

Instructor Info:

Instructor: Dr. Katrina Black
 Contact: keblack@mtu.edu

Office: Dept. of Physics, Fisher 121
 Office Hours: By Arrangement

Materials

- Required Text: College Physics, OpenStax College Publishing, ISBN 978-1-93816-00-0, available FREE online at <https://openstaxcollege.org/textbooks/college-physics/get>. Non-free print copies are also available. You will need a physical copy (print-out or purchased) for open-book exams.
- High-speed internet sufficient for streaming video, accessing course materials, etc. Some activities may use Java or Flash. Most students will want access every weekday.
- Paid WebAssign account for completing online homework. The class key is posted on the Canvas homepage. There is a free trial period.

Course Overview

In PH1110, we will explore topics in forces and motion, energy and momentum, fluids, waves, and thermal physics. Using algebra-based math, conceptual reasoning, and graphical analysis, we will develop models that describe the way the world works and use those models to describe and predict events.

PH1110 supports University Student Learning Goal 2: Knowledge of the Physical and Natural World. More information can be found at <http://www.mtu.edu/assessment/program/university-learning-goals/goal-2-rubric.pdf>

Vital Course Information

- **Time Commitment:** This summer course is very intense – we cover a semester’s worth of physics in only 7 weeks. Expect to spend around 20 hours per week on this course. Many students find it takes even more time during more difficult material.
- **Ask for help when you need it:** In an online course, it’s up to you to seek help when you need it. I can’t see if you look confused! It’s my job to help you learn this material, so please don’t hesitate to be in touch with me and your classmates early and often. Make use of Piazza!
- **Not Entirely Self-Paced:** The course material is divided into two units, each culminating with an exam. You may work on each unit at a faster pace than suggested, but assignments must be completed by their due dates and exams must be taken on the scheduled days. The second unit will open the Wednesday before the first assignments are due.
- **Exams Must Be Proctored:** All course components EXCEPT exams are completed online. If you are not able to take exams at the Michigan Tech campus, you must arrange for an objective and disinterested proctor. Details are available on Canvas and at <http://www.mtu.edu/ctl/testing-center/proctors/>

Grading Policy

Your final grade will be determined using the following weights:

Reflect/Forum Participation	5%
Reading Quizzes	10%
Video Quizzes	15%
WebAssign Homework	35%
Midterm Exam	15%
Final Exam	20%

Letter grades will be assigned as follows:

A	90-100%	C	70-74%
AB	85-89%	CD	65-69%
B	80-84%	D	60-64%
BC	75-79%	F	0-59%

I reserve the right to adjust these ranges downward, but will not adjust them upward.

Course Components and Work Schedule

The course components are designed to scaffold your learning, which is especially important in an online course. Each day introduces a new topic. For each topic:

- Do the reading and take the *reading quiz* in Canvas
- Watch the video(s) and complete any online activities
- Take the *video quiz*
- Try (and finish) the *WebAssign Homework*
- *Reflect* on your learning

Reading Quiz: The reading quiz on Canvas is a check that you have a basic understanding of the daily topic. Reading quizzes have a time limit of 30 minutes, and you only have one attempt, but your lowest 2 quizzes will be dropped.

Video Quiz: The video quiz on Canvas is a check that you understood the material in the video/activity, and gives you practice in the ideas you will use in the homework. If you have trouble with the quiz, you will want to review reading, video, and activities, and try again - you have unlimited tries to get these questions right! One quiz will be dropped to allow for any technical issues.

Try the homework: Look over the WebAssign homework. Make a plan and try to solve each problem. You have 5 attempts for each problem. If any are giving you trouble, post on Piazza for help. Asking for (and giving) for help can count toward your *Reflect* grade.

Finish the homework: I suggest that you finish each topic's homework as you complete the topic. However, to accommodate as many student schedules as possible, the homework assignments for any given week will be due on SUNDAY of the following week, except for the last week of class, where homework will be due on Friday. Your lowest homework grade will be dropped to allow for any technical issues

Reflect on your learning: Over the course of the class, I expect each student to make 30 posts (one for each topic) to our class forum. These posts can be answering the *Reflect* prompt for each topic, asking a question about course material, or answering a question about course material. Your posts to the forum can appear anonymously to your classmates if you choose.

Reading and video quizzes for each topic are due each day at 11:59 pm. Your own personal schedule will dictate the most appropriate timing to work on the course components. I suggest allowing something like 30 – 60 minutes to read and take the reading quiz, 60 – 90 minutes to watch the videos, do activities, and take the video quiz, 30 – 60 minutes to try the homework, and 2 hours to finish the homework.

Late Work and Extensions

I know everyone is busy, especially during a compressed summer class! Canvas will automatically apply a 12-hour grace period for every assignment. In WebAssign, you may apply for an automatic 12-hour extension within one hour after each homework is due (the extension is for 12 hours after the time you request it!). After the grace period/extension, the assignments will lock. *Please use the grace period responsibly and only when needed so that I can continue to offer it.*

Exams

This course has one midterm and one final exam. The scheduled dates are:

Midterm: Monday, June 4

Final: Friday, June 29

Exams for this course are hybrid computer/paper exams. The exam will be presented on Canvas (similar to your topic quizzes), but for some questions, you will need to show your work. You will record your work on paper, and your proctor will electronically return your work to me.

