

# NOAA Great Lakes CoastWatch Program

CoastWatch is a nationwide National Oceanic and Atmospheric Administration (NOAA) program within which the Great Lakes Environmental Research Laboratory (GLERL) functions as the Great Lakes regional node. In this capacity, GLERL obtains, produces, and delivers environmental data and products for near real-time observation of the Great Lakes to support environmental science, decision making, and supporting research. This is achieved by providing Internet access to near realtime and retrospective satellite observations, in-situ, and modeled Great Lakes data. Clients include Federal, state, and local (decision-making and regulatory) agencies, academic institutions, and the public. The goals and objectives of the CoastWatch Great Lakes Program directly support NOAA's statutory responsibilities in estuarine and marine science, living marine resource protection, and ecosystem monitoring and management.

## Future Products / Directions

- ◆ NPP VIIRS
- ◆ SAR Ice Type Classification
- ◆ SAR Wind Fields (Google)
- ◆ MODIS Chl, DOC, SM
- ◆ Primary Productivity
- ◆ Scatterometer Measured Winds/Ice
- ◆ Decision Support (GIS)
- ◆ Thredds /LAS or ERDAP Server

# NPP VIIRS – 1.3 Km Resolution

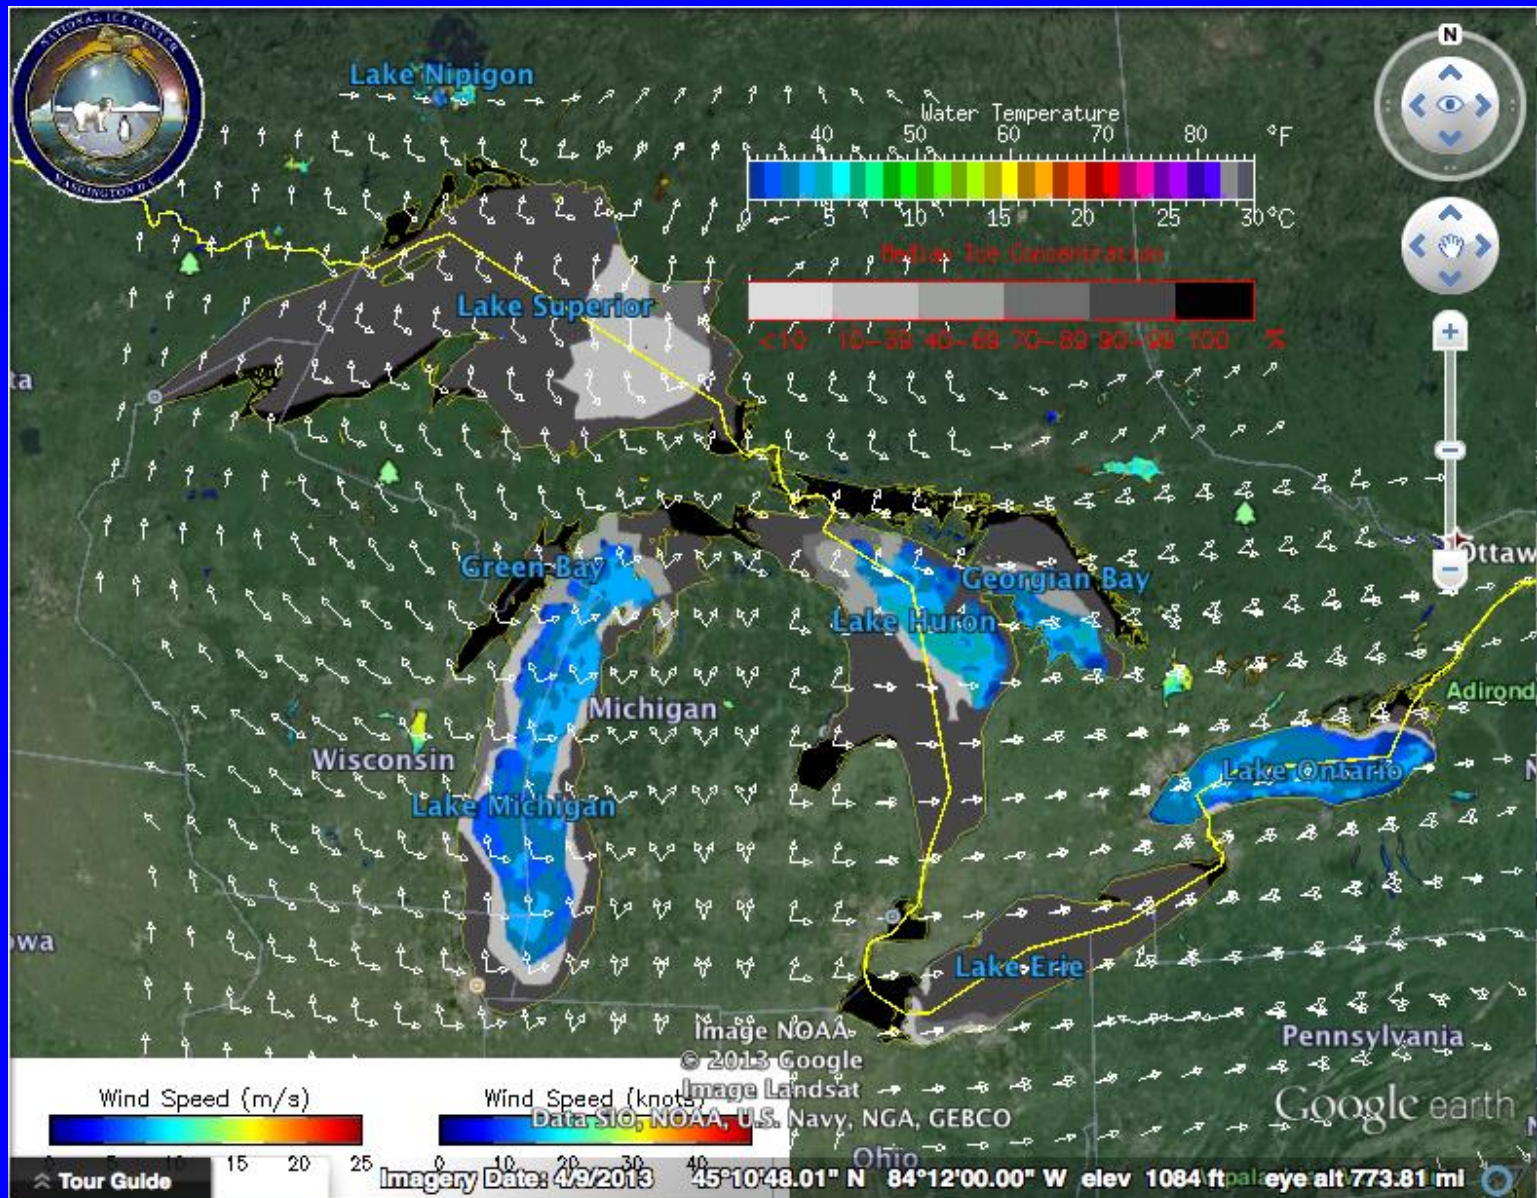

# NPP VIIRS – 750 Meter Resolution

# Google SAR Winds

# Lake Superior Ice Cover

**March 17, 2014**

	New lake ice		Consolidated ice floes		Stratified ice		Pancake ice
	Lake ice with crusted snow		Brash ice		Noise (<-20dB)		Unclassified

**March 16, 2014**

Algal and Sediment Extent Map

Water Quality & Public Health Concern Map

MODIS True Color

### Area

	Surface Algal Mat Area:	432 Sq Km.
	High Algal Concentration Area: (Chlorophyll > 20 µg/L)	2845 Sq Km.
	Heavy Sediment Plume Area:	0 Sq Km.
	Higher Concern Possible HAB Related Public Health Concern: (microcystin assumed > 20 µg/L based on surface scum analysis and historical observations, Water Temp > 18°C)	
	Lower Concern Detected Area:	432 Sq Km.
	Higher Concern Possible HAB Related Water Quality Concern: (Chlorophyll > 20 µg/L, Water Temp > 18°C)	
	Lower Concern Detected Area:	2845 Sq Km.

