Supplementary Coursework Form
Basic format for plan of study

Supplementary courses are in three categories: 4000-level courses (i.e., advanced undergraduate courses); cognate courses (i.e., graduate courses in MTU departments other than Humanities); one-on-one courses set up by arrangement with individual faculty (i.e., independent study/directed reading/internships). Students may apply a maximum of three (3) cognate course credits toward the 36-credit coursework portion of their degree. All students must receive approval of this plan of study contract before enrolling for the courses listed below. At the end of the term, faculty will be asked to submit a grade for the work on the basis of this contract. If there are any questions, please see the Graduate Director. Students will not be allowed to register for these courses until they have filed an approved plan of study.

Some Notes on Policy

• The RTC Steering Committee recommends that such independent work be reserved for advanced students (second year and beyond); that is, students who have completed the bulk of their coursework. The expectation is that beginning students should be joining in the conversation of the communities of their peers and their faculty in the regularly scheduled courses, and not substituting independent work for coursework. Such independent work must not impede the students’ progress in regularly scheduled courses.

• During summer semesters, students receiving Michigan Tech support MUST register for credit (students who are not supported by Michigan Tech are not required by us to register, though they may have other obligations for loans, etc.). That credit may be either in the form of a course (usually three (3) credits) if so advised by their faculty advisor OR one (1) credit of independent study. All students should consult with their advisors before registering for summer; no student will be allowed to sign up for independent work without prior written approval of the faculty and graduate advisor.

• MS students working on theses or project should register for HU5990 or HU5991 respectively; they must meet with their advisor(s) before registering.

• PhD students preparing Qualifying Exams enroll in HU6903 during the semesters immediately before and during the taking of their exams.

• All and only those PhD students working on dissertations after passing their comprehensive examinations should enroll for HU6990 Dissertation Research credits.

• Substitution of independent study for coursework (maximum three (3) credits per course must be pre-approved by the Graduate Director.)
