Join Dr. Julia Burton's silviculture lab for the summer of 2024. We will work four ten hour days per week, reinventorying old-growth long-term ecological research plots in the Ottawa National Forest. This is an exciting opportunity to build skills and experience in field ecology by collecting data that can clarify the mechanisms behind forest competitive interactions. We will book housing in the area, and expect approximately 12-14 weeks of work. We're hoping to start May 6<sup>th</sup>. Please e-mail questions to Adam Milenkovic ([azmilenk@mtu.edu](mailto:azmilenk@mtu.edu)).