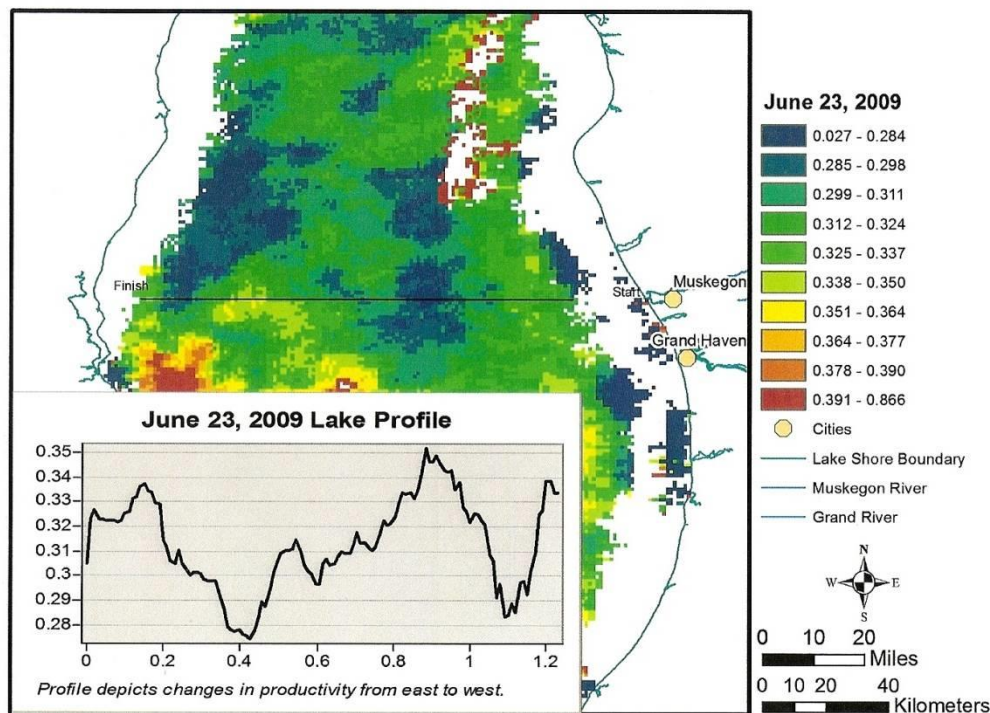

# Future Products

## Prototype Primary Productivity

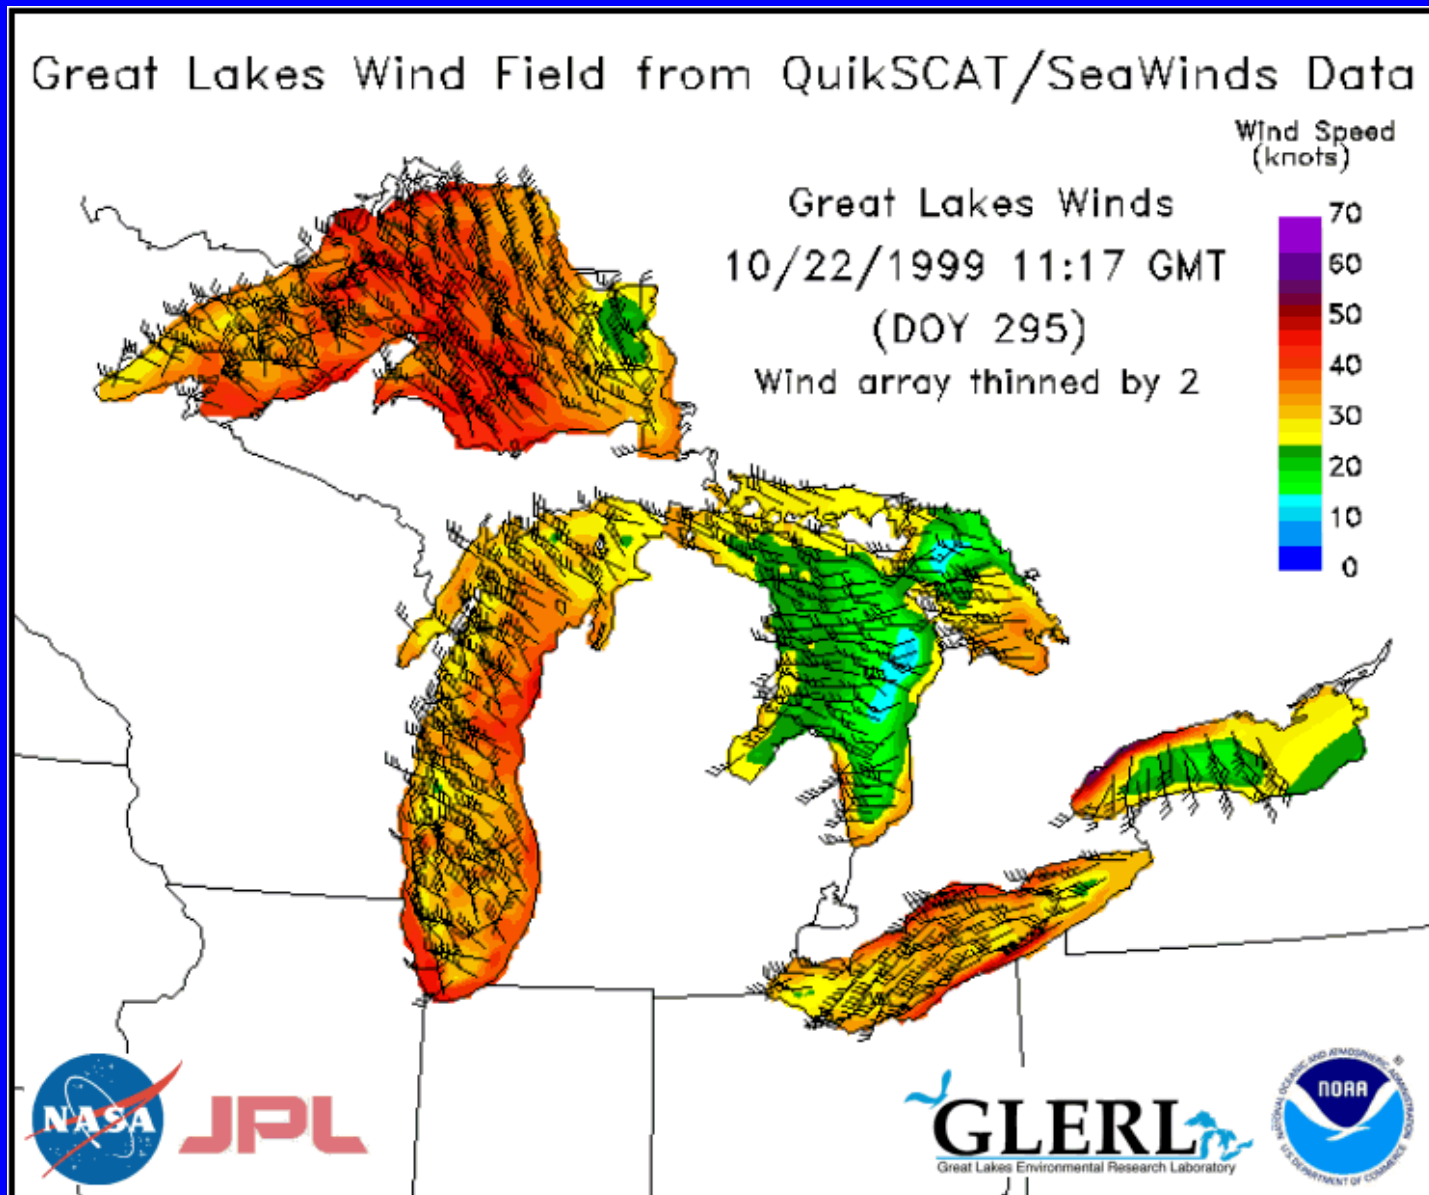

June 23, 2009 Productivity Analysis

