Undergraduate Course Descriptions
Effective Fall 2018

Accounting

ACC 2000 - Accounting Principles I
Introduction to basic principles, concepts, and theoretical framework of financial accounting with the emphasis on its use by economically rational decision makers. Topics include the decision-making environment and the accounting cycles, processes, and statements.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring

ACC 2100 - Accounting Principles II
Emphasizes the role of accounting information within a firm. Topics include budgeting, responsibility accounting, cost allocations, cost behavior, decision models, capital budgeting, and an introduction to product costing in manufacturing and service sector firms.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): ACC 2000

ACC 3000 - Accounting Theory/Practice I
Studies the theory, concepts, and practices underlying financial reporting and measurement. Primary focus is on income measurement, and the valuation of assets, like cash, receivables, inventory, and long-lived assets, as well as multinational issues.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): ACC 2000

ACC 3100 - Accounting Theory/Practice II
A continuation of ACC 3000 with theories, concepts, and practices underlying financial measurement and reporting. Focuses on the measurement and reporting of liabilities and equities, and includes multinational issues.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): ACC 2000

ACC 3500 - Managerial/Cost Accounting I
The primary emphasis is on traditional and contemporary product costing techniques, cost allocation practices, and basic cost-management issues. Topics include process costing, standard costing, activity-based costing, backflush costing, cost allocation issues, balanced scorecard, strategic profitability analysis, and the role of accounting in contemporary management practices.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): ACC 3000 and FIN 3000(C)

ACC 3600 - Foundations of Taxation
Introduction to basic principles, concepts, and theoretical framework of taxation systems, emphasizing income taxation and its impact on decision making. Topics include tax planning and compliance for individuals, corporations, and partnerships.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): ACC 2100

ACC 4100 - Attestation and Assurance
Auditing procedures and techniques associated with public accounting and with internal auditing for business entities. Topics include auditor’s responsibilities, professional ethics, generally accepted auditing standards, purpose and types of audits, objectives, internal control, evidence, organization within the public accounting profession, the audit program, and auditing procedures and techniques.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): ACC 2000

ACC 4200 - Advanced Accounting
The theory and practice of financial accounting and reporting pertaining to business combinations and consolidated financial statements, accounting for partnerships, and related business forms, foreign currency transactions, and financial statement translations, and other advanced accounting topics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): ACC 3000

ACC 4500 - Managerial/Cost Accounting II
Emphasizes information requirements of contemporary management decision-making and strategic-planning processes. Covers contemporary control and evaluation practices (such as activity-based management), determining the costs of quality, and productivity analysis in the context of accounting information systems.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): ACC 3500

ACC 4600 - Advanced Tax Topics
Continuation of ACC3600. Introduction to advanced principles and concepts of taxation, emphasizing income taxation and its impact on decision making. Topics include tax planning and compliance for estates and trusts, gratuitous transfers, multi-jurisdictional operations, and entity formations, liquidations, and reorganizations.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): ACC 3600

ACC 4700 - Governmental and Not-for-Profit Accounting
An in-depth study of the accounting principles and financial reporting unique to the governmental and not-for-profit sectors of the U.S. economy.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): ACC 3000

ACC 4800 - Accounting Systems
Introduction to the basic principles, concepts, and theoretical framework for the design and operation of accounting information systems, emphasizing its use to enhance decision making. Topics include system design, internal controls, the use of databases, and electronic commerce.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): ACC 2100 or ACC 5050

ACC 4990 - Special Topics in Accounting
Examines current issues in Accounting and other topics of interest to faculty and students in greater depth.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required
Pre-Requisite(s): ACC 3000

Air Force ROTC

AF 0120 - Physical Conditioning
Activities that promote physical conditioning. Emphasis is on individual conditioning through strength and aerobic training and team sports such as ultimate frisbee and football. May be used once as a general education co-curricular course. Sports physical required prior to start of class (contact instructor for details).
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

AF 0130 - Air Force Elite Forces Workout
An intense workout program that develops personal physical fitness and self-confidence. Workouts include an elite U.S. Military special operations training. Basic swimming skills required.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: On Demand
Restrictions: Permission of instructor required
Pre-Requisite(s): AF 0120

AF 0230 - Precision Drill Team
Techniques and skills involved in precision drill movements, including marching, rifle spinning, ceremonial sabre handling, and color guard performance. Each student must have or purchase an appropriate drill-team uniform. May be used once as a general education co-curricular course. Non-cadets are required to provide a uniform cleaning deposit and purchase some non-returnable uniform items.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required
AF 0340 - Field Training
A rigorous program of physical conditioning, team activities, and survival training. Offered the summer semester after acceptance into the Field Training program. Course completed off campus.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Summer
Restrictions: Permission of instructor required
Pre-Requisite(s): AF 2002

AF 1001 - Foundations of US Air Force I
Introduces students to the USAF and ROTC. Topics include Air Force mission and organization, officership, professionalism, military customs and courtesies, officer opportunities, and communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
Credits: 1.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Fall

AF 1002 - Foundations of US Air Force II
Introduces students to the USAF and ROTC. Topics include Air Force operations and installations, principles of war and tenets of Airpower, policy and strategy, and human relations in the Air Force. Leadership lab is mandatory for AFROTC cadets and complements this course by providing cadets with followership and leadership experiences.
Credits: 1.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Spring

AF 2001 - Evolution of US Air & Space Power I
This course provides students with some knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective.
Credits: 1.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Fall

AF 2002 - Evolution of US Air & Space Power II
This course provides the students with some knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. Leadership and communications lessons and exercises will prepare cadets for upcoming summer training program.
Credits: 1.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Spring
Pre-Requisite(s): AF 2001

AF 2010 - Evolution of US Air And Space Power I for Non-AFROTC Students
For non-AFROTC students. AFROTC cadets should enroll in AF 2001. This course provides students with some knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. Post-WWI through end of WWII will be discussed. Leadership and communications lessons and exercises.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall
Restrictions: Permission of instructor required

AF 2020 - Evolution of US Air and Space Power II for Non-AFROTC Students
For non-AFROTC students. AFROTC students should enroll in AF 2002. This course provides students with some knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. Leadership and communications lessons and exercises. Leadership lessons designed to prepare cadets for upcoming summer training program.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Spring

AF 3002 - Leadership Studies II
Study of leadership in civilian and military institutions. Topics include officership, team building, feedback, Air Force evaluation systems, leadership ethics, professional relations, and communication skills. The course includes discussion, informal lecture, case studies, and experiential exercises.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

AF 3010 - Leadership Studies I for Non-AFROTC Students
For non-AFROTC students. AFROTC cadets should enroll in AF 3001. Study and practice of leadership in civilian and military organizations. Topics include leadership principles, problem solving, management fundamentals, counseling, motivation, mentoring, and effective communication. Various leadership theories are discussed. The course includes discussion, informal lecture, self-evaluation of leadership traits, and experiential exercises.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

AF 3020 - Leadership Studies II for Non-AFROTC Students
For non-AFROTC students. AFROTC cadets should enroll in AF 3002. Study of leadership in civilian and military institutions. Topics include officership, team building, feedback, Air Force evaluation systems, leadership ethics, professional relations, and communication skills. The course includes discussion, informal lecture, case studies, and experiential exercises.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

AF 4001 - National Security Affairs I
This course is designed to develop an understanding of the nature of conflict and how the United States military forces are developed, organized, and employed. Topics include the need for national security, the evolution and formulation of American defense policy and strategy, the origins of regional security issues, cross-cultural competence, and joint doctrine.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall

AF 4002 - National Security Affairs II
This course examines selected roles of the military in society, unconventional warfare, current issues affecting the military profession, and the military justice system. Special topics of interest focus on information warfare, the law of armed conflict, the military as a profession, and officership.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

AF 4010 - National Security Affairs I - for Non-AFROTC Students
For non-AFROTC students. AFROTC cadets should enroll in AF 4001. This course is designed to develop an understanding of the nature of conflict and how the United States military forces are developed, organized, and employed. Topics include the need for national security, the evolution, and formulation of American defense policy and strategy, the origins of regional security issues, cross-cultural competence, and joint doctrine.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

AF 4040 - National Security Affairs II - for Non-AFROTC Students
For non-AFROTC students. AFROTC cadets should enroll in AF 4002. This course examines selected roles of the military in society, unconventional warfare, current issues affecting the military profession, and the military justice system. Special topics of interest focus on information warfare, the law of armed conflict, the military as a profession, and officership.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

Undergraduate Course Descriptions, 2018-19, Page 2 of 103
Army ROTC

AR 0340 - Internship in Advanced Military Leadership
A rigorous program of physical conditioning, leadership development, and team building training. Offered the summer semester after completion of the Cadets junior year of college. Course completed off campus.
Credits: 3.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Summer
Restrictions: Permission of department required

AR 1001 - Introduction to the Army and Critical Thinking
Introduces cadets to the competencies that are critical for effective leadership. Cadets learn how the personal development of "life skills" such as critical thinking, time management, goal setting, stress management, and comprehensive fitness relate to the Army profession.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall

AR 1003 - Leadership and Competence
Introductory course to prepare cadets to the competencies that are critical for adaptive leadership. Cadets learn the basics of the communication process and the importance of developing the essential skills to effectively communicate in the Army. Students will examine the Army profession in depth.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Spring

AR 1011 - Basic Leadership Lab I
Practicum in basic military topics such as drill and ceremony, emergency preparedness, survival skills, and military communication.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall

AR 1012 - Basic Leadership Lab II
Practicum in basic military topics such as first aid, teambuilding, orienteering, profession of arms, and ethics in problem solving.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring

AR 2001 - Leadership and Decision Making
Explores the dimensions of creative tactical leadership styles by examining team dynamics and historical leadership theories that form the basis of the Army leadership framework. Aspects of motivation and team building are practiced through planning, executing, and assessing team exercises
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall

AR 2002 - Army Doctrine and Team Development
Examines the challenges of leading teams in complex operational environments. The course highlights terrain analysis, patrolling, and operation orders. Cadets develop greater self-awareness as they assess their own leadership styles and practice communication and team building skills.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Spring

AR 2011 - Intermediate Leadership Lab I
Practicum in basic military topics, such as drill and ceremony, emergency preparedness, survival skills, and military communication.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall

AR 2012 - Intermediate Leadership Lab II
Practicum in basic military topics, such as first aid, teambuilding, orienteering, profession of arms, and ethics in problem solving.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring

AR 2068 - Fall Military Physical Conditioning
Develops physical fitness, personal confidence, and leadership skills. Students are exposed to both individual and group physical fitness procedures and techniques. Emphasis is on developing a good fitness program for each individual student. May be used once as a general education co-curricular course.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall

AR 2069 - Spring Military Physical Conditioning
Develops physical fitness, personal confidence, self-esteem and military skills. Students are exposed to both individual and group physical fitness procedures and techniques. Emphasis is on developing a good fitness program for each individual student. May be used once as a general education co-curricular course.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring

AR 3001 - Warfighting Functions
Teaches cadets to plan, coordinate, navigate, motivate, and lead a squad and platoon in the execution of mission during a classroom PE, a leadership lab, or during a leader training course.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall
Co-Requisite(s): AR 3011

AR 3002 - Leadership and Operations
Cadets will study, practice, and apply the fundamentals of Army leadership, officership, Army value and ethics, personal development, and small unit tactics at the platoon level.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Spring
Co-Requisite(s): AR 3012
Pre-Requisite(s): AR 3001

AR 3011 - Advanced Leadership Lab I
Practicum in basic military topics, such as drill and ceremony, emergency preparedness, survival skills, and military communication.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall
Co-Requisite(s): AR 3001

AR 3012 - Advanced Leadership Lab II
Practicum in basic military topics, such as first aid, teambuilding, orienteering, profession of arms, and ethics in problem solving.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring
Co-Requisite(s): AR 3002
Pre-Requisite(s): AR 3011

AR 3068 - Military Physical Leadership I
Develops a cadet's leadership abilities to design, implement, and assess a platoon level Army physical training program. Cadets learn the basic leadership of designing and developing a physical conditioning program. May be used once as a general education co-curricular course.
Credits: 1.0; Repeatable to a Max of 12; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): AR 2068 and AR 2069

AR 3069 - Military Physical Leadership II
Develops a cadet's leadership abilities to design, implement, and assess a platoon level Army physical training program. Cadets improve their small group's level of physical conditioning while honing their own leadership skills. May be used once as a general education co-curricular course.
Credits: 1.0; Repeatable to a Max of 12; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): AR 3068

AR 3775 - U.S. Military History for the Professional Officers
History of the American military and its place in American society in both peace and war from the colonial period until the present.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Summer
Restrictions: Permission of department required
Pre-Requisite(s): AR 3068

AR 4001 - Mission Command I and the Army Profession
Completes the Cadet to commissioned officer transition. Course stresses mission command and ethics to assist the Cadet in further embracing their role as an Army officer.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall
Co-Requisite(s): AR 4011
Pre-Requisite(s): AR 3001 and AR 3002
Lec-Rec-Lab: will examine the Army profession in depth. Course will teach critical knowledge, skills, abilities, and competencies that newly commissioned officers will need to succeed in their first unit of assignment. Cadets will examine the Army profession in depth.

AR 4004 - Mission Command II and the Company Grade Officer
Course (3-0-0)
Pre-Requisite(s): AR 4001
Restrictions: May not be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): CH 1150 and MA 1160 or MA 1161

BE 2400 - Cellular and Molecular Biology
Course teaches basic concepts of cell biology, physiology, molecular biology, genetics, and biotechnology.

BE 2700 - Biomedical Signals & Systems
Course covers the origin, processing, and interpretation of biological signals. Mathematical modeling techniques used in the analysis of linear systems. Topics include: Fourier, Laplace, and z-transforms, signal comparison techniques, power spectrum analysis, 2-dimensional signals, transfer functions, convolution, and simulations.

BE 2800 - Biomaterials I: Fundamental Materials Science and Engineering
Course teaches the fundamental materials science principles and different classes of biomaterials (metals, ceramics, polymers and their composites), and some practical professional issues concerning the field of biomaterials.

BE 3300 - Biomechanics II: Soft Tissue and Bio-Fluid Mechanics
Course teaches the fundamental principles of mechanics that are closely related to human soft tissue and bio-flow, particularly, at the human organ level. Emphases are given to both engineering fundamentals and biomedical applications.

BE 3350 - Biomechanics II: Soft Tissue and Bio-Fluid Mechanics
Course teaches the fundamental principles of mechanics that are closely related to human soft tissue and bio-flow, particularly, at the human organ level. Emphases are given to both engineering fundamentals and biomedical applications.

BE 3400 - Experimental Techniques in Biomedical Engineering
Course provides overview of two and three-dimensional force and structure systems and their applicability to human body. Course topics will include principle of equilibrium, concept of free-body diagram, moment of inertia, centroids, Kinematics and equations of motion, principle of energy, work and momentum. Course materials tailored for biological applications, particularly for applications at human organ level.

BE 3550 - Fluid Mechanics
Course provides overview of two and three-dimensional force and structure systems and their applicability to human body. Course topics will include principle of equilibrium, concept of free-body diagram, moment of inertia, centroids, Kinematics and equations of motion, principle of energy, work and momentum. Course materials tailored for biological applications, particularly for applications at human organ level.

BE 3700 - Biomedical Instrumentation
Course teaches basic principles of mechanics that are closely related to human soft tissue and bio-flow, particularly, at the human organ level. Emphases are given to both engineering fundamentals and biomedical applications.

BE 3800 - Biomechanics III: Clinical Applications
Course teaches the fundamental principles of mechanics that are closely related to human soft tissue and bio-flow, particularly, at the human organ level. Emphases are given to both engineering fundamentals and biomedical applications.

BE 3900 - Biomechanics IV: Advanced Clinical Applications
Course teaches the fundamental principles of mechanics that are closely related to human soft tissue and bio-flow, particularly, at the human organ level. Emphases are given to both engineering fundamentals and biomedical applications.

BE 4000 - Advanced Biomedical Engineering Seminar
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 4100 - Special Topics Leadership Development
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

ATM 4640 - Fundamentals of Atmospheric Science
Fundamental principles of atmospheric science, including thermodynamics, aerosol and cloud physics, radiative transfer, and atmospheric dynamics.

BE 2100 - Biomedical Engineering Seminar
Course teaches the fundamental principles of mechanics that are closely related to human soft tissue and bio-flow, particularly, at the human organ level. Emphases are given to both engineering fundamentals and biomedical applications.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.

BE 2110 - Statistical Methods for Biomedical Engineering
Course teaches the fundamentals of biomedical engineering techniques used in biomedical engineering, technical report writing, and record keeping.
BE 3701 - Biomedical Instrumentation Lab
Laboratory exercises to demonstrate basic instrumentation principles and biomedical measurements. Students will learn how to make non-invasive measurements on themselves and how to evaluate measurement instrumentation. Course will coincide with BE3700 lectures.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Sophomore, Junior, Senior
Co-Require(s): BE 3700

BE 3800 - Biomaterials II: Properties and Biological Interactions
Biomaterials properties including structure-function relationships (materials composition and properties), protein/cell materials interactions, characterization methods, and handling and processing considerations.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Require(s): BE 2700(C) and BE 2800

BE 4000 - Independent Study
Students undertake an independent study under the guidance of a Biomedical Engineering faculty member. The course of study may either be research or academic and is decided upon between the student and faculty member.
Credits: variable to 6.0. Repeatable to a Max of 12
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor and department required

BE 4115 - Finite Element Modeling
This course teaches both fundamentals of finite element theory and hands-on experience for bio engineers.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Require(s): (MA 2320 or MA 2321) and (MA 3520 or MA 3521) and (BE 3350 or MEEM 2150)

BE 4200 - Cellular and Molecular Biology II
Covers, at an advanced level, the general principles and engineering applications of science and biology, including cell biology, physiology, molecular biology, genetics, and biotechnology.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Require(s): BE 2400

BE 4230 - Stem Cell and Tissue Engineering
This course will introduce basic concepts of tissue engineering; scaffold materials and biotechnologies for tissue engineering; basic concept of stem cells; review of stem cell sources and related policies; current progress in stem cell research, and application of stem cells in tissue engineering and regenerative medicine.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior, Sophomore
Pre-Require(s): BE 2400 and BE 3350 and BE 3800

BE 4250 - Biomedical Optics
Light plays a significant role in modern clinical diagnostics and in the clinical treatment of disease. Examples include non-invasive surgery, optical biopsy, and cancer therapy. This course will focus on the study of how light propagates through biological tissue.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2014-2015 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Require(s): (MA 2320 or MA 2321 or MA 2330) and (MA 3520 or MA 3521 or MA 3530 or MA 3560) and MA 3160

BE 4300 - Polymeric Biomaterials
A specialized study of polymers used in biomedical engineering. Topics include: processing-structure-properties relationships for polymers, polymer fibers and composites, degradation of polymers, and medical applications for polymeric biomaterials.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2009-2010 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Require(s): BE 3800

BE 4330 - Biomimetic Materials
This course introduces students to biologically inspired approaches to design functional biomaterials. Topics include the discovery and incorporation of biological designs into novel materials and their application in the biomedical field.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2014-2015 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Require(s): BE 3350 and BE 3800

BE 4335 - Smart Polymers
This course introduces students to smart polymers that change their physical properties in response to various environmental stimuli. Topics include the molecular origin of the stimuli responsiveness of these materials and their applications in the biomedical field.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Require(s): BE 3350 and BE 3800

BE 4350 - Cell Biomechanics and Mechanical Transduction
This course is designed to introduce the mechanical analysis and characterization of mammalian cells. Mechanotransduction, whereby cells detect loading and respond to the morphology and mechanical properties of the surrounding extracellular matrix, will be emphasized.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Require(s): BE 2400 and BE 3350 and BE 3800

BE 4410 - Medical Imaging
This course covers the physical nature of the interactions between the waves and matter, especially the biological tissues, principle imaging modalities used in modern medicine and the common techniques used for the processing of the resulting images.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Require(s): BE 3700

BE 4510 - Cardiovascular Engineering
Fundamental cardiovascular pathology and the biomedical engineering approaches being developed and used toward problems resulting in significant cardiovascular deficiency such as myocardial infarction, chronic kidney disease, atherosclerosis, and heart valve disease.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Require(s): BL 2020 and BE 2400

BE 4670 - Micro & Nano Technologies
This course will introduce students to micro- and nano-technologies and the processes involved in manufacturing. Particular emphasis will be on their use in biomedical applications. Goal is to provide information beneficial in research and development, and the industry.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Require(s): BE 3700

BE 4700 - Biosensors: Fabrication & Applications
This course introduces the student to the fundamentals of biosensor development and applications. It provides an understanding of biological components, immobilization methods, transducers, and fabrication techniques.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2009-2010 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Require(s): BE 3700 and BE 3701

BE 4755 - Medical Devices
An introduction to medical devices used for diagnosis, monitoring, and treatment in clinical medicine. Topics covered include product planning, reliability, clinical trial design, regulatory as well as technical aspects of common medical devices.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
BE 4770 - Biomedical Microcontrollers
The focus of this course is to provide biomedical engineering students the necessary skills to develop microcontroller-based devices. Provides basic knowledge on computer programming languages, microcontrollers, digital circuits, and microcontroller development kits. Students will design and fabricate a microcontroller-based device using a microcontroller development kit for a specific biomedical application.
Credits: 3.0
Lec-Rec-Lab: (1-0-2)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate Pre-Requisite(s): BE 3700 and BE 3701

BE 4800 - Biomaterials Interfaces
This course introduces the students to the effects of topography and texture on the performance of biomaterials. Special emphasis is placed on tissue engineering scaffolds and microfabrication and nanofabrication techniques. Some of the topics also include self-organization of biomembranes and supramolecular systems, bioactive materials, and the molecular basis for surface recognition and masking.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2010-2011 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate Pre-Requisite(s): BE 3800

BE 4850 - Tissue Mechanics
This course integrates continuum mechanics, experiments, and computational methods to understand soft tissue mechanics. The first half of the course is dedicated to building continuum mechanics foundation, which will be used to formulate constitutive equations for arteries and the heart in the second half.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Senior Pre-Requisite(s): BE 3300

BE 4900 - Biomedical Design Fundamentals
Design considerations and professional practice issues are addressed. Ethics, regulatory affairs, and intellectual property are addressed within the context of the biomedical engineering profession. Modern tools of biomedical design are presented and applied to current problems.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior

BE 4901 - Biomedical Design Project I
Team approach is used to resolve a defined problem in biomedical engineering. Projects are selected and undertaken with faculty guidance and sponsor input. Must be senior project ready, as defined by major, substitutes for prerequisites.
Credits: 2.0
Lec-Rec-Lab: (0-1-3)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Biomedical Engineering; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior Pre-Requisite(s): BE 3500(C) and BE 3600 and (BE 3750 or MEEM 4180) or (BE 3350 and BE 3700 and BE 3701 and BE 3800) and BE 4900

BE 4910 - Biomedical Design Project II
Continuation of Biomedical Design Project I (BE4901) under faculty guidance. Emphasizes design and testing of prototypes. Requires work project notebooks, oral and written reports, and presentations.
Credits: 2.0
Lec-Rec-Lab: (0-1-3)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior Pre-Requisite(s): BE 4900 and BE 4901

BE 4930 - Biomedical Engineering Topics
Biomedical engineering courses will be offered on new or emerging technical subjects depending on student demand and faculty interest and expertise.
Credits: variable to 6.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Level(s): Graduate

Biological Sciences

BL 0600 - Clinical Practicum and Career Preparation Seminar
Presents an overview of hospital-based clinical practicum experiences and outlines pathways to national certification. Also addresses other career options for the clinical laboratory scientist. Credits do not count toward graduation.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science; May not be enrolled in one of the following Class(es): Freshman

BL 1010 - General Biology I
A discussion of the principles of ecology and organismal biology, using the theme of physiological ecology and adaptations. This course will emphasize biodiversity, scientific method, experimental design and written and oral presentation of results.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall

BL 1020 - General Biology II
Discussion of the major principles by which life is organized. Topics include scientific methods, biological chemistry, cell structure and organization, multicellular organization, diversity of organisms, energetics and photosynthesis, cellular reproduction genetics, gene structure and expression, and recombinant DNA.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Spring, Summer
Pre-Requisite(s): BL 1010

BL 1040 - Principles of Biology
Basic principles through which biological systems operate. Topics include cell biology, structure, and function, energy production, genetics, physiology, diversity, evolution, and ecology.
Credits: 4.0
Lec-Rec-Lab: (3-0-2)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following Major(s): Medical Laboratory Science, Biological Sciences

BL 1580 - First Year Experience in Biological Sciences
Introduction to fields and career opportunities in the biological sciences.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Biological Sciences; Must be enrolled in one of the following Class(es): Freshman, Sophomore

BL 1590 - First Year Experience in Health Professions
Introduction to various careers in the health professions. Discusses required course work, entrance exams, and other requirements for entry to the various fields. Guest lecturers include representatives of many health areas.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Fall
Restrictions: Must not be enrolled in one of the following Major(s): Pre-Professional; Must be enrolled in one of the following Class(es): Freshman, Sophomore

BL 1600 - First Year Experience in Medical Laboratory Science
Introduction to subdisciplines, the clinical practicum, career opportunities, and current issues in medical laboratory science.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall

BL 1710 - Medical Terminology
Autotutorial course covers the fundamentals of medical terminology, including recognition and use of common prefixes, roots, and suffixes, as well as single-syllable words. Exercises also include spelling and pronunciation.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall

BL 2000 - Biology of Movement and Meditation
Students will explore the science behind the practice of yoga, including poses, meditation, anatomy & physiology. Will read peer-reviewed literature excerpts regarding yoga research. Physical practice, no prior experience necessary. Yoga supplies required.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer

Undergraduate Course Descriptions, 2018-19, Page 6 of 103
BL 2001 - Valuing the Great Lakes
The Great Lakes are used as the subject to examine environmental issues. A combination of reading, lecture, and discussion will be used to study the unique ecology, biology, and history of the Great Lakes.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall

BL 2004 - Cooking and Nutrition
Students will learn the basics of nutritional science while preparing healthy meals. Emphasis will be on the physiology of food metabolism and critically examining food claims. Students will also learn to make appropriate choices regarding food and cooking techniques.
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman

BL 2100 - Principles of Bioinformatics
This course discusses the core concepts in bioinformatics and modern biology, math, and computer science combine to form the basis of bioinformatics. Students will be exposed to the applications of bioinformatics in analysis of DNA and protein sequences and be introduced to common methods for processing this data.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman

BL 2210 - Genetics Laboratory
A laboratory to complement BL2200. Covers applications of techniques used in genetics, including Mendelian analysis, tetrad analysis, karyotyping, DNA and protein electrophoresis, DNA and plasmid purification, transformation and restriction mapping, and PCR amplification of DNA.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Pre-Requisite(s): BL 2200(C)

BL 2410 - Basic Medical Laboratory Techniques
Introduces a variety of fundamental diagnostic procedures performed in a typical clinical laboratory.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall

BL 3000 - Job Shadowing in Health Professions
Designed for students to observe health professionals in clinical settings. Course will cover prerequisites, HIPPA rules, and shadowing etiquette. Students will complete at least 15 hours of shadowing arranged with the cooperating hospital or clinic.
Credits: 1.0; Repeatable to a Max of 3
Lec-Rec-Lab: (0-0-1)
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 2010(C)

BL 3006 - Graduate Health Program Application Preparation
Course will assist students with the application process for graduate health professional programs (medical, dental, PA, etc.). Topics covered will include writing about experiences, developing a personal statement, asking for letters of recommendation, and conducting interviews.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Spring
Restrictions: Permission of instructor required

BL 3010 - General Entomology
A study of the form, function, and diversity of insects along with their relationship to humans as pests and disease vectors and their role in the natural world.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 1010 or BL 1040

BL 3012 - Essential Cell Biology
This course will provide an understanding of cell structure and function with emphasis on eukaryotic cells. Topics include macromolecules, membranes, organelles, cytoskeleton, division, differentiation, cell-cell interactions, intracellular trafficking, protein sorting, cell signaling, and motility.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 1020 or BL 1040 and BL 2100
BL 3090 - Biological Concepts for Engineers
An introduction to biological principles centered on human and ecological concepts for engineers and scientists. Course topics include chemistry for biologists, cell structure and function, genetics and heredity, human anatomy and physiology, ecology and the environment, and plant biology and toxicology.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Environmental Engineering, Civil Engineering

BL 3190 - Evolution
A study of the patterns and processes of organic evolution. Topics include genetics of populations, mechanisms of deterministic and stochastic genetic change, history of life on earth, biogeography, molecular evolution, units of selection, sexual selection, speciation, and human evolution.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (BL 1010 or BL 1040)

BL 3210 - General Microbiology
Introduction to the general principles and techniques involved in the study of microorganisms, including bacteria, fungi, and viruses. Topics include cell structure and function, growth, metabolism, biodiversity, and interactions.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (BL 1020 or BL 1040) and (BL 2100 or CH 4710)

BL 3220 - Medical Mycology and Virology
Study of clinically important fungi and viruses.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring

BL 3230 - Medical Bacteriology
Study of pathogenic, identification, isolation and antimicrobial susceptibility testing of clinically important bacteria.
Credits: 4.0
Lec-Rec-Lab: (2-0-5)
Semesters Offered: Spring
Pre-Requisite(s): (3-0-0)

BL 3300 - Introduction to Genomics
Introduction to Genomics. Genome organization, mapping and characterization from humans and related organisms. Topics include hierarchical arrangement of genes, genome mapping, molecular markers of physical genome maps, genome sequencing, comparative genomics, analysis of important human genes and their products, and ethical and legal aspects of genomics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 3210

BL 3310 - Environmental Microbiology
General principles of microbiology, focusing on both the use and control of microorganisms. Topics include microbial structure, function, growth, metabolism, and diversity, as well as microbial involvement in water and waste treatment, waterborne diseases, and pollution control.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science, Biochemical Sciences, May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2200 or FW 3320

BL 3400 - Principles of Ecology
Study of both accepted and currently debated principles that describe ecological relationships at the organism, population, community, and ecosystem levels.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall
Pre-Requisite(s): BL 1020 or BL 1040

BL 3611 - Principles and Practice of Phlebotomy
This course covers the collection, processing, and transportation of specimens for laboratory analysis. Emphasis will be placed on hands-on phlebotomy training using proper techniques and precautions.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 2410

BL 3640 - General Immunology
Investigates the immune defense system that has evolved to protect vertebrates from invading pathogens and cancer. Covers general principals of innate and acquired immunity, immunodeficiency and autoimmune diseases, as well as transplantation immunology, and the role of apoptosis in lymphocyte maturation.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science, Pharmaceutical Chemistry, Biochem & Molec Biology-Bio Sc, Biomedical Engineering, Biological Sciences; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 1020 or BL 1040 or BL 2020 or BE 2400

BL 3780 - Medical Parasitology Laboratory
Stresses the visual identification of common human parasites.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science, Biological Sciences; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 1710 and BL 2410

BL 3782 - Writing Practicum in Biology
Students will develop and improve their skill level in searching for scientific literature, incorporating that into scientific writing, evaluating and incorporating the work of others, and develop critique skills for review of scientific source material and basic statistical methods.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Biological Sciences, Biochem & Molec Biology-Bio Sc, Bioinformatics; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 1710 and BL 2410

BL 3970 - Current Health Issues
Current topics relevant to human health, with emphasis on health maintenance and disease prevention and the role of government in these matters. Topics include: tobacco use and poor diet/physical inactivity, infectious disease, mental and behavioral health, environmental health issues, and health care, including health insurance and models of universal health coverage.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

BL 3990 - Biological Sciences Teaching Experience
Development of teaching skills through assisting in the instruction of a section of biological sciences laboratory. Students gain experience in leadership, group work, organization skills, laboratory preparation, and laboratory instruction.
Credits: variable to 4.0; Repeatable to a Max of 4
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

BL 4000 - Research in Biology
A literature and laboratory research problem that culminates in a written report on the work performed.
Credits: variable to 9.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

BL 4001 - Honors Research in Biology
A laboratory-based research problem that culminates in a written report and a seminar presentation on the work performed. Open only to biological sciences and clinical laboratory sciences majors accepted into the Honors in Biological Sciences program.
Credits: variable to 9.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required
BL 4008 - Summer Workshop on Genome Editing of Human Disease Genes
The course will focus on a survey and choice of disease-related genes, designing and constructing genome-editing tools, assaying for genome-editing efficiency, the detection and verification of the edited genes, and finally the production of stable disease-gene mutant cell lines.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

BL 4010 - Biochemistry I
Structure, biochemical properties, and function of important biomolecules such as proteins and nucleic acids. Introduces enzyme biochemistry (structure, function, catalysis, kinetics, and inhibition).
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer
Pre-Requisite(s): (BL 1020 or BL 1040 or BE 2400) and BL 2100 and (CH 2410 or CH 2420)

BL 4020 - Biochemistry II
Dynamic aspects of living systems. Broad exposure to cellular metabolic pathways, intermediary metabolism and its regulation and bioenergetics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring, Summer
Pre-Requisite(s): BL 4010

BL 4030 - Molecular Biology
Molecular biology of gene structure, expression and regulation. Also topics covering various molecular techniques and applications of these techniques and biotechnology.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (BL 1020 or BL 1040) and (BL 2100 or CH 4710)

BL 4034 - Community Ecology and Evolutionary Dynamics
This is an advanced course that looks at the study of ecology and evolutionary biology at the community level; how populations interact with the abiotic environment and each other to determine patterns of diversity, distribution, and abundance of plants and animals.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2014-2015 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 3400 and BL 3190

BL 4035 - Bioimaging
Hands-on training in operation of the scanning electron microscope (SEM). Students prepare biological specimens of their choice for observation. Half semester course.
Credits: 2.0
Lec-Rec-Lab: (0-2-6)
Semesters Offered: Spring - Offered alternate years beginning with the 2010-2011 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): BL 4035

BL 4036 - Ecology and Evolution of Interactions Between Plants and Insects
Plants and insects have played major roles in influencing each other's evolutionary diversification. We will examine the ecology and evolution of plant-insect interactions in basic and applied contexts. A solid foundation of tools in ecology and evolution will be established and class will include lectures and interactive discussions from readings of the primary literature.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2013-2014 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): BL 3400 and BL 3190

BL 4038 - Epigenetics
An introduction to the fundamentals of epigenetic control that is not encoded by genomic DNA sequences of an organism. Topics include major regulatory mechanisms including DNA methylation, histone modification, and non-coding RNA (ncRNA) mediated gene regulation.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 3300 or BL 4030

BL 4042 - Scanning Electron Microscopy of Biological Specimens
Hands-on training in operation of the scanning electron microscope (SEM). Students prepare biological specimens of their choice for observation. Successful completion of course is prerequisite to becoming a certified SEM operator in the ACMAL. Half semester course.
Credits: 2.0
Lec-Rec-Lab: (2-0-6)
Semesters Offered: Fall - Offered alternate years beginning with the 2010-2011 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): BL 4035

BL 4044 - Human Pathophysiology
Course will cover abnormal function (physiology) and investigate the signs and symptoms of major diseases in humans. Extension of Anatomy & Physiology by working through the systems of the human body. Course will include a clinical focus and case-study approach.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 2100 and BL 2020

BL 4052 - Fluorescence and Video Microscopy of Biological Specimens
Hands-on training in fluorescence microscopy and video microscopy. Students prepare biological specimens of their choice for observation. Half semester course.
Credits: 2.0
Lec-Rec-Lab: (0-2-6)
Semesters Offered: Fall - Offered alternate years beginning with the 2010-2011 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): BL 4035

BL 4062 - Transmission Electron Microscopy of Biological Specimens
Hands-on training in operation of the transmission electron microscope (TEM). Students prepare biological specimens of their choice for observation. Successful completion of course is prerequisite to becoming a certified TEM operator in the ACMAL. Half semester course.
Credits: 2.0
Lec-Rec-Lab: (2-0-6)
Semesters Offered: Spring - Offered alternate years beginning with the 2010-2011 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): BL 4035

