

APPENDIX F
COMMUNITY KNOWLEDGE PRE-SURVEY AND
POST-SURVEY AND DATA TABLES

The data from these surveys reflected people's knowledge about the project, biogas, and improved cook stoves. It also revealed people's roles and opinions as a reflection of caste, wealth, or gender. Information about caste, gender, and ward location of the households are omitted in the data tables to protect the villagers' identity.

APPENDIX H

BIOGAS RECIPIENT SURVEY DATA TABLES

This survey of the biogas recipients showed the views of the respondents pertaining to the project and its managers. It reveals the roles of participants, the problems, and the working process in the installation process. The respondents also indicated the costs involved and what they knew about the loan system. To protect the villagers' identities, the caste, ward, and gender of the respondent are omitted from the results displayed in the data table.

APPENDIX I

PEARSON CORRELATION COEFFICIENT STATISTICAL DATA SETS

The computer software SAS System generated the following Pearson Correlation Coefficient statistical data sets for data variables collected in the pre and post community knowledge and the biogas recipient structured interview surveys. Two different statistical data sets were generated for the biogas recipient survey based on different variables selected from the survey.

Pre – Community Knowledge Survey Data Table