Please allow 90 minutes for your midterm exam and 120 minutes for your final exam. Exams are open book/notes and must take place under the supervision of a proctor. Calculators are recommended! Local students will use Michigan Tech's testing center. Distance students will need to arrange their own local proctors. Exams will take place **between 7:00 AM and 9:00 PM local time on the dates listed above. Be sure that your proctor is available during this times!** The final exam will be comprehensive with an emphasis on material from the second unit.

Academic Integrity

I have a liberal policy toward students working together to solve homework problems. Just as physicists work together to do physics, physics students should work together to understand homework problems! You can work together in person, or ask and answer questions in our class forum, Piazza. HOWEVER, do not short-change yourself by using another student's work to answer quizzes and homework questions. Not only is this a breach of academic integrity, but doing homework is like practicing for a recital or training for a marathon. You may find a way to cut corners, but your exam grades will show it!

Of course, during an exam, any communication with any other person, or use of any unauthorized resources is considered cheating. If academic dishonesty is suspected, the matter will be referred to the Office of Student Affairs. The penalty is no less than an academic integrity warning and no more than expulsion.

University Policies

This course adheres to University policies regarding academic integrity, use of student work for university, program, or course assessment, disability accommodation, institutional equity, veteran and military accommodation, and equal opportunity, discrimination, or harassment. Updated policy statements can be found at http://www.mtu.edu/ctl/instructional-resources/syllabus/syllabus_policies.html

If you require disability accommodation for any reason, please don't hesitate to contact me or the Dean of Students for guidance. Distance students should be aware that according to Michigan Tech University guidelines, disability accommodations are verified through the Dean of Students at <http://www.mtu.edu/deanofstudents/disability/>

PH1110 Daily Topic Schedule for Summer 2018

Week		Topic #	Reading	Topic
1	14-May	1.1	Chapter 1 (all)	Unit conversion, Approximation, Uncertainty
	15-May	1.2	2.1-2.5	Displacement, Velocity, and Acceleration in 1-D
	16-May	1.3	2.6-2.8	1-D motion (cont.), Graphs
	17-May	1.4	3.1-3.3	Vector addition, Decomposition
	18-May	1.5	3.4-3.5	Projectile Motion, Relative Velocity
2	21-May	2.1	4.1-4.4	Newton's Laws
	22-May	2.2	4.5-4.6	Weight, Normal, and Tension Forces
	23-May	2.3	5.1-5.2	Friction and Drag
	24-May	2.4	4.7	Integrating Forces and Kinematics
	25-May	2.5	5.3	Elasticity, Stress, and Strain
3	28-May			Memorial Day Recess
	29-May	3.2	7.1-7.4	Work, Kinetic and Potential Energy, and Cons. of Energy
	30-May	3.3	7.5-7.7	Non-conservative forces, Power
	31-May	3.4	8.1-8.3	Momentum, Impulse, and Conservation
	1-Jun	3.5	8.4-8.5,8.7	Elastic and Inelastic Collisions, Propulsion
4	4-Jun			Midterm Exam
	5-Jun	4.2	9.1-9.4	Torque, Equilibrium, CG
	6-Jun	4.3	6.1-6.3, 6.5	Uniform Circular Motion and Newton's Law of Gravitation
	7-Jun	4.4	10.1-10.3	Angular Acc, Rotational Kinematics, Moment of Inertia
	8-Jun	4.5	10.4-10.7	Rotational Work/KE, Angular momentum
5	11-Jun	5.1	11.1-11.5	Density, Pressure, Pascal's Principle, Hydraulic Systems
	12-Jun	5.2	11.6-11.8	Gauge Pressure, Buoyancy, Surface Tension, Capillary
	13-Jun	5.3	12.1-12.4	Flow Rate, Continuity, Bernoulli, Viscosity
	14-Jun	5.4	16.1-16.3	Simple Harmonic Motion
	15-Jun	5.5	16.4-16.5	Pendulums and SHOs
6	18-Jun	6.1	16.9-16.11	Waves and Superposition
	19-Jun	6.2	17.1-17.3	Sound Waves and Intensity
	20-Jun	6.3	17.4-17.5	Standing Waves and Doppler Effect
	21-Jun	6.4	13.1-13.4	Temp, Thermal expansion, KMT, Ideal Gases
	22-Jun	6.5	14.1-14.4	Specific and Latent Heat
7	25-Jun	7.1	14.5-14.7	Heat Transfer
	26-Jun	7.2	Chapter 15	Laws of Thermodynamics
	27-Jun			Study Day
	28-Jun			Study Day
	29-Jun			Final Exam (Comprehensive)