BL 4070 - Environmental Toxicology
Introduction to the range of anthropogenic pollutants released into the environment. Concepts of bioaccumulation, biomagnification and environmental persistence, modes of toxicity and detoxification, transport and fate in aquatic and terrestrial ecosystems. Toxic equivalent factors and quotients, regulatory guidelines and practices.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (BL 1020 or BL 1040) and (CH 1150 and CH 1160)

BL 4090 - Tropical Island Biology
A survey of island biology, including marine and terrestrial habitats. Topics include formation of carbonate islands, geological history of the Bahamas, island plant communities, intertidal, grass bed, mangrove and coral reef communities. Special course fees. Consult department before enrolling. Completion of BL1020 or BL1040 desirable but not necessary.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Spring

BL 4100 - Special Topics in Biological Sciences
A study of recent developments in the biological sciences.
Credits: variable to 10.0; Repeatable to a Max of 10
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

BL 4120 - Environmental Remediation
Toxicology of major environmental pollutants, their dose-response relationships and fundamentals of environmental remediation. Topics include physical, chemical, and biological remediation methods and effect of environmental toxins on biological systems. Laboratory will involve the application of chemical and biological remediation techniques.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Fall - Offered alternate years beginning with the 2011-2012 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 1020 or BL 1040
BL 4140 - Plant Physiology
Physiology and biochemistry of plants. Emphasizes photosynthesis, plant hormones, water and nutrient relations, and light-regulated development.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2005-2006 academic year
Pre-Requisite(s): BL 2160 and CH 2420

BL 4145 - Plant-Microbe Interactions
Interactions between plants and microorganisms in the environment. Topics include microbial virulence, signaling, gene expression, beneficial interactions and disease resistance in plants. Laboratory will focus on plant biochemical and microbiological methods as they relate to environmental problems.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Fall - Offered alternate years beginning with the 2012-2013 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2200

BL 4200 - Microbial Physiology
Structure and function of microorganisms, with emphasis on mechanisms for responding to changing environmental and nutritional conditions.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): BL 3210 or BL 3310

BL 4370 - Advanced Cell Biology
Celebration of the commonalities of life as exhibited in the basic building block of organisms - the cell. Course topics include details of basic genetic mechanisms, cell structure and function, and an examination of cells in their social context.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): BL 2200 and CH 2420

BL 4380 - Cardiopulmonary Physiology
Using a problem-based learning approach, course examines the physiology of the human body. In-class case-study analyses provide in-depth learning about the cardiovascular and pulmonary systems and their relationship with other organ systems. Promotes development of problem-solving skills.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): BL 2200

BL 4421 - Lake Superior Exploration
A field intensive course with significant time spent on a research vessel (RV Agassiz or other) where students will learn the use of a variety of state-of-the-art techniques to characterize biological communities and measure important physical and biological processes.
Credits: 3.0
Lec-Rec-Lab: (4-0-6)
Semesters Offered: Summer - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior

BL 4440 - Fish Biology
Fishes and their habitat, native and exotic fishes of the Great Lakes region, and ocean fishery resources will be examined. Basic topics in ichthyology and fish ecology, evolution, genetics, reproduction strategies and identification of early life stages, fish community structure, food webs and dynamics. Laboratory exercises on sampling, identification and classification of fishes and basic fish anatomy and discussion of scientific papers relevant to the subject material.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 1020 or BL 1040

BL 4447 - Stream Ecology
Field course combining river and stream ecosystem and foodweb study with fishes in lake systems. Students will be exposed to research methods used in lakes for comprehensive abiotic and biotic understanding.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Summer - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 1010 or BL 1040 or BL 3400

BL 4450 - Limnology
The study of biological, physical, and chemical processes of freshwater eco systems using a watershed perspective, with emphasis on local lakes.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 3400 and CH 1122 or (CH 1160 and CH 1161)

BL 4465 - Biological Oceanography
An overview of ocean environments and marine life. Topics include: trophic level interactions, nutrient cycling, ecology of plankton, invertebrates, fish, mammal and bird resources, and human influences on marine ecosystems. Will cover basic water chemistry and light in oceans.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 1010 or BL 1040 or BL 3080

BL 4510 - Senior Capstone Experience
Reading, interpreting, and integrating information from the primary literature of biological sciences. Emphasizes oral and written presentation skills.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Biological Sciences, Biochem & Molec Biology-Bio Sc, Bioinformatics; May not be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): BL 4000(C) or BL 4001(C) or BL 4995(C)

BL 4550 - Clinical Chemistry
A study of clinical biochemistry of the human body. Theory and practical applications used in routine analysis of body fluids. Includes the study of electrolyte balance, acid base balance, and the functions of major organs and systems.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Biological Sciences, Biochem & Molec Biology-Bio Sc, Bioinformatics; Must be enrolled in one of the following Class(es): Junior
Pre-Requisite(s): BL 2020 and BL 3640

BL 4560 - Medical Laboratory Science Medical Practicum I
Practical and didactic training in clinical chemistry, immunopathology, and medical microbiology under the direction of National Accrediting Agency for the Clinical Laboratory Sciences (NAACLS)-approved/accredited hospital internship program personnel.
Credits: 15.0
Lec-Rec-Lab: (15-0-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science
Pre-Requisite(s): BL 2020 and BL 3640

BL 4610 - Medical Laboratory Science Medical Practicum II
Practical and didactic training in hematology, urinalysis, and immunohematology under the direction of National Accrediting Agency for the Clinical Laboratory Sciences (NAACLS)-approved/accredited hospital internship program personnel.
Credits: 15.0
Lec-Rec-Lab: (15-0-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science
Pre-Requisite(s): BL 4610
BL 4612 - Medical Laboratory Science University Clinical Practicum
Practical and didactic training in Medical Laboratory Science for students who have completed the NAACLS accredited MLS 4+1 degree. Course is under direction of the MLS Practicum Coordinator and conducted in affiliated hospitals. Upon completion, students are eligible to sit for the ASCP Board Registry Exam.
Credits: 10.0
Lec-Rec-Lab: (0-0-10)
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required

BL 4630 - Cytotechnology Practicum I
Practical and didactic training in recognition of normal cells and cellular changes, particularly malignant, in the female reproductive tract, respiratory tract, and gastrointestinal tract under the direction of Committee on Accreditation of Allied Health Education Programs (CAAHEP)-approved/accredited hospital internship program personnel. Acceptance by a CAAHEP-approved/accredited cytotechnology hospital internship program required.
Credits: 14.0
Lec-Rec-Lab: (14-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science

BL 4631 - Cytotechnology Practicum II
Practical and didactic training in normal cell identification and recognition of cellular changes with emphasis on the diagnosis of cancer in the urinary, excretory, and neurological systems under the direction of Committee on Accreditation of Allied Health Education Programs (CAAHEP)-approved/accredited hospital internship program personnel.
Credits: 14.0
Lec-Rec-Lab: (14-0-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science

BL 4640 - Clinical Immunology & Serology
Integrates basic and clinical immunological principles as well as outlines the diagnosis and evaluation of immune disorders and selected infectious diseases.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science; Biological Sciences; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 4630

BL 4660 - Current Topics in Medical Laboratory Science
Recent developments in Clinical Laboratory Science.
Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required

BL 4720 - Hematology and Hemostasis
Theory and laboratory applications. Emphasis will be placed on hematopoiesis, normal and disease states affecting blood cells and coagulation processes. The lab will focus on cell morphology and practical testing applications.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science, Biological Sciences; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): BL 4730(C)

BL 4725 - Medical Laboratory Instrumentation
An overview of the principles, applications, and selection of instruments used in medical laboratory. Lab work includes operation, maintenance, and trouble shooting to obtain experience working with power supplies, centrifuges, spectrophotometers, pH meters, osmometers, radiation counters, and chemistry analyzers, blood cell counters, and other instruments commonly used in a diagnostic laboratory.
Credits: 2.0
Lec-Rec-Lab: (1-0-3)
Semesters Offered: Spring

BL 4752 - Cancer Biology
Emphasis on characteristic genetic, molecular, and cellular changes leading to cancer. Topics will include the role of tumor viruses, oncogenes, tumor suppressors, immortalization, apoptosis, and angiogenesis in cancer initiation and/or progression. Consideration of current therapies and future directions for treatment.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): BL 3012 or BL 4370 or BE 2400

BL 4800 - Molecular Diagnostics
This course provides the scientific background behind modern molecular techniques applied in the diagnosis of human diseases. Topics to be covered include nucleic acid structure and function as well as introduction to nucleic acid characterization techniques used in disease diagnosis and genetic disorders.
Credits: 5.0
Lec-Rec-Lab: (3-0-2)
Semesters Offered: Fall
Pre-Requisite(s): BL 2200

BL 4810 - Medical Laboratory Science Core Concept Integration and Application
SML Program Capstone Course. Review, and subsequently learn to integrate and apply, clinical core course material. Assignments include collaborative exercises involving development, peer review, and presentation of worksheets, case studies, and instrument evaluations, as well as other interactive learning activities.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2200 and BL 4030(C)

BL 4980 - Medical Laboratory Science Core Concept Integration and Application
SML Program Capstone Course. Review, and subsequently learn to integrate and apply, clinical core course material. Assignments include collaborative exercises involving development, peer review, and presentation of worksheets, case studies, and instrument evaluations, as well as other interactive learning activities.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Medical Laboratory Science; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2200 and BL 4030(C)

BL 4995 - Research in Biochemistry
A literature and laboratory research problem in biochemistry that culminates in a written report on the work performed.
Credits: variable to 6.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

Business
BUS 1100 - Introduction to Business
Introduction to planning, organizing, decision-making, leadership and control in a business. Business disciplines of accounting, finance, information systems, management, marketing, and operations are introduced, along with discussions of business ethics and social responsibility.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring

BUS 2100 - Business Statistics
Introduction to basic concepts and methods of probability and statistics, including the following topics: collection, description and presentation of data, probability, random variables, sampling, probability distributions, estimation and hypothesis testing, ANOVA, and selected non-parametric techniques.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): MA 1135 or MA 1190 or MA 1161
BUS 2200 - Business Law
Provides an understanding of the legal basis of contracts and their enforcement in the areas of general contracts, contracts of commercial sales and of agency, and commercial paper.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring

BUS 2400 - Quantitative Problem Solving
Stresses development of quantitative decision and analysis skills to solve problems with cases, exercises, simulations, and mathematical modeling. Topics include regression analysis, decision analysis, stochastic environments, data sources and errors, utility theory risk preference, linear programming, and simulation analysis.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): BUS 2100 or MA 2710 or MA 2720 or MA 3710 or MA 3720

BUS 3900 - Business Internship
A practical approach to business problem solving. Requires a report on work activity upon completion of the internship.
Credits: variable to 4.0; Repeatable to a Max of 4
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; Must be enrolled in one of the following College(s): School of Business & Economics

BUS 4900 - Research Projects
Under the general guidance of a faculty member, students read, conduct research, and prepare reports and papers as required. The SBE's Curriculum Committee must approve the subject of the proposed project.
Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor and department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

BUS 4950 - Business Project
Students work individually or in a team on a project under the guidance of a faculty advisor. The student(s) analyze a problem, develop a project plan, summarize findings, and make recommendations.
Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

BUS 4990 - Special Topics in Business
Business topics of interest to students and faculty.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

BUS 4991 - Business Development Experience I
Provides students with hands-on entrepreneurial learning experience by placing them in close proximity of real world entrepreneurs and innovators. Students ascertain commercial viabilities of intellectual property, senior design or enterprise projects, independent new ventures or early stage business incubators.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): BUS 1100 and BUS 2300 and ACC 2000 and ACC 2100 and BUS 2200 and MGT 2000 and MIS 2000 and FIN 3000 and OSM 3000 and MGT 3000 or MGT 3000

BUS 4992 - Business Development Experience II
Completion and presentation of the business plan and recommendations on the commercial viability of intellectual properties, senior design or enterprise projects, independent new ventures, or early stage incubators.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): BUS 4991

CEE 1001 - Sustainability and Civil Engineering Practice
Course will focus on characterizing the motivation for and principles of sustainable engineering and provide an introduction to tools used in sustainable design. Course topics follow a logical and linear progression which includes the societal context, scientific motivation, and application of sustainable practices in civil engineering.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Spring

CEE 1501 - Experiences in Environmental Engineering
Provides a series of activities that explore the field of environmental engineering. Through completion of the course, students will gain fundamental experiences with the skills, knowledge, and attitudes needed to solve the complex environmental problems needing solutions from today's environmental engineers.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall

CEE 3010 - Civil Engineering Materials
Covers properties and behavior of typical civil engineering materials, including wood, metals, aggregates, asphalt cement concrete, portland cement concrete, and composites. Laboratory exercises demonstrate selected engineering mechanics principles, including elastic, inelastic, and time-dependent material behavior. Additional topics include testing techniques, materials standards, report writing, and presentation of experimental data.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring
Pre-Requisite(s): ENGR 2120 or MEEM 2150

CEE 3202 - Structural Analysis
Introduction to structural concepts and techniques for analyzing trusses, determinate and indeterminate beams, and frame structures. Apply concepts from statics and mechanics of materials to determine internal forces and deflections of structural members and systems, including loads and load paths.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): (ENG 2120 or MEEM 2150) and (MA 2320 or MA 2321 or MA 2330)

CEE 3331 - Professional Practice
Professional expectations of civil and environmental engineers demonstrated through readings, discussion, and writing. Topics include the consequences of engineering, design issues, legal aspects, ethical considerations, government requirements, management, leadership, and contract issues.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

CEE 3332 - Fundamentals of Construction Engineering
Introduction to concepts required by professionals involved in the construction industry. Includes contracts, bidding, estimating, scheduling, cash flow, safety, labor issues, equipment ownership, and productivity.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman

CEE 3401 - Transportation Engineering
Introduction to transportation in the United States, transportation mode characteristics and applications, highway geometrics and design standards, pavement design and management.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman

CEE 3400 - Introduction to Rail Transportation
Introduction to topics related to rail transportation and industry. Overview of North American passenger and freight railroads in the past and today, system components (railroad track, rolling stock, and signals/communications), organizations, careers and safety, and technology and sustainability.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman

CEE 3501 - Environmental Engineering Fundamentals
Basic principles and calculations for environmental engineering. Covers application of mass balance, energy balance, and physical/chemical/biological principles to water and wastewater treatment, surface water quality, air quality, solid waste management, and groundwater quality.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): MA 2160 and CH 1112 or (CH 1150 and CH 1151)
Lec-Rec-Lab: (3-0-2)

Semesters Offered: Fall, Spring, Summer

Pre-Requisite(s): GE 2000 and (MEEM 2150 or ENG 2120) and ENG 3200

Credits: 3.0

Lec-Rec-Lab: (0-2-2)

Semesters Offered: Fall

Pre-Requisite(s): CE 3202 or CEE 3202

Credits: 3.0
CEE 4404 - Railroad Engineering
Rail transportation systems require infrastructure, vehicles, motive power and energy, and control systems to move goods and people. This multi-disciplinary course provides students with understanding of these system components and related engineering and technology enabling efficient operation of today's system. 
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): CEE 3490 or CE 4490

CEE 4406 - Airport Planning and Design
Introduction to the air transportation system, airport planning studies, demand forecasting, aircraft characteristics, runway requirements, airport layout and design. Also includes environmental impacts, airport capacity and operations, terminal and ground access planning and analysis. 
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring

CEE 4407 - Transportation Design
Introduction to computer aided geometric design of highways and railways. Covers design principles and use of standards for horizontal and vertical alignments and cross sections, including road intersections, railway turnouts and grade crossings. Students develop engineering drawings and related cost estimates for road/rail projects.
Credits: 4.0
Lec-Rec-Lab: (3-0-2)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): CEE 3401 or CEE 3401 and SU 2000

CEE 4410 - Transportation Planning
An introduction to urban transportation planning, planning data collection, transportation planning models, and development and evaluation of transportation plans. Includes extensive use of transportation planning software to evaluate transportation plans in multimodal networks.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (CE 3401 or CEE 3401) and SU 2000

CEE 4501 - Environmental Engineering Chemical Processes
Application of chemistry, conservation principles, and mathematics to the analysis of chemical processes occurring in natural and engineered environments. Topics include acid-base phenomena, the carbonate system, precipitation/dissolution, redox chemistry, diffusion, mass transfer, and applications to engineering design.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall
Pre-Requisite(s): (ENVE 3501 or CEE 3501 or ENVE 3503 or CEE 3503) and (ENVE 3502 or CEE 3502) and ENG 3200

CEE 4502 - Wastewater Treatment Principles and Design
Principles of physical, chemical, and biological processes employed in wastewater treatment. Design of selected individual units within wastewater treatment systems.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): ENVE 3501 or CEE 3501 or ENVE 3503 or CEE 3503

CEE 4503 - Drinking Water Treatment Principles and Design
Provides an overview of the principles and design of municipal water treatment practices. Understand the physical and chemical processes employed in water treatment. Design individual unit processes with a view toward integration into complete treatment systems.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): ENVE 3501 or ENVE 3503 or CEE 3501 or CEE 3503

CEE 4504 - Air Quality Engineering and Science
Overview of air quality regulation in the U.S. and world, including basic concepts of atmospheric chemistry and transport; fugitive, point, and area emissions; principles and tradeoffs of operation and design of air pollution control systems; and application of air quality models.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): ENVE 3501 or ENVE 3503 or CEE 3501 or CEE 3503

CEE 4505 - Surface Water Quality Engineering
Develops the scientific basis for water quality management in lakes and rivers. Considers the origin, behavior, and fate of nutrients and toxic substances. Introduces engineered approaches for lake management, including mass balance modeling. Presents techniques for water quality restoration and the legal framework supporting pollution control.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall
Pre-Requisite(s): ENVE 3501 or ENVE 3503 or CEE 3501 or CEE 3503

CEE 4506 - Application of Sustainability Principles to Engineering Practice
Study of sustainability, engineering and design including systems analysis, life cycle analysis, biogeochemical cycles, energy balances, energy conservation and development, models for sustainable engineering, environmental regulations as sustainability instruments, sustainability in the build environment, and industrial ecology and compliance.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): ENVE 3501 or ENVE 3503 or CEE 3501 or CEE 3503

CEE 4507 - Water Distribution and Wastewater Collection Design
Application of basic principles in civil and environmental engineering to the analysis and design of water distribution systems, wastewater collection systems, and their appurtenances.
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Spring
Pre-Requisite(s): (ENVE 3501 or CEE 3501 or ENVE 3503 or CEE 3503) and (CE 3520 or CEE 3560)

CEE 4509 - Environmental Process & Simulation
Provides a rigorous hands-on introduction to process control, laboratory and pilot-plant experimentation focused on physical, chemical and biological treatment systems used in environmental engineering.
Credits: 2.0
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Spring
Pre-Requisite(s): (ENVE 3501 or CEE 3501 or ENVE 3503 or CEE 3503) and ENG 3200 and (ENVE 4502 or CEE 4502 and ENVE 4503 or CEE 4503)

CEE 4510 - Baccalaureate Thesis
Independent baccalaureate research project performed under the supervision of one or more faculty.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

CEE 4511 - Solid and Hazardous Waste Engineering
Characterization, treatment, separation, and disposal of solid and hazardous wastes. Science and engineering for the management of solid and hazardous waste problems. Technologies discussed include incineration, landfiling, vapor extraction, soil washing, and bioremediation.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): ENVE 3501 or CEE 3501 or ENVE 3503 or CEE 3503

CEE 4512 - Aquatic Biogeochemistry
Biogeochemistry. Modeling as an integrative tool is stressed.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): (ENVE 4504 or CEE 4504 or ENVE 4501 or CEE 4501 or CH 3510)

CEE 4515 - Atmospheric Chemistry
Study of the photochemical processes governing the composition of the troposphere and stratosphere, with application to air pollution and climate change. Covers radical chain reaction cycles, heterogeneous chemistry, atmospheric radiative transfer, and measurement techniques for atmospheric gases.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): ENVE 4504 or CEE 4504 or ENVE 4501 or CEE 4501 or CH 3510

CEE 4518 - Aquatic Biogeochemistry
Covers interactions among chemical, biological, and physical processes within aquatic ecosystems as well as role of aquatic ecosystems in global biogeochemistry. Modeling as an integrative tool is stressed.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2014-2015 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (ENVE 4501(C) or CEE 4501(C)) and (ENVE 4505(C) or CEE 4505(C))
CEE 4528 - Global Biogeochemistry
This course gives an overview of important biogeochemical processes occurring in land, air, and water. An emphasis is put on modeling as an integrating tool.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): ENVE 4501(C) or CEE 4501(C)

CEE 4620 - River and Floodplain Hydraulics
Analysis of open channel systems, including natural channels, designed channels, flow transitions, non-uniform flow, and unsteady flow.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): CE 3620 or CEE 3620

CEE 4640 - Stormwater Management and Low Impact Development
Design techniques for stormwater collection, conveyance, infiltration, and detention storage systems are discussed, both traditional stormwater management systems and newer approaches based on the philosophy of low impact development (LID) that seek not to alter the natural ecology of a site.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Summer
Pre-Requisite(s): CE 3620 or CEE 3620

CEE 4655 - Stream Restoration
Basic mechanics of the transport of sediments in natural systems, including tractive forces and geomorphic functions.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): CE 3620 or CEE 3620

CEE 4780 - Optimization Methods in Civil and Environmental Engineering
Decision analysis and optimization techniques, including linear programming, nonlinear programming, and dynamic programming. Computer-based solutions of design problems in various civil and environmental engineering specialty areas are considered.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MA 2160 and (MA 2320 or MA 2321 or MA 2330)

CEE 4820 - Foundation Engineering
Applies the fundamentals learned in CE3810 to problems in geotechnical engineering. Learn the procedures used to design footings, piled foundations, retaining walls, marine structures, and slopes. Computational laboratory reinforces lectures; students have direct access to the instructor as the design is being developed.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Fall
Pre-Requisite(s): CE 3810 or CEE 3810

CEE 4830 - Geosynthetics Engineering
Geosynthetic materials are grouped by mechanical characteristics and engineering use. They are widely used in highway, landfill, and embankment design. Develop designs for filters, soil separators, reinforced earth, and impermeable membranes. Also learn when using a geotextile is appropriate.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): CE 3810 or CEE 3810

CEE 4850 - Rock Engineering for Civil Engineers
This course focuses on the applied behavior of rock encountered primarily in civil engineering projects. Topics include rock classification, rock durability, rock mass strength classification, use of stereo nets, rock reinforcement, blasting, rock socket application and bearing capacity on rock.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2009-2010 academic year
Pre-Requisite(s): CE 3810 or CEE 3810

CEE 4900 - Engineering Design Project I
An engineering design project related to civil and environmental engineering. Not available to students who have taken CE4905. Students must complete both CE4900 and CE4910 to fulfill senior design requirements. Must be senior project ready as defined by major department.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

CEE 4905 - Engineering Design Project
An engineering design project related to civil and environmental engineering. Not available to students who have taken CE4900 or CE4910. (Senior project ready as defined by major substitutes for prerequisites)
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

CEE 4910 - Engineering Design Project II
Continuation of CE4900. Not available to students who have taken CE4905. Students must complete both CE4900 and CE4910 to fulfill senior design requirements. Senior project ready as defined by major substitutes for prerequisites.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring, Summer
Pre-Requisite(s): CE 4900 or CEE 4900

CEE 4915 - International Engineering Field Experience
An engineering design project that incorporates an international experience. Must be taken in conjunction with CE4916 in order to fulfill senior design requirements. Must be senior project ready as defined by major department.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Class(es): Senior

CEE 4916 - International Senior Design Field Project
An engineering design project that incorporates an international experience. Must be taken in conjunction with CE4915 in order to fulfill senior design requirements. Senior project ready as defined by major substitutes for prerequisites.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): CE 4915 or CEE 4915

CEE 4920 - Civil Engineering Independent Study
Approved research or design project in civil engineering, originating with an individual student or assigned by the instructor.
Credits: variable to 3.0; Repeatable to a Max of 3
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

CEE 4930 - Environmental Engineering Independent Study
Approved research or design project in environmental engineering, originating with an individual student or assigned by the instructor.
Credits: variable to 3.0; Repeatable to a Max of 3
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

CEE 4990 - Special Topics in Civil and Environmental Engineering
Topics of special interest in civil or environmental engineering.
Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer

CEE 4993 - Engineering with Developing Communities
Study of applying appropriate, community-based, and sustainable engineering in developing communities. Concepts of human-centered design and sustainable development are covered. Topics are drawn from several areas of engineering, including water and wastewater treatment, construction materials, solid waste, energy, and information systems.
Credits: 2.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: On Demand
Pre-Requisite(s): (ENG 2120 or MEEM 2150) and (CE 3620 or CEE 3620)

Chemistry

CH 0100 - Chemistry Coaching
Scheduled weekly individual or study group session with an experienced chemistry coach to improve mastery of chemistry material, problem-solving skills, and awareness of expectations in first year chemistry.
Credits: 0.0; May be repeated
Semesters Offered: Fall, Spring, Summer
CH 0200 - Organic Chemistry Coaching
Scheduled weekly individual or study group session with an experienced organic chemistry coach to improve understanding of organic structures, develop skills for predicting products of organic reactions, the drawing of mechanisms and determining synthesis strategies as well as awareness of expectations in a specific discipline of chemistry.
Credits: 0.0; May be repeated.
Semesters Offered: Fall, Spring

CH 1000 - Introductory Chemistry
Introduces fundamental concepts of chemistry to students who are interested in how chemical processes shape the world. Covers fundamental chemical concepts and integrates applications of chemistry that are relevant to the global community. High school chemistry is not required.
Credits: 3.0
Lec-Rec-Lab: (3-1-3)
Semesters Offered: Fall, Summer

CH 1112 - University Chemistry - Studio Laboratory I
Introduces experimental and theoretical chemical concepts from a hands-on, inquiry-based perspective. Emphasis is placed on experimental methods, reactions and stoichiometry, states of matter, thermochemistry, periodicity and bonding, solutions, and kinetics.
Credits: 5.0
Lec-Rec-Lab: (3-1-3)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Biochem & Molec Biology-Chem, Pharmaceutical Chemistry, Chemistry, Cheminformatics
Pre-Requisite(s): MA 1031(C) or MA 1032(C)

CH 1122 - University Chemistry - Studio Laboratory II
Introduces more complex experimental and theoretical concepts from a hands-on, inquiry-based perspective. Emphasis is on experimental methods, kinetics, equilibria, thermodynamics, electrochemistry, and special topics which may include chemical analysis, organic synthesis, computational methods, and biochemistry.
Credits: 5.0
Lec-Rec-Lab: (3-1-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Biochem & Molec Biology-Chem, Pharmaceutical Chemistry, Chemistry, Cheminformatics
Pre-Requisite(s): CH 1112 or (CH 1150 and CH 1151)

CH 1130 - Professional Development for Chemists I: Orientation
Required for all entering chemistry majors. Intro to department, cover writing, technical software, library resources, reading and writing reports, academic integrity, career services, and other orientation topics. First course in a four-part professional development sequence.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Biochem & Molec Biology-Chem, Pharmaceutical Chemistry, Chemistry, Cheminformatics

CH 1150 - University Chemistry I
Introduces the foundations of chemistry, including electronic structure of atoms and molecules, intermolecular forces, states of matter, chemical reactions, organic chemistry, chemical equilibria, kinetics, and acid-base chemistry. Includes laboratory component that emphasizes lecture components.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Co-Requisite(s): CH 1151
Pre-Requisite(s): MA 1031(C) or MA 1032(C) or MA 1160(C) or MA 1161(C) or MA 1135(C) or ALEKS Math Placement >= 56 or CEEB Calculus AB >= 2 or CEEB Calculus BC >= 2 or CEEB Calculus AB Subscore >= 2

CH 1151 - University Chemistry Lab I
Laboratory to accompany CH1150.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)

CH 1153 - University Chem Recitation I
Problem solving session to support University Chemistry I - CH1150.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring, Summer
Co-Requisite(s): CH 1150
Pre-Requisite(s): MA 1031(C) or MA 1032(C) or MA 1160(C) or MA 1161(C) or MA 1135(C) or ALEKS Math Placement >= 56 or CEEB Calculus AB >= 2 or CEEB Calculus BC >= 2 or CEEB Calculus AB Subscore >= 2

CH 1160 - University Chemistry II
A continuation of CH 1150. Introduces more complex concepts in chemistry, including kinetics, chemical equilibria, acid-base equilibria, thermodynamics, electrochemistry, and chemical analysis. Additional topics may include chemistry of the metals and non-metals, biochemical systems, and nuclear chemistry. Includes laboratory component that emphasizes lecture concepts.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Co-Requisite(s): CH 1161
Pre-Requisite(s): CH 1112 or (CH 1150 and CH 1151)

CH 1161 - University Chemistry Laboratory II
Laboratory to accompany CH1160.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer
Co-Requisite(s): CH 1160
Pre-Requisite(s): CH 1112 or (CH 1150 and CH 1151)

CH 1163 - Problem Solving in University Chemistry II - CH1160
Problem solving session to support University Chemistry II - CH1160.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring, Summer
Co-Requisite(s): CH 1160
Pre-Requisite(s): CH 1150 and CH 1151

CH 2130 - Professional Development for Chemists 2: Career Planning
Continuation from CH1130 and provides a more in-depth review of topics related to career planning, such as resume writing, interviewing, selecting research topics, research integrity, reading and writing reports, applying for scholarships and grants, and oral communication skills.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Biochem & Molec Biology-Chem, Pharmaceutical Chemistry, Chemistry, Cheminformatics
Pre-Requisite(s): CH 1130

CH 2212 - Quantitative Analysis
Measurements and calculations relevant to volumetric and gravimetric analysis as well as electrochemistry and separations. Error analysis and statistical treatment of data. In the laboratory, introduces classical and contemporary techniques that require high quality measurements.
Credits: 5.0
Lec-Rec-Lab: (3-0-6)
Semesters Offered: Spring
Pre-Requisite(s): CH 1122 or (CH 1160 and CH 1161)

CH 2410 - Organic Chemistry I
A study of the chemistry of carbon compounds. Review of hybrid orbitals, covalent bonding, and resonance. Introduction to nomenclature, stereochemistry, mass spectrometry and infrared spectroscopy, functional group chemistry based on reaction mechanisms, and multi-step synthesis.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer
Pre-Requisite(s): CH 1122 or (CH 1160 and CH 1161)

CH 2411 - Organic Chemistry Lab I
Laboratory to accompany CH2410.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Summer
Pre-Requisite(s): CH 2410 and CH 1122 or (CH 1160 and CH 1161)

CH 2420 - Organic Chemistry II
Covers more functional group chemistry based on reaction mechanisms; more involved multi-step synthesis; introduction to nuclear magnetic resonance spectroscopy; introduction to carbohydrates, amino acids, proteins, nucleic acids; and topics of specialized interest.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring, Summer
Pre-Requisite(s): CH 2410

CH 2421 - Organic Chemistry Lab II
Laboratory to accompany CH2420.
Credits: 2.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring, Summer
Pre-Requisite(s): CH 2411 and CH 2420(C)
CH 3130 - Professional Development for Chemists 3: Communication
Continuation from CH2130 and provides a more in-depth review of topics related to refining written and oral communication skills, including advanced library resources, reading and writing reports, and seminar attendance.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Biochem & Molec Biology-Chem, Pharmaceutical Chemistry, Chemistry, Cheminformatics
Pre-Requisite(s): CH 2130

CH 3510 - Physical Chemistry I - Thermodynamics, Equilibrium and Kinetics
Ideal and non-ideal gas laws, the kinetic theory of gases, equations of state, liquid-vapor equilibrium, the laws of thermodynamics, solid-liquid-vapor equilibria, the chemical potential, chemical equilibrium, electrochemistry, the phase rule, phase diagrams, and chemical kinetics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): CH 1122 or (CH 1160 and CH 1161) and MA 2160 and PH 2200(C)

CH 3511 - Physical Chemistry Lab I
Laboratory to supplement CH3510.
Credits: 2.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): CH 3510(C)

CH 3520 - Physical Chemistry II - Molecular Structure
Continuation of CH3510. Covers solid-state chemistry, surface chemistry, atomic and molecular spectroscopy and structure, chemical applications of group theory, valence, the periodic table, elements of quantum mechanics, and statistical thermodynamics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): CH 3510(C)

CH 3521 - Physical Chemistry Lab II
Laboratory to supplement CH3520.
Credits: 2.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring
Pre-Requisite(s): CH 3520(C)

CH 3540 - Biophysical Chemistry
Examines fundamental physical principles underlying complex biological systems in order to understand the interactions and behaviors found in biological, biochemical, and physical systems. Topics include macromolecules in aqueous environments, spectroscopy and structure determination, kinetics, membranes, and transport phenomena.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): (BL 1020 or BL 1040) and CH 1122 or (CH 1160 and CH 1161) and MA 2160 and PH 2200

CH 3541 - Biophysical Chemistry Laboratory
Examines the physical methods employed in the study of biological systems, including structure determination, spectroscopy, microscopy, imaging, and modeling. The core objective is application of the fundamentals developed in the Biophysical Chemistry course to systems of biological relevance.
Credits: 2.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring
Co-Requisite(s): CH 3540

CH 4110 - Pharmaceutical Chemistry: Drug Action
Focuses on structural and mechanistic approaches to pharmaceuticals and drug action. General principles of absorption, distribution, action, metabolism and toxicity of drugs will be presented followed by action of drug classes such as antibiotics, cardiovascular, and anti-inflammatory drugs.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 4010 or CH 4710

CH 4120 - Pharmaceutical Chemistry: Drug Design
Focuses on the important concepts in the design and synthesis of drugs. Rational basis for drug design including synthetic, computational and biochemical concepts will be discussed. Topics include structure-activity relationships, synthesis and reaction mechanism, and case studies of drugs.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): CH 2420

CH 4130 - Professional Development for Chemists 4: Senior Seminar
Continuation from CH3130 with emphasis on advanced topics of written and oral communication skills.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Biochem & Molec Biology-Chem, Pharmaceutical Chemistry, Chemistry, Cheminformatics
Pre-Requisite(s): CH 3130

CH 4140 - Introduction to Pharmaceutical Analysis
This course will present a systematic introduction to chemical analysis of pharmaceutical raw materials, finished pharmaceutical products, and of drugs in biological fluids, which are carried out in pharmaceutical laboratories worldwide.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): CH 2410

CH 4190 - Current Topics in Pharmaceutical Chemistry
Discussion of recent topics in pharmaceutical chemistry.
Credits: variable to 3.0; Repeatable to a Max of 12
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): CH 4210

CH 4210 - Instrumental Analysis
The lecture portion of CH4212; not open to undergraduate chemistry majors.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): CH 2212 and CH 3510(C) and CH 3511(C)

CH 4212 - Instrumental Analysis
Chemical instrumentation applied to organic and inorganic analysis with emphasis on chromatography and spectroscopy.
Credits: 5.0
Lec-Rec-Lab: (3-0-6)
Semesters Offered: Fall
Pre-Requisite(s): CH 2212 and CH 3510(C) and CH 3511(C)

CH 4222 - Bioanalytical Chemistry
An overview of modern analytical and instrumental techniques with emphasis on approaches relevant to measurements in biochemistry. Theory and methods of chromatographic separation methods, biomolecule quantification and electrophoretic characterization. Error analysis and statistical treatment of data also covered.
Credits: 5.0
Lec-Rec-Lab: (3-0-6)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Major(s): Cheminformatics, Chemistry; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): CH 1122 or (CH 1160 and CH 1161) and CH 3510(C) and CH 3511(C)

CH 4240 - Advanced Mass Spectrometry
Advanced instrumentation and methods are the focus of this course. Design of various mass analyzers and their advantages and limitations will be reviewed. Advanced identification methods such as tandem mass spectrometric analysis and exact mass analysis will be discussed.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Co-Requisite(s): CH 4241
Pre-Requisite(s): CH 4212 or CH 4222
CH 4241 - Advanced Mass Spectrometry Laboratory
Students will learn how to perform mass spectrometry (MS) experiments to identify and quantify molecules. The experiments will include the following method approaches: electrospray ionization (ESI), matrix associated laser desorption (MALDI) and tandem MS analysis (MS/MS).
Credits: 3.0
Lec-Rec-Lab: (0-0-1)
Semesters Offered: Spring - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Co-Requisite(s): CH 4240
Pre-Requisite(s): CH 4212 or CH 4222

