens, and graded assignments, quizzes, and tests for BIO 205.

PROFESSIONAL MEMBERSHIPS

- American Geophysical Union
- Soil Science Society of America

SERVICE AND AD HOC OUTREACH ACTIVITIES

- National Ecological Observatory Network: I serve on two Technical Working Groups for NEON (Terrestrial Biogeochemistry, Plant Productivity); 2019-present.
- International Soil Carbon Network: I have served on the ISCN Scientific Steering Group since 2018.
- Committee Service: I serve on the Ford Forest Advisory Committee for the College of Forest Resources and Environmental Science, Michigan Technological University. While with University of Michigan, I participated in committees including the UMBS Facilities and Land Use Committee, UMBS Winter Research Meeting planning committee, and hiring committees for UMBS Analytical Chemist and Resident Biologist positions.
- Manuscript reviewer: I have served as a manuscript reviewer for *Agricultural and Forest Meteorology, Biogeochemistry, Biogeosciences, Canadian Journal of Forest Research, Castanea, Ecological Applications, Ecology, Ecosphere, Ecosystems, European Journal of Forest Research, Forest Ecology and Management, Forests, Geoderma, Geophysical Research Letters, Global Change Biology, Global Change Biology- Bioenergy, Invasive Plant Science and Management, Journal of Biogeography, Journal of Geophysical Research- Biogeosciences, Journal of Soils and Sediments, Journal of the Torrey Botanical Society, New Forests (Guest Editor), New Phytologist, Oecologia, Plant and Soil, Plant Biosystems Journal, Plant Ecology, PLOSOne, Proceedings of the National Academy of Sciences of the United States, Scientific Reports, Soil Biology and Biochemistry, Soil Science, Soil Science Society of America Journal, Tree Physiology, Vadose Zone Journal.*
- Proposal reviewer: I have been an *ad hoc* proposal reviewer for NSF's Division of Environmental Biology, the DOE Office of Biological and Environmental Research, and the World Bank Forest Carbon Partnership Facility Carbon Fund.
- Preproposal and full proposal panelist: I have twice accepted invitations to serve on proposal review panels for NSF-BIO in the Division of Environmental Biology.
- Independent reviewer: I have reviewed book chapters for author F. M. Lappé, two technical reports and an editorial article for the USDA-Forest Service, a technical report for the State of California, and forest management plans for Michigan DNR.
- Volunteer consulting scientist: I have done rapid inventory of Threatened/Endangered plant species for Michigan DNR at an oil spill site along the Straits of Mackinac, and conducted bryophyte and vascular plant surveys for site biological inventories in Ohio and northern Michigan.
- Environmental outreach: I have worked in independent and collaborative capacities to develop and lead outreach workshops (4) at UMBS for middle and high school students and tribal groups. Workshop topics included climate change, forest ecology, biodiversity, and ecosystem services. I have also organized and led 8 site tours and field events at UMBS for other K-12, scouting, and community events. Over 250 people participated in these events from 2005 - present.

- Media outreach: I have provided interviews to writers for online outlets and podcasts including [Nature Change](#), [ClimateWire](#), [Environmental Monitor](#), Science, the [Wisconsin Forestry Center](#), and the University of Michigan News Service for stories ([1](#), [2](#)) about forest ecosystems and carbon sequestration. I have been interviewed by the Associated Press about the ecological consequences of cold winter weather (the resulting story was released through a variety of popular media outlets ranging from National Public Radio to the Weather Channel). Lastly, I have provided occasional interviews to newspapers (*e.g.*, Petoskey News-Review, St. Ignace News) on earth science topics.