# Prototype of Great Lakes wind-field product derived from QuikScat/SeaWinds Data

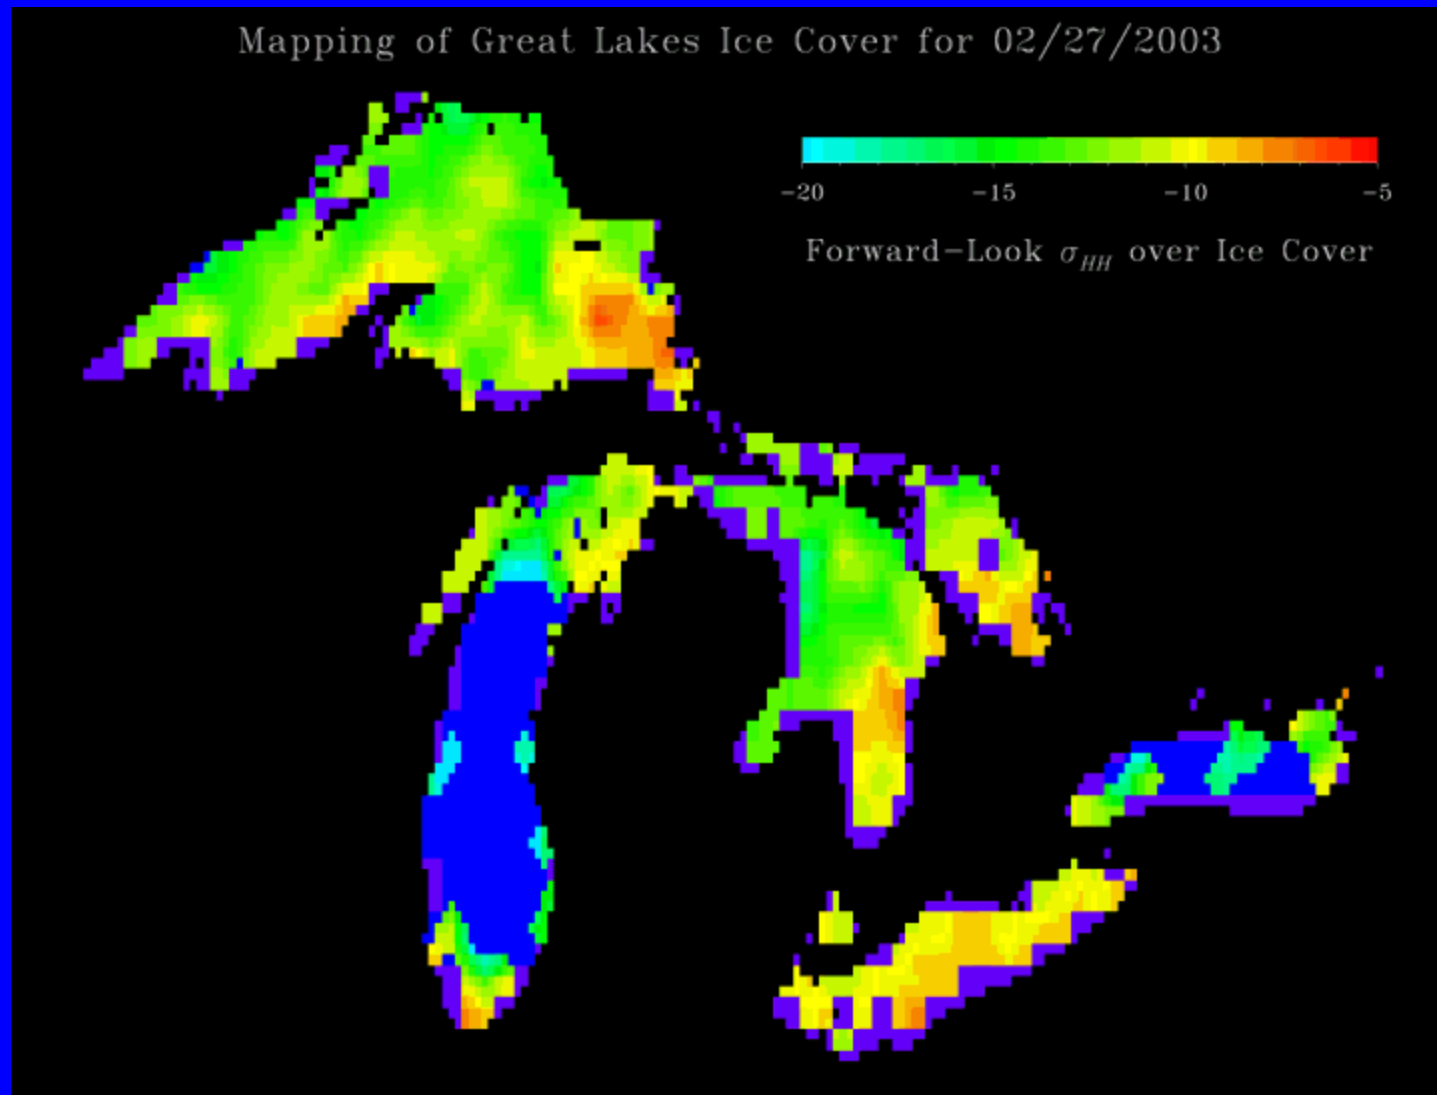

# Future Products Prototype of Great Lakes Ice-cover product derived from QuikScat/SeaWinds Data

green-red = ice, blue = water, and violet = unclassified areas

# Decision Support System

## Data Inputs