CH 4290 - Current Topics in Analytical Chemistry
Discussion of recent topics in analytical chemistry.
Credits: variable to 3.0; Repeatable to a Max of 12
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman

CH 4310 - Inorganic Chemistry I
Descriptive chemistry of the main group elements with some emphasis on the structure and theory of bonding with transition metal complexes. Examines bonding, physical and chemical properties, structure, and reactions of the chemical elements and their compounds.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): CH 3520

CH 4311 - Inorganic Chemistry Laboratory
Laboratory preparations (selected inorganic and organometallic compounds) that illustrate appropriate experimental techniques for synthesis of molecules; measurement of chemical properties, structures, and phenomena; hands-on experience with modern instrumentation; computational data analysis (by means of single crystal X-ray Diffraction experiments).
Credits: 2.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall
Pre-Requisite(s): CH 4310(C)

CH 4320 - Inorganic Chemistry II
Continuation of CH4310. Descriptive chemistry of the transition group elements. Transition metal compounds; aspects of bonding, spectra, and reactivity; complexes of p-acceptor ligands; organometallic compounds and their role in catalysis; metals in biological systems; preparative, analytical, and instrumental techniques.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): CH 4310

CH 4390 - Current Topics in Inorganic Chemistry
Discussion of recent topics in inorganic chemistry.
Credits: variable to 3.0; Repeatable to a Max of 12
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman

CH 4412 - Spectroscopy of Organic Chemistry
Emphasizes use of spectral data interpretation to determine structures of organic compounds. Discusses proton and carbon nuclear magnetic resonance (including two-dimensional techniques, COSY, HETCOR, etc.), mass spectrometry, infrared spectrophotometry.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
Pre-Requisite(s): CH 4240

CH 4430 - Intermediate Organic Chemistry
Develop the chemical intuition necessary for advanced work in organic chemistry. Emphasizes reaction mechanisms and why reactions occur. Topics include heteraromatic chemistry, curved-arrow formalism and multi-step reactions, molecular orbitals and symmetry-controlled reactions, Hammett equation and structure-activity relationships, substitution reactions and carbonyl reations.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): CH 4240

CH 4490 - Current Topics in Organic Chemistry
Discussion of recent topics in organic chemistry.
Credits: variable to 3.0; Repeatable to a Max of 12
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman

CH 4515 - Atmospheric Chemistry
Study of the photochemical processes governing the composition of the troposphere and stratosphere, with application to air pollution and climate change. Covers radical chain reaction cycles, heterogeneous chemistry, atmospheric radiative transfer, and measurement techniques for atmospheric gases.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Level(s): Graduate; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): CH 3510 or CH 3520(C) or ENVE 4501 or ENVE 4504 or CEE 4501 or CEE 4504

CH 4516 - Aerosol and Cloud Chemistry
This course is focused on the chemistry of atmospheric aerosols and cloud processes. Students will learn about methods for chemical characterization, the chemical composition of aerosol and the chemical reactions pertinent to secondary aerosol and cloud composition.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): CH 3510 or CH 3520 or ENVE 4501 or ENVE 4504

CH 4519 - Transport and Transformation of Organic Pollutants
Assessment of factors controlling environmental fate, distribution, and transformation of organic pollutants. Thermodynamics, equilibrium, and kinetic relationships are used to quantify organic pollutant, partitioning, and transformations in air, water, and sediments. Use of mass balance equations to quantify pollutant transport.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2009-2010 academic year
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): ENVE 4501 or CEE 4501(C) or CH 3510

CH 4535 - Physical Chemistry III - Molecular Driving Forces from Fundamentals to Applications
Advance course design to bridge concepts in thermodynamics, kinetics, and quantum chemistry through the application of statistical mechanics to understand the molecular driving forces acting in chemical/physical/material/biological systems at both microscopic, and macroscopic level.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): CH 3510 and CH 3520

CH 4560 - Computational Chemistry
Focuses on the theory and method of modern computational techniques applied to the study of molecular properties and reactivity through lecture and computer projects. Covers classical mechanical as well as quantum mechanical approaches.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall - Offered alternate years beginning with the 2010-2011 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): CH 3510 and CH 3520

CH 4590 - Current Topics in Physical Chemistry
Discussion of recent topics in physical chemistry.
Credits: variable to 3.0; Repeatable to a Max of 12
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman

CH 4610 - Introduction to Polymer Science
Introductory study of the properties of polymers. Includes structure and characterization of polymers in the solid state, in solution, and as melts. Topics include viscoelasticity, rubbery elasticity, rheology and polymer processing. Applications discussed include coatings, adhesives, and composites.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): CH 1122 or (CH 1160 and CH 1161)

CH 4620 - Polymer Chemistry
Study of polymer chemistry dealing with the mechanisms of polymerization and copolymerization. Study of the chemistry of polymers, including polymer modification and degradation. Topics include methods for measuring and predicting the path of degradation and stabilization.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): CH 2420
Lec-Rec-Lab: 2.0
Semesters Offered: Fall - Offered alternate years beginning with the 2008-2009 academic year
Pre-Requisite(s): CH 4610(C) or CM 4610(C) or BE 4300(C) or MY 4600(C) or MSE 4110(C)

CH 4640 - Synthesis of Nanoparticles
This hands-on course teaches methods of preparing different types of nanoparticles, and controlling nanoparticle size, structure, and functionalization. Students will analyze selected papers from professional literature to see emerging trends in nanoparticle design and use.
Credits: 3.0
Lec-Rec-Lab: 0-1-3
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): CH 2410 and CH 2411

CH 4690 - Current Topics in Polymer Chemistry
Discussion of current topics in polymer chemistry.
Credits: variable to 3.0; Repeatable to a Max of 12
Lec-Rec-Lab: 0-1-4
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): Freshman

CH 4710 - Biomolecular Chemistry I
Examines chemical concepts underlying biomolecules and bioprocesses and interconnections between biology and chemistry. Bioorganic mechanisms and biophysical concepts in biochemistry are emphasized. Topics include biomolecules including proteins and nucleic acids and bioprocesses including catalysis and gene action.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall, Summer
Pre-Requisite(s): CH 2420

CH 4720 - Biomolecular Chemistry II
Focuses on structural and chemical logic of bioprocesses with emphasis on bioorganic mechanisms and the interconnections between biology and chemistry. Topics include metabolic pathways, membrane biophysics, ion-channels, cell communication, transcriptional control and molecular biology.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 4010 or CH 4710

CH 4721 - Research Methods in Biomolecular Chemistry
Lab course will emphasize the research process in biomolecular chemistry by actively involving students in question formulation, experimental design, data gathering, critical analysis, team work, and communication in an inquiry-based format. Students will employ methods used in modern biochemistry/molecular biology in a series of open-ended experiments that will lead to a student-developed original research project.
Credits: 3.0
Lec-Rec-Lab: 0-0-7
Semesters Offered: Spring
Pre-Requisite(s): (CH 4710 and CH 4222) or CH 4212 and CH 4720(C)

CH 4730 - Confocal Laser Scanning Microscopy: Foundations, Applications, and Advances
Principles of fluorescence microscopy, confocal microscope design, practical aspects of confocal microscopy, live cell imaging, high speed imaging, fluorescent stains, quantitative fluorescence, immunofluorescence, fluorescent proteins, biosensors. Confocal applications in biology and health related sciences will be covered.
Credits: 1.0
Lec-Rec-Lab: 0-0-2
Semesters Offered: Fall, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Level(s): Graduate

CH 4790 - Current Topics in Biochemistry
Discussion of recent topics in biochemistry.
Credits: variable to 3.0; Repeatable to a Max of 12
Lec-Rec-Lab: 0-1-3
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman

Chemical Engineering

CM 1000 - Introduction to Chemical Engineering
Introduces chemical engineering as a profession using the theme of industrial chemical production. Covered concepts include process flow diagrams, unit operations, green engineering, and career opportunities. Guest speakers from industry will provide their perspectives on working as a chemical engineer.
Credits: 1.0
Lec-Rec-Lab: 1-0-0
Semesters Offered: Fall

CM 2110 - Fund of Chem Engg 1
Application of chemical engineering fundamentals to the design and analysis of chemical processes. Mass balances, energy balances, and fundamentals concepts are applied. Introduces use of Process Flowsheet Simulation Software.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall, Summer
Pre-Requisite(s): CH 1112 or (CH 1150 and CH 1151)

CM 2120 - Fund of Chem Engg 2
Application of mass and energy balances to common chemical engineering operations. Mass balances, energy balances, and fundamental concepts are applied to flow in piping systems, pumps, compressors and stagewise separations (distillation, absorption/desorption, and extraction). Advanced use of Process Flowsheet Simulation software.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Spring, Summer
Pre-Requisite(s): CM 2110

CM 2200 - Intro Minerals and Materials
Fundamentals of minerals processing, raw materials production, and extractive metallurgy, including primary metals production.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall

CM 3110 - Transport/Unit Operations 1
Develop an understanding of the processes of momentum transfer (fluid mechanics) and heat transfer. Presents the basic equations of microscopic momentum and heat transfer, along with macroscopic transport equations that can be used in engineering analysis.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall, Spring
Pre-Requisite(s): CM 2120 and (MA 3520 or MA 3521 or MA 3530 or MA 3560) and MA 3160 and PH 2100

Undergraduate Course Descriptions, 2018-19, Page 19 of 103
CM 3120 - Transport/Unit Operations 2
Mass transfer fundamentals applied to unit operations. Topics include Fick’s Law, continuity equation with reaction and mass transfer co-efficients. Transient heat transfer and numerical solution are covered. Applications include absorption, distillation, extraction, adsorption, and membrane separations.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Chemical Engineering
Pre-Requisite(s): CM 3110 and CM 2120 and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

CM 3215 - Transport Laboratory
This course will be an introduction to basic laboratory methods and instrumentation used in the measurement of fluid flow, heat transfer, and mass transfer. Topics to be covered include methods of statistical data analysis, experimental design, principles of measurement and instrumentation, and technical communication.

Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Chemical Engineering
Pre-Requisite(s): CM 2120 and CM 3110(C) and (MA 3520 or MA 3521 or MA 3530 or MA 3560) and UN1015

CM 3230 - Thermodynamics for Chemical Engineers
First and second law applied to closed and open systems. Topics include energy conversion, power cycles, entropy and enthalpy calculations on engineering systems; property estimation for non-ideal vapors, liquids, and other substances, non-ideal multicomponent equilibria, chemical reaction equilibria.

Credits: 4.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): CH 3510 and MA 3160 and (MA 3520(C) or MA 3521(C) or MA 3530(C) or MA 3560(C))

CM 3310 - Process Control
Covers methods of analyzing the transient behavior of chemical processing systems. Develops methods of analyzing systems and system components along with the special mathematical techniques needed. These concepts are then applied to illustrate mathematical modeling of large-scale chemical processing systems.

Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
Pre-Requisite(s): (MA 3520 or MA 3521 or MA 3530 or MA 3560) and PH 2200 and CM 2110 and CM 2120

CM 3410 - Technical Communication for Chemical Engineering
Study of the purposes, genres, and applications of technical communication in chemical engineering professions, including written, oral, visual, and graphic communication. Assignments may include memos, progress reports, procedures, memo and formal reports, research citations, and job-seeking requirements. Emphasizes organization, support, coherence, usefulness, ethics, and professionalism.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Senior
Pre-Requisite(s): UN 1015

CM 3450 - Computer-Aided Problem Solving in Chemical Engineering
The use of modern software packages in chemical engineering. Packages include spreadsheet, symbolic manipulator, chemical process calculator, statistical and modeling software. Course develops knowledge and skills in using computer tools that will complement chemical engineering courses and practice.

Credits: 3.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Fall - Offered alternate years beginning with the 2008-2009 academic year
Pre-Requisite(s): CM 2110(C) and MA 2160

CM 3510 - Chemical Reaction Engineering
A study of chemical reaction engineering including design and analysis of chemical reactors, the fundamentals of chemical kinetics, and analysis of reaction rate data.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): CM 2110 and CM 3110 and CM 3230(C) and (MA 3520 or MA 3521 or MA 3530 or MA 3560) and CH 2410

CM 3825 - Sampling, Statistics, and Instrumentation
Solids sampling theory, practice, and instrumentation for process streams. Statistics/probability as they apply to representative samples from bulk lots. Minimization of errors, proper design of sample collection and size reduction apparatus, and statistical design and analysis will be covered.

Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year

CM 3830 - Mineral Processing and Extraction Laboratory
Laboratory course covering the major mineral processing and extractive metallurgy operations, such as crushing, grinding, sampling, particulate separation processes, dewatering, and hydrometallurgical processing.

Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Pre-Requisite(s): CM 2200(C) or CM 2110(C)

CM 3979 - Alternative Energy Technologies and Processes
This course covers a wide range of alternative energy technologies with an emphasis on chemical and biochemical processing. Technologies covered may include biofuels, solar power, fuel cells, etc.

Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Fall
Pre-Requisite(s): CH 1112 or (CH 1150 and CH 1151) and (MA 1160 or MA 1161)

CM 4000 - Chemical Engineering Research
An undergraduate research experience on chemical engineering topics. Students work directly with faculty members on a research project. A report (written, poster, or oral) may be required.

Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Level(s): Graduate

CM 4020 - Undergraduate Research in Mineral Processing Engineering
An undergraduate research experience on mineral processing engineering topics. Students work directly with faculty members on a research project. A report (written, poster, or oral) may be required.

Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Level(s): Graduate

CM 4040 - Undergraduate Research in Biological Engineering
An undergraduate research experience on biological engineering topics, excluding biofuels. Students work directly with faculty members on a research project. A report (written, poster, or oral) may be required.

Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Level(s): Graduate

CM 4060 - Undergraduate Research in Polymer Engineering
An undergraduate research experience on polymer engineering topics. Students work directly with faculty members on a research project. A report (written, poster, or oral) may be required.

Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Level(s): Graduate

CM 4080 - Undergraduate Research in BioFuels Engineering
An undergraduate research experience on bio-fuels engineering topics. Students work directly with faculty members on a research project. A report (written, poster, or oral) may be required.

Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Level(s): Graduate

CM 4110 - Unit Operations Laboratory
Provides a rigorous introduction to experiments focused in the unit operations of fluid mechanics, heat transfer, mass transfer, and chemical reaction engineering.

Credits: 3.0
Lec-Rec-Lab: (0-1-6)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate; Must be enrolled in one of the following Major(s): Chemical Engineering
Pre-Requisite(s): CM 3120 and CM 3215 and CM 3230 and CM 3510 and CM 4310(C)
CM 4120 - Chemical Plant Operations Lab
A capstone laboratory course focused on chemical manufacturing processes using the department's pilot plants. Safety, process control, teamwork, and communication skills are stressed.
Credits: 3.0
Lec-Rec-Lab: (0-1-6)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Level(s): Graduate; Must be enrolled in one of the following Major(s): Chemical Engineering
Pre-Requisite(s): CM 3215 and CM 3310 and CM 4110

CM 4125 - Bioprocess Engineering Laboratory
An integrated biological process laboratory experience, including fermentation fundamentals, molecular biology, biotechnology, and their use in industry, metabolism, bioreactor analysis and design, biosensors, and analysis. May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): CM 4125 - Bioprocess Engineering Laboratory
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): CM 3215 and CM 3310

CM 4310 - Chemical Process Safety/Env
A study of the technical fundamentals of chemical process safety and designing for the environment. Includes toxicology, industrial hygiene, source models, fires and explosions, relief systems, hazard identification, risk assessment, environmental fate and transport, hazardous waste generation, pollution prevention, and regulatory requirements.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): CM 3120 and CM 3230

CM 4505 - Particle Technology
Fundamentals of particle processing, characterization, and separation. Topics include particle synthesis, mineral processing, automobile recycling, contaminated soils, recyclable materials such as batteries and tires, and sludges.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): CM 3120 and CM 3230

CM 4510 - Interfacial Engineering
This course will give students additional tools to perform as an engineer in a sustainability role. Capstone technical and economic evaluations of processes and unit operations. Students undertake experiments covering aspects of polymer characterization, processing, and recycling. Also included are experiments in applications such as coatings, adhesives, and composites.
Credits: 2.0
Lec-Rec-Lab: (0-1-3)
Semesters Offered: Fall - Offered alternate years beginning with the 2008-2009 academic year
Pre-Requisite(s): CM 4610(C) or CH 4610(C) or BE 4300(C) or MY 4600(C) or MSE 4110(C)

CM 4550 - Polymer Rheology
A systematic development of the principles and applications of the science of rheology. Reviews vector and tensor mathematics and Newtonian fluid dynamics. Develops the physical and mathematical nature of stress and deformations in materials. Covers the use of theory and application of rheological equations of state.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): CM 3110 or MEEM 3210 or ENG 3200 or MY 3110 or MSE 3110 or CE 3600 or CEE 3600 and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

CM 4565 - Polymer Rheology Laboratory
Basic techniques for acquisition of shear rheological data in torsional shear (cone-and-plate or parallel-plate) and capillary shear will be taught. Also covered will be approximate methods for obtaining elongational viscosity.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): CM 4610(C) or CH 4610(C) or CM 4650(C) or BE 4300(C) or MY 4600(C) or MSE 4110(C)

CM 4710 - Biochemical Processes
Presents an introduction to fundamental and applied aspects of industrial biochemical processing. Topics include cell structure and composition, enzymes and their use in industry, metabolism, bioreactor analysis and design, biosensors, and analysis. May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): CM 3110(C)

CM 4740 - Hydrometallurgy/Pyrometallurgy
Extraction and refining of metals and industrial chemicals from natural and recycled materials. Includes solution-chemistry processes (hydrometallurgy) and thermochemical processes (pyrometallurgy).
Credits: 4.0
Lec-Rec-Lab: (3-1-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): CH 1122 or (CH 1160 and CH 1161)

CM 4770 - Analytical Microdevice Technologies
Course will provide background in micro/nano-scale technologies for biomedical diagnostic applications. Includes theoretical and experimental advances in chemical, mechanical, optical, and biological analysis. Reading of news and technical articles will develop skills/knowledge to envision microdevice applications for a semester-long project led by a graduate student team member.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring - Offered alternate years beginning with the 2012-2013 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): PH 2200

CM 4780 - Biomanufacturing and Biosafety
This course will give students additional tools to perform as an engineer in a biomanufacturing facility. Focus is on mammalian cell culture derived products. Federal laws and compliance of biosafety in manufacturing facilities. Process design software will be introduced.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2014-2015 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): HL 2100 or CH 4710 or CM 4040 or CM 4080 or CM 4710 or (CM 3110(C) and BL 1404)

CM 4855 - CM Process Analysis & Design I
Capstone technical and economic evaluations of processes and unit operations. Application of cost estimation, energy efficiency, and economic evaluation techniques. Teams analyze an existing facility, identify improvement opportunities, demonstrate the economic consequences, and recommend a course of action.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Chemical Engineering
Pre-Requisite(s): CM 3120 and CM 3215 and CM 3230 and CM 3510 and CM 2410
CM 4860 - CM Process Analysis & Design 2
Process and project design principles applied to realistic problems, including project evaluation and management. Problems include safety, environmental, and operability constraints. Emphasizes the profit motive in industry and the role of the chemical engineer.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Chemical Engineering
Pre-Requisite(s): CM 4855

CM 4861 - CM Design Laboratory 2
Individual/team projects to optimize designs for new ventures with realistic constraints. Requires process synthesis, market research, economic evaluation, and risk analysis techniques. Develops skills in problem solving, critical thinking, and communication. May include the AIChE National Student Design problem.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Chemical Engineering
Pre-Requisite(s): CM 4860(C)

CM 4900 - Interdisciplinary Design 1
Focuses on an interdisciplinary chemical engineering design project. (Senior project ready as defined by major substitutes for prerequisites)
Credits: variable to 3.0
Semesters Offered: Fall
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

CM 4910 - Interdisciplinary Design 2
Focuses on an interdisciplinary chemical engineering design project. (Senior project ready as defined by major substitutes for prerequisites)
Credits: variable to 3.0
Semesters Offered: Spring
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

CM 4990 - Special Topics in CM
Covers chemical engineering topics not included in regular courses, which may include biochemical engineering, design of biochemical reactions, composite materials, and numerical analysis of transport processes.
Credits: variable to 3.0; Repeatable to a Max of 12
Semesters Offered: On Demand
Restrictions: Permission of instructor required

Construction Management

CMG 1000 - Introduction to Construction Management
Introduction to the construction management profession, and current issues and trends in residential and commercial construction industries. Focuses on how the construction industry works, along with enhancing verbal, CAD, and print reading skills.
Credits: 2.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Freshman, Sophomore

CMG 1140 - Basic Construction Materials
Covers properties and behavior of basic construction materials, including wood, metals, aggregates, asphalt, concrete, and composites. Laboratory exercises include field testing techniques, materials standards, report writing, and presentation of data.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring

CMG 1200 - Introduction to Building Information Modeling
An introduction to Building Information Modeling (BIM) with an emphasis on the Autodesk Revit software.
Credits: 2.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Spring

CMG 2110 - Building Utility Systems
Overview of the mechanical, electrical, and plumbing components of building systems. HVAC systems and controls, water supply and drainage, electrical power distribution and lighting, fire detection, alarm, and communications. Includes construction drawing interpretation and design projects.
Credits: 4.0
Lec-Rec-Lab: (0-4-0)
Semesters Offered: Fall
Pre-Requisite(s): PH 1240(C)

CMG 2120 - Statics and Strengths of Materials for Construction
Composition and resolution of forces and force systems, principles of equilibrium applied to various bodies, simple structures, friction, centroids, and moments of inertia. Mechanical behavior of materials, including calculation of stresses, strains, and deformations due to axial, torsional, and flexural loading.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring
Pre-Requisite(s): PH 1110 or PH 1140

CMG 2140 - Building Materials & Methods
Materials, structural systems, building codes, and management procedures appropriate for residential and commercial construction. Includes construction drawing interpretation and graphic design project.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring
Pre-Requisite(s): CMG 1140

CMG 2265 - Construction Quantity Survey
An introduction to the interpretation of construction drawings to perform quantity take-offs. Emphasis is on the civil and architectural components of building construction, with some discussion of other elements.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Sophomore, Junior, Senior
Pre-Requisite(s): CMG 1000 and CMG 1140

CMG 3200 - Site Planning and Development
An examination of land development issues including: site analysis, environmental concerns, contouring, earthwork and grading, soils, route alignments, storm water management, sewer systems, zoning, and land planning. Incorporates CAD applications in the lab.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): SU 2000

CMG 3250 - Structural Analysis and Design
Elastic theory analysis and design of steel structural components, including tension, compression, truss frames, flexural beams, and connections. Includes an introduction to reinforced concrete structures and timber. All work is according to current applicable code manuals. Design projects include computer applications.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

CMG 4000 - Design-Build Project Delivery
Professional practice, financial, legal, and ethical considerations in construction management are illustrated and discussed in the context of the design-build delivery system.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: On Demand
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): CMG 2120 or MET 2120

CMG 4100 - Construction Equipment Management
Study of basic principles used in the construction industry for selecting and managing construction equipment. Focuses on understanding the time value of money, estimating equipment ownership and operating costs, selecting the proper equipment for specific tasks, and estimating equipment production.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): CMG 3200(C)
CMG 4120 - Construction Planning and Scheduling
This course will introduce students to the basics of construction scheduling. Topics covered will include: Fundamentals of different scheduling methods such as Critical Path Method and linear scheduling. Resource allocation in schedules, and Schedule monitoring and control methods.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): CMG 3265 or CE 3332 or CEE 3332

CMG 4200 - Construction Contracts
Legal aspects of construction to include a study of construction documents, the project manual, report requirements, agreements, change orders, and other administrative functions in building construction.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): BUS 2200

CMG 4210 - Construction Project Management
Provides students with an understanding of the principles required to deliver a construction project on time, within budget, and with acceptable quality. Topics include construction law, contracts, delivery systems, job site layout and control, submittals, record keeping, subcontracting and purchasing, quality management, change orders, claims, and dispute resolution.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): CMG 4200

CMG 4300 - Construction Finance and Accounting
Focuses on the principles of accounting and financial management needed to make construction projects and companies financially successful. Includes profitability, projecting costs, cash flow and cash requirements, and equipment costs.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): CMG 4200

CMG 4400 - Construction Safety Management
Provides an awareness and understanding of workplace safety practices. Emphasis on the construction industry, including the OSHA construction regulations.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): ACC 2000 and EC 3400

CMG 4800 - Sustainable Construction
An introduction to the philosophy and practice of sustainable building construction with emphasis on underlying socio-environmental philosophies, sustainable directed building technologies and materials, and case studies of contemporary green buildings to culminate in a simple sustainable design project.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): CMG 4120 and CMG 4210 and CMG 4920 and HU 3120

CMG 4900 - Construction Project Simulation
Capstone course. Integrates all aspects of the construction management process. Students will explore the responsibilities of the construction manager and consider project management issues through semester-long simulated construction projects (commercial and design-build). Includes oral and written report components.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Construction Management; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): CMG 3200 and CMG 3250 and CMG 4120(C) and CMG 4210 and HU 3120

CMG 4996 - Special Topics in Construction Management
Selected additional topics of interest in Construction Management based on student and faculty demand and interest. May be a tutorial, seminar, workshop, project, or class study.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Construction Management; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): CMG 4120 and CMG 4210 and CMG 4900 and CMG 4920

CMG 4997 - Independent Study in Construction Management
Independent study of an approved topic under the guidance of a Construction Management faculty member. May be either an academic, design or research problem/project.
Credits: variable to 3.0, Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Construction Management; Must be enrolled in one of the following Class(es): Senior

CMG 4998 - Undergraduate Research in Construction Management
An undergraduate research experience in Construction Management. Under the guidance of a Construction Management faculty member, students work on a selected/approved research problem or work directly with faculty on active research projects/grants. May require more than one semester to complete.
Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Construction Management; Must be enrolled in one of the following Class(es): Senior

Computer Science
CS 1000 - Explorations in Computing
An introduction to the study of computing: fundamental concepts and skills; opportunities at Michigan Tech; career opportunities; social and ethical issues.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): CS 1121 or CS 1131

CS 1040 - Assembly Language Programming
Programming in assembly language. Includes integer floating point, and instruction encoding in binary. Transition course for only those students affected by credit change in CS1143/421.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): CS 1122 or CS 1131

CS 1090 - Special Topics in Computer Science
Special topics in computer science offered on occasion based on student and faculty demand and interest.
Credits: variable to 3.0; May be repeated
Semesters Offered: On Demand
Restrictions: Permission of instructor required

CS 1111 - Introduction to Programming in C/C++
Introductory course in C++ programming. Topics include top-down analysis of problems, structured programming, control structures, functions, arrays, pointers, and file I/O. Basic concepts of object-oriented programming (classes, objects, function overloading) will also be introduced.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Industrial Technology, Computer Network & System Admin, Electrical Engineering, Audio Production & Technology; Must be enrolled in one of the following Class(es): Freshman, Sophomore

CS 1121 - Introduction to Programming I
Starting point of the computer science programs. A high-level, object-oriented programming language is introduced as a problem-solving tool. Topics include design, coding, documentation, debugging, and testing of programs. Programming assignments are given in both a closed lab setting and as homework.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): MA 1031(C) or MA 1032(C)

CS 1122 - Introduction to Programming II
Continuation of CS 1121. Topics include data abstraction, class hierarchies and polymorphism, list, stack, queue and tree data structures, complexity-based algorithms and data structure choices, and recursion. Homework programming assignments are given.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): CS 1121
CS 1131 - Accelerated Introduction to Programming
An alternative starting point of the computer science programs for students with some programming experience, combining material from CS 1121 and CS 1122, offered at an accelerated pace. Homework programming assignments are given.
Credits: 3.0
Lec-Rec-Lab: (0-4-2)
Semesters Offered: Fall
Restrictions: Permission of department required
Pre-Requisite(s): MA 1031 or MA 1032 or MA 1160(C) or MA 1161(C)

CS 1142 - Programming at the Hardware Software Interface
Programming in assembly language and C for students with prior experience in Java. Topics include binary number encodings, instruction set architecture, assembly language programming, and instruction encodings. C programming topics include program structure, preprocessor, arrays, structures, pointers, input/output, dynamic memory management, and linked data structures.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): CS 1122 or CS 1131

CS 2090 - Special Topics in Computer Science
Special topics in computer science offered on occasion based on student and faculty demand and interest.
Credits: variable to 3.0; May be repeated
Semesters Offered: On Demand
Restrictions: Permission of instructor required

CS 2311 - Discrete Structures
 Presents fundamental concepts in discrete structures that are used in computer science. Topics include sets, trees, graphs, functions, relations, recurrences, proof techniques, logic, combinatorics, and probability.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): (CS 1121 or CS 1131) and (MA 1135 or MA 1160 or MA 1161)

CS 2321 - Data Structures
 Presents fundamental concepts in data structures. Topics include abstract data types (priority queues, dictionaries and graphs) and their implementations, algorithm analysis, sorting, text processing, and object oriented design. A significant programming project is assigned.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): CS 1122 or CS 1131

CS 3000 - Ethical and Social Aspects of Computing
An examination of social and ethical issues associated with computing. Topics include: ethical theories and decision making, intellectual property, freedom of expression, privacy, security, and professional responsibility.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): CS 3141

CS 3090 - Special Topics in Computer Science
Special topics in computer science offered on occasion based on student and faculty demand and interest.
Credits: variable to 3.0; May be repeated
Semesters Offered: On Demand
Restrictions: Permission of instructor required

CS 3141 - Team Software Project
This course introduces software design techniques (e.g., Design-By-Contracts), uses the UML for requirements and design specification, and requires implementation, unit testing and documentation in the context of a significant team project. Other topics: teamwork, user interfaces, social and professional responsibility.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): (CS 2311 or MA 3210) and CS 2321

CS 3311 - Formal Models of Computation
Introduction to the theory of formal languages and computation. Topics include regular languages and finite automata, context-free languages and push-down automata, Turing-acceptable languages, Turing machines and the halting problem. Proof techniques and applications, such as parsing, are also treated.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): CS 2311 or MA 3210

CS 3331 - Concurrent Computing
Concepts and techniques in concurrent computing. Topics include: processes and threads, mutual exclusion, semaphores, monitors and condition synchronization, deadlock, safety and liveness, message passing, and concurrent architectures.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): CS 1142 or (CS 1141 and CS 1040) and (CS 2311 or MA 3210) and CS 2321

CS 3411 - Systems Programming
Development of robust programs that provide efficient services to system software developers. Topics include: file I/O, process creation and management, linking and libraries, interprocess communication, performance measurement, and socket programming.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): CS 3421

CS 3421 - Computer Organization
Introduction to the logical structure of computers, including the fundamentals of logic design, information storage and manipulation, control, and input/output. Topics include a review of current hardware technology, combinational and sequential logic, arithmetic, datapaths, hard-wired control, interrupts, caches, virtual memory, and an introduction to pipelining.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): (CS 1141 and CS 1040) or CS 1142

CS 3425 - Introduction to Database Systems
This course provides an introduction to database systems including database design, query, and programming. Topics include goals of database management; data definition; data models; data normalization; data retrieval and manipulation with relational algebra and SQL; data security and integrity; database and Web programming; and languages for representing semi-structured data.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): (CS 2311 or MA 3210) and CS 2321

CS 3712 - Software Quality Assurance
Practices for ensuring quality through the software process. Topics include: requirements elicitation, analysis and documentation, testing, and quality assurance management.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): CS 3141

CS 4090 - Special Topics in Computer Science
Special topics in computer science offered on occasion based on student and faculty demand and interest.
Credits: variable to 4.0; May be repeated
Semesters Offered: On Demand
Restrictions: Permission of instructor required

CS 4099 - Directed Study in Computer Science
Students study one or more special topics in computer science under the direction of one or more faculty members.
Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

CS 4121 - Programming Languages
A discussion of the concepts underlying programming languages. Topics include: programming paradigms; language properties (including syntax, semantics, run-time behavior, and implementation issues); data, procedure, functional, and control abstraction; functional programming, and logic programming.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): CS 2321 and CS 3421 and CS 3311

CS 4130 - Compiler Design and Optimization
Design, theory, and programming language translators and the theory and implementation of optimizers. Topics include: intermediate representations, advanced code generation, control-and data-flow analysis, advanced compiler optimization, dynamic compilation, global register allocation and instruction scheduling.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): CS 4121
CS 4321 - Introduction to Algorithms
Fundamental topics in algorithm design, analysis, and implementation. Analysis fundamentals include asymptotic notation, analysis of control structures, solving recurrences, and amortized analysis. Design and implementation topics include sorting, searching, and graph algorithms. Design paradigms include greedy algorithms, divide-and-conquer algorithms, and dynamic programming.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (CS 2311 or MA 3210) and CS 2321

CS 4411 - Operating Systems
Principles of the design and implementation of operating systems. Topics include: process management, process scheduling, memory management, I/O, file systems. Includes a significant implementation component.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): CS 3331 and CS 3421

CS 4425 - Database Management System Design
This course covers the design issues concerning the implementation of database management systems, including distributed databases. The topics include data storage, index implementation, query processing and optimization, security, concurrency control, transaction processing, and recovery.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): CS 3425

CS 4431 - Computer Architecture
Advanced course in architecture of high-performance computer systems. Topics include instruction-set design, simulation of processor architectures, multiple functional units, pipelining, dynamically scheduled pipelines, speculative execution, multi-core and multi-processor systems, advanced I/O subsystems and analytic models of architectural features of processors.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): CS 3425

CS 4461 - Computer Networks
Computer network architectures and protocols; design and implementation of datalink, network, and transport layer functions. Introduction to the Internet protocol suite (TCP, UDP, IP), domain name service and protocols, file sharing protocols, wireless networks, and network security.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): CS 3411

CS 4471 - Computer Security
Development and administration of secure software systems. Topics include principles of software development, practical cryptography, program security, operating system security, database security, administration, legal and ethical issues.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): CS 3411 or CS 4411

CS 4496 - GPU and Multicore Programming
Introduction to Graphics Processing Units (GPU) and multi-core systems, their architectural features and programming models, stream programming and compute unified driver architecture (CUDA), caching architectures, linear and non-linear programming, scientific computing on GPUs, sorting and search, streaming, cryptography, and fixed and floating point operations.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): CS 3411 and CS 3421

CS 4611 - Computer Graphics
Introduction to interactive computer graphics. Topics include 3D viewing, 3D transformation, interactive techniques, animation, modeling, lighting, texturing, vertex programs, fragment programs, and graphics algorithms. Requires substantial programming homework.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (CS 1141 or CS 1142) and CS 2321 and MA 2330

CS 4710 - Model-Driven Software Development
Focuses on the use of formal models throughout the software development life cycle. Topics include formal specification of requirements, behavioral modeling, automated analysis, architectural styles and design specification.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring, Summer
Pre-Requisite(s): CS 3311 and CS 3141(C)

CS 4711 - Software Processes and Management
Focuses on the software development process and related management issues. Topics include software process models, the Capability Maturity Model, process tools, use of standards, software maintenance, configuration management, project planning and tracking, team management, and measurement and estimation.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): CS 3141

CS 4750 - Teaching Methods in Computer Science
Provides teaching methods, models, and experiences for teaching computer science in secondary schools. Topics discussed include teaching methods, learning, security and maintenance of equipment, professional journals, ethics, legal issues, diversity, and problem solving. Requires admission to the Teacher Education Program.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): ED 4700

CS 4760 - Human-Computer Interactions
Principles of user interface (UI) design and implementation. Topics include: UI theory, design principles, evaluation, and tools. Requires completion of a group project implementing and evaluating a UI.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): CS 3141

CS 4791 - Senior Software Engineering Project I
A capstone project course. Using software engineering principles and techniques, students work as part of a team responsible for developing a quality software project.
Credits: 3.0
Lec-Rec-Lab: (0-1-4)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required
Pre-Requisite(s): CS 3712 or CS 4760

CS 4792 - Senior Software Engineering Project II
A continuation of the capstone project experience, intended for Software Engineering majors.
Credits: 3.0
Lec-Rec-Lab: (0-1-4)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required
Pre-Requisite(s): CS 4791

CS 4811 - Artificial Intelligence
Fundamental ideas and techniques that are used in the construction of problem solvers that use Artificial Intelligence technology. Topics include knowledge representation and reasoning, problem solving, heuristics, search heuristics, inference mechanisms, and machine learning.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): CS 4791

CS 4821 - Data Mining
Data mining focuses on extracting knowledge from large data sources. The course covers data mining concepts, methodology (measurement, evaluation, visualization, etc.), algorithms (classification/regression, clustering, association rules, etc.), and applications (web mining, recommender systems, bioinformatics, etc.).
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Permission of instructor required
Pre-Requisite(s): (CS 3425 or MIS 3100) and (MA 2330 or MA 2320 or MA 2321) and (MA 2710 or MA 2720 or MA 3710)
Economics

EC 2001 - Principles of Economics
An introduction to economics. The microeconomics portion covers consumer choice, the firm, value and price theory, and distribution theory. The macroeconomics portion covers national income analysis, fiscal policy, money and monetary policy, the commercial banking system, and the Federal Reserve System.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): MA 1020 or MA 1031 or MA 1032 or MA 1135(C) or MA 1160(C) or MA 1161(C)

EC 3002 - Microeconomic Theory
The study of consumer and producer choices, market demand and supply, and market structures.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): EC 2001 and (MA 1135 or MA 1160 or MA 1161) and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 3003 - Macroeconomic Theory
Analysis of the determinants of the level of output, employment, prices, and economic growth with an emphasis on fiscal policy and monetary policy.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): EC 2001 and (MA 1135 or MA 1160 or MA 1161) and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 3100 - International Economics
Introduction to international economics, including balance of payments, accounting, foreign exchange markets, international trade theory, barriers to trade, trade and development, regional economic integration, and current U.S. international economic issues.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): EC 2001 and (MA 1135 or MA 1160 or MA 1161) and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 3300 - Industrial Organization
Economic analysis of market power and industry structure. Topics include the goals of public policy toward business, antitrust policy, economic regulation, public enterprise, and social regulation of health, safety, and the environment.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): EC 2001 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 3400 - Economic Decision Analysis
Studies economic decision-making for actions occurring over time. Covers decision tools for comparing alternatives, public project evaluation, risk and uncertainty, mutually exclusive decisions, multiple objective decisions, interest rate calculations, cash flow analysis, depreciation and taxes, cost of capital, capital budgeting.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): EC 2001 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 4000 - Senior Seminar in Economics
A senior capstone seminar in which students discuss and conduct research under the guidance of several faculty members.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Major(s): Finance, Operations and Systems Mgmnt, Management Information Systems, Marketing, Accounting, Management; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 4050 - Game Theory/Strategic Behavior
The study of strategic situations involving the interactions of individuals. Modeling techniques are applied to game situations faced in business, entertainment, politics, and the daily routine of life.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 4100 - Mathematical Economics
Application of the principal mathematical techniques used in economic theory and modeling. Topics include optimization, marginal analysis, comparative statics, and other applications.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): EC 3002 or EC 3003) and (MA 1160 or MA 1161 or MA 1135)

EC 4200 - Econometrics
Introduces techniques and procedures to estimate and test economic and financial relationships developed in business, economics, social and physical sciences.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): (EC 2001 or EC 3002 or EC 3003) and (BUS 2100 or MA 2710 or MA 2720 or MA 3710) and (MA 1135 or MA 1160 or MA 1161)

EC 4400 - Banking and Financial Institutions
Analysis of asset and liability management of financial institutions and the role of financial institutions in the U.S. and international economy.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (EC 2001 or EC 3002) and Fall (UN 1025 or Modern Language - 3000 level or higher)

EC 4500 - Public Sector Economics
Economic analysis of how democratic governments generate revenue (primarily taxation) and make expenditure decisions and how such decisions impact the welfare of individuals. Topics include market failures, voting processes, income redistribution programs, efficiency and incidence of taxation.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Pre-Requisite(s): EC 2001 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 4620 - Energy Economics
Introduction to the institutional, technical, and economic issues of the production and use of energy resources, including petroleum, natural gas, coal, nuclear, electric utilities, and alternative energy. Coursework applies economic analysis to supply, distribution, and use of energy resources, including environmental and social consequences.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): EC 2001 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 4630 - Mineral Industry Economics
Studies the role of minerals and metals in society and the economics of their use. Applies economic principles to examine the supply, demand, markets, and foreign trade for important minerals and metals. Examines the effect of government policies on the minerals industries. Requires a technical report.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): EC 2001 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 4640 - Natural Resource Economics
Studies the economics of nonrenewable resources (energy and minerals) and renewable resources (water, fisheries, forests and species). Discusses the economics of land use change, macroeconomic topics such as economic growth, sustainability and green accounting.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (EC 2001 or EC 3002 or FW 4080) and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

EC 4650 - Environmental Economics
Considers the efficient and equitable use of environmental resources, including air, water, land, wilderness and parks, wildlife and other ecological systems. Measures the benefits and costs of decreasing pollution, cleaner environment, and protecting scarce ecological resources. Addresses market failures and the economic valuation of environmental amenities.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (EC 2001 or EC 3002) and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
## Economic Analysis and Human Resource Economics
Economic analysis of labor markets and human resources. Topics include the supply and demand for labor, wage determination, human capital theory, returns to education and training, causes of wage differentials, and economic effects of discrimination.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Pre-Requisite(s): EC 2001 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

## Research
Under the general guidance of a faculty member, students read, conduct research, and prepare reports and papers as required.

Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Pre-Requisite(s): EC 2001

## Special Topics in Economics
Economic topics of interest to students and faculty.

Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Pre-Requisite(s): EC 2001

### Education

#### ED 2000 - Issues in American Education
Introduction to schooling in the United States. Emphasis on history, role of education in social reproduction and transformation, laws, and the work of teaching, as these pertain to issues of social justice.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring

#### ED 2010 - Field Study in Education: Elementary School
Observations in an elementary school, offering relevant school experience to help clarify career goals.

Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: Permission of department required

#### ED 2020 - Field Study in Education: Secondary School
Observations in a secondary school, offering relevant school experience to help clarify career goals.

Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: Permission of department required

#### ED 3210 - Foundations of Education
Contemporary issues in education from historical, philosophical, sociological and legal perspectives. Emphasizes the structure/function of U.S. education as well as exceptional children, especially the handicapped and culturally different. This course is one component of the Teacher Education Early Block. Requires admission to teacher education program.

Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): ED 3410, ED 4110

#### ED 3410 - Clinical Experience
Observation, tutoring and classroom teaching in an area school classroom. This course is one component of the Teacher Education Early Block. Requires admission to the Teacher Education program.

Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): ED 3410, ED 4110

#### ED 3510 - Communicating Science I
Students design hands-on presentations for K-8 students and their parents at family science nights conducted at area schools and other events in a 4-county area (off campus 4:30-9:00PM). The course highlights presentation skills, teaching techniques, learning styles, and classroom management.

Credits: 3.0
Lec-Rec-Lab: (1-0-2)
Semesters Offered: On Demand
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

#### ED 3511 - Communicating Science II
Students make presentations in local K-8 classrooms and/or at evening family science nights conducted at area schools. Classroom lectures will highlight the rationale for interacting with schools and communities as a professional, presentation skills, effective teaching techniques, learning styles, classroom management techniques, and model hands-on learning techniques.

Credits: 1.0
Lec-Rec-Lab: (0-0-1)
Semesters Offered: On Demand

#### ED 4020 - Methods of Teaching Social Studies
Application of learning and instructional theories and practice to the teaching of social studies. Emphasis will include application of state and national education standards and relevant assessment strategies for social studies. Requires admission to the Teacher Education program by the Department of Education.

Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: On Demand
Restrictions: Permission of department required
Pre-Requisite(s): ED 4700(C)

#### ED 4110 - Psychological Foundations of Learning
The course examines how human beings grow and learn with major emphasis on the early adolescent and adolescent. Psychological basis of educational procedures and practices are established with special reference to learning disorders, gifted children, and culturally diverse classrooms.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): ED 4700(C)

#### ED 4140 - Methods of Teaching English
Application of learning theories and national and state professional standards to the teaching of English. Emphasizes methods, materials, and media used to teach adolescents. Requires admission to teacher education program or permission of instructor.

Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall
Restrictions: Permission of department required
Pre-Requisite(s): ED 4700(C)

#### ED 4150 - Literacy in the Content Areas
An introduction to the best ways to use language for deepening comprehension and understanding of all the content areas. Includes inquiries into how cultural and learning differences relate to comprehension. A minimum of 28 tutoring hours in a local school is required.

Credits: 4.0
Lec-Rec-Lab: (0-3-1)
Semesters Offered: Spring
Pre-Requisite(s): ED 4110 and ED 3210 and ED 3410

#### ED 4300 - Instructional Technology
Provides the development of knowledge and skills required to make use of information and communication technologies as instructional tools. Use of instructional technology will be considered within a context of relevant research and theory pertaining to human learning.

Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): ED 4700

#### ED 4510 - Special Topics in Education
Students identify and develop an in-depth examination of current topics in education for further research and study. Working in consultation and agreement with select faculty, students engage in active inquiry on leading educational issues.

Credits: variable to 6.0; Repeatable to a Max of 9
Semesters Offered: On Demand
Restrictions: Permission of department required

#### ED 4700 - Fundamentals of Instruction
Study of key areas of instruction in preparation for student teaching. Emphasis is placed on lesson planning, classroom management, and student assessment and evaluation. Requires admission to the teacher education program by the Department of Education.

Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): ED 4300

Pre-Requisite(s): ED 4110 and ED 3210 and ED 3410
**Electrical & Computer Engineering**

**ED 4720 - Methods of Teaching Science**
Application of learning and instructional theories to the teaching of science.

**Credits:** 2.0  
**Lec-Rec-Lab:** (1-0-2)  
**Seminesters Offered:** Fall  
**Restrictions:** Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore  
**Pre-Requisite(s):** ED 4700(C)

**ED 4910 - Directed Teaching**
Knowledge of human growth and learning theories, methods and materials, and individual differences applied to classroom settings conducted under the supervision of an experienced middle or secondary school teacher. Requires admission to teacher education program.

**Credits:** 12.0  
**Lec-Rec-Lab:** (0-0-36)  
**Seminesters Offered:** Fall, Spring  
**Restrictions:** Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior  
**Pre-Requisite(s):** ED 4300 and ED 4700 and (ED 4720 or HU 4140 or SS 4020(C) or MA 4905)

---

**Electrical Engineering and Computer Engineering**

**EE 1110 - Essential Mathematics for Electrical Engineering**
Review of basic trigonometry, sinusoidal signals, amplitude, frequency and phase, addition of sinusoids. Complex numbers and complex arithmetic. Real exponential functions, complex exponentials, Euler's relations, decaying sinusoids and complex exponential functions. Differentiation and integration of sinusoids and exponentials.

**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (2-0-0)  
**Seminesters Offered:** Fall, Spring, Summer  
**Restrictions:** Must be enrolled in one of the following Class(es): Freshman, Sophomore  
**Pre-Requisite(s):** MA 1160 or MA 1161

**EE 1111 - Introduction to Electrical and Computer Engineering**
A half-semester course intended to provide an introduction to the profession of Electrical Engineering and Computer Engineering freshman or sophomore students. The goals of this course are to provide perspective into the various subareas within ECE and highlight the technical, professional, and ethical behavior expected of the graduate.

**Credits:** 1.0  
**Lec-Rec-Lab:** (0-2-0)  
**Seminesters Offered:** Fall, Spring  
**Restrictions:** Must be enrolled in one of the following Major(s): Electrical Engineering, Computer Engineering; Must be enrolled in one of the following Class(es): Freshman, Sophomore  
**Pre-Requisite(s):** MA 1160 or MA 1161

**EE 2111 - Electric Circuits I**
This course will cover basic electrical concepts, resistive circuits, nodal and loop analysis techniques, superposition, Thevenin and Norton equivalents, maximum power transfer, capacitance and inductance, AC steady-state analysis.

**Credits:** 3.0  
**Lec-Rec-Lab:** (3-0-2)  
**Seminesters Offered:** Fall, Spring, Summer  
**Pre-Requisite(s):** EE 1110(C) and MA 2160

**EE 2112 - Electric Circuits II and Lab**
This course will cover second order transient circuits, magnetically coupled networks, AC steady-state analysis, polyphase circuits, variable frequency network performance, and two port networks.

**Credits:** 4.0  
**Lec-Rec-Lab:** (3-0-2)  
**Seminesters Offered:** Fall, Spring, Summer  
**Pre-Requisite(s):** EE 1110 and EE 2111 and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

**EE 2174 - Digital Logic and Lab**
Introduces analysis, design, and application of digital logic. Includes Boolean algebra, binary numbers, logic gates, combinational and sequential logic, storage elements and hardware-description-language based synthesis.

**Credits:** 4.0  
**Lec-Rec-Lab:** (3-0-2)  
**Seminesters Offered:** Fall, Spring, Summer  
**Pre-Requisite(s):** EE 2174 or EE 2241 or CS 1121 or CS 1131 or CS 1111

**EE 3120 - Electric Energy Systems**
An overview of the generation and utilization of electrical energy. Covers three-phase circuits, transformers, photovoltaics, batteries, electromechanical energy conversion, and an overview of electric power systems, including economic issues.

**Credits:** 3.0  
**Lec-Rec-Lab:** (3-0-0)  
**Seminesters Offered:** Fall, Spring, Summer  
**Pre-Requisite(s):** EE 2110 or EE 3010 or (EE 2111 and EE 2112(C))

**EE 3131 - Electronics**
Covers the fundamentals of electronic devices and circuits; operational amplifiers, bipolar junction transistors, diodes, and MOSFETs.

**Credits:** 4.0  
**Lec-Rec-Lab:** (3-0-2)  
**Seminesters Offered:** Fall, Spring, Summer  
**Pre-Requisite(s):** EE 2112 or EE 3010

**EE 3140 - Electromagnetics**
Covers basic principles of engineering electromagnetics with an emphasis on Maxwell's equations.

**Credits:** 3.0  
**Lec-Rec-Lab:** (3-0-0)  
**Seminesters Offered:** Fall, Spring  
**Pre-Requisite(s):** PH 2200 and MA 3160 and (EE 2110 or EE 2112)

**EE 3160 - Signals and Systems**
Introduces the mathematical analysis of signals, systems, and control. Topics include differential equations, Fourier series, Fourier transforms, Laplace transforms, frequency response, Bode plots, state models, and an introduction to control systems.

**Credits:** 3.0  
**Lec-Rec-Lab:** (3-0-0)  
**Seminesters Offered:** Fall, Spring, Summer  
**Pre-Requisite(s):** EE 2110 or EE 2112 and (MA 2320 or MA 2321 or MA 2330) and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

**EE 3171 - Microcontroller Applications**
Introduces the concepts of microcontroller-based systems. Describes basic characteristics of microcontrollers, then goes into significant detail in the applications of a specific microcontroller. Topics include C and assembly language programming, instruction set interface, ASICS, and polled, interrupt, and DMA input/output.

**Credits:** 4.0  
**Lec-Rec-Lab:** (3-0-2)  
**Seminesters Offered:** Fall, Spring, Summer  
**Pre-Requisite(s):** May not be enrolled in one of the following Major(s): Computer Engineering  
**Restrictions:** 
**Pre-Requisite(s):** EE 2241 or CS 1121 or CS 1111 and (EE 2174 or EE 2173)

**EE 3173 - Hardware/Software System Integration**
Covers the integration of hardware and software into a complete working system. Includes design and construction of I/O devices for microprocessor or microcontroller-based systems, communication and bus protocols, programming in assembler language and in "C", system integration and testing. Also covers the use of FPAs and HDL design tools.

**Credits:** 4.0  
**Lec-Rec-Lab:** (3-0-3)  
**Seminesters Offered:** Fall, Spring  
**Pre-Requisite(s):** EE 2110 or EE 2112  
**Restrictions:** Must be enrolled in one of the following Major(s): Electrical Engineering, Computer Engineering  
**Pre-Requisite(s):** EE 2304 or EE 2174 and (EE 3130 or EE 3131) and (CS 1111 or CS 1142 or CS 2141) and CS 3421 and (MA 3710 or EE 3160)

**EE 3180 - Introduction to Probability and Random Signal Analysis**

**Credits:** 3.0  
**Lec-Rec-Lab:** (3-0-0)  
**Seminesters Offered:** Fall, Spring, Summer  
**Pre-Requisite(s):** EE 3180

**EE 3190 - Optical Sensing and Imaging**
Optical sensing techniques, including imaging and non-imaging systems.

**Credits:** 3.0  
**Lec-Rec-Lab:** (3-0-0)  
**Seminesters Offered:** Fall, Spring, Summer  
**Pre-Requisite(s):** EE 3130 and EE 3160 and EE 3180

---

Undergraduate Course Descriptions, 2018-19, Page 28 of 103
EE 3261 - Control Systems
Mathematical formulation of control problems (both transfer function and state-variable descriptions); analysis of feedback control systems (stability, transient performance, steady-state error, sensitivity, etc.); analog and digital simulation; and experiments with physical systems.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Fall, Spring
Pre-Requisite(s): EE 3160

EE 3290 - Photonic Material, Devices, and Applications
Light wave propagation in optical crystals and fibers, detection, and the creation of light in semiconductors.
Credits: 4.0
Lec-Rec-Lab: (3-0-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Electrical Engineering, Physics, Applied Physics, Physics (BA), Biomedical Engineering, Materials Science and Engrg; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): EE 3140 or EE 3090 or PH 2400

EE 3373 - Introduction to Programmable Controllers
The design of discrete sequential controls using programmable logic controllers (PLCs). Relay logic is used to introduce ladder logic and ladder logic is used to program the PLC. Introduces a structured approach to sequential control design. Data acquisition is introduced using BridgeVIEW software
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Electrical Engineering, Computer Engineering
Pre-Requisite(s): EE 2110 or EE 2112 or EE 3010

EE 3901 - Design Fundamentals
The design process; includes team design activities and studies project management, ethics, and professionalism.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): EE 3131(C) and UN 1015

EE 4000 - Undergraduate Research
An undergraduate research experience during the senior year in electrical or computer engineering. Students work on an active research project/grant with a faculty member. A report will be published in the department and archived.
Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; Must be enrolled in one of the following Class(es): Junior, Senior

EE 4173 - Computer System Engineering and Performance
Covers the principles and practices of modern computer architecture. Emphasizes quantitative performance evaluation of memory hierarchies, from cache through virtual memory; pipelined processors with advanced hazard management; and combined processor/memory systems. Introduces RAID, superscalars, parallel processing, cache coherence, performance simulation software.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Computer Engineering
Pre-Requisite(s): CS 3421 and EE 3173

EE 4219 - Introduction to Electric Machinery and Drives
Provides a thorough understanding of how electric machines can be used to drive loads with control of speed, torque and position. Topics include basic electro-mechanics, rotating machinery, dc machines, ac machines, power electronics and load modeling. Applications include industrial systems, hybrid/electric vehicles and electric power systems.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): EE 2110 or EE 2112 or EE 3010

EE 4220 - Introduction to Electric Machinery and Drives Laboratory
Provides a hands on understanding of how electric machines can be used to drive loads with control of speed, torque, and position. Topics include basic electro-mechanics, rotating machine, dc machines, ac machines, power electronics, and load modeling.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring
Pre-Requisite(s): EE 4219(C)

EE 4221 - Power System Analysis 1
Covers power transmission line parameters and applications, symmetrical components, transformer and load representations, systems faults and protection, and the per unit system.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): EE 3120 and (EE 2112 or EE 2110)

EE 4222 - Power System Analysis 2
Topics covered include symmetrical components; symmetrical faults; unbalanced faults; generating the bus impedance matrix and using it in fault studies; power system protection; power system operation; power system stability.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): EE 4221

EE 4226 - Power Engineering Laboratory
A laboratory based course highlighting single phase and three phase power concepts, including: power factor, single and three phase transformer configurations, non-ideal transformers, synchronous machines, renewable energy, power flow and fault simulations, relay settings and relay testing and calibration.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required
Pre-Requisite(s): EE 4221 and EE 4222(C)

EE 4227 - Power Electronics
Fundamentals of circuits for electrical energy processing. Covers switching converter principles for dc-dc, ac-dc, and dc-ac power conversion. Other topics include harmonics, pulse-width modulation, feedback control, magnetic components and power semiconductors.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer
Pre-Requisite(s): EE 3120 and (EE 3130(C) or EE 3131)

EE 4228 - Power Electronics Lab
Fundamentals of design, construction and control of circuits for electrical energy processing. Covers switching converter principles for dc-dc, ac-dc, and dc-ac power conversion. Other topics include harmonics, pulse-width modulation, feedback control, magnetic components and power semiconductors.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall
Pre-Requisite(s): EE 4227(C)

EE 4231 - Physical Electronics
Device physics and physical models of the most basic solid-state device structures. Major topics include the terminal characteristics and their physical origin, device design, and device applications.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): EE 3130 or EE 3131

EE 4232 - Electronic Applications
Study of electronic circuits under small- and large-signal conditions. Typical topics include analysis and design of power and RF amplifiers, feedback circuits, oscillators, timing circuits, and wave-shaping circuits.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): EE 3130 or EE 3131

EE 4240 - Introduction to MEMS
Fundamentals of micromachining and microfabrication techniques, including planar thin-film process technologies, photolithographic techniques, deposition and etching techniques, and the other technologies that are central to MEMS fabrication.
Credits: 4.0
Lec-Rec-Lab: (3-1-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

EE 4252 - Digital Signal Processing and its Applications
Digital signal processing techniques with emphasis on applications. Includes sampling, the Z-transform, digital filters and discrete Fourier transforms. Emphasizes techniques for design and analysis of digital filters. Special topics may include the FFT, windowing techniques, quantization effects, physical limitations, image processing basics, image enhancement, image restoration and image coding.
Credits: 4.0
Lec-Rec-Lab: (3-0-2)
Semesters Offered: Fall
Pre-Requisite(s): EE 3160
EE 4253 - Real-Time Signal Processing
Practical implementation of digital signal processing concepts as developed in EE4252. Emphasis on applications of DSP to communications, filter design, speech processing, and radar. Laboratory provides practical experience in the design and implementation of DSP solutions.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
Pre-Requisite(s): EE 4252

EE 4262 - Digital and Non-linear Control
Introduction to state space analysis and design (state feedback, observers, and observer feedback); digital control system design and analysis (Z-transforms, difference equations, the discrete-time state model, and digital implementation of controllers); introduction to nonlinear systems (equilibrium states, linearization, phase plane analysis, and describing function analysis); and experiments with physical systems.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
Pre-Requisite(s): EE 3261

EE 4271 - VLSI Design
Design of VLSI circuits using CAD tools. Analysis of physical factors affecting performance.
Credits: 4.0
Lec-Rec-Lab: (3-0-2)
Semesters Offered: Fall, Summer
Pre-Requisite(s): EE 3131 and EE 2174

EE 4272 - Computer Networks
Computer network architectures and protocols; design and implementation of datalink, network, and transport layer functions. Introduction to the Internet protocol suite (TCP, UDP, IP), domain name service and protocols, file sharing protocols, wireless networks, and network security.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Electrical Engineering
Pre-Requisite(s): CS 3411

EE 4290 - Optical Communication
Fundamentals of fiber optics communications, including sources, transmission media, detectors, signal processing, and networking.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): EE 3291

EE 4295 - Introduction to Propulsion Systems for Hybrid Electric Vehicles
Hybrid electric drive vehicle analysis will be developed and applied to examine the operation, integration, and design of powertrain components. Model based simulation and design is applied to determine vehicle performance measures in comparison to vehicle technical specifications. Power flows, losses, energy usage, and drive quality are examined over drive-cycles via application of these tools.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following College(s): Electrical Engineering
Pre-Requisite(s): EE 3291

EE 4373 - Advanced Programmable Controllers
Using Allen Bradley Micro Logix, SLC500, and PLC-5 programmable controllers, course covers structured programming, Sequential Function Charts, proportional integral differential control, data acquisition and interfacing. The labs will require students to write and troubleshoot complex PLC programs.
Credits: 4.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Electrical Engineering, Computer Engineering; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): EE 3373

EE 4411 - Engineering Electromagnetics
A mathematically rigorous study of dynamic electromagnetic fields, beginning with Maxwell's equations. Topics include scalar and vector potentials, waves, and radiation.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): EE 3140

EE 4490 - Laser Systems and Applications
Survey of laser types and analysis of common physical and engineering principles, including energy states, inversion, gain, and broadening mechanism from a quantum mechanical perspective. Laser applications and laser properties are explored in the laboratory portion.
Credits: 4.0
Lec-Rec-Lab: (3-0-2)
Semesters Offered: Spring
Pre-Requisite(s): EE 3140

EE 4723 - Network Security
Learn fundamental of cryptography and its application to network security. Understand network security threats, security services, and countermeasures. Acquire background knowledge on well known network security protocols. Address open research issues in network security.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring, Summer
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): EE 4272 or CS 4461

EE 4737 - Embedded System Interfacing
Introduction to the use of low-power microcontrollers and hardware-dependent C for embedded sensing and control systems. Emphasizes direct interfacing with analog and digital sensors and actuators of several different modalities, to implement end-to-end embedded systems for applications including robotics and wireless sensor nets.
Credits: 4.0
Lec-Rec-Lab: (3-0-1)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in the following classes: Senior, Sophomore
Pre-Requisite(s): EE 3291

EE 4777 - Distributed Additive Manufacturing Using Open-Source 3-D Printing
This course provides an overview of open-source hardware in theory and practice for an introduction to distributed additive manufacturing using open-source 3-D printing. Each student will build a customized RepRap and will learn all hardware and software for maintaining it.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): College of Engineering; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): CS 1141 or EE 2241 and (EE 3171 or EE 3173)

EE 4800 - Special Topics in Electrical Engineering
Covers specific topics in electrical engineering.
Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor and department required

EE 4805 - Electrical Engineering Project
A project in electrical engineering. An individual student or a group of students complete a mutually-agreed-upon project in consultation with a faculty member.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor and department required

EE 4870 - Special Topics in Computer Engineering
Covers special topics in computer engineering.
Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor and department required

EE 4901 - EE Design Project 1
The first semester of a program of study in which a group of students work on an engineering design project in consultation with a faculty member. (Senior project ready as defined by major substitutes for prerequisites)
Credits: 2.0
Lec-Rec-Lab: (1-0-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): EE 3131 or (EE 3130 and EE 3305)) and (EE 3901 or EE 4900) and (EE 3170(C) or EE 3171(C) or EE 3173(C))

EE 4910 - EE Design Project 2
The second semester of a program of study in which a group of students work on an engineering design project in consultation with a faculty member. (Senior project ready as defined by major substitutes for prerequisites)
Credits: 2.0
Lec-Rec-Lab: (0-1-3)
Semesters Offered: Spring
Pre-Requisite(s): EE 4901
Electrical Engineering Technology

EET 1120 - Circuits I
Defines resistance, voltage, current, and power, followed by DC network analysis and network theorems. Includes the analysis of transients in capacitive and inductive networks. Lab exercises use electronic test equipment to analyze circuits constructed from schematics.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring
Pre-Requisite(s): MA 1031(C) or MA 1032(C) or MA 1160(C) or MA 1161(C) or MA 1135(C)

EET 1411 - Basic Electronics
Introduction to basic electrical principles and devices including DC and AC circuits, diodes, transistors, operational amplifier ICs, power supply regulation, and elements of communication systems.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering Tech, Surveying Engineering, Computer Network & System Admn
Pre-Requisite(s): MA 1031 or MA 1032 or MA 1160(C) or MA 1161(C) or MA 1135(C)

EET 2120 - Circuits II
Defines and applies sinusoidal steady-state AC concepts such as impedance, complex power, resonance, and frequency response. Applies basic network analysis tools to AC single phase and balanced three-phase networks, bridge circuits, and filters. AC circuit principles are reinforced by coordinated lab exercises.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in at least one of the following Major(s): Electrical Engineering Technology, Surveying Engineering, Computer Network & System Admn
Pre-Requisite(s): EET 1120 and (MA 1031(C) or MA 1032(C) or MA 1161(C) or MA 1135(C))

EET 2141 - Digital Electronics and Microprocessor Fundamentals
A study of the fundamental components used in digital logic circuits and microcomputer architecture and programming. Topics include: number systems and codes, Boolean algebra, combinational logic circuits, flip-flops, arithmetic circuits, counters and registers, decoders, multiplexers, memory organization, microprocessor addressing modes, stacks and subroutines.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall
Pre-Requisite(s): EET 1120 or EET 1411

EET 2142 - Digital Design and Modeling Using VHDL
Emphasizes the language concepts of digital systems design using VHDL with emphasis on good design practices and writing verification testbenches. Students will gain valuable hands-on experience writing efficient hardware design code and performing simulations using ModelSim.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring
Pre-Requisite(s): EET 2141

EET 2220 - Electronic Devices & Circuits
Introduction to solid-state electronic devices and their application. Studies diodes, transistors and operational amplifier ICs. Transistor biasing, temperature stabilization and gain calculations of single and multistage amplifiers. Studies power amplifiers, frequency response, heat sinking and power supply design.
Credits: 3.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Spring
Pre-Requisite(s): EET 2120

EET 2233 - Electrical Machinery
Fundamental steady-state analysis of DC, AC polyphase and AC single-phase electrical machines as well as transformers.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall, Summer
Pre-Requisite(s): EET 1411 or EET 2120(C)

EET 2241 - C++ and Matlab Programming
Introduction to C++ programming and MATLAB for use in solving problems encountered in engineering technology. C++ topics include the basics of syntax and program structure. Focuses on the basic capabilities of MATLAB and its programming environment.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Electrical Engineering Technology
Pre-Requisite(s): MA 2160(C)

EET 2411 - Digital Electronics
Introduction to the fundamentals of the digital electronics that make up microprocessors. Topics include number systems and codes, Boolean algebra, combinational and sequential logic circuits, arithmetic circuits, and digital memory.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Computer Network & System Admn
Pre-Requisite(s): EET 1411 and (MA 1031(C) or MA 1032(C) or MA 1160(C) or MA 1161(C) or MA 1135(C))

EET 2413 - Data Communications
Introduction to the fundamentals of basic data communication methods. Topics include data transmission, signal encoding techniques, digital data communication techniques, transmission media, and frequency domain analysis.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Electrical Engineering Technology, Computer Network & System Admn
Pre-Requisite(s): EET 1411 or EET 1120

EET 3131 - Instrumentation
An investigation of transducers and where they are used. Topics include signal conditioning, sensitivity, linearity, hysteresis, process measurements, and position, motion and force measurements. Exposure to graphical data acquisition tools such as LabVIEW is incorporated.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring
Pre-Requisite(s): EET 1411 or EET 2220 or PH 2230 or EE 2110 or EE 3010

EET 3141 - Computer Architecture and Design
Computer system components, instruction set design, hardwired control units, arithmetic algorithms/circuits, floating-point operations, introduction to memory and I/O interfaces.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall
Pre-Requisite(s): EET 2241 and EET 2142(C)

EET 3143 - Programmable Logic Devices
Emphasizes the concept of design, simulation and implementation of large scale digital systems which incorporate digital devices at all complexity levels.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring
Pre-Requisite(s): EET 3141

EET 3225 - Special Electronic Devices
An advanced course in the study of linear integrated circuits. Includes op amps, comparators, wave form generators, timers and regulators. Emphasizes practical applications, including the interface of time-continuous measures to the discrete digital world.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall
Pre-Requisite(s): EET 3220

EET 3281 - Electrical Project Development and Troubleshooting
Covers soldering, component layout, printed circuit board artwork, troubleshooting, electrical and environmental factors in design as well as an overview of the practical methods used by industry to project processes. The student designs and fabricates a circuit board and assembles a project.
Credits: 3.0
Lec-Rec-Lab: (0-1-3)
Semesters Offered: Spring
Pre-Requisite(s): EET 2220

EET 3367 - Communication Systems
Basic course in communication systems. Topics include noise designation and calculation, bandwidth, frequency domain analysis, oscillators, AM/FM analysis, AM/FM transmission and reception, superheterodyne principle and SSB.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Spring
Pre-Requisite(s): EET 3220

EET 3373 - Introduction to Programmable Controllers
The design of discrete sequential controls using programmable logic controllers (PLCs). Relay logic is used to introduce ladder logic and ladder logic is used to program the PLC. Introduces a structured approach to sequential control design. Data acquisition is introduced using BridgeVIEW software.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Electrical Engineering Technology
Pre-Requisite(s): EET 1411 or (EET 2120 and EET 2141) or EET 2411 or PH 2230 or EE 2110 or EE 3010 or EE 2112
EET 3390 - Power Systems
A study of the transmission of electrical power from generators to loads, system components and system performance. Covers basics of power systems and their analysis, the per-unit concept, faults on power circuit interrupting, system instrumentation, and automatic protection system.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): EET 2233

EET 4141 - Microcontroller Interfacing
The design of systems, hardware, and software needed to perform serial and parallel data transmission between microcontrollers. Data collection using analog to digital converters, and analog and digital control outputs.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall
Pre-Requisite(s): EET 2141 or CS 1121

EET 4142 - Digital Signal Processing Applications
Provides students with knowledge in architecture, instruction set, hardware and software development tools associated with a fixed point general purpose DSP. Includes applications of DSP in control of electric drives and power electronic devices.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring
Pre-Requisite(s): EET 3367 and EET 4141

EET 4144 - Real-Time Robotics Systems
Covers the components of a robot system, safety, concepts of a work-cell system, geometry, path control, automation sensors, programming techniques, hardware, and software.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: On Demand
Pre-Requisite(s): EET 1411 or EET 2220 or PH 2230 or EE 2110 or EE 3010

EET 4147 - Industrial Robotic Vision Systems and Advanced Teach Pendant Programming
Procedures for setting up, teaching, testing, and modifying robot vision systems widely used in industrial automation. Introduces advanced Teach Pendant Programming to develop complex scenarios for integrating robots into industrial cells. Final project must demonstrate proficiency in setting up and programming an advanced robotic vision scenario.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): EET 4144

EET 4253 - LabVIEW Programming for Data Acquisition
An introduction to graphical programming using LabVIEW. Data acquisition and control programs will be written. Transducer utilization and signal conditioning are studied, including handling of noise. DAQ interfaces will be designed, built, and implemented.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring
Pre-Requisite(s): EET 1411 or EET 2220 or EE 2112 or EE 3010 or PH 2230

EET 4311 - Advanced Circuits and Controls
This course considers the modeling, design and implementation of basic and advanced process control strategies. Process modeling and dynamics will be considered using LaPlace transform analysis. Control techniques addressed will include feedback, cascade, feedforward, multivariable and model based methods.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall
Pre-Requisite(s): EET 3131 or EET 4253

EET 4367 - Wireless Communications
Topics include television systems, wave propagation, antennas, digital communications, wireless communications systems and standards, wireless communications channels, multiple access schemes, modern wireless technologies, wireless channel impairments and techniques to minimize them.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Pre-Requisite(s): EET 3367 and MA 2160

EET 4373 - Advanced Programmable Controllers
Using Allen Bradley Micro Logix, SLC500, & PLC-5 programmable controllers, course covers structured programming, Sequential Function Charts, networking, proportional integral differential control, data acquisition and interfacing. The labs will require students to write and troubleshoot complex PLC programs.
Credits: 4.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): EET 3373

EET 4380 - Alternative Energy Applications
An overview of world energy resources and energy consumption trends. Fundamental principles, applications, and viability of alternative energy sources such as wind, solar, and tidal will also be presented.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): EET 2233

EET 4460 - Senior Project I
Capstone course phase I, requiring the application of knowledge gained in lower division courses. Projects are normally team oriented, require weekly progress reports, and culminate with a final report and oral presentation.
Credits: 3.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): EET 3281

EET 4480 - Senior Project II
A capstone course requiring the application of knowledge gained in lower division courses. Projects are normally team oriented, require weekly progress reports, and culminate with a final report and oral presentation.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): EET 4460

EET 4996 - Special Topics in Electrical Engineering Technology
Selected additional topics of interest in Electrical Engineering Technology based on student and faculty demand and interest. May be a tutorial, seminar, workshop, project, or class study.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Electrical Eng Tech; Must be enrolled in one of the following Class(es): Senior

EET 4997 - Independent Study in Electrical Engineering Technology
Independent study on an approved topic under the guidance of an Electrical Engineering Technology faculty member. May be either an academic, design, or research problem/project.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Electrical Eng Tech; Must be enrolled in one of the following Class(es): Senior

EET 4998 - Undergraduate Research in Electrical Engineering Technology
An undergraduate research experience in Electrical Engineering Technology. Under the guidance of an Electrical Engineering Technology faculty member, students work on a selected/approved research project or work directly with faculty on active research projects/grants. May require more than one semester to complete.
Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Electrical Eng Tech; Must be enrolled in one of the following Class(es): Senior

EET 4999 - Professional Practice in Electrical Engineering Technology
Addresses engineering professional ethics, legal issues, professional development, and corporate culture as they relate to engineering technology graduates and our global society.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Electrical Eng Tech; Must be enrolled in one of the following Class(es): Senior

Engineering Fundamentals

ENG 1001 - Engineering Problem Solving
Introduction to the engineering problem solving method and to modern tools used to solve problems.
Credits: 2.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall
Pre-Requisite(s): (MA 1031(C) or MA 1032(C)) and (Spatial Visualization Score >= 19 or ENG 1002(C))
ENG 1002 - Introduction to 3-D Spatial Visualization
Intended for first-year engineering students with a demonstrated need for the development of 3-D spatial visualization skills. Topics include isometric sketching, orthographic projection, object transformations, 3-D coordinate systems, patterns folding to 3-D objects, and cross sections of solids.

Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring
Restrictions: Permission of department required

ENG 1003 - Introduction to Computer Aided Drafting
Fundamentals of creating engineering drawings with modern CAD software. Topics include basic geometric construction, drawing modification, dimensioning, and working with layers. Designed for students with no CAD experience.

Lec-Rec-Lab:
Credits: 1.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): ENG 1002 and (Spatial Visualization Score >= 19 or ENG 1100 or ENG 1101)

ENG 1100 - Engineering Analysis
An introduction to the engineering profession. Focuses on engineering analysis, computational skills, and communication skills.

Credits: 2.0
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): (MA 1160(C) or MA 1161(C)) and (MA 1162(C) or MA 1163(C)) and (Spatial Visualization Score >= 19 or ENG 1102(C))

ENG 1101 - Engineering Analysis and Problem Solving
An introduction to the engineering profession and to its various disciplines. Focuses on developing problem-solving skills, computational skills, and communication skills. Through active, collaborative work, students work on teams to apply the engineering problem-solving method to "real-world" problems.

Credits: 3.0
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): (MA 1160(C) or MA 1161(C) or MA 2160(C) or MA 3160(C)) and (Spatial Visualization Score >= 19 or ENG 1002(C))

ENG 1102 - Engineering Modeling and Design
Continuation of ENG1101. Introduction to the engineering design process with an emphasis on graphics and documentation. Focuses on engineering problem solving in the context of the design process.

Credits: 3.0
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): (MA 1160(C) or MA 1161(C) or MA 2160(C) or MA 3160(C)) and (Spatial Visualization Score >= 19 or ENG 1102(C))

ENG 1505 - Introduction to Systems Engineering
Students utilize a software tool to establish the utility of systems modeling through relevant examples.

Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring
Pre-Requisite(s): ENG 1001 or ENG 1101

ENG 1990 - Special Topics in Engineering
Engineering topics of interest to students and faculty that are not normally covered in the existing courses.

Credits: variable to 5.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required

ENG 2060 - Facilitating Group Learning
Development of facilitation skills in group environments. Topics include peer-learning strategies, developing inclusive classrooms, and facilitation techniques.

Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required
Pre-Requisite(s): ENG 1102

ENG 2120 - Statics-Strength of Materials
The composition and resolution of forces and force systems, principles of equilibrium applied to various bodies, simple structures, friction, and 2nd moments of area. Intro to the mechanical behavior of materials, including calculation of stresses, strains, and deformations due to axial, torsional, and flexural loading. Uses MATLAB.

Credits: 4.0
Lec-Rec-Lab: (0-4-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Major(s): Mechanical Engineering, Civil Engineering
Pre-Requisite(s): MA 2160 and PH 2100 and ENG 1102

ENG 2505 - Low Fidelity Systems Modeling
Students utilize a software tool to model a range of natural and human-made systems to gain understanding and ability to apply a systems modeling approach for analysis of systems of increasing complexity.

Credits: 3.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Pre-Requisite(s): ENG 1505(C) and MA 2160 and (ENG 1102 or CS 1121 or CS 1131)

ENG 2990 - Special Topics in Engineering
Engineering topics of interest to students and faculty that are not normally covered in the existing courses.

Credits: variable to 5.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required

ENG 3060 - Developing Mentoring Skills
Provides an overview of mentoring. Topics include various mentoring techniques, providing effective feedback, and observational strategies.

Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): ENG 2060

ENG 3200 - Thermodynamics/Fluid Mechanics
Provides engineering students with a unified understanding of the fundamental conservation laws and property accounting applied to thermodynamic and fluid dynamic systems. Topics will include but are not limited to: ideal gas behavior; heat, work, and energy; 1st and 2nd laws of thermodynamics; heat pumps; cycles; hydrostatics; Bernoulli; pipe flow and loss; and lift and drag. Uses MATLAB.

Credits: 4.0
Lec-Rec-Lab: (0-4-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): MA 2160 and CH 1112 or (CH 1150 and CH 1151) and PH 2100 and ENG 1102

ENG 3505 - Modeling Laboratory for Sustainable Systems
A laboratory course to accompany Sustainable Futures I. Puts into modeling practice the concepts, methodologies, and systems modeling to generate design alternatives.

Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall
Pre-Requisite(s): ENG 1505 and ENG 2505 and ENG 4510(C)

ENG 3830 - Engineering Professional Practice
Students will integrate and solidify topics of professional communications, ethics, problem solving, and fundamental competencies of engineering. Students will enhance their understanding of consequences of engineering, design issues, legal aspects, ethical considerations, management, and leadership, through readings, research, and discussions.

Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: On Demand
Restrictions: Permission of department required
Pre-Requisite(s): ENG 1101 or (ENG 1001 and ENG 1100) and ENG 1102 and ENG 2120 or (MEEM 2110 and MEEM 2150) and ENG 3200 or (MEEM 2201 and MEEM 3201) and EE 3010 and (CEE 3101 or CS 1121 or GE 2300 or MSE 2100)

ENG 3990 - Special Topics in Engineering
Engineering topics of interest to students and faculty that are not normally covered in the existing courses.

Credits: variable to 5.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required

ENG 4060 - Leadership in Group Environments
Develops collaborative leadership skills through active hands-on learning. Topics include collaborative software, communication, and group management strategies.

Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): ENG 3060

ENG 4070 - LEAP Leadership Practicum
Experience designed for the practical application of leadership knowledge, skills, and behaviors in the LEAP environment. The practicum experience will be designed and implemented by the student, with mentorship/guidance from the associated faculty.

Credits: variable to 6.0; Graded Pass/Fail Only
Semesters Offered: On Demand
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): ENG 2060
Enterprise

ENT 1960 - Enterprise Orientation-Spring
An orientation for students to their specific enterprise. Covers enterprise specific topics but should also include organizational structure; past, present and future projects and their results.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BUS 2100 or CEE 3710 or MA 2720 or MA 3710 or EE 3180 or BE 2100

ENG 4505 - Systems Analysis, Modeling, and Design
This course will focus on a cross disciplinary subset of systems drawn from engineering, business, and natural science. Students will concentrate on modeling methodology appropriate for moderate to large systems environments and a collaborative project where they apply what they have learned.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): ENG 3505 and ENG 4510

ENG 4510 - Sustainable Futures I
Covers introductory and intermediate concepts of Sustainable Development. Explores methods/tools for assessing sustainability (economic, environmental, societal impacts) of current and emerging industrial technologies. Explores relationships between government policies and markets for introducing sustainable technologies into national economies and corporations.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

ENG 4905 - Senior Engineering Design Project
Students work in teams on one-semester open-ended capstone design projects developing and implementing original and creative solutions to real engineering problems. Students must be Senior Project ready as defined by major. May take ENG4905, ENG4910, or ENG4910.
Credits: variable to 4.0
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): ENG 3830(C) or ENG 4505

ENG 4910 - Multidisciplinary Senior Design Project II
Continuation of ENG4905. Introduction to engineering design including modeling, simulation, economic decision making and reliability. Integration of design principles in the solution of open-ended engineering problems. Projects are defined and planned with faculty and industrial guidance. Emphasizes economics and environmental constraints. (Senior project ready as defined by major substitutes for prerequisites)
Credits: variable to 4.0
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): ENG 4900

ENG 4990 - Special Topics in Engineering
Engineering topics of interest to students and faculty that are not normally covered in the existing courses.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required

Enterprise

ENT 1960 - Enterprise Orientation-Spring
An orientation for students to their specific enterprise. Covers enterprise specific topics but should also include organizational structure; past, present and future projects and their results.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): ENG 1101 or (ENG 1001 and ENG 1100)
**ENT 3959 - Fundamentals of Six Sigma I**
This course introduces tools used for process improvement focusing on the DMAIC approach used widely in industry today.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (0-1-0)  
**Semesters Offered:** Fall  
**Restrictions:** Must be enrolled in one of the following Class(es): Sophomore, Junior, Senior

**ENT 3960 - Enterprise Project Work IV**
Interdisciplinary teams work as part of an enterprise to address real-world design projects or problems. Third-year students practice designing approaches to solve problems and develop procedures to achieve specified project objectives.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (0-0-3)  
**Semesters Offered:** Fall, Spring, Summer  
**Restrictions:** Must be enrolled in one of the following Class(es): Junior, Senior

**ENT 3961 - Enterprise Strategic Leadership**
This 1-credit module focuses on exploring research findings about leadership, the practice of leadership, and providing skill assessment and development opportunities. Topics include leadership traits, behaviors, theories, and leadership of change. Combines a variety of teaching methods, including self-assessment, cases, discussion, experiential exercises, role-playing, videotaping.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (0-0-2)  
**Semesters Offered:** Spring  
**Pre-Requisite(s):** ENT 2961 and (EC 2001 or PSY 2000 or SS 2100 or SS 2200 or SS 2400 or SS 2500 or SS 2501 or SS 2502 or SS 2503 or SS 2504 or SS 2505 or SS 2600 or SS 2700)  
**ENT 3963 - Deliver: Explore, Develop, Execute!**
if you have an idea that you believe addresses a need and could lead to commercialization, this course will help you to explore the path from idea to market through customer development, value assessment, business model planning, and execution.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (0-0-2)  
**Semesters Offered:** Fall, Spring, Summer  
**Restrictions:** Must be enrolled in one of the following Class(es): Sophomore, Junior, Senior

**ENT 3964 - Project Management**
Project definition, developing a work breakdown structure, responsibility assignment and milestone development. Covers techniques for project scheduling and practical application of Gannt and PERT/CPM charts; resource management and application of critical chain method; project budgeting and cost estimation; project monitoring, control, evaluation, and termination; and project teams, their structure, and interactions.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (1-0-0)  
**Semesters Offered:** Fall, Spring, Summer  
**Restrictions:** Must be enrolled in one of the following Class(es): Junior, Senior

**ENT 3966 - Design for Manufacturing**
This course supplements courses that address "design for function." Products "designed for manufacturing" are lower cost, higher quality, and have a shorter time to market. The course describes how the capabilities and limitations of common manufacturing processes translate into qualitative design guidelines. Topics include design for casting, forging, sheet metal forming, machining, plastics and assembly.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (0-1-0)  
**Semesters Offered:** Spring  
**Restrictions:** Must be enrolled in one of the following Class(es): Junior, Senior  
**Pre-Requisite(s):** ENG 1102

**ENT 3967 - Design for Six Sigma**
This course emphasizes the design for Six Sigma (DFSS) tools and methods used widely in industry to optimize new products and services.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (0-1-0)  
**Semesters Offered:** Spring  
**Restrictions:** May not be enrolled in one of the following Class(es): Freshman, Sophomore

**ENT 3970 - Enterprise Special Topics**
For the development of new, junior-level instructional modules in support of the enterprise.  
**Credits:** 1.0; May be repeated  
**Lec-Rec-Lab:** (0-0-2)  
**Semesters Offered:** Fall, Spring, Summer  
**Restrictions:** Must be enrolled in one of the following Class(es): Junior, Senior

**ENT 3971 - Seven Habits of Highly Effective People**
Focuses on personal and professional effectiveness through greater productivity, increased influence in key relationships, stronger team unity and complete life balance. This course will explore these areas through interactive exercises, case studies, videos, and sharing of experiences.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (0-1-0)  
**Semesters Offered:** Spring  
**Restrictions:** Must be enrolled in one of the following Class(es): Sophomore, Junior, Senior

**ENT 3979 - Alternative Energy Technologies and Processes**
This course covers a wide range of alternative energy technologies with an emphasis on chemical and biochemical processing. Technologies covered may include biofuels, solar power, fuel cells, etc.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (1-0-0)  
**Semesters Offered:** Fall  
**Pre-Requisite(s):** CH 1112 or (CH 1150 and CH 1151) and (MA 1160 or MA 1161)

**ENT 3980 - Pre-Capstone Enterprise Project Work**
Interdisciplinary teams work as part of an enterprise to address real-world design projects or problems. This course is to be taken by third-year or fourth-year enterprise students who have completed the junior-level project work, but are not approved as capstone-ready by their department.  
**Credits:** 1.0; Repeatable to a Max of 2  
**Lec-Rec-Lab:** (0-0-3)  
**Semesters Offered:** Fall, Spring, Summer  
**Restrictions:** Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore  
**Pre-Requisite(s):** ENT 3950 and ENT 3960

**ENT 3982 - Continuous Improvement Using Lean Principles**
Fields from engineering through the social sciences are adopting continuous improvement using Lean principles to make their organizations successful. The evolution of these principles and the associated processes, methods, and tools are described and applied.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (0-1-0)  
**Semesters Offered:** Fall

**ENT 3983 - The Culture of Continuous Improvement**
A continuous improvement culture is based on humility and respect for people. Problem solving in this environment is highly participative, focuses on the issue not the person, and seeks to empower the employees closest to the work being performed.  
**Credits:** 1.0  
**Lec-Rec-Lab:** (0-1-0)  
**Semesters Offered:** Spring

**ENT 3984 - Lean Six Sigma Principles**
Proven Lean Six Sigma problem-solving methods and statistical tools contribute to the success of any organization. Course covers Lean Six Sigma methodology, tools, and planning for a Green Belt certification project.  
**Credits:** 3.0  
**Lec-Rec-Lab:** (0-3-0)  
**Semesters Offered:** Fall  
**Restrictions:** Must be enrolled in one of the following Class(es): Junior, Senior

**ENT 3985 - Lean Six Sigma Certification Project Execution**
Execute a previously defined project using Lean Six Sigma problem-solving methods and statistical tools. Establish baselines; identify and validate root causes; identify, test, and implement a solution; and propose a method to sustain the gains.  
**Credits:** 3.0  
**Lec-Rec-Lab:** (0-1-4)  
**Semesters Offered:** Spring

**ENT 3986 - Lean Six Sigma Certification Project Execution**
Execute a previously defined project using Lean Six Sigma problem-solving methods and statistical tools. Establish baselines; identify and validate root causes; identify, test, and implement a solution; and propose a method to sustain the gains.  
**Credits:** 3.0  
**Lec-Rec-Lab:** (0-1-4)  
**Semesters Offered:** Spring

**ENT 4900 - Senior Enterprise Project Work V Non-Capstone**
Interdisciplinary teams work as part of an enterprise to address real-world projects or problems of significance to industry, government and communities. Fourth-year students gain experience in defining project objectives and planning strategies to achieve these objectives, and leading teams to accomplish project goals. This course is for students who are not participating in Enterprise to fulfill their capstone requirements.  
**Credits:** 2.0  
**Lec-Rec-Lab:** (0-0-6)  
**Semesters Offered:** Fall, Spring, Summer  
**Restrictions:** May not be enrolled in one of the following College(s): College of Engineering; Must be enrolled in one of the following Class(es): Senior
**ENT 4910 - Senior Enterprise Project Work VI Non-Capstone**
Interdisciplinary teams work as part of an enterprise to address real-world projects or problems of significance to industry, government and communities. Fourth-year students gain experience in defining project objectives and planning strategies to achieve these objectives, and leading technical teams to accomplish project goals. This course is for students who are not participating in Enterprise to fulfill their capstone requirements.

**Credits:** 2.0

**Lec-Rec-Lab:** (0-0-6)

**Semesters Offered:** Fall, Spring, Summer

**Restrictions:** May not be enrolled in one of the following College(s): College of Engineering; Must be enrolled in one of the following Class(es): Senior

**ENT 4950 - Enterprise Project Work V Capstone**
Interdisciplinary teams work as part of an enterprise to address real-world design projects or problems. Fourth-year students gain experience in defining project objectives, planning strategies to achieve these objectives, and leading technical teams to accomplish project goals. Must be Senior Project ready as defined by major.

**Credits:** 2.0

**Lec-Rec-Lab:** (0-0-6)

**Semesters Offered:** Fall, Spring, Summer

**Restrictions:** Must be enrolled in one of the following Major(s): Civil Engineering, Chemical Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, Materials Science and Engrg, Software Engineering, Construction Management, Computer Network & System Admin, Electrical Eng Tech, Mechanical Engineering Tech, Surveying Engineering, Biomedical Engineering; Must be enrolled in one of the following Class(es): Senior Pre-Requisite(s): (BE 3350 and BE 3700 and BE 3800 and BE 4900) or (CE 3620 or CEE 3810 or CEE 3810) or CM 4855(C) or (CS 4711 or CS 4760) or (EE 3131 and EE 3901 and EE 3171(C) or EE 3173(C)) or (GE 3860 and GE 3880) or (ENT 3950 and ENT 3960 and MEEM 3000(C) and MEEM 3600 and MEEM 3602(C)) or (ENT 3950 and ENT 3960 and MA 3710 and MEEM 3750(C) and MEEM 3750(C) and MEEM 3911) or (MY 3115 or MY 3115 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120) or CM 3250 and CMG 4120 and CMG 4120(C) or (MY 3120 and EET 3281 and EET 4253(C)) or MET 4460(C) or SAT 3812(C) or SU 4100(C) or ENG 3830

**ENT 4951 - Business Plans and Budgeting in the Enterprise**
Introduction to the mechanics, dynamics and concepts of the financial budgeting process. Applications of financial concepts is emphasized through the development of basic business plans. Topics and activities include budget preparation, performance assessment, and financial evaluation of projects.

**Credits:** 1.0

**Lec-Rec-Lab:** (0-0-6)

**Semesters Offered:** Spring

**Restrictions:** May not be enrolled in one of the following Major(s): Business Administration; Must be enrolled in one of the following Class(es): Junior, Senior

**ENT 4954 - Global Competition**
Emphasizes unique economic, market, and political risks faced by organizations as operations expand beyond domestic borders. Discusses establishing risk profiles to analyze new labor, product, capital markets on a global scale and appropriate market entry strategies. Small teams will do a risk profile and recommend market entry strategies for selected countries.

**Credits:** 1.0

**Lec-Rec-Lab:** (0-1-0)

**Semesters Offered:** Fall

**Pre-Requisite(s):** ENT 2961 and (EC 2001 or PSY 2000 or SS 2100 or SS 2200 or SS 2400 or SS 2500 or SS 2501 or SS 2502 or SS 2503 or SS 2504 or SS 2505 or SS 2600 or SS 2700)

**ENT 4960 - Enterprise Project Work VI Capstone**
Interdisciplinary teams work as part of an enterprise to address real-world design projects or problems. Fourth-year students gain experience defining project objectives, planning strategies to achieve these objectives, and leading technical teams to accomplish project goals.

**Credits:** 2.0

**Lec-Rec-Lab:** (0-0-6)

**Semesters Offered:** Fall, Spring, Summer

**Restrictions:** Must be enrolled in one of the following Class(es): Senior Pre-Requisite(s): ENT 4950 and (BE 4900 or (CEE 3620 or CEE 3810) or CM 4855 or (CS 3712 or CS 4711 or CS 4760) or (EE 3171 or EE 3173 or GE 3860 or GE 3880) or (MEEM 3000(C) and MEEM 3502(C)) or (MEEM 3000(C) and MEEM 3200(C) and MEEM 3911) or (MY 3115 or MY 3115 and MY 3115 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120 and MY 3120) or CM 3250 and CMG 4120 and CMG 4120(C) or (MY 3120 and EET 3281 and EET 4253 or MET 4460 or SAT 3812 or SU 4100 or (ENG 3830 or ENG 4505))

**ENT 4961 - Enterprise Project Work VII**
Course intended for students who have completed all project courses in Enterprise and who wish to continue with the program through graduation.

**Credits:** 1.0; Repeatable to a Max of 2

**Lec-Rec-Lab:** (0-0-3)

**Semesters Offered:** Fall, Spring, Summer

**Restrictions:** Permission of instructor required; Must be enrolled in one of the following Class(es): Senior Pre-Requisite(s): ENT 3950 and ENT 3960 and ENT 4950 and ENT 4960

**ENT 4970 - Enterprise Special Topics**
For the development of new, senior-level instructional modules in support of the enterprise.

**Credits:** 1.0; May be repeated

**Lec-Rec-Lab:** (0-1-0)

**Semesters Offered:** Fall, Spring

**Restrictions:** Must be enrolled in one of the following Class(es): Senior

---

**English as a Second Language**

**ESL 0210 - High Beginner Reading**
For students of English as a second language; not for native speakers of English. Emphasis is on preparing students for academic study through the development of effective reading strategies, vocabulary acquisition, note-taking, inferring, summarizing, and critical thinking.

**Credits:** 3.0; May be repeated; Graded Pass/Fail Only

**Lec-Rec-Lab:** (0-0-3)

**Semesters Offered:** On Demand

**Restrictions:** Must be enrolled in one of the following Major(s): English as a Second Language

**ESL 0211 - High Beginner Vocabulary**
For students of English as a second language; not for native speakers of English. Emphasis is on vocabulary acquisition, word form, and morpheme recognition.

**Credits:** 1.0; Graded Pass/Fail Only

**Lec-Rec-Lab:** (0-0-3)

**Semesters Offered:** On Demand

**Restrictions:** Must be enrolled in one of the following Major(s): English as a Second Language

**ESL 0220 - High Beginning Writing**
For students of English as a second language; not for native speakers of English. Students work collaboratively on writing tasks of various genres through multiple drafts emphasizing structural organization of sentences and paragraphs, and syntactical accuracy.

**Credits:** 3.0; May be repeated; Graded Pass/Fail Only

**Lec-Rec-Lab:** (0-2-3)

**Semesters Offered:** On Demand

**Restrictions:** Must be enrolled in one of the following Major(s): English as a Second Language

**ESL 0230 - High Beginner Listening and Speaking**
For students of English as a second language; not for native speakers of English. Emphasis on developing oral fluency, conversation, listening strategies, and presentation skills on familiar topics.

**Credits:** 3.0; May be repeated; Graded Pass/Fail Only

**Lec-Rec-Lab:** (0-2-3)

**Semesters Offered:** On Demand

**Restrictions:** Must be enrolled in one of the following Major(s): English as a Second Language

**ESL 0231 - High Beginner Pronunciation**
For students of English as a second language, not native speakers of English. Emphasis on prosodic elements of second language speech. Focus on listening for features of speech. Time is divided between classroom instruction and lab.

**Credits:** 1.0; Graded Pass/Fail Only

**Lec-Rec-Lab:** (0-0-3)

**Semesters Offered:** On Demand

**Restrictions:** Must be enrolled in one of the following Major(s): English as a Second Language

**ESL 0240 - High Beginner Grammar**
For students of English as a second language; not for native speakers of English. Students receive explicit instruction and form-focused activities to develop mechanics and syntactical accuracy emphasizing various simple, complex, and compound structures, verb forms, and other grammatical elements.

**Credits:** 1.0; May be repeated; Graded Pass/Fail Only

**Lec-Rec-Lab:** (0-0-3)

**Semesters Offered:** Fall, Spring

**Restrictions:** Must be enrolled in one of the following Major(s): English as a Second Language

**ESL 0290 - Beginning Special Topics**
For students of English as a second language; not for native speakers of English. Concentrated on a specific area of ESL. Example: English for computer users.

**Credits:** variable to 6.0; May be repeated; Graded Pass/Fail Only

**Semesters Offered:** On Demand

**Restrictions:** Must be enrolled in one of the following Major(s): English as a Second Language
ESL 0310 - Intermediate Reading I
For students of English as a second language, not for native speakers of English. Emphasis is on comprehension of main ideas and structural details, critical-thinking skills and class discussion. Students learn to take notes, outline and summarize. 
Credits: 3.0; May be repeated; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-2-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0311 - Intermediate Vocabulary I
For students of English a second language; not for native English speakers. The emphasis is on vocabulary acquisition for academic study. Students will learn techniques for understanding vocabulary words from context; analyze lexical roots, prefixes and suffixes; and become familiar with word association mapping and idiomatic expressions. 
Credits: 1.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-0-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0320 - Intermediate Writing I
For students of English as a second language, not for native speakers of English. Students work collaboratively on writing tasks of various genres through multiple drafts; emphasizes structural organization, development and syntactical accuracy. 
Credits: 3.0; May be repeated; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-2-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0330 - Intermediate Listening and Speaking I
For students of English as a second language; not for native speakers of English. Emphasis is on developing oral fluency, skills needed for group work, academic listening strategies and academic presentation skills on familiar, informative topics. 
Credits: 3.0; May be repeated; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-2-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0331 - Intermediate Pronunciation I
For students of English as a second language, not native speakers of English. Emphasis on prosodic elements of second language speech. Focus on identifying and anticipating features of speech. Time is divided between classroom instruction and lab. 
Credits: 1.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-0-3)

Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0340 - Intermediate Communicative Grammar
For students of English as a second language; not for native speakers of English. Using explicit instruction and form-focused activities to develop students' syntactical accuracy; further developments on various simple, complex and compound structures, verb forms and other grammatical elements. 
Credits: 1.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-0-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0350 - Intermediate Reading II
For speakers of English as a second language; not for native speakers of English. This is an intermediate reading course for academically oriented ESL students. The course is designed to further develop effective reading strategies for adapted academic texts of varying lengths. 
Credits: 3.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-2-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0351 - Intermediate Vocabulary II
For students of English as a second language; not for native English speakers. Further emphasis on vocabulary acquisition but with more range and depth than in Intermediate Vocabulary I. Demonstrate understanding of figurative language, word relationships, and nuances in word meanings. Students will improve their ability to understand and correctly use academic vocabulary that is technical and precise, and meant to convey specific ideas, often with reduced context. 
Credits: 1.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-0-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0360 - Intermediate Writing II
For students of English as a second language, not for native speakers of English. Students work collaboratively on writing tasks of various genres through multiple drafts; further development on structural organization, development and syntactical accuracy. 
Credits: 3.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-2-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0370 - Intermediate Listening and Speaking II
For students of English as a second language; not for native speakers of English. Further development of oral fluency, skills needed for group work, academic listening strategies, and academic presentation skills on familiar, informative topics. 
Credits: 3.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-2-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0371 - Intermediate Pronunciation II
For students of English as a second language, not native speakers of English. Emphasis on prosodic elements of second language speech. Focus on identifying and anticipating features of speech. Time is divided between classroom instruction and lab. 
Credits: 1.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-0-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0380 - Intermediate Communicative Grammar II
For students of English as a second language, not for native speakers of English. Using explicit instruction and form-focused activities to develop students' syntactical accuracy; further developments on various simple, complex and compound structures, verb forms and other grammatical elements. 
Credits: 1.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-0-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0390 - Intermediate Special Topics
For students of English as a second language, not for native speakers of English. Concentrated study of a specific area of ESL in greater depth than in other courses. Examples: English for computer users, idioms; Contact Director of ESL Programs. 
Credits: variable to 6.0; May be repeated; Graded Pass/Fail Only  
Semesters Offered: On Demand  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0399 - Intermediate Independent Study
For students of English as a second language, not for native speakers of English. Selected areas in ESL based on interest and need of student. Interested students should contact the Director of English as a Second Language Programs. 
Credits: variable to 6.0; May be repeated; Graded Pass/Fail Only  
Semesters Offered: On Demand  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0410 - Advanced Reading I
For students of English as a second language, not for native speakers of English. Emphasis is on preparing students for academic study through the development of effective reading strategies, note-taking, inferring, summarizing, critical thinking and discussion. 
Credits: 3.0; May be repeated; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-2-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0411 - Advanced Vocabulary I
For students of English as a second language, not for native speakers of English. Emphasis is on helping students increase their command of idiomatic English and academic vocabulary in daily and academic situations with attention given to correct pronunciation. Additional practice with the Academic Word List (AWL) will include short writing assignments. 
Credits: 1.0; Graded Pass/Fail Only  
Lec-Rec-Lab: (0-0-3)  
Semesters Offered: Fall, Spring, Summer  
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language
ESL 0412 - Advanced English for Business
This course is designed for students of English as a second language, not for native speakers of English. Emphasis is on acquiring vocabulary necessary for academic study of courses required in business majors.
Credits: 1.0; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0413 - Advanced English for Engineering
This course is designed for students of English as a second language, not for native speakers of English. Emphasis is on acquiring vocabulary necessary for academic study of courses required in engineering majors.
Credits: 1.0; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0414 - Advanced English for Math
This course is designed for students of English as a second language, not for native speakers of English. Emphasis is on acquiring vocabulary necessary for academic study of mathematical courses.
Credits: 1.0; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0415 - Advanced English for Science
This course is designed for students of English as a second language, not for native speakers of English. Emphasis is on acquiring vocabulary necessary for academic study of courses required in biological science majors.
Credits: 1.0; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0420 - Advanced Writing I
For students of English as a second language, not for native speakers of English. Students work collaboratively on writing tasks of various genres through multiple drafts; emphasizes coherence and unity, source use and documentation and language formality.
Credits: 3.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0421 - Advanced Listening and Speaking I
For students of English as a second language, not for native speakers of English. Emphasis is on developing oral fluency academic listening strategies, argument development, skills needed for group work and academic presentation skills with a focus on persuasive speaking.
Credits: 3.0; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0430 - Advanced Listening and Speaking II
For students of English as a second language, not for native speakers of English. Further development of oral fluency, academic listening strategies, argument development, skills needed for group work, and academic presentation skills with a focus on persuasive speaking.
Credits: 3.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0431 - Advanced Pronunciation I
For students of English as a second language, not for native speakers of English. Emphasis on prosodic elements of second language speech. Focus on producing features of speech. Time is divided between classroom instruction and lab.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0432 - Advanced Pronunciation II
For students of English as a second language, not for native speakers of English. Emphasis on prosodic elements of second language speech. Focus on producing features of speech. Time is divided between classroom instruction and lab.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0440 - Advanced Communicative Grammar I
For students of English as a second language, not for native speakers of English. Using explicit instruction and form-focused activities to develop students’ error analysis skills; emphasizes correcting sentence constructions and connections, verb consistency and other common errors.
Credits: 1.0; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0441 - Advanced Communicative Grammar II
For students of English as a second language, not for native speakers of English. Students work collaboratively on writing tasks of various genres through multiple drafts; emphasizes argument construction/deconstruction, source integration, sentence variety and cohesion.
Credits: 3.0; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0450 - Advanced Reading II
For students of English as a second language, not for native speakers of English. Emphasis is on preparing students for academic study through the development of effective reading strategies, note-taking, inferring, summarizing, critical thinking and discussion in academic settings using slightly adapted academic texts.
Credits: 3.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0451 - Advanced Vocabulary
For students of English as a second language, not for native speakers of English. Emphasis is on mastering the words and phrases that are specific to academic writing, speaking and research, as well as everyday idioms, expressions, and abbreviations. Predicting the pronunciation pattern of new words and phrases; lexical bundles and collocation usage will be also covered.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0460 - Advanced Writing II
For students of English as a second language, not for native speakers of English. Emphasis is on mastering the words and phrases that are specific to academic writing, speaking and research, as well as everyday idioms, expressions, and abbreviations. Predicting the pronunciation pattern of new words and phrases; lexical bundles and collocation usage will be also covered.
Credits: 3.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0470 - Advanced Listening and Speaking II
For students of English as a second language, not for native speakers of English. Further development of oral fluency, academic listening strategies, argument development, skills needed for group work, and academic presentation skills with a focus on persuasive speaking.
Credits: 3.0; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0471 - Advanced Pronunciation II
For students of English as a second language, not for native speakers of English. Emphasis on prosodic elements of second language speech. Focus on producing features of speech. Time is divided between classroom instruction and lab.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0480 - Advanced Communicative Grammar II
For students of English as a second language, not for native speakers of English. Further development of oral fluency academic listening strategies, argument development, skills needed for group work, and academic presentation skills with a focus on persuasive speaking.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0490 - Advanced Special Topics
For students of English as a second language, not for native speakers of English. Concentrated study in a specific area of ESL in greater depth than in other courses. Examples: academic writing, business English. Contact Director of ESL Programs.
Credits: variable to 6.0; May be repeated; Graded Pass/Fail Only
Semesters Offered: On Demand
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 0550 - Research Writing I
For international graduate students of English as a second language, not for native speakers of English. Students work on improving academic reading and writing skills; emphasizes rhetorical analysis, cohesion and coherence, source use, research skills and syntactical accuracy.
Credits: 3.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall

ESL 0580 - Research Writing II
For international graduate students of English as a second language, not for native speakers of English. Students work on improving academic reading and writing skills; emphasizes graduate research writing and academic presentations.
Credits: 3.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring

ESL 0590 - Academic Support Spec Topics
For students of English as a second language, not for native speakers of English. Study a specific area of ESL in greater depth than in other courses. Examples: graduate research writing, business English, academic presentations. Contact Director of ESL Programs.
Credits: variable to 4.0; May be repeated; Graded Pass/Fail Only
Semesters Offered: On Demand
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

ESL 0599 - Academic Support Indep Study
For students of English as a second language, not for native speakers of English. Selected areas in ESL based on student need and interest. Interested students should contact the Director of English as a Second Language Programs.
Credits: variable to 6.0; May be repeated; Graded Pass/Fail Only
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): English as a Second Language

ESL 1601 - Introduction to Audio Production
An introduction to hands-on creative and technical work in sound. Work covers script analysis, story telling approaches, dialog direction and editing, sound effects and ambiance design, music integration and DAW based mixing.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

ESL 1602 - Introduction to Music Mixing
A hands-on introduction to mixing music with emphasis on the support of musical principles and style. Students develop a technical understanding and practice the manipulation of volume, frequency, dynamics, pitch, and time to support the focus, rhythm, melody, and mood of a wide variety of musical styles.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring

ESL 1701 - Backstage Technology
Overview of the basic techniques, theories, and terminology of technical theatre. Focus on practical application of stagecraft and rigging for a theatrical production, safety in technical theatre, physical theatre structures, production processes, and theatre organization.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring

ESL 1702 - Lighting and Sound Technology
Overview of the basics of theatrical lighting, stage electrics, audio systems, and techniques for theatrical production. Focus on practical application of static and automated lighting for a theatrical production, including instrumentation and control. Introduction to live sound reinforcement, recording, and complex playback.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

ESL 1703 - Costume Technology
Introduction to basics of costume shop technology, costume construction/sewing. Focus on costume shop procedures, practical use of tools, machines, and techniques through individual projects and costuming for mainstage productions. Overview of hand sewing and pattern fitting/alteration.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Summer

ESL 2123 - World Music
This course introduces the student to the diversity of traditional music from around the globe. Students will explore the universal importance of music, its place within a global community, and effects of technology on the cross pollination of musical styles.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer - Offered alternate years beginning with the 2017-2018 academic year

ESL 2150 - Creative Drawing Processes
Students redefine “drawing” and challenge preconceptions of what it means to be “creative” through a range of exercises using materials such as paint, pencils, pans, video, and collage. Practice close observation to see the world in new ways.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring, Summer

ESL 2160 - Creative Practices
Students will mindfully cultivate their creativity while making art connected to specific interests. Hands-on practice with basic photo, drawing, painting, and/or collage techniques of how artists/designers find inspiration. Prior drawing experience recommended.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year

Visual and Performing Arts

FA 1501 - Introduction to Audio Production
An introduction to hands-on creative and technical work in sound. Work covers script analysis, story telling approaches, dialog direction and editing, sound effect and ambiance design, music integration and DAW based mixing.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

FA 1602 - Introduction to Music Mixing
A hands-on introduction to mixing music with emphasis on the support of musical principles and style. Students develop a technical understanding and practice the manipulation of volume, frequency, dynamics, pitch, and time to support the focus, rhythm, melody, and mood of a wide variety of musical styles.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring

FA 1701 - Backstage Technology
Overview of the basic techniques, theories, and terminology of technical theatre. Focus on practical application of stagecraft and rigging for a theatrical production, safety in technical theatre, physical theatre structures, production processes, and theatre organization.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring

FA 1702 - Lighting and Sound Technology
Overview of the basics of theatrical lighting, stage electrics, audio systems, and techniques for theatrical production. Focus on practical application of static and automated lighting for a theatrical production, including instrumentation and control. Introduction to live sound reinforcement, recording, and complex playback.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

FA 1703 - Costume Technology
Introduction to basics of costume shop technology, costume construction/sewing. Focus on costume shop procedures, practical use of tools, machines, and techniques through individual projects and costuming for mainstage productions. Overview of hand sewing and pattern fitting/alteration.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Summer

FA 2123 - World Music
This course introduces the student to the diversity of traditional music from around the globe. Students will explore the universal importance of music, its place within a global community, and effects of technology on the cross pollination of musical styles.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer - Offered alternate years beginning with the 2017-2018 academic year

FA 2150 - Creative Drawing Processes
Students redefine “drawing” and challenge preconceptions of what it means to be “creative” through a range of exercises using materials such as paint, pencils, photos, video, and collage. Practice close observation to see the world in new ways.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring, Summer

FA 2160 - Creative Practices
Students will mindfully cultivate their creativity while making art connected to specific interests. Hands-on practice with basic photo, drawing, painting, and/or collage techniques of how artists/designers find inspiration. Prior drawing experience recommended.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
FA 2190 - Art and Nature
Explore "nature" through art using materials ranging from what you find outdoors to digital media. Visits to natural sites provide inspiration and practice with creative fundamentals. Explore expressivity, brainstorming, project development, and collaboration.
Credits: 3.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall

FA 2222 - Film Music
This course surveys the development of film music. Students will learn how music functions to support the aesthetic/narrative elements of the story. Students will learn skills to identify how music manipulates the listener and how composers shape that manipulation.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Summer

FA 2300 - Art and Design Studio
Introduction to art and design as visual art. Explores design principles and creative problem solving using multiple materials. Students also examine design's ability to shape and interpret information. Hands-on studio work, lectures and discussions. Emphasizes creativity, inventiveness, and experimentation.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following Class(es): Senior

FA 2305 - Ceramics I
Introduces handbuilding ceramic techniques, including coil, slab, pinch and wheel throwing. The goal is to allow students to be individually creative through experimenting with the possibilities in three-dimensional form. Historical, contemporary, functional and sculpture processes will be explored.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Summer

FA 2315 - Beginning Wheel Throwing
Learning to use the potters wheel as an expressive tool is the goal of this course. In the context of traditional techniques for creating vessels forms students will also be challenged to explore their individual expressive and creative abilities.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Summer

FA 2320 - Color and Meaning
An introductory level course in which students discover their personal palettes and explore color schemes. Use paint, basic photography, and collage to tap the expressive potential of color. Solve practical color problems and create poetic color compositions.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall

FA 2330 - Art Appreciation
Introduces students to analytical tools to critically observe the visual world. By studying arts media, artists and designers, creative and technical processes, principles of design, as well as major works of art, students will express their own ideas about the visual experience in written form.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer

FA 2361 - Scenic Art & Scenic Illustration
Students will learn small-format drawing, painting, and illustration techniques for theatre and architectural design, as well as large-scale scenic painting techniques for painting of murals, faux finishes, theatre, and opera. Lectures, discussions, and hands-on studio practice.
Credits: 3.0
Lec-Rec-Lab: (0-2-1)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): FA 1701(C)

FA 2400 - Huskies Pep Band
The Huskies Pep Band provides enthusiastic support for a number of athletic programs at MTU and participates in important events in the community. The HPB is one of the most visible programs in the University. We are known as one of the country's most spirited college pep bands anywhere. May be used once as a general education co-curricular course.
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring

FA 2402 - Campus Concert Band
The Concert Band provides the opportunity for students to pursue an interest in instrumental performance through the medium of a concert wind band. Repertoire of the ensemble includes music of the highest calibre with moderate technical demands. Open to students with prior experience in a band or orchestra. May be used once as a general education co-curricular course.
Credits: 1.0; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring

FA 2430 - Research and Development Jazz Band
The Research and Development Jazz Band is for instrumentalists wishing to learn the fundamentals of jazz improvisation and the nuances of the jazz idiom. Repertoire includes swing, jazz, rock, Latin, ballads, fusion, and other contemporary jazz styles. Public performances are given on campus and in the surrounding area. Audition required.
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring

FA 2500 - Music Theory I
Reinforcement of music fundamentals, including musical notation; major, minor scales; intervals; triads; rhythm; and an introduction to musical analysis. Provides rudimentary ear training. Introduces music writing, both manual and with notation software.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

FA 2501 - Basic Musicianship: Skill Acquisition in Music Reading, Sight-Singing, and Ear-Training
Skill acquisition in music reading, sight-singing, keyboard harmony and ear-training. Provides an introduction to melodic and rhythmic solfege systems. Class should be taken before or concurrently with FA2500.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

FA 2520 - Music Appreciation
Survey of the nature of Western music with an emphasis on the developments in the aesthetics, theories, and media of music, including electronic music, multimedia works, and non-Western influences.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer

FA 2570 - Music Lessons for Brass, Woodwind, String, Percussion, Harp, Piano, Voice, Guitar
Professional private music instruction on brass, woodwind, string, piano, guitar, voice, organ, and harp. Concert grand harp available on campus. Guitar rentals available from instructor. One semester may be counted toward General Education co-curricular requirements.
Credits: 0.5; May be repeated; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-1)
Semesters Offered: Fall, Spring, Summer

FA 2580 - Group Voice
The fundamentals of speech and singing including information about the vocal instrument, the vocal process, vocal technique, and how to learn and perform simple solo songs.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand

FA 2600 - Beginning Acting
Teaches basic techniques of acting to include script and character analysis, internal and external approaches to performance, and basic use of voice and body.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring

FA 2640 - Stage Makeup
A practical guide to the theory and practice of makeup for the stage. Students will study basic techniques including corrective, aging, character makeup, and special effects.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year

FA 2650 - Audition Techniques
Students learn to prepare for the many types of auditions encountered in the professional world of performance through simulated audition situations, from the theatrical cattle-call to the screen test in film. Additionally, professional interviewing techniques are taught and practiced through simulation.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): FA 2600

FA 2690 - Acting Practicum
Performance in a stage production or electronic media project. The project must be approved by the instructor either through audition or written contract of planned project.
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required
FA 2661 - Backstage Practicum
Open to students selected for the crew of a mainstage theatre production sponsored by the Department of Visual and Performing Arts. Positions on stage crews are open to all MTU students. Work assignments will be made by the technical director of the Department of Visual and Performing Arts.
Credits: variable to 3.0; May be repeated
Semesters Offered: Fall, Spring

FA 2662 - Sound Practicum
Students get hands-on experience in live and recorded sound as well as in system maintenance and design. This work is done in a simulated internship experience. Students are expected to take this course multiple times and work towards leadership positions.
Credits: variable to 3.0; May be repeated
Semesters Offered: Fall, Spring
Pre-Requisite(s): FA 1702 and (FA 1662 or FA 1664)

FA 2663 - Career Development
Provides students the opportunity to attend professional events which contribute to the development of their careers. Students will experience seminars, workshops, performance opportunities, competitions, and may perform services and interact with professionals at such events as KCACTF, AES, USITT, and URITA.
Credits: 1.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-0-1)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Sound Design, Theatre & Entertain Tech (BT), Theatre & Electr. Media Perf., Audio Production & Technology

FA 2701 - Drafting for the Entertainment Industry
Basics of hand drafting conventions and standards used in the entertainment industry. Focus on design and technical techniques for views such as: ground plans, elevations, sections, detail drawings, orthographic projections, scale perspective drawings. Introduces industry-specific CAD programs.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring, Summer

FA 2705 - Stage Properties - Designing and Crafting
A focus on the design, research, production, and management of stage properties including: script, analysis, period and style, appropriateness, set dressing, Development and utilization of effective tools, materials, and techniques for structure, details, and finishing.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): FA 1701(C)

FA 2710 - Movement for Performers
Develops physical flexibility and strength, beginning with discovery of the body's physical center. The student will learn to create characters by focusing on posture, movement in space, and kinesics.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2009-2010 academic year

FA 2720 - Sound in Art and Science
Engagement with critical, historical, and creative approaches to sound in Entertainment, Art, Technology, and Science. Integrated with a historical overview of aural environment and its application to designed environments from zen gardens to Harley exhaust.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Summer

FA 2730 - Costume Crafts
Research and exploration of the theatrical techniques used to create costume crafts and personal props. Practical projects will challenge students to develop skills in millinery, leatherwork, painting and dyeing, fabric manipulation, mask making, jewelry, and safe use of materials.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year

FA 2820 - Theatre Appreciation
Students engage theatre as a phenomenon precipitating experiences affirming life and sparking insight. Exploration of creativity comes through exercises and play writing; critical thinking is practiced in script analysis. Aesthetics, and production roles are applied in staging a short play.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring

FA 2830 - Voice and Articulation
An applied study of the use of voice. Students work to develop stronger, more vibrant and articulate professional speech. Accent reduction is covered extensively. Additionally, techniques for media are introduced.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2010-2011 academic year

FA 3000 - Visual & Performing Arts Tour
Students participating in fine arts performance tours taking place outside of regular academic terms are eligible to receive credit based on the time span of the tour and the nature of the itinerary. Requires active membership in the touring group or permission of director.
Credits: variable to 3.0; May be repeated; Graded Pass/Fail Only
Semesters Offered: On Demand
Restrictions: Permission of instructor required

FA 3112 - Music Composition I
This course is a study in the art of acoustic instrumental, vocal and MIDI composition. Students will study music of contemporary composers and create compositions for performance.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): FA 2500 and FA 3530

FA 3112 - Music Composition II
This course is a continuation of Music Composition I. Students expand their skills to include composition for media including, film, television, and digital arts. Students will apply their skills to create fully realized live performances of their compositions.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): FA 2500 and FA 3530 and FA 3112

FA 3133 - Contemporary Music: The Search for New Sounds
Contemporary Music will explore music from the late nineteenth century through today. The focus of the class will be modern composers' search for new sounds using electronic instruments, popular music, non-western music, and new performance techniques.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2013-2014 academic year
Pre-Requisite(s): FA 2500 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3150 - Drawing II
Observational and imaginative drawing including the human figure. Non-representational drawing. Contemporary drawing systems, concepts, and processes. Emphasizes proportion, structural framework, visual measurement, movement, and relationships. Students work in a variety of drawing media.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring
Pre-Requisite(s): FA 2050 or FA 2150 or FA 2300 or FA 2305 or FA 2330 or FA 2160

FA 3305 - Creative Ceramics
Addresses ceramic theory, history, and science, and aims to develop the content and quality of students' work in clay. Students will learn new ways of creating forms through use of the wheel, molds, and study of clay and glaze technologies.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring, Summer

FA 3330 - Art History - Prehistory to Renaissance
Surveys world art and architecture from the Paleolithic (30,000BC) to the Renaissance (1500AD). Focusing on city building, cave painting, glass, ceramics, frescoes, and metal casting, students will interpret the visual arts as historical evidence and expressions of cultural beliefs.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Summer
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3333 - Contemporary Sculpture Studio
Introduction to contemporary sculpture using a range of materials and approaches. Emphasizes development of students' creative language. Hands-on studio work, lectures, discussions. Class takes place in Rozsa gallery; includes student exhibit at end of semester.
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
FA 3335 - Traditional Sculpture Studio
Introduction to traditional ways of making sculpture around the world. Students develop studio skills while studying creative traditions from varied cultures. Hands-on studio work, lectures, discussions. Class takes place in Rozsa gallery; includes student exhibit at end of semester. 
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025)

FA 3340 - Art History - Renaissance to Today
Surveys Western art from the Renaissance (1500AD) to today. Focusing on painting, sculpture, architecture, and photography. We will study art in relation to its national, international, social, cultural, and historical contexts. 
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring, Summer
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3360 - Ceramic Sculpture
Explores the material properties and expressive potential of clay. Learning a variety of sculptured techniques, students will demonstrate the ability to incorporate the elements and principles of art (line, space, form, harmony) to create aesthetic artwork. 
Credits: 3.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: On Demand
Pre-Requisite(s): FA 2305 or FA 3305

FA 3400 - Keweenaw Symphony Orchestra
The KSO is a college-community orchestra comprising Tech students, Tech faculty, and community musicians. The ensemble performs the great orchestra, opera, and ballet masterworks. The orchestra presents four-five yearly concerts, including regular concert tours. Auditions required. 
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring

FA 3401 - Wind Symphony
The Wind Symphony is a concert wind ensemble of variable size and instrumentation for students with a serious interest in musical performance at a high level. Features a comprehensive approach to the literature to be performed, including study of composers and historical background. Audition required. 
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required

FA 3430 - Jazz Lab Band
A select ensemble of approximately twenty instrumentalist studying jazz improvisation and performing literature for the jazz ensemble. Repertoire includes swing, jazz-rock, ballads, fusion, and experimental compositions. Activities include performances at festivals, concerts, and dances, and a spring-break tour. Course work includes topics in jazz history, music theory, and improvisational. Audition required. 
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring

FA 3501 - Conducting and Interpretation
Fluency in reading, analyzing, and interpreting orchestral, band, and choral music scores; principles and techniques of conducting a music ensemble; live conducting experiences with music ensembles; in-depth analysis of live and recorded classical, jazz, and rock music; fundamentals of musicianship. 
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): FA 2500

FA 3510 - Concert Choir
A select ensemble made up of student and community singers studying and performing traditional choral literature ranging from chant to avant-garde compositions. Activities include campus and community performances and occasional international tours. Audition required. 
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring

FA 3530 - Music Theory II
Study of fundamentals of tonal harmony, including harmonic progression and principles of voice-leading. Introduction to formal and harmonic analysis. Students will complete beginning projects in music composition. 
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): FA 2500

FA 3550 - History of Jazz
Covers the musical, historical, and sociological elements of America's only original musical art form, jazz. Focuses on the major stylistic eras from 1900 to the present in addition to the major artists and their contributions. Emphasizes developing interactive, aural, and critical skills. 
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Summer - Offered alternate years beginning with the 2009-2010 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3560 - Music History
Developments in western classical music from the 1770s to 1970s in Europe and America. Includes a brief examination of Baroque music. Concentrates on music, style, aesthetics, culture, and biographies of major composers from the Classical, Romantic, and Twentieth-Century periods. 
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring, Summer
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3565 - Masterworks in Western Music Literature
Examination of selected works from the canon of Western music in context of relevant historical events. Students will explore the relation of text and music, ritual and music, rhetorical tropes in music as well as expressions of musical form. 
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2013-2014 academic year
Pre-Requisite(s): FA 2500(C) or FA 2501(C)

FA 3580 - Chamber Choir
Participation in the Chamber Choir provides opportunities for students to explore and perform music written for small choir. Repertoire from varied styles and time periods (from antiquity to the present) will be prepared and presented in formal and informal performance settings. Audition required. 
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring

FA 3600 - Advanced Acting
Students explore acting through analytical and theoretical study of script and characters. Understanding of characters in the context of a play or film will prepare students to apply advanced acting techniques such as Meisner and Stanislavski. 
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): FA 2600 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3620 - Acting for Television and Film
Advanced applications of fundamental acting technique and presentation skills with the added dynamic of the camera. Students will explore scene work for television and film, as well as commercial performance techniques for advertising in digital media. 
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2013-2014 academic year

FA 3625 - History of Rock
This course will acquaint the student with the musical, historical, cultural, and sociological elements of Rock Music. It covers the major stylistic eras from 1948-present, the "pre-rock" era and the major artists and their contributions. Emphasis is placed on students developing interactive, aural and critical skills. 
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3630 - The Beatles and the Beach Boys: An Analysis of Their Music, Their Evolution, Their Rivalry
Analysis of biography, formative vs. mature style, musical structure, and historical impact of both bands. Offered online, second half of summer term. 
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Summer

<td>FA 3650</td>
<td>- Stage Management</td>
<td>Procedures and skills for effective stage management of theatrical productions, including coordination of performers and technicians during rehearsal and performance periods. Instruction in stage manager's notation used for blocking, scene shifts, and cues for lighting, sound, special effects, and performers.</td>
<td>3.0</td>
<td>Spring - Offered alternate years beginning with the 2009-2010 academic year</td>
<td>Freshman</td>
</tr>
<tr>
<td>FA 3660</td>
<td>- Advanced Acting Practicum for Film/Video/Stage</td>
<td>Practical experience of the production processes of theatre and media. Students will research, rehearse, and perform a role in an approved theatre or media project.</td>
<td>1.0; Repeatable to a Max of 2</td>
<td>Fall, Spring</td>
<td>Permission of instructor required</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>FA 3661</td>
<td>- Design &amp; Management Practicum</td>
<td>Open to students who take significant responsibility for a Visual and Performing Arts production, such as stage manager, assistant designer, or assistant director.</td>
<td>3.0; May be repeated</td>
<td>Fall, Spring</td>
<td>FA 2660</td>
</tr>
<tr>
<td>FA 3662</td>
<td>- Advanced Sound Practicum</td>
<td>Open to students who take significant responsibility for sound on a major production, such as sound designer, recording engineer, live sound engineer.</td>
<td>3.0; May be repeated</td>
<td>Fall, Spring, Summer</td>
<td>FA 1662 and FA 1664 and FA 1702 and FA 2662 and FA 3730</td>

</tbody>
</table>
FA 3741 - Recording Lab
Hands-on learning in the art of the recording engineer. Students develop an understanding of pop and classical recording approaches, skills to decide which approach is appropriate for a given task, and the technical knowledge necessary to implement the chosen approach.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Theatre & Entertain Tech (BS), Sound Design, Audio Production & Technology
Co-Require(s): FA 3740
Pre-Requisite(s): FA 1662 and FA 1664 and FA 1702

FA 3750 - Lighting Design
Fundamentals of designing theatrical lighting through various explorations and projects. Focus on professional design development and presentation techniques: theatrical drafting conventions, light sketches, plots. Also, designer/director relationships, script analysis, research, design concepts/history. Students are introduced to a mainstage theatre design.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2005-2006 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): FA 1702 or FA 2820

FA 3760 - Costume Design
Fundamentals of designing theatrical costumes through various explorations and projects. Focus on professional design development and presentation techniques: costume renderings, patterning, color/fabric analysis. Also, designer/director relationships, script/character analyses, research, design concepts. Students are introduced to a mainstage theatre design.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2003-2004 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): FA 2800

FA 3780 - Directing for Theatre
A comprehensive, in-depth study of mounting a theatre production with an emphasis on directing. Through script analysis, students study the necessary production elements, how they interrelate, and directing techniques to create a unified production from the director's vision.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: Permission of instructor required
Pre-Requisite(s): FA 2800

FA 3810 - Theatre History I
Study of the Cultural History of Theatre from is likely beginnings through the English Restoration, including traditions of both eastern and western theatre.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3821 - Theatre History II
Study of the Cultural History of Theatre from the end of the English Restoration through the contemporary era.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3830 - The Broadway Musical
A multimedia examination of important works of American musical theatre, how these works have mirrored or shaped our culture, and how New York City has shaped or been shaped by this vibrant art form.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand

FA 3860 - Costume History
A study of costume fashion, emphasis on the western world, from antiquity through the 20th Century. Including: basic characteristics of each period, environmental & cultural influences, specific costume terminology. Comparative analysis of historic costume choices found in film & theatre.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2012-2013 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

FA 3880 - Readings in Dramatic Literature
An examination of dramatic literature with an emphasis on theatre production. Students will examine a selection of plays each semester. Students can repeat the course up to four times; each semester examines different plays.
Credits: 1.0; Repeatable to a Max of 4
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Sound Design, Theatre & Entertain Tech (BS), Theatre & Electr. Media Perf., Audio Production & Technology; May not be enrolled in one of the following Class(es): Freshman

FA 3975 - Portfolio Development
Techniques for building a professional design and technical portfolio for the theatre and entertainment industry. The final result of the course will be a portfolio of all work to date.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

FA 4150 - Advanced Drawing Studio
Advanced independent exploration and experimentation in drawing theory and use of various drawing media. Students identify a problem or area of interest and develop an approach to it in close consultation with a faculty member, experimenting with a variety of media and methods.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required
Pre-Requisite(s): FA 2050 or FA 2150

FA 4200 - Advanced Creative Mixed Media Studio
Advanced work in mixed media such as watercolor, collage, drawing, and/or simple tech. Compositional theory as well as advanced applications of personal expression in mixed media may be included. Emphasis on independence in approach to materials, techniques, and concepts.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: Permission of instructor required

FA 4300 - Advanced Sculpture Studio
An advanced studio course. Students create works of art inside the student gallery/classroom in the Rozsa, and study traditional & contemporary sculpture. Projects, lectures, readings, and discussions. Focus is on development of the student's personal arts language.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: Permission of instructor required
Pre-Requisite(s): FA 3333 or FA 3335

FA 4400 - Chamber Music Seminar
For students interested in the study and performance of instrumental chamber music. Small ensembles meet once each week for coaching, presentations, and discussion on literature and techniques of rehearsal and performance.
Credits: 1.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required

FA 4420 - Music Performance: Jazz
Jazz combos (e.g., Jaztec, Salsa Norte) are select small groups of musicians studying jazz improvisation and performing literature for the small jazz ensemble. Focuses on developing individual improvisational techniques, personal style, and unique original arrangements. Repertoire includes swing, jazz-rock, ballads, fusion, and experimental techniques. Activities can include performances and tours.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required

FA 4620 - Musical Theatre Performance
Provides specialized experience in performance styles of the musical theatre through scene-study and process from sheet music to the stage.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2009-2010 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
FA 4650 - Production Management for the Entertainment Industry
Focus on techniques to coordinate production and artistic operations for the theatre and entertainment industries and venues. Emphasis on effective event management processes including: safety, budgeting, scheduling, personnel, rehearsals, performance, communication, facilities.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): FA 3850

FA 4690 - Voice Acting Lessons
Private intensive in voice acting focusing on one specific genre (i.e. audio book narration, radio/television commercials, animated videos, technical narration. IVR messaging, etc.) Course covers basic skills for chosen genre and includes private coaching with the instructor as well as an industry professional.
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Theatre & Electr. Media Perf., May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): FA 2830 and FA 3710(C)

FA 4701 - Stage Mechanics and Rigging
Practical application and theory of stage mechanics and rigging. Emphasis will be placed on theatrical systems such as line-sets, tumtables, and scenery lifts. Course will also explore automation through pneumatics, hydraulics, and motor control.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Theatre & Entertain Tech (BS), Sound Design, Audio Production & Technology
Co-Requisite(s): FA 4741
Pre-Requisite(s): FA 1702 and FA 2662 and FA 3730 and PH 1090

FA 4702 - Transducer Theory Lab
Laboratory to practice the application of loudspeaker and microphone principles. Designed to be taken concurrently with FA4740 Transducer Theory.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Theatre & Entertain Tech (BS), Sound Design, Audio Production & Technology
Co-Requisite(s): FA 4740

FA 4800 - Jazz Improvisation
Explores the elements of jazz improvisation while developing creative ideas and technical facility in the individual musician. Emphasis will be placed on learning the idiomatic use of the major scale and associated modes, the jazz melodic minor scale, the blues scale, pentatonic scales, and the 8-tone dominant scale. Development of stylistic conformity by exploring the styles of swing, bebop, cool, blues, Latin and rock/funk. Emphasis on the II-V-I progression in major and minor keys and symmetric harmony.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2001-2002 academic year
Pre-Requisite(s): FA 3530

FA 4820 - Jazz Arranging
Explores elements of jazz arranging and composition while developing creative ideas in the individual musician. Emphasis on learning to arrange for jazz combo and traditional big band. Includes developing the shape concept of triad use, 4-part and 5-part chord voicing, construction of an arrangement, and competence with FINALE notational software.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2003-2004 academic year
Pre-Requisite(s): FA 2500 and FA 3530

FA 4900 - Independent Study in Visual and Performing Arts
Independent research directed by Visual and Performing Arts faculty. Projects focus on one or more of the visual and performing genres; theatre, music, visual art. Requires a written proposal setting out goals, plans for final project, and the resources required to complete the project.
Credits: variable to 3.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

FA 4950 - Special Topics in Visual & Performing Arts
Tutorial, seminar, or class study of a topic of special interest and importance in visual and performing arts.
Credits: variable to 3.0; May be repeated
Semesters Offered: On Demand
Restrictions: Permission of instructor required

FA 4960 - Special Topics Workshop
Special workshop projects in the fine arts.
Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

FA 4970 - Visual and Performing Arts Final Project
Capstone course extending the student's knowledge and skill in a chosen fine arts discipline through independent research or other focused creative activity. A detailed proposal of the student's final project must be approved in writing by a Visual and Performing Arts faculty advisor before the student enrolls in FA4970.
Credits: variable to 3.0
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

FA 4975 - Portfolio Presentation
A public presentation of an array of art work completed by a student as part of the minor in Art or a Visual and Performing Arts degree program. Guidelines for the portfolio presentation are available from the student's advisor.
Credits: variable to 3.0; Repeatable to a Max of 3
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

Finance

FIN 3000 - Principles of Finance
Introduction to the principles of finance. Topics include financial mathematics, the capital investment decision, financial assets valuation, and the risk-return relationship.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): (MA 2710 or MA 2720 or MA 3710 or BUS 2100) and ACC 2100(C)

FIN 4000 - Investment Analysis
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): EC 3400 or FIN 3000

FIN 4100 - Advanced Financial Management
Advanced topics in managerial finance: Advanced capital budgeting, project analysis, capital acquisition, capital structure and dividend policy, and other topics.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): EC 3400 or FIN 3000

FIN 4200 - Derivatives and Financial Engineering
Covers the pricing and use of options, financial futures, swaps, and other derivative securities.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): EC 3400 or FIN 3000
FIN 4300 - Personal Financial Planning
Overview of personal financial issues and services and instruments offered by economic and financial institutions. Topics include the personal financial environment, personal investments and asset management, tax planning, the development of an adequate but cost-effective insurance program, and retirement planning.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): BA 3400 or EC 3400 or FIN 3000
Pre-Requisite(s): BA 3400 or EC 3400 or FIN 3000

FIN 4400 - Security Analysis
Detailed analysis of security valuation. Topics include fundamental analysis (financial statement analysis, free cash flow valuation, credit analysis, ratio analysis), technical analysis, and quantitative analysis.
Credits: 3.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): FIN 3000 or EC 3400 or FIN 4400

FIN 4500 - Financial Risk Management
Detailed analysis of the measurement of financial risk and the tools and techniques available to manage financial risk. Topics include financial disasters, risk measurement (market, default, currency exchange, value-at-risk) and the hedging of these risks.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): FIN 3000 or EC 3400 or FIN 4400

FIN 4700 - Global Finance
Studies international financial systems and markets. Covers the principle of comparative advantage, balance of payments, exchange rate systems, theories of international finance, identification of international risk exposures, the management and treatment of risk, and special topics of international finance.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): BA 3400 or EC 3400 or FIN 3000

FIN 4801 - Applied Portfolio Management I
Covers issues in the management and administration of investments in an institutional setting. Students form a new investment firm and manage a real portfolio of financial assets.
Credits: variable to 3.0
Semesters Offered: Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

FIN 4802 - Applied Portfolio Management II
Covers issues in the management and administration of investments in an institutional setting. Students form a new investment firm and manage a real portfolio of financial assets.
Credits: variable to 3.0
Semesters Offered: Fall
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

FIN 4803 - Applied Portfolio Management III
Covers issues in the management and administration of investments in an institutional setting. Students form a new investment firm and manage a real portfolio of financial assets.
Credits: variable to 3.0
Semesters Offered: Spring
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

FIN 4990 - Special Topics in Finance
Examines current issues in Finance and other topics of interest to faculty and students in greater depth.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Pre-Requisite(s): EC 3400 or FIN 3000

Forest Resources & Environmental Science

FW 1035 - Wood Anatomy and Properties
An introduction to the anatomical and physical nature of woody materials and how these characteristics are related to its applications as a sustainable raw material.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Spring

FW 1050 - The Natural Resource Professional
Seminar introduces students to the various careers within forestry, conservation, ecology, and wildlife that represent specialties within natural resources. Students explore natural resource issues around the world.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Spring

FW 2010 - Vegetation of North America
Identification of trees and shrubs. Study of seed dispersal, dormancy, and community ecology, with an emphasis on trees. Systematic study of the major forested vegetation types of North America.
Credits: 4.0
Lec-Rec-Lab: (2-0-4)
Semesters Offered: Fall

FW 2030 - Natural Resources Conservation
This course explores the history and evolution of conservation in thought and practice, with an emphasis on the writings and legacy of conservation pioneers such as Aldo Leopold.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): FW 3010

FW 2051 - Field Techniques
Equipment and techniques used in forestry, wildlife, ecology, and recreation management. Topics include field safety, land measurement and navigation, establishment of sample locations, measurement of attributes of individuals and groups of trees, vegetation and other organisms.
Credits: 2.0
Lec-Rec-Lab: (1-0-3)
Semesters Offered: Fall

FW 3010 - Practice of Silviculture
Methods of controlling the establishment, growth, composition, health and quality of forests and woodlands to meet the diverse needs and values of landowners and society on a sustainable basis. Course held at Ford Center, Alberta, MI.
Credits: 4.0
Lec-Rec-Lab: (2-1-3)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Forestry, Wildlife Ecology & Mgmt, App Ecol & Environ Sci
Pre-Requisite(s): FW 2010 and FW 2051

FW 3012 - Survey of Silviculture
An introduction to the practice of silviculture including ecological principles which form the basis for forest management. The course emphasizes proper use of silviculture terminology and includes field examples of management practices. Course held at Ford Center, Alberta, MI.
Credits: 2.0
Lec-Rec-Lab: (1-0-2)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Wildlife Ecology & Mgmt, Natural Resources Management, App Ecol & Environ Sci, Forestry
Pre-Requisite(s): FW 2010 and FW 2051

FW 3020 - Forest Ecology
Environmental factors and plant and animal characteristics which control composition, structure, and function of forest ecosystems. Emphasis on how ecosystems change across space and time and knowledge needed to sustainably manage forest ecosystems for social, economic, and ecological benefits.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Pre-Requisite(s): FW 2010(C) and FW 2051(C)

FW 3075 - Introduction to Biotechnology
The course covers basic concepts and practical applications in biotechnology. Topics include the use of biotechnology in agriculture, healthcare, and environmental remediation. Advances in gene containment, regulatory, societal and environmental issues associated with commercialization of biotechnological products will be discussed.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
FW 3097 - Forest Biomaterials
Examines the nature and use of forest biomaterials and their role in the larger economy. Local and global advantages and challenges for using forest biomaterials will be addressed within the context of sustainability, covering topics such as economics, material and product engineering, policy, life cycle analysis, and supply chain management.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
FW 3098 - Adding Value to Forest Biomaterials
Examines how forest biomaterials are converted from raw forms into intermediary or final products that can support a sustainable future. Manufacturing sites in the upper Midwest are visited during the week prior to the start of fall semester. Lecture topics include the forest bioeconomy, emerging and export markets, and industry challenges.
Credits: 2.0
Lec-Rec-Lab: (1-0-3)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): FW 1035
FW 3110 - Natural Resource Policy
Covers concepts related to social systems and natural resources. Offers a survey of natural resource policies and organizations. State and federal levels of policymaking will be linked to the human values, attitudes, and beliefs that set the context for natural resource policy processes.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring, Summer
FW 3111 - Wild Foods: Northern Forests
This class engages students in learning practical skills utilizing vegetation of the Boreal Forest for food, medicines, and utilitarian purposes. Emphasis is on exploring the wisdom of the Indigenous peoples of this region. The course provides a basic overview of cultural and historical importance of the interactions between people and plants.
Credits: 2.0
Lec-Rec-Lab: (1-0-1)
Semesters Offered: Summer
FW 3116 - Ethnobotany
The development and variety of plant use across cultures, the transition to commercialization of plants, how current uses are tied to traditional uses, and methods of ethnobotanical research.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
FW 3150 - Timber Harvesting
Methods and techniques used in timber harvesting systems. Emphasizes best management practices, aesthetic and ecological impacts, logging cost analysis, timber appraisal, and timber sale preparation and administration. Course held at Ford Center, Alberta, MI.
Credits: 2.0
Lec-Rec-Lab: (1-0-3)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Forestry Pre-Requisite(s): FW 2051
FW 3170 - Land Measurements and GPS
Introduces field measurements and computations involved in determining direction, distance, and area. Covers the hand compass, pacing, and use of GPS, including differential correction. Integration of GPS data with GIS is emphasized. Course held at Ford Center, Alberta, MI.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Wildlife Ecology & Mgmt, Natural Resources Management, App Ecol & Environ Sci, Forestry Co-Requisite(s): FW 3190 Pre-Requisite(s): FW 3540
FW 3180 - Geomorphology, Landscapes and Ecosystems
Provides basic understanding of the geologic and glacial processes that shaped the landscape of the Upper Midwest influencing the distribution and productivity of modern-day plant communities. Topics include geology of Michigan, glacial geomorphology, soil development, landscape and community ecology, and forestry. Course held at Ford Center, Alberta, MI.
Credits: 2.0
Lec-Rec-Lab: (1-0-3)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Natural Resources Management, Wildlife Ecology & Mgmt, App Ecol & Environ Sci; May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): FW 3540
FW 3190 - Multi-resource Assessment
Develops a basic proficiency in the application of multiple-resource measurement techniques. Gain familiarity with the application of individual tree and landscape measurements as well as estimation of growth, sampling techniques, computational procedures, and mapping procedures commonly used in forest and land management. Course held at Ford Center, Alberta, MI.
Credits: 3.0
Lec-Rec-Lab: (0-1-4)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Wildlife Ecology & Mgmt, Natural Resources Management, App Ecol & Environ Sci, Forestry Pre-Requisite(s): FW 2051 and FW 3020 and FW 3200 and (MA 2710 or MA 2720 or MA 3710)
FW 3200 - Biometrics and Data Analysis
Sampling design, implementation and analysis for inventory and monitoring of attributes of stands, forests and landscapes. Includes computing skills for data entry, storage and analysis and application of statistical techniques to answer questions about ecological data.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Spring
Pre-Requisite(s): FW 2051 and (MA 2710 or MA 2720 or MA 3710)
FW 3313 - Sustainability Science
Foundational scientific concepts (dynamic systems and catastrophe theory) as applied to socioecological systems. Use of indicators and indices to track progress towards sustainability goals. Review of local, national, and global sustainability policies to avoid catastrophes and guide sustainable development.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
FW 3320 - Fundamentals of Forest Genetics and Genomics
This course will teach fundamental and applied genetic principles that are essential for management of forest and other ecosystems to maintain their long-term health and sustainability. The class will cover the following topics: structure and function of DNA, inheritance, molecular evolution, population and quantitative genetics, gene conservation, genomics and biotechnology.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
FW 3330 - Soil Science
Introduction to the chemical, physical, and biological properties of soil.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall
Pre-Requisite(s): CH 1112(C) or (CH 1150(C) and CH 1151(C))
FW 3376 - Forest & Environmental Resource Management (The FERM) I
Application of forest and environmental management practices by teams of students with the assistance of faculty, staff and representatives of state, federal and corporate land management groups as well as non-governmental organizations.
Credits: 2.0; May be repeated
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): FW 2010 and FW 2051
FW 3377 - Forest & Environmental Resource Management (The FERM) II
Application of forest and environmental management practices by teams of students with the assistance of faculty, staff, and representatives of state, federal, and corporate land management groups as well as non-governmental organizations.
Credits: 3.0; May be repeated
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): FW 2010 and FW 2051
FW 3410 - Conservation Biology
Introduction to biological, social, political, and economic facets of conservation biology. Emphasizes evaluation of how best to maintain and restore biodiversity through management of populations and ecosystems. Topics include mass extinctions, global change, loss and degradation of habitat, and over exploitation of biological resources.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
FW 3510 - Outdoor Recreation and Tourism
Covers background on Americans and leisure; overview of primary providers of recreation in the US; management of outdoor recreation, measuring and valuing outdoor recreation and tourism; recreation and tourism in the Great Lakes region. Requires participation in field trips/workshops.
Credits: 3.0
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Spring
FW 3540 - An Introduction to Geographic Information Systems for Natural Resource Management
The fundamentals of GIS and its application to natural resource management. Spatial data, its uses and limitations are evaluated. Students work extensively with the ARCGIS software package.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Spring
Pre-Requisite(s): MA 2710(C) or MA 2720(C) or MA 3710(C) or ENVE 3502 or CEE 3502(C)
FW 3600 - Wildlife Habitat
Understand the ecological basis for management of forest wildlife and how forest management influences wildlife populations. Laboratory introduces techniques in wildlife research and management, especially methods of habitat analysis. Course held at Ford Center, Alberta, MI.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Wildlife Ecology & Mgmt, Natural Resources Management, App Ecol & Environ Sci, Forestry; May not be enrolled in one of the following Class(es): Freshman
FW 3610 - Ornithology
An ecological and evolutionary approach to the study of birds. Topics include behavioral, anatomical, and physiological adaptations to flight, life history, mating systems, migration, communication and conservation. Laboratory emphasizes identification and experimental use of birds as model organisms.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Spring
Pre-Requisite(s): BL 1040 or BL 1020
FW 3620 - Field Ornithology
An introduction to field techniques and identification. Weekend trip to Whitefish Point Bird Observatory during spring migration and field note taking.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Summer
FW 3640 - Aquatic Ecosystems
Students will be introduced to aspects of lake and stream ecosystems. Field trips will focus on sampling abiotic and biotic characteristics of aquatic ecosystems, especially in regard to land use and management and conservation. Course held at Ford Center, Alberta, MI.
Credits: 2.0
Lec-Rec-Lab: (1-0-3)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Natural Resources Management; May not be enrolled in one of the following Class(es): Freshman
FW 3760 - Human Dimensions of Natural Resources
Uses sociological concepts to cover facets of human relationships to natural resources, including human values, beliefs, and attitudes regarding the environment; rural resource-dependent communities; natural resource professions and expert knowledge; and the history of American perspectives on the environment.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
FW 3765 - Maple Syrup Management and Culture
Overviews cultural and historical importance of syrup production. Topics include methods of collecting and processing sap, syrup, sugar, and business marketing of maple products. Course includes one day field experience.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
FW 3800 - Insect Ecology
Insects are widespread and diverse components of terrestrial and aquatic ecosystems. This course will consider aspects of insect ecology, including biodiversity and conservation of insects, the effects of biotic and abiotic factors on insect populations, and the trophic diversity of insects. Course held at Ford Center, Alberta, MI.
Credits: 2.0
Lec-Rec-Lab: (1-1-0)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Wildlife Ecology & Mgmt, App Ecol & Environ Sci
FW 3840 - Forest Health
Drawing on examples from the Great Lakes region, and other parts of North America, this course will consider which type of insects and pathogens attack our trees and forests, how they interact with each other, and what tools we can use to effectively reduce their negative impacts of forest pests. Course held at Ford Center, Alberta, MI.
Credits: 3.0
Lec-Rec-Lab: (1-1-3)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Major(s): Wildlife Ecology & Mgmt, Natural Resources Management, App Ecol & Environ Sci, Forestry
Pre-Requisite(s): FW 3020
FW 4000 - Professional Experience Program
Students create oral/written reports and reflection based on paid or volunteered work or field experience in natural resources.
Credits: 1.0: Repeatable to a Max of 4
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required
FW 4080 - Forest Economics & Finance
Financial analysis and economic theory applied to forestry project analysis and selection, focusing on prices. Covers risk, capital markets, taxation, auctions, and non-market valuation.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
FW 4082 - Gene Expression Data Analysis
This course is designed for students majoring in molecular biology, computer science, data science and related majors to develop fundamental but essential skills for manipulating, preprocessing, and analyzing high throughput gene expression data for pattern extraction and knowledge discovery.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): FW 4099 or CS 1121 or CS 1122 or CS 1131 or CS 1141 or CS 2321
FW 4099 - Programming Skills for Bioinformatics
Students will learn computer programming skills in Perl for processing genomic sequences and gene expression data and become familiar with various bioinformatics resources.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): CS 1121
FW 4110 - Tree Seeding Production and Greenhouse Management
Demonstrates greenhouse culture of trees from seed or vegetative cuttings. Topics include production of containerized seedlings; vegetative propagation via budding, grafting, and rooting of cuttings; and genetic manipulation. Students have hands-on roles in the routine greenhouse culture, such as media preparation, pest management, and fertilization.
Credits: variable to 4.0
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
FW 4120 - Tree Physiology
A study of tree structure, growth, development and function, and how these are related to the environment. We will focus on the cycling of water, carbon, and nutrients within the context of global change.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
FW 4125 - Conservation Genetics
This course explores how genetic variation and its loss affect the ability of natural populations to adapt to changing environments. The relevance for the long-term conservation of animal and plant populations is highlighted.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
FW 4140 - Stand & Forest Modeling
Use of models that simulate tree, stand, and forest development. Emphasis on critical evaluation of model designs, outputs, uses in silvicultural decision-making, and forest to landscape management and planning.
Credits: 2.0
Lec-Rec-Lab: (1-0-2)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): FW 3010 or FW 3012 and FW 3540(C)
FW 4150 - Forest and Natural Resource Management
Focuses on forest and natural resources management planning and decision making. Emphasizes structured problem solving frameworks and decision support tools/models. Three field trips to meet with natural resources professionals and discuss site-specific management issues and approaches.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Pre-Requisite(s): FW 3010 or FW 3012

FW 4151 - Advanced Timber Harvesting
Quantitative methods for evaluation of time harvesting systems, equipment, and transportation. Emphasizes detailed logging cost analysis, machine rates, depreciation, productivity, and optimization. Includes use of software, GIS, and systems of equations.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Forestry
Pre-Requisite(s): FW 3150

FW 4170 - Consulting Forestry
For students who are considering consulting forestry as a career. Covers issues specific to working with private landowners, stewardship plan writing, choosing a business entity, marketing, taxes, income/expenses, insurance, timber sale administration, and resolving landowner disputes.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Spring

FW 4180 - Natural Resources, Ethics, and the Environment
Discusses relationship between ecological science and environmental ethics as it relates to natural resource management.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

FW 4220 - Wetlands
Study of the physical, chemical, and biological characteristics of wetlands. Describes functions and values of individual wetland types. Presents management of wetlands and laws governing wetlands. Labs concentrate on field techniques used to assess specific plant, animal, soil, and hydrological characteristics of wetlands.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman

FW 4240 - Mammalogy
Covers the classification, structure, and natural history of mammals, including physiological, behavioral, and ecological adaptations. Through laboratory and fieldwork, emphasizes field techniques and the distribution and identification of mammals, especially those species found in the western Great Lakes.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 1020 or BL 1040

FW 4250 - The Wolves and Moose of Isle Royale
Wolves and moose have been studied for 50 years on Isle Royale, a wilderness island in Lake Superior. The instructor leads this research and uses the research to explain predation, population dynamics, conservation genetics, and other ecological principles.
Credits: 2.0
Lec-Rec-Lab: (1-1-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman

FW 4260 - Population Ecology
Covers the principles of population ecology. Topics include measures of populations, population dynamics, and models used to describe the theories related to population dynamics.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

FW 4300 - Introduction to Wildland Fire
An introduction to wildland fire based on an understanding of fire history, fuel properties, fire weather, fire behavior, ecological effects and management.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): FW 3020 and (FW 3010 or FW 3012)

FW 4370 - Forest and Landscape Hydrology
The course will use a process-based approach to present the physical hydrology, geomorphology and water quality of forested watersheds. Course focuses on the interaction between watershed processes and forest management.
Credits: 3.0
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): MA 2710 or MA 2720

FW 4371 - Snow Hydrology
This course will cover snow formation in the atmosphere, snow accumulation and distribution, snow metamorphism, avalanche dynamics, snowmelt and runoff, remote sensing of snow properties, and the impact of forests and under-snow biogeochemical processes.
Credits: 3.0
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman

FW 4400 - Urban Forestry
Urban forestry is the science and art of managing natural resources in communities. It focuses on maximizing the wide range of economic, environmental, and social benefits associated with trees and urban greenspaces while minimizing maintenance costs and reducing tree-related risks.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring

FW 4401 - Urban Forestry Lab
The urban forestry field lab is a two-day tour held in Chicago for students to interact with and learn from professionals in the green industry, arboriculture, and urban forestry. It coincides with the Midwest Urban Tree Care Forum in mid-April.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Pre-Requisite(s): FW 4400(C)

FW 4500 - Independent Study
Guided study or research on an approved forest resource or other natural resource topic with a chosen faculty member.
Credits: variable to 7.0; Repeatable to a Max of 7
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

FW 4540 - Remote Sensing of the Environment
Remote sensing principles and concepts. Topics include camera and digital sensor arrays, types of imagery, digital data structures, spectral reflectance curves, applications, and introductory digital image processing.
Credits: 3.0
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): FW 3540 or FW 5550

FW 4545 - Map Design with GIS
Principles of making maps, from traditional to advanced visualization techniques, that convey information which is useful in decision making at many levels. Focus will be on creating maps using GIS software and digital data. A working knowledge of ArcMap is required.
Credits: 2.0
Lec-Rec-Lab: (1-0-3)
Semesters Offered: Spring - Offered alternate years beginning with the 2017-2018 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): FW 3540 or FW 5550

FW 4610 - Wildlife Ecology
Covers the ecological basis for management of wildlife, including biological and sociological factors that influence management.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 3400(C) or FW 3020(C)
FW 4620 - Herpetology
The biology of amphibians and reptiles, including evolution, zoogeography, ecology, behavior and physiology.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): BL 1040 or BL 1020

FW 4710 - Environmental Biogeochemistry
Impacts of decisions regarding landuse, land management, and energy and mineral exploration on natural resources (i.e., air, water, land, and biodiversity) are discussed using the framework of the biogeochemical cycles of the elements.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): FW 4620 - Herpetology, FW 4710 - Environmental Biogeochemistry

FW 4800 - Communication for Natural Resource Professionals
This class completes the development of oral and written communication skills for students as they prepare to graduate and gain employment in the field of natural resources.
Credits: 2.0
Lec-Rec-Lab: (1-1-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): CH 1150

FW 4810 - Integrated Resource Assessment
Provides a capstone experience by integrating techniques from many of the forestry, applied ecology, wildlife ecology, and management core courses. Covers multiple-resource inventory of forested landscapes evaluation of forest parameters and the development of management plans for various natural resource alternatives.
Credits: 4.0
Lec-Rec-Lab: (0-2-4)
Semesters Offered: Fall
Pre-Requisite(s): FW 3190

FW 4811 - Integrated Resource Assessment Data Collection
Students will collect field data needed for writing their Integrated Resource Assessment management plans. Field skills and ability to summarize and display data will be assessed. Students will develop appropriate sampling designs, collect needed field data with acceptable error limits, and summarize the data.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Wildlife Ecology & Mgmt, Natural Resources Management, App Ecol & Environ Sci, Forestry
Pre-Requisite(s): FW 3190

FW 4830 - Integrated Natural Resource Assessment
Course provides a capstone experience by integrating techniques from many of the forestry, applied ecology, wildlife ecology, and natural resources management core courses. Culminates in the development of management plans for various natural resource alternatives.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): FW 4810

FW 4840 - Senior Research Thesis
An independent study or research project on an approved topic in Forestry, Applied Ecology and Environmental Sciences, Wildlife Ecology, or Natural Resources Management, under the guidance of a faculty member. Available only to students in their graduating year.
Credits: 4.0
Lec-Rec-Lab: (0-4-0)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): FW 3190

Geological & Mining Engineering & Sciences

GE 1100 - Geological Engineering and Sciences Orientation
Introduction to geosciences as a profession, including discussions of career opportunities and geoscience programs. Earth materials and the earth's processes are also introduced. Includes frequent field trips. Intended for freshman or sophomore students in geological engineering, geology, applied geophysics, hydrology, geotechnics, earth science teaching, or any other geoscience program.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Geological Engineering, Sciences & Arts Undeclared, Engineering Undeclared, General Sciences and Arts, Applied Geophysics, Geology. May not be enrolled in one of the following Class(es): Junior, Senior

GE 2000 - Understanding the Earth
Introduction to materials and processes that shape the earth we live on. Lecture and laboratories acquaint students with minerals, rocks, earth resources, weathering, geologic time, landslides, groundwater, streams, shorelines, deserts, glaciers, geologic structures, earthquakes, plate tectonics, and the dynamics of the earth's crust, mantle, and core.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall, Spring

GE 2020 - Introduction to Mining Engineering and Mining Methods
Learn how various mining components, from prospecting to financing to reclamation, fit together. Includes advantages and drawbacks of different mining methods and their selection. Introduces ethics and professional development. Use of basic computer and mine design software.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring - Offered alternate years beginning with the 2005-2006 academic year

GE 2100 - Environmental Geology
Introduction and study of current environmental issues related to the earth sciences. Covers major topics such as volcanism, earthquakes, shoreline erosion, and pollution of groundwater as multi-week modules with associated labs, lectures, and field projects.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring

GE 2300 - Mineral Science
Introduction to the study of minerals including chemical composition, crystal structure, physical properties, identification, and controls on and environmental formation. Laboratory focuses on hand specimen identification of minerals and includes introduction to X-ray diffraction and SEM mineral analysis techniques.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): CH 1000 or CH 1112 or (CH 1150 and CH 1151)

GE 2310 - Introduction to Petrology
Identification, physical properties, chemical composition, occurrence, and origin of the important types of igneous, sedimentary, and metamorphic rocks. Laboratory includes hand specimen description and identification of rocks.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Spring
Pre-Requisite(s): GE 2300

GE 2320 - Mining Methods and Systems
This course presents a study of the surface and underground mining methods practiced in coal, metal, and aggregate mine operations, classification of mining methods, support design and equipment selection, general mine planning requirements, mine development sequence, cycle of operations, and method application.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): GE 2300

GE 2500 - Introduction to Oceanography
Effect of waves, tides, currents, natural hazards along shorelines, and air-sea interactions on the climate.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Spring
GE 2640 - Atmospheric Observations and Meteorology
Introduction to fundamentals of atmospheric science and meteorology through direct observations of the atmosphere.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2002-2003 academic year

GE 3040 - Fundamentals of Applied and Environmental Geophysics
An introduction to geophysical methods used in applied and environmental geophysics. This course is not only pertinent for the practicing geoscientist but also for environmental engineers, civil engineers, and others interested in learning how physics can be used to investigate Earth's substance.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): GE 2000

GE 3050 - Structural Geology
Introduction to fundamental concepts and components of geographic information systems (GIS) for engineering.
Credits: 4.0
Lec-Rec-Lab: (3-0-2)
Semesters Offered: Spring
Pre-Requisite(s): GE 2000

GE 3060 - Introduction to Field Geology
Introduction to field geophysical techniques including basic land surveying. Students must provide their own transportation.
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Spring
Pre-Requisite(s): CH 1150 and CH 1151

GE 3070 - Geohydrology
Introduction to methods and problems of field geology, interpretation of field geological and/or engineering report and memo writing.
Credits: 5.0
Lec-Rec-Lab: (0-0-15)
Semesters Offered: Summer
Restrictions: Permission of department required
Pre-Requisite(s): GE 2020 and GE 2320

GE 3080 - Mine Planning and Design
Course provides the basics of mine planning, feasibility study, block modeling, economic analysis, cost estimation and price forecasting, mining method selection algorithms. Introduction and hands-on experience with mine planning and design software including Surpac, Vulcan, and Whittle.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
Pre-Requisite(s): GE 2000 or GE 2100 and (GE 3050 or ENG 2120 or MEEM 2150)

GE 3090 - Field Geophysics
Introduction to field geophysical techniques including basic land surveying. Emphasizes the recording, reduction, presentation, and interpretation of gravity, magnetic, electrical, seismic, and electromagnetic data as well as the proper use, care, and calibration of equipment used to collect the data. Requires report writing. Students must provide their own transportation.
Credits: 5.0
Lec-Rec-Lab: (0-0-15)
Semesters Offered: Summer
Restrictions: Permission of department required
Pre-Requisite(s): GE 3040

GE 3100 - Depositional Systems
Introduction to depositional processes and their products. Investigates the physical processes controlling sedimentation along with principles of correlation and interpretation of strata. Focuses on interpreting sedimentary rocks as a record of climate, sea-level and tectonic change.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Pre-Requisite(s): GE 2000 and GE 2310

GE 3200 - Geochemistry
Introduction to elements of modern geochemistry including aqueous solutions, isotopes, age dating, etc. Emphasizes concepts and quantitative methods. Teaches principles of thermodynamics and phase equilibria from an introductory perspective as they pertain to geologic systems.
Credits: 3.0
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Spring
Pre-Requisite(s): GE 2000

GE 3250 - Computational Geosciences
Introduction to quantitative analysis and display of geologic data using R/Matlab, covering basic R/Matlab syntax and programming, and analysis of one-dimensional (e.g. time series) and two-dimensional datasets (i.e. spatial data). Techniques are applied to geological datasets.
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): MA 1160 or MA 1161

GE 3320 - Earth History
This course covers the history of the Earth from 4.5 billion years to the present. Plate tectonics is the organizing theme with emphasis on recognizing and evaluating the evidence for the major reorganizations of the Earth's crust.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Pre-Requisite(s): GE 2000 or GE 2100

GE 3340 - Drilling and Blasting
Rock penetration and fragmentation methods to include boring, cutting, drilling, and blasting techniques. Design of surface and underground blasting rounds. Formulation of design criteria to minimize the adverse effects of blasting. Field demonstration in the design, monitoring, and evaluation of blasts.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Fall, Spring - Offered alternate years beginning with the 2006-2007 academic year
Pre-Requisite(s): GE 2020 and PH 2100

GE 3410 - Mine Safety & Health Cert
Principles of health and safety in mine practice, hazard recognition, and preventive and corrective actions.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Summer

GE 3430 - Geomechanics Laboratory
This course includes laboratory experiments to determine physical and mechanical properties of rocks including harness, tensile and compressive strength and stress, point load index, tri-axial tests, and slake durability test.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer
Pre-Requisite(s): GE 2020 and GE 2320

GE 3850 - Geohydrology
Geologic and hydrologic factors controlling the occurrence, movement, and development of subsurface water. Quantitative methods for analyzing groundwater systems are introduced.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall, Spring

GE 3860 - Engineering Geology and Geoinformatics
Engineering geology relates the geologic factors with the location, design, construction, and maintenance of engineering projects and ensures they are accounted. Students will also be introduced to the fundamental concepts and components of geographic information systems (GIS) for engineering.
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Fall
Pre-Requisite(s): GE 2000 or GE 2100 and (GE 3050 or ENG 2120 or MEEM 2150)

GE 3870 - Resource & Reserve Estimation
This course covers the classification of resource and reserve; resource estimation algorithms; linear, nonlinear, and indicator kriging; stochastic simulation; variogram modeling; block-variance relationships; recoverable reserve; and introduction to resource estimation software.
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): GE 2020 and MA 3710

GE 3880 - Mine Planning and Design
Course provides the basics of mine planning, feasibility study, block modeling, economic analysis, cost estimation and price forecasting, mining method selection algorithms. Introduction and hands-on experience with mine planning and design software including Surpac, Vulcan, and Whittle.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
Pre-Requisite(s): GE 2320 and GE 3400 and GE 3870

GE 3910 - Field Geology with Engineering Applications
Introduction to methods and problems of field geology, interpretation of field relationships, and engineering site investigation. Field areas are located in northern Michigan. Requires geological and/or engineering report and memo writing.
Credits: 5.0
Lec-Rec-Lab: (0-0-15)
Semesters Offered: Summer
Restrictions: Permission of department required
Pre-Requisite(s): GE 3040

GE 3915 - Introduction to Field Geology
An introduction to geologic field mapping and site investigations. Requires geological and/or engineering report and memo writing.
Credits: 5.0
Lec-Rec-Lab: (0-0-15)
Semesters Offered: Summer
Restrictions: Permission of department required
Pre-Requisite(s): GE 2000 and GE 2310 and GE 3050

GE 3915 - Introduction to Field Geology
An introduction to geologic field mapping and site investigations. Requires geological and/or engineering report and memo writing.
Credits: 3.0
Lec-Rec-Lab: (0-0-9)
Semesters Offered: Summer
Restrictions: May not be enrolled in one of the following Major(s): Geological Engineering, Applied Geophysics
Pre-Requisite(s): GE 2000 and GE 2310 and GE 3050

GE 4000 - Earth Science Teaching Experience
Development of earth science teaching skills through assisting in instruction in a geology course laboratory. Students gain experience in organizing, preparing, and presenting earth science topics and answering questions.
Credits: variable to 3.0, Repeatable to a Max of 3
Semesters Offered: On Demand
GE 4130 - Petroleum Geology
Basic elements of petroleum geology, including the composition of crudes, exploration, subsurface techniques, petroleum migration, seals, traps, and types of gas and oil plays. Students will study geologic factors that control the genesis of major gas and oil fields, such as the Persian Gulf, California, and US Gulf Coast.
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Spring
Pre-Requisite(s): GE 2000 and GE 2300 and GE 2310
Credits: 3.0

GE 4150 - Natural Hazards
This course focuses on current mitigation agencies and warning systems, case studies of successes and failures in hazard mitigation, and technical tools for hazard study and mitigation such as satellite remote sensing and GIS.
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): GE 2000 or GE 2100
Credits: 3.0

GE 4180 - Volcanology
Volcanoes and how they work. Volcanic eruption styles and products, their recognition, and significance. Volcanic hazards, volcano monitoring and impacts of volcanism on the environment, climate and society. Applies chemistry, physics, and fluid mechanics in a volcanological context.
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): GE 2000 and (MA 1160 or MA 1161)
Credits: 3.0

GE 4190 - Magma Reservoir Dynamics
Introduction to topics in advanced igneous petrology emphasizing processes that occur in magma reservoirs. Includes the application and integration of geochemistry, petrology, and geochronology to investigate magma dynamics and their influence on frequency, style, and magnitude of eruptions.
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): GE 2300 and GE 2310
Credits: 3.0

GE 4240 - Surface Geophysics
Application of near surface geophysical methods to environmental and geological investigations through field work and case studies. An emphasis will be placed on ground penetrating radar, but will include other methods such as electrical resistivity, induced polarization, magnetics, and horizontal loop electromagnetics.
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): GE 3040 and GE 3900
Credits: 3.0

GE 4250 - Fundamentals of Remote Sensing
This course focuses on the basic physics behind above- surface remote sensing and remote sensing systems. Topics covered include: properties of the atmosphere, absorption and scattering of electromagnetic radiation, instrument design, data acquisition and processing, validation, and basic applications.
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): PH 2200 and MA 2160
Credits: 3.0

GE 4290 - Mine Ventilation, Health, and Safety Engineering
Course deals with an introduction to mine ventilation, properties of air, gases, and dust, mine fans and its applications, flow distribution in mine network, computer analysis of ventilation network, mine health and safety overview, health and safety culture, and practice.
Lec-Rec-Lab: (0-0-9)
Semesters Offered: Summer - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): GE 2020 and GE 2320 and ENG 3200
Credits: 3.0

GE 4360 - Materials Handling
Surface and underground materials handling methods. Selection and performance analysis of materials handling equipment. Computer applications.
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Pre-Requisite(s): PH 2100
Credits: 3.0

GE 4500 - Plate Tectonics and Global Geophysics
Plate tectonics and the internal structure of the earth using information from seismology, geomagnetism, gravity, and heat flow.
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MA 3160 and PH 2200 and GE 2000
Credits: 3.0

GE 4504 - Air Quality Engineering and Science
Overview of air quality regulation in the U.S. and world, including basic concepts of atmospheric chemistry and transport; fumes, point, and air emissions; principles and tools of operation and design of air pollution control systems; and application of air quality models.
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Fall
Pre-Requisite(s): ENVE 3501 or ENVE 3503 or CEE 3501 or CEE 3503
Credits: 3.0

GE 4530 - Planetary Geology & Geophysics
Geological, geophysical, and geochemical processes in the Solar System are examined. Topics include the formation and evolution of the Solar System, planetary surface processes and water distribution, impact structures, composition, structure, and dynamics of planetary interiors, geophysical exploration of planets.
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): GE 3050 and PH 2100 and MA 2160
Credits: 3.0

GE 4560 - Earthquake Seismology
Course covers fundamentals of the physics of earthquakes and seismic energy propagation, and seismic methods to determine Earth structure. Emphasis is placed on natural source techniques, with extension to exploration applications. Weekly labs apply techniques.
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): GE 2000 and PH 2200 and MA 2160
Credits: 3.0

GE 4600 - Reflection Seismology
Principles of reflection seismic techniques, including theoretical background and application, and hands-on computer projects.Included are acquisition, data processing, and 2D/3D data interpretation. Students conduct projects using actual commercial-quality seismic data.
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Spring
Pre-Requisite(s): GE 3040
Credits: 3.0

GE 4610 - Formation Evaluation and Petroleum Engineering
Principles and practice of formation evaluation, primarily through analysis of well logs and the principles and practice of petroleum engineering. Emphasizes reservoir engineering and simulation. Students conduct projects using actual field data.
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Fall
Credits: 3.0

GE 4620 - Energy Economics
Introduction to the institutional, technical, and economic issues of the production and use of energy resources, including petroleum, natural gas, coal, nuclear, electric utilities, and alternative energy sources. Applies economic analysis to industrial and policy problems of the supply, distribution, and use of energy resources, including environmental and social consequences.
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): EC 2001 or EC 3002 or EC 3003
Credits: 3.0

GE 4630 - Mineral Industry Economics
Studies the role of minerals and metals in society and the economics of their use. Applies economic principles to examine the supply, demand, markets, and foreign trade for important minerals and metals. Examines the effect of government policies on the minerals industries. Requires a technical report.
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): EC 2001 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
Credits: 3.0

</table>
Pavlis Honors

HON 1150 - Creating Your Path
This course will guide students in the application of life design methods to create a path toward achievement of personal education, career & life goals. By applying a combination of activities, discussion, & reflection to principals of design thinking, problem solving, creativity, & communication, students will develop a framework for life success.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: Permission of department required; Must be enrolled in one of the following Class(es): Freshman, Sophomore

HON 2150 - Pavlis Seminar I
The first of three seminars designed for the Pavlis Honors College Experiential Learning Communities. Students are introduced to program requirements and engage in an active and reflective learning environment to explore personal and social identities, teamwork, culture, and perspectives
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman

HON 2200 - Leadership, Culture, and Technology
This course provides students with an understanding of the nature and process of leadership, and an opportunity to assess personal leadership skills/potential and develop a personal model of leadership. Leadership in other cultures and use of appropriate technology will also be explored.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required

HON 2990 - Interdisciplinary Special Topics in Honors
Study of interdisciplinary special topics as specified by section title.
Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required

HON 3060 - Honors Practicum
Reflective practicum for students fulfilling the immersion requirement in a Pavlis Honors College Experiential Learning Community.
Credits: variable to 12.0; Repeatable to a Max of 12
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): HON 2150 and HON 3150

HON 3150 - Pavlis Seminar II
The second of three seminars designed for Pavlis Honors College Experiential Learning Communities. Students engage in telling their stories to different audiences, learn about personal leadership, and craft a personal leadership vision statement.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): HON 2150 and HON 3150

HON 3150 - Pavlis Seminar II
This course introduces students to the processes and tools associated with Human Centered Design (HCD). HCD is a key process used in identifying needs/opportunities and innovative solutions.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

HON 3410 - Culture, Language, & Project Development
Course is designed to help students gain culture and language awareness for their int'l travel to project sites in Ghana, India, Tanzania, Brazil, or Senegal. Students will gain insight working with and learning from different cultures to see the world and their leadership in new ways and will refine/finalize projects they will implement in country.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Summer
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025)

HON 3990 - Interdisciplinary Special Topics in Honors
Study of interdisciplinary special topics as specified by section title.
Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required

HON 4060 - International Leadership Practicum
Students traveling internationally in the Pavlis program will plan and direct a project abroad and spend time abroad participating in a variety of leadership and cultural awareness experiences.
Credits: variable to 9.0
Semesters Offered: Summer
Pre-Requisite(s): UN 3410(C)

HON 4070 - Leadership Practicum
Course designed for students pursuing the Leadership Minor, allows for a non-international leadership practicum experience, and the practical application of leadership knowledge, skills and behaviors, and development of leadership experience. The practicum experience will be designed and implemented by the student, with mentorship/guidance from the associated faculty.
Credits: variable to 9.0
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): HON 2200 or MGT 3100 or AF 3001

HON 4150 - Pavlis Seminar III
The final of three seminars designed for the Pavlis Honors College Learning Community. Students engage in difficult dialogues, decision making, critical thinking, ethics, and goal setting while they synthesize their honors college experience.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): UN 4080

HON 4150 - Pavlis Seminar III
This course, designed for students in the Pavlis program, is the first in a two part leadership capstone experience. Students engage in discussions and make oral presentations, outline a senior project report, mentor other students and apply their leadership skills by taking on leadership roles.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): HON 3150 and UN 1015 and (UN 1025)

HON 4200 - Leadership Capstone Project II
This course, designed for students in the Pavlis program, is the second in a two part leadership capstone experience. Students engage in discussions and make oral presentations, write a senior project report, mentor other students and apply their leadership skills by taking on leadership roles.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): UN 4060 and (HON 4100(C) or UN 4100)

HON 4300 - Introduction to the Fundamentals of Social Innovation and Social Entrepreneurship
In this introductory course, students will be exposed to the key concepts and practices around social innovation and entrepreneurship. They will learn about different approaches to social entrepreneurship and strengths and weaknesses of various models and strategies. All students will participate in the Social Innovation Challenge Competition at semester end.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

HON 4990 - Interdisciplinary Special Topics in Honors
Study of interdisciplinary special topics as specified by section title.
Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required

Humanities

HU 0110 - Undergraduate Student Coaching
Schedule weekly appointments with a writing coach to strengthen writing and reading effectiveness in any course except Composition. Specialized assistance available to students who speak English as a Second Language, students who have learning disabilities and students who are undergraduate writing coaches.
Credits do not count toward graduation.
Credits: 0.0; May be repeated
Semesters Offered: Fall, Spring, Summer
HU 0122 - Global Issues Study Team
Students who are enrolled in Global Issues (UN1025) may sign up for a study team led by a writing center coach. Teams meet twice weekly. The meetings address the challenges of the Global Issues course as well as develop students' effectiveness working in teams. Strongly recommended for students with English/Reading ACT of 20 or below. Credits do not count toward graduation.

Semesters Offered: Fall, Spring, Summer
Co-Requisite(s): UN 1025

HU 0123 - Composition Coaching
Scheduled weekly appointment with a writing coach to improve writing and reading effectiveness in Composition (UN1015). Strongly recommended for students with English ACT of 20 or below. Credits do not count toward graduation.

Credits: 0.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Co-Requisite(s): UN 1015

HU 0124 - Graduate Student Coaching
Scheduled weekly appointment with a writing coach to improve writing and reading effectiveness in graduate courses and to address the challenges of writing theses and dissertations. Credits do not count toward graduation.

Credits: 0.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Level(s): Graduate

HU 0125 - Int'l GTA Assistance Program
International graduate students can enroll in HU0125 to work on cultural differences in presentation skills and to practice speaking instructional English. These students will meet weekly in group and individual settings to improve their ability as speakers of English. Credits do not count toward graduation.

Credits: 0.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Level(s): Graduate

HU 2130 - Introduction to Rhetoric
Focuses on historical origins, cultural adaptations, and contemporary relevance of rhetorical traditions.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Senior

HU 2201 - Level I-A Chinese Language and Culture
Introduction to basic Chinese grammar, vocabulary, and idiomatic expressions, designed to help students acquire the basics of oral and written Chinese. Includes study of contemporary Chinese culture.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Senior

HU 2202 - Level I-B Chinese Language and Culture
Further study of Chinese grammar, vocabulary, and idioms with emphasis on conversation and communicative strategies. Includes continued study of Chinese culture.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 2201 or Language Placement Chinese >= 100

HU 2241 - Level I-A Less Commonly Taught Languages
Introduction to basic grammar, vocabulary, and idioms, designed to help students acquire the basics of oral and written communication. Includes study of cultures in which the language is spoken.

Credits: variable to 5.0
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Senior

HU 2242 - Level I-B Less Commonly Taught Languages
Further study of grammar, vocabulary, and idioms with emphasis on conversation and communicative strategies. Includes continued study of cultures in which the language is spoken.

Credits: variable to 5.0
Semesters Offered: On Demand
Pre-Requisite(s): HU 2241

HU 2271 - Level I-A French Language and Culture
Introduction to basic French grammar, vocabulary, and idioms designed to help students acquire the basics of oral and written French. Includes study of contemporary French-speaking cultures.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Senior

HU 2272 - Level I-B French Language and Culture
Further study of French grammar, vocabulary, and idioms with continued practice of conversation and basic readings in French. Continued study of contemporary French speaking cultures.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 2271 or Language Placement French >= 131

HU 2273 - Transitional Level I French Language and Culture
Intensive study of basic French grammar, vocabulary, and culture. Designed to prepare students with minimum essentials of oral and written French for intermediate and advanced level work. Students completing this course may apply for placement credits.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): Language Placement French >= 201

HU 2281 - Level I-A German Language and Culture
Introduction to the basics of the German language, acquainting students with the essentials of oral and written German and introducing cultures and societies of contemporary German-speaking Europe.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Senior

HU 2282 - Level I-B German Language and Culture
Further study of the basics of the German language acquainting students with the essentials of oral and written German, with emphasis on conversational skills. Includes continued discussion of cultures and societies of contemporary German-speaking Europe.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 2281

HU 2291 - Level I-A Spanish Language and Culture
Introduction to basic Spanish grammar, vocabulary, and idioms, designed to help students acquire the basics of oral and written Spanish. Includes study of contemporary Spanish-speaking cultures.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Senior

HU 2292 - Level I-B Spanish Language and Culture
Further study of basic Spanish grammar, vocabulary, and idioms with continued practice of conversation and basic readings in Spanish. Continued study of selected Hispanic cultures.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 2291 or Language Placement Spanish >= 131

HU 2293 - Transitional Level I Spanish Language and Culture
Intensive review of basic Spanish grammar, vocabulary, and culture. Designed to prepare students with minimum essentials of oral and written Spanish for intermediate and advanced level work. Students completing this course may apply for placement credit.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): HU 2291 or Language Placement Spanish >= 201

HU 2324 - Introduction to Film
Focuses on critical engagement with cinematic form and its relationship to cultural, historical, and/or theoretical contexts.

Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall

HU 2500 - Ways of Reading
This course introduces students to reading strategies, critical vocabularies, and critical writing practices. Individual sections will center on a unifying question or problem, emphasizing attentive reading, critical thinking, and qualitative interpretation of literary texts.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

HU 2501 - American Experience in Literature
A survey of major works in American literature from origins to the present. Focuses on historical trends in the development of literature and culture in the Americas with particular emphasis on the United States.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2017-2018 academic year
HU 2503 - Introduction to Literature
Survey of transnational or transatlantic literary traditions, highlighting select historical periods such as Romanticism, and/or movements, such as the Harlem Renaissance.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring

HU 2505 - Science, Technology, and Humanities
A survey using literary texts, narrative history, documentary evidence, film, music, and cross-cultural references to contextualize the emergence of scientific, technological, and humanistic developments in the modern era.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand - Offered alternate years beginning with the 2000-2001 academic year

HU 2510 - Intro to Creative Writing
An introduction to creative writing with readings in contemporary and emerging literatures. Genres covered may include fiction, nonfiction, poetry, and screenplay. This course stresses individual production through process-oriented writing exercises, small group workshops, individual conferences, and creative theory.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring

HU 2538 - British Experience in Literature
A survey of selected works of British literature from its origins to the present. Focuses on historical trends in the development of the English language and the cultures of Great Britain.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year

HU 2548 - Young Adult Literature
Reading, reflecting on, and responding to age-appropriate adolescent literature. Works include authors from different races, cultures, historical periods, and genders. Discussion may be supplemented with films. Appropriate for students who plan to be parents, community volunteers, and teachers.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

HU 2600 - Introduction to the Field of Scientific and Technical Communication
An introduction to the history, theory, and practice of scientific and technical communication as preparation for future study.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Scientific & Tech Comm (BS), Scientific & Tech Comm (BA)

HU 2632 - Fundamentals of Digital Photography
Explores the history, aesthetics, theory, and practice of photography in the digital environment. Students learn in-depth digital camera and imaging production techniques. Students provide their own digital camera, preferably a digital SLR.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: On Demand

HU 2633 - Fundamentals of Digital Imaging
Explores the history, aesthetic, theory, and practice of digital imaging. Students learn to find, make, and analyze images.
Credits: 3.0
Lec-Rec-Lab: (0-2-1)
Semesters Offered: Fall, Spring

HU 2642 - Introduction to Digital Media
Basic principles, practices and implications of digital media communication and production. Provides foundation in tools, techniques and processes through hands-on production, readings, discussion and analysis of contemporary issues related to digital media.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring

HU 2645 - Graphic and Information Design
A computer-intensive introduction to the principles for creating clear, effective graphic communication. Students critique the work of other designers in terms of the work's audience and intended effect, and they construct and critique their own design projects as well.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

HU 2700 - Introduction to Philosophy
A study of thought representing various traditions such as classical and contemporary philosophy, Eastern and Western religion, and issues in recent science. Some basic concepts of logic are also examined. Emphasizes moral philosophy, including ethical relativism, utilitarianism, and Kantian ethics.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring

HU 2701 - Logic and Critical Thinking
Introduction to everyday reasoning and formal logic. Important goal is to develop skills of argument identification, analysis, and evaluation. Students learn how to symbolize ordinary language statements and arguments and to determine their validity or invalidity using proof and truth-table methods.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand

An introduction to the major concepts and theories of normative ethics and metaethics and an examination of a variety of issues in applied ethics including poverty and economic justice, lying and truth-telling, euthanasia, sexual conduct, and issues in communication ethics.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Summer

HU 2810 - Research and Writing in Communication
Prepare students to evaluate, design, and conduct research in communication. Develops research-related writing strategies and proficiency.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015(C)

HU 2820 - Communication and Culture
Introduction to the ways that communication creates and maintains culture. Considers a variety of perspectives on the significance of communication. Explores the importance of communication for understanding culture.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

HU 2830 - Public Speaking & Multimedia
Introduces the fundamentals of public speaking and multimedia applications. Emphasis on speaking/listening competencies in face-to-face and digital environments using online and digital tools.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring

HU 2910 - Language and Mind
Linguistic study of structural and cognitive aspects of language. Examines language design: how sounds, words, sentences, and conversation create meaning; the relationship of language, brain, mind, and thought; the ability of humans, animals, and machines to acquire language.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall

HU 2920 - Language and Society
Examines how societies use and organize themselves with respect to language. Considers attitudes towards language standardization and dialectal variations within the US based on geography, class, ethnicity, gender, age, etc., and speakers' choices of how they present themselves linguistically.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring

HU 3015 - Advanced Composition
Advanced instruction in composing substantive arguments based on primary and secondary research. Multidisciplinary inquiry-based projects ask students to write for both academic and lay audiences in print and digital forms. Specific research methods, writing technologies, and topics vary by section.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3120 - Technical and Professional Communication
A study of written and oral communication in technical and scientific environments; emphasizes audience, writing processes, genres of scientific and technical discourse, visual communication, collaboration, professional responsibility, clear and correct expression. Students write and revise several documents and give oral report(s). Computer Intensive.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3130 - Rhetoric of Science and Technology
A study of contemporary theories of rhetoric and their application to interpreting and critiquing various forms of persuasive discourse, especially in science and technology.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3150 - Topics in Literacy Studies
A study of how and why different groups of people use reading and writing differently in varying situations and in varying textual media. Topics may include the various ways texts function and reading is used; the authority of written texts; access to reading and writing and to various textual media.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3151 - The Rhetoric of Everyday Texts
The examination and production of everyday texts such as social media, image-texts, web pages, signs, museum exhibits, architecture, and fashion in terms of their theoretical, historical, cultural, and technological contexts. Student should expect to produce “everyday texts” of their own as well as write about texts examined in the course.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3201 - Level II-A Chinese Language and Culture
Review and continued study of listening, speaking, reading, and writing in Chinese. Students learn how to communicate in Chinese societies. Includes study of various aspects of the Chinese culture.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 2202 or Language Placement Chinese >= 201

HU 3202 - Level II-B Chinese Language and Culture
Further study of Chinese language. Includes study of vocabulary, idioms, and sentences structure to improve conversational, reading, and writing abilities. Includes discussion of various aspects of Chinese culture.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 3201 or Language Placement Chinese >= 301

HU 3204 - Level III Topics in Chinese Literature and Culture
Study of various genres of Chinese literature and of various aspects of Chinese society, emphasizing, historical and cultural backgrounds. Conducted primarily in Chinese.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 3202 or Language Placement Chinese >= 401

HU 3241 - Level II A Less Commonly Taught Language and Culture
Review and continued study of listening, speaking, reading, and writing in less commonly taught language. Students learn how to communicate in target culture. Includes study of various aspects of the culture in which the language is used.
Credits: variable to 5.0
Semesters Offered: On Demand
Pre-Requisite(s): HU 2242

HU 3242 - Level II B Less Commonly Taught Language and Culture
Further study of less commonly taught language. Includes study of vocabulary, idioms, and sentence structure to improve conversational reading and writing abilities and discussions of various aspects of culture in which the language is used.
Credits: variable to 5.0
Semesters Offered: On Demand
Pre-Requisite(s): HU 3241

HU 3253 - World Literatures & Cultures
Comparative approach to world literatures and cultures. May include literary works, critical essays, films, music, and other representations of world culture.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3261 - Topics in Communicating Across Cultures
Examines communication practices and styles across selected cultures and multicultural groups, drawing on an interdisciplinary range of research fields. May address social issues, language and cultural differences, gender, race, ethnicity, class, disabilities, age, religion, family and national identity.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3262 - Topics in Francophone Cultures
An introduction to Francophone cultures (in English) in a comparative perspective. Includes a survey of French history and its influence on Francophone societies. Includes study of film and other media and a critical examination of cross-cultural differences between French, Francophone, and U.S. cultures.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025)

HU 3263 - Topics in German-Speaking Cultures
An introduction to German-speaking culture (in English) in a comparative perspective. Includes a survey of Central-European history and its influence on modern-day German-speaking societies through movies, media, and recent technologies, and a critical examination of cross-cultural differences between German and North-American cultures.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3264 - Topics in Spanish-Speaking Cultures
An introduction to Spanish-speaking cultures (in English) in comparative historical perspectives. Includes a survey and a critical cross-cultural examination of Latin-American cultures and Spanish-speaking societies (European, Caribbean, and North, Central and South American) through literature, music, film, art, and other media.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3265 - Topics in East Asian Cultures
Introduction to the contemporary and traditional cultures of China, Korea, and Japan taught through readings, films, lectures, and discussions. Taught in English.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)

HU 3271 - Level II-A French Language and Culture
Review and continued study of grammar, vocabulary, speaking, listening, reading, and writing in French. Includes written compositions and oral presentations. Cultural focus on several Francophone regions of the world.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 2272 or HU 2273 or Language Placement French >= 331

HU 3272 - Level II-B French Language and Culture
Continued study of grammar, vocabulary, speaking, listening, reading, and writing in French. Includes written compositions, oral presentations, and reading of brief literary texts. Cultural focus on several Francophone regions of the world.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 3271 or Language Placement French >= 421

HU 3273 - Level II French Composition and Conversation
Extensive work in the active, creative use of written and oral French. Includes development of communicative strategies, written compositions, and oral presentations in the context of contemporary French-speaking cultures. May include study of film and other media.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): HU 2272 or HU 2273 or Lang Placement French I-A Tran >= 301
HU 3274 - Level III Topics in French Literature and Culture
Topics in French literature and its historical and cultural contexts. May include selections from Francophone literature. Conducted in French.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring - Offered alternate years beginning with the 2013-2014 academic year
Pre-Requisite(s): HU 3272 or HU 3273 or Language Placement French >= 501

HU 3275 - Level III French for Special Purposes
Study of business, technical, and/or scientific discourses in the context of French language and Francophone cultures.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2013-2014 academic year
Pre-Requisite(s): HU 3272 or HU 3273 or Language Placement French >= 501

HU 3280 - Level I-C German Language and Culture
Concluding study of the basics of the German language acquainting students with the essentials of oral and written German, with emphasis on conversational skills. Includes continued discussion of cultures and societies of contemporary German-speaking Europe.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 2282 or Language Placement German >= 221

HU 3281 - Level II-A German Language and Culture
Review of the basics of the German language. Includes study of vocabulary, idioms, and sentence structure to improve conversational and reading abilities, and discussion of various aspects of contemporary German culture.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 3280 or Language Placement German >= 301

HU 3282 - Level II-B German Language and Culture
Review of the basics of the German language. Includes study of vocabulary, idioms, and sentence structure to improve conversational and reading abilities, discussion of various aspects of contemporary German culture, readings of literary texts, screenings of German films, and writing of compositions in German.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 3281 or Language Placement German >= 371

HU 3283 - Level II German for Special Purposes
Review of the basics of the German language. Extensive work on the creative use of written and oral German with emphasis on short themes in German.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 3282 or Language Placement German >= 451

HU 3284 - Level III in German Literature and Culture
Study of German literature and cultures. Topics may include postwar German literature, Germany since WWII, or emphasis on a major contemporary writer. Readings, discussion and writing in German.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): HU 3282 or Language Placement German >= 521 or CEEB German Language >= 3

HU 3285 - Level III German: Film and Media
Focus on improving advanced language skills for professional communicative situations, including acquisition of discipline-specific vocabulary (preparatory for language certification). Topics may include issues of science and technology in German-speaking countries.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): HU 3282 or Language Placement German >= 521 or CEEB German Language >= 3

HU 3291 - Level II Spanish Language and Culture
Review and continued study of grammar, vocabulary, speaking, listening, reading, and writing in Spanish. Includes written compositions and oral presentations. Cultural focus on several Spanish-speaking regions. Students completing this course may apply for placement credit.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 2292 or HU 2293 or Language Placement Spanish >= 321

HU 3292 - Level II-B Spanish Language and Culture
Continued study of grammar, vocabulary, speaking, listening, reading, and writing in Spanish. Includes written compositions, oral presentations, and readings of short literary and documentary texts. Strong cultural focus on several Spanish-speaking regions. Students completing this course may apply for placement credit.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 2292 or HU 2291 or Language Placement Spanish >= 401

HU 3293 - Level IIC Spanish Composition and Conversation
Advanced grammar, composition, and conversation practice. Readings may include texts from literary, social, economic, scientific, engineering, or business discourses in the context of Hispanic cultures. Students completing this course may apply for placement credit.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 2293 or HU 3291 or HU 3292 or Language Placement Spanish >= 480

HU 3294 - Hispanic Literatures and Cultures
Study of selected works of literature, culture, and civilization from selected regions of the Spanish-speaking world. May incorporate study of literary genres and historical periods as related to Spain and/or Latin American cultures.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 3292 or Language Placement Spanish >= 631

HU 3295 - Level III Advanced Spanish for Literacies
Spanish for Special Purposes is designed for students who anticipate careers in which they will need to interact with Hispanic communities in the U.S. or abroad and who wish to continue study of Spanish language and culture for specific professional purposes. Topics include Spanish for engineering and other sciences, healthcare, business, and legal professions.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year
Pre-Requisite(s): HU 3292 or Language Placement Spanish >= 631

HU 3296 - Introduction to Hispanic Literatures and Cultures
Overview of Iberian and/or Latin American literatures and cultures from colonial through contemporary periods, including the arts and popular movements, from a multidisciplinary perspective. Course is repeatable up to six credits.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand - Offered alternate years beginning with the 2015-2016 academic year
Pre-Requisite(s): HU 3292 or Language Placement Spanish >= 631

HU 3326 - Topics in World Cinema
This course focuses on mainstream and/or independent films in their historical and sociocultural contexts from selected regions such as Latin America, Africa, the Middle East, Asia, and Europe.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): HU 2324 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3327 - Film Style and Genre
Focus on film style and genre with an emphasis on study of directors, movements, and their technological, theoretical, and sociocultural contexts. Includes small lab projects.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring, Summer - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): HU 2324 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3400 - Topics in Diversity Studies
This course provides students with a better understanding of underrepresented populations within the United States by examining the culture and experience of African American; American Indian; Asian American; Latina/Latino American; Gay, Lesbian, Bisexual, and Transsexual; or Post-Colonial peoples.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3401 - Gender and Culture
Interrelations of gender and culture, including comparative analysis of constructions of gender. May examine different societies and/or different historical periods.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3410 - Introduction to Diversity Studies in the United States
This course provides students with a better understanding of underrepresented populations within the United States by examining the social, cultural, and personal consequences of gender, race, ethnicity, class, sexual orientation, (dis)ability, and other significant identities.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2015-2016 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3402 - Mythology
Survey of the major mythological systems of the world with particular attention to those areas of commonality among various civilizations. Films may provide contextual background.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2001-2002 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3503 - Studies in the Novel
Examination of the novel in world literature with special attention to the historical, cultural, and personal contexts within which the author is writing. Film versions may be examined.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2001-2002 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3504 - Literary Forms, Genres, and Modes
This course examines one or more literary forms, genres, and modes such as tragedy, satire, romance, science fiction, fantasy, comedy, epics, novels, short stories, poetry, and/or creative nonfiction. Emphasis on individual production through process-oriented writing exercises, small group workshops, individual conferences, and revision/development.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3554 - Literature Across Borders
Study of literary genres, themes, and movements, with emphasis on comparing and contrasting perspectives reflected in literatures from Western and non-Western cultures. Topics may focus on historical, social, aesthetic, and cultural factors as they influence these literatures. Films may be used.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2004-2005 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3555 - Literature and Science
Focuses on depictions of science in literature and literary features of scientific texts from a range of historical periods, genres, and nationalities. May include the influence of scientific methods on literature and vice versa (for instance, narrative medicine).
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3403 - Shakespeare
In-depth study of a limited number of Shakespearean plays with special attention to dramatic structure, character development, theme presentation, and theatre history. Includes extensive study of Renaissance influences, possibly film versions of selected plays, and examination of current critical theories.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3404 - Workshop in Creative Nonfiction
Advanced work in creative nonfiction writing; workshop format. Readings will include short memoirs, personal essays, lyric essays, and other sub-genres of contemporary creative nonfiction. Emphasis on individual production through process-oriented writing exercises, small group workshops, individual conferences, and revision/development.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 2510 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3405 - Workshop in Poetry
Advanced work in poetry writing; workshop format. Students will study contemporary and emerging works in order to enrich and stimulate their own poetic practice. Emphasis on individual production through process-oriented writing exercises, small group workshops, individual conferences, and revision/development.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 2510 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3406 - Workshop in Fiction
Advanced work in fiction writing; workshop format. Readings will include 'canonical', contemporary, and emerging examples of short-form fiction. Emphasis on individual production through process-oriented writing exercises, small group workshops, individual conferences, and revision/development.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 2510 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 3407 - Workshop in the Environment
This course examines the interdisciplinary relationship between literature and environmental and ecological studies. Topics to be explored include eco-criticism, eco-feminism, environmental (in) justice, indigeneity, sustainability, and animal studies.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3600 - Professional Development in the Humanities
Addresses conventions and expectations for professional development through projects such as portfolio development and research into contemporary professional and work place issues. Explores career and graduate school opportunities.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Comm and Culture Studies, Scientific & Tech Comm (BS), Liberal Arts, Scientific & Tech Comm (BA), Humanities, English; May not be enrolled in one of the following Class(es): Freshman
HU 3605 - Grammar and Usage in Society
Description and analysis of current standards of grammar and usage in the U.S. Students acquire an understanding of the structures of American English as well as an understanding of the social forces underlying standardization and the processes of language change.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
HU 3606 - Editing
Examination of the responsibilities of an editor and grounding in basic editorial skills. Topics include situations of editing, levels of editing, readability, correctness, style, relations with authors, and social and political implications of editing.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
HU 3621 - Introduction to Journalism
Introduction to the history and practice of journalism. Includes critical analysis of journalistic coverage, journalistic style and editing, and ethical issues in journalism.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3630 - Publications and Information Management
Principles of information selection, editing, layout, and graphics essential to the scheduling, budgeting, and production of various print and digital publications.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): HU 2642 and HU 2633 or HU 2645
HU 3693 - Science Writing
Introduces writing, research, and editing that contribute to a public understanding of science. Possible topics: health, environment, medicine, public policy.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3694 - Grant Writing
Introduces fundamentals of grant proposal writing and research. Possible topics: writing for nonprofits, grant writing in various disciplines, researching funding resources.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3695 - Digital Writing and Rhetoric
Social, ethical, and historical implications of digital writing and rhetoric, investigating digital contexts, with special attention to analyzing and producing digital content.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): HU 2642 or HU 2130 or HU 3120
HU 3700 - Philosophy of Science
Examination of problems involved in scientific methodology such as theory structure, concept formation, scientific explanation, hypothetico-deductive model, role of experimentation, function of paradigms and analogies, distinction between science and pseudoscience, extent to which science is value-free or value-laden, social responsibility of scientists, and aims of science.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3701 - Philosophy of Technology
A study of philosophical analyses of technology. Topics may include: the essence and nature of technology, technology and human existence; the notion that we live in a technological age; and ethical issues surrounding the use, abuse, and ubiquity of technology.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3702 - Philosophy of Religion
An examination of some philosophical questions in diverse religious traditions including the existence of God, the problem of evil, and the nature of religious experience.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3710 - Engineering Ethics
A study of ethical questions confronting individual engineers and the engineering profession. Among the issues to be explored are the meaning of professionalism, the social responsibilities of engineers, engineer-employer and engineer-client relationships, whistle-blowing, conflicts of interest, and competitive bidding.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3711 - Biomedical Ethics
A study of several important ethical and philosophical issues that arise in medical practice and in biomedical science. Issues may include euthanasia, abortion, the physician-patient relationship, experimentation involving human subjects, and allocation of scarce biomedical resources. General ethical theories and concepts are used to shed light on those issues.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3800 - Media and Society
Examines contemporary forms of mediated communication. Emphasis on understanding media economics and impacts of media on attitudes, values, behavior, and identity. Topics may include propaganda, advertising, political communication, journalism, media violence, social media, surveillance, and media policy.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3820 - Interpersonal Communication
Examines practices and issues of relational communication and encourages critical awareness of common assumptions. Topics include verbal and nonverbal cues, conflict models, friendship, intimacy, and the interpersonal significance of race, gender, class, and disability.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3830 - Creativity, Culture, and Change
Examines the sources of creativity and the ways that it has been used to change cultural values, feelings, beliefs, and practices. A project-based course that cultivates and applies creative action toward cultural change.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3832 - Advanced Digital Presentation
Students will use digital delivery modes to design and deliver presentations for a variety of social and professional purposes. Students will explore the ethical, social, and political implications of digital delivery for civic life and public discourse.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3840 - Organizational Communication
An approach to understanding organizations in their socio-historical contexts from a variety of theoretical perspectives in communication. Explores meanings, roles, relations, interactions, and structures from a communication perspective.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3850 - Cultural Studies
Examines the way that culture communicates values, feelings, beliefs; structures differential relations of power and possibility; creates difference and hierarchy. Considers the struggles over meaning that open up possibilities for diversity and change.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3860 - Popular Culture
Introduces fundamentals of cultural theory and media criticism. Considers historical, social, political, and economic contexts of popular culture from a media studies perspective.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3871 - New Media Theory
Examines relationships among changing communication technologies and communication theories. Emphasizes issues involving emerging technologies and emerging theory.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3872 - Color, Visuality, and Culture
Engages with color as an aesthetic, theoretical, historical, cultural, and political concept. Explores what color is made of, how color shapes meaning, and how color functions in various expressive and interpretative contexts including politics, science, and industry.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3882 - Media Industries
Examines economic, political, and cultural aspects of media industries (cinema, broadcasting, music, gaming, telecommunications, and advertising) from historical and contemporary contexts.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3891 - Documentary
Considers technical, theoretical, aesthetic and ethical dimensions of documentary media through analysis and production.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall
HU 3910 - Language and Globalization
Considers the historical rise of the English language and other dominant languages, and present effects on minority and endangered languages within the US and abroad; World Englishes and dialectal variation; and the interaction of forces of globalization/standardization with localization/identity.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2009-2010 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3940 - Language and Identity
Examines how individuals create and perform their social identities through and in response to language, considering social variables such as race, ethnicity, class, gender, sexuality, disability, geography, power, ideology, etc. Explores how these variables may intersect, clash, and be resolved.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2010-2011 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
HU 3961 - Theroetical Foundation of TESOL
Introduction to key concepts and issues in teaching English to speakers of other languages. Topics covered may include nature of first-and-second acquisition, role of input and instruction in language learning, and evaluation of approaches to teaching and research.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Co-Requisite(s): HU 3605
Pre-Requisite(s): HU 2910
HU 3962 - TESOL Methods and Materials
Enhance understanding and awareness of the developmental stages and needs of English language learners in various learning contexts. Show how to adjust, modify, and manipulate instructional techniques and materials to accommodate the linguistic and cognitive needs of English learners.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): HU 3961
HU 3963 - Assessment and Testing in TESOL
This course covers basic principles and approaches in the assessment and testing of English as a second or foreign language in various instructional contexts. Topics covered may include test construction and adaptation and the application of this knowledge to evaluating tests.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): HU 3961
HU 3964 - Cross-Cultural Aspects of TESOL
Course examines those places where language and culture come together to affect our interactions; concentrating on areas particularly important to language teaching, learning, and usage. Topics may include introduction to pragmatics, politeness theory, and conversational politeness strategies.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): HU 3961
HU 4050 - Special Topics
Tutorial, seminar, workshop, or class study of special interest and importance in the humanities. Students should register by section number for the appropriate instructor and topic
Credits: variable to 6.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required
HU 4060 - Humanities Workshop
Special workshop projects in the humanities such as tutorials, editing, Shakespeare Faire drama workshop, writer's workshop, or study-abroad tours. Approved credit varies by degree program.
Credits: variable to 6.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required
HU 4101 - Multiliteracies Center Practicum
Reflective practicum in which theories of learning, literacy, and cultural differences are applied in the Multiliteracies Center setting under the supervision of a writing center professional.
Credits: 1.0; May be repeated
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required
Pre-Requisite(s): UN 1015

HU 4130 - Special Topics in Rhetoric and Composition
An in-depth examination of particular issues, theories, methodologies, or concepts in the field of rhetoric and composition, such as comparative rhetorics, computers and writing, multi-lingual writing, feminist rhetorics, and multi-modal composition.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2000-2001 academic year

HU 4140 - Methods of Teaching English
Application of learning theories and national and state professional standards to the teaching of English. Emphasizes methods, materials, and media used to teach adolescents. Requires admission to teacher education program or permission of instructor. Includes significant time in the field.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall
Restrictions: Permission of department required
Pre-Requisite(s): ED 4110 and ED 3210 and ED 3410 and ED 4700(C)

HU 4150 - Literacy in the Content Areas
Introduction to the best ways to use language for deepening comprehension and understanding in all content areas. Inquiries into how cultural and learning differences relate to comprehension. A minimum of 26 tutoring hours in a local school is required.
Credits: 4.0
Lec-Rec-Lab: (0-3-1)
Semesters Offered: Spring
Pre-Requisite(s): ED 4110 and ED 3210 and ED 3410

HU 4271 - Modern Language Seminar I-French
Language and power. Critical study of the representation of politics, economics, and social institutions in literature, film, and authentic documents from French, German, and Hispanic language communities. Students read texts in French and English translations. Course offered third year beginning 2009-2010.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 3274 or HU 3275

HU 4272 - Modern Language Seminar II-French
Individual and society. Critical study of the relationship between the individual and social institutions in literature, film, and authentic documents from French, German, and Hispanic language communities. Students read texts in French and in English translation. Course offered third year beginning 2010-2011.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring - Offered alternate years beginning with the 2001-2002 academic year
Pre-Requisite(s): HU 3274 or HU 3275

HU 4273 - Modern Language Seminar III-French
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): (HU 3274 or HU 3275) and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 4282 - Modern Language Seminar II-German
Individual and society. Critical study of the relationship between the individual and social institutions in literature, film, and authentic documents from French, German, and Hispanic language communities. Students read texts in German and in English translation. Course offered every third year beginning 2009-2010.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring - Offered alternate years beginning with the 2001-2002 academic year
Pre-Requisite(s): (HU 3284 or HU 3285) and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 4283 - Modern Language Seminar III-German
Technology in literature and film. Critical study of the relationship between modern technology and literature, film, and authentic documents from French, German, and Hispanic language communities. Students read texts in German and in English translation. Course offered every third year beginning 2010-2011.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): HU 3284 or HU 3285

HU 4271 - Level IV Modern Language Seminar I-Spanish
Language and power. Critical study of the representation of politics, economics, and social institutions in literature, film, and authentic documents from French, German, and Hispanic language communities. Students read texts in Spanish and English translation.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 3294 or HU 3295

HU 4292 - Level IV Modern Language Seminar II-Spanish
Technology in literature and film. Critical study of the relationship between modern technology and literature, film, and authentic documents from French, German, and Hispanic language communities. Students read texts in Spanish and in English translation.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 3294 or HU 3295

HU 4293 - Level IV Modern Language Seminar III-Spanish
Technology in literature and film. Critical study of the relationship between modern technology and literature, film, and authentic documents from French, German, and Hispanic language communities. Students read texts in Spanish and in English translation.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): HU 3294 or HU 3295

HU 4327 - Visual Storytelling and Cinema
Production-intensive focus on how filmmakers use narrative design, cinematography, and editing to tell a story, realize a creative vision, and engage an audience.
Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring
Pre-Requisite(s): HU 2324

HU 4500 - Senior Seminar in English
A course especially designed for English majors. In depth exploration of various topics with special emphasis on theory and production. Students will be required to engage relevant secondary sources and theory in a longer, final seminar paper.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

HU 4501 - BA Thesis
Students will be required to engage relevant secondary sources and theory in a longer, final seminar paper or creative project. Produce a cultural final project that demonstrates advanced critical and creative analysis. Proposals must be approved in the prior semester.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior

HU 4600 - Humanities Internship
Provides internship experience directly related to student's course of study. Students conduct work at internship site in addition to academic assignments that encourage them to connect their professional and academic experience.
Requires approval of department internship coordinator.
Credits: variable to 6.0; May be repeated
Semesters Offered: On Demand
Restrictions: Permission of department required
HU 4625 - Risk Communication
Examines models for communicating risks associated with environmental, safety, and health hazards. Considers the diverse roles assumed by the public under each of these models and means of ensuring that risks are communicated fairly, honestly, and accurately.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 4626 - International Technical Communication
Focuses on international workplace communication. Introduces theories of globalization. Topics may include localization, contrastive rhetoric, technical translation, and international usability.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): HU 2600

HU 4628 - Usability Evaluation and User Experience Design
Theories and practices of usability evaluation and user experience design relevant to technical communication contexts. Individual and team projects with emphasis on the development of instructions and procedures.
Credits: 3.0
Lec-Rec-Lab: (0-2-1)
Semesters Offered: Spring
Pre-Requisite(s): HU 3120 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 4634 - Advanced Practicum in Scientific and Technical Communication
Provides technical communication majors with opportunities to design and produce various communication products expected in their working careers, such as sets of procedures, proposals, progress reports, sets of directions, and style sheets. The course will also require students to complete, with advice from the instructor, one major client-involved project such as a brochure, newsletter, website, technical training module, etc.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Scientific & Tech Comm (BS), Scientific & Tech Comm (BA)
Pre-Requisite(s): HU 3120 and HU 2600

HU 4642 - Advanced Topics in Media
Critical and/or applied topics in advanced media, theory and development. Topics may include game design, mobile media, color, photography, film, or graphic design.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-2-3)
Semesters Offered: On Demand
Restrictions: Permission of instructor required

HU 4690 - Special Topics in Technical and Professional Communication
In-depth examination of selected topics in scientific and technical communication, or on professional and workplace writing in selected genres such as reports, proposals, or whitepapers.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman

HU 4700 - Topics in Philosophy
The topics will ordinarily be in-depth examinations of a particular philosopher or philosophical problem, tradition, or historical period. Examples include the philosophy of Kant, the existence of God, American pragmatism, death and dying, and ancient Greek philosophy.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): UN 1015

HU 4701 - Political Philosophy
Issues in political philosophy, such as the moral foundations of political systems, the proper relation between the individual and the state, and the justification of social institutions. Philosophers studied may include Plato, Aristotle, Machiavelli, Hobbes, Locke, Marx, de Tocqueville, Mill, Dewey, and Rawls.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 4710 - Sports Medicine and Ethics
Examines ethical issues in sports medicine. Topics include the ethical responsibilities and conflicts of interest for team physicians, research on athletes, sport-related concussions, and doping. Philosophical ethical foundations, and professional ethical codes for sports medicine will be studied.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman

HU 4711 - Biomedical Research Ethics
Examination of bioethical issues in biomedical research. Topics include research on human subjects, on vulnerable populations, and animals, principles of ethical research, and societal expectations for researchers.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): HU 3711

HU 4725 - Existentialism and Phenomenology
Introduction to the philosophical traditions of existentialism and phenomenology. Topics might include: the nature of human existence and of freedom; the importance of world, self, anxiety, death, and authenticity; and the foundations of knowledge, experience and meaning.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2013-2014 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 4800 - Media and Globalization
Examines the development of modern international communication systems, the rise of transnational media industries and technologies, and debates about their global impacts.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2014-2015 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 4850 - Surveillance, Media, and Film
Considers surveillance practices and the surveillance imaginary through films that take surveillance as their principal feature. Covers perspectives such as those of the watchers and the watched; kinds and purposes of surveillance; and the relationship between filmic surveillance and our sense and practices of freedom versus control.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): UN 1015 or (UN 1025)

HU 4890 - Topics in Communication
In-depth examination of selected issues or problems in the study of communication, such as gender and communication, the environment and communication, sound and communication, violence and communication.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

HU 4961 - Practicum in TESOL
Observation, case studies, tutoring, instructional assistance, and supervised teaching experience in English to speakers of other languages.
Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): HU 3962

Kinesiology & Integrative Physiology

KIP 1000 - Introduction to Exercise Science
Introduction to the fields and career opportunities in the exercise sciences.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Fall
KIP 1010 - Introduction to Sports and Fitness Management
Introduction to the fields and career opportunities in sports and fitness management.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Fall

KIP 1500 - Foundations of Kinesiology
Introduces academic subdisciplines of kinesiology - anatomy, motor behavior, biomechanics, physiology, exercise and the environment, sport nutrition and the mind and brain in exercise. Provides the conceptual framework within which the scientific bases for movement during exercise, sport performance, and other forms of physical activity are studied.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring

KIP 1900 - Student Athlete 101
Read, discuss, and practice study skills, cognitive strategies, goal development, and address contemporary issues problematic in today's college environment.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Fall
Restrictions: Permission of department required

KIP 2000 - Professionalism in Kinesiology
This course will assist students in gaining skills for entering into career-focused roles with professional competency, learning to apply these skills through shadowing experiences, and preparing to transition from a college student to a professional in kinesiology.
Credits: 2.0
Lec-Rec-Lab: (1-1-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Sports and Fitness Management, Exercise Science; May not be enrolled in one of the following Class(es): Freshman

KIP 2100 - Introduction to Athletic Training
Covers first aid, adult CPR, child CPR, and other sport training issues. Students receive appropriate certification cards.
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Fall, Spring

KIP 2200 - Health Promotion
This course emphasizes methods in planning, designing, implementing, and improving health/wellness promotion programs. Client motivation, behavior change, and physical activity for special populations will be addressed.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): EH 1500 or KIP 1500

KIP 2300 - Sports and Fitness Leadership
Course is designed to help students succeed in leadership principles, effective communication, team work, and introspection. Students will lead, teach, and collaborate with their peers through different assignments and active participation in class.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year

KIP 2400 - Principles of Sports Officiating
Theory and practice of officiating various sports common in the community and school setting.
Credits: 2.0
Lec-Rec-Lab: (1-0-2)
Semesters Offered: Fall - Offered alternate years beginning with the 2014-2015 academic year

KIP 2500 - Athletic Training Practicum
An experiential learning course in which students assist certified athletic trainers in preventive and post-injury care of collegiate athletes. Topics include professionalism, acute injury prevention techniques, and post-injury management and care.
Credits: 1.0
Lec-Rec-Lab: (0-0-1)
Semesters Offered: Fall, Spring Pre-Requisite(s): KIP 2100 or EH 3050

KIP 2600 - Introduction to Public Health
An overview of public health including the history of public health and major issues facing the U.S. and global populations. Topics include societal conditions that lead to health disparities, role of government, and the basic sciences supporting public health.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Fall

KIP 2610 - Outdoor Emergency Care Training (Ski Patrol)
Second of two-course sequence required for Alpine and Nordic Ski Patrol candidates. Ninety hours of instruction includes three weekends. Requires payment of dues to become member of National Ski Patrol. Certification in National Ski Patrol Outdoor Emergency Care is available upon completion.
Credits: 2.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Fall
Restrictions: Permission of instructor required Pre-Requisite(s): PE 2028

KIP 2800 - Special Topics in Kinesiology
Examination of current topics in the field of kinesiology. Literature and research topics are addressed.
Credits: variable to 9.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Sports and Fitness Management, Exercise Science

KIP 2800 - Special Topics in Kinesiology
Examination of current topics in the field of kinesiology. Literature and research topics are addressed.
Credits: variable to 9.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Sports and Fitness Management, Exercise Science

KIP 3000 - Sports Psychology
Overview of psychological principles and their applications to individuals and groups in sport, exercise and/or therapy. For the laboratory portion, students observe and analyze behaviors in a setting of their choice.
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): PSY 2000

KIP 3100 - Exercise Assessment and Prescription
Theory and practical aspects of exercise testing and prescription; topics include testing of strength, endurance, cardiovascular endurance, flexibility, body composition, muscle power, and balance with special considerations for arthritis, osteoporosis, dyslipidemia, immunology, and metabolic syndrome.
Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2020 and BL 2021

KIP 3200 - Personal Training
A pragmatic course of both theory and application in setting up a personal training program for individuals. Includes assessment, techniques, planning, safety and legal issues. Leads toward final preparation to earn certification as a personal trainer.
Credits: 2.0
Lec-Rec-Lab: (1-0-1)
Semesters Offered: Spring
Pre-Requisite(s): BL 2020 and BL 2021 and (EH 3100 or KIP 3100)

KIP 3300 - Foundations of Coaching
Practical and relevant information appropriate for beginning and experienced interscholastic coaches.
Credits: 3.0
Lec-Rec-Lab: (2-0-1)
Semesters Offered: Fall, Summer

KIP 3310 - Methods of Coaching
Students will demonstrate knowledge of skills, tactics, strategies, and sporting principles in coaching sport teams.
Credits: 2.0
Lec-Rec-Lab: (1-1-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2013-2014 academic year

KIP 3400 - Sports Administration
Students will learn skills and competencies of sports management including ethics, marketing, law, finance, information, collegiate, olympic, professional, youth, campus recreation programs, parks, career opportunities, foundations, and future directions.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman

KIP 3410 - Facilities & Events Management
Students will learn about managing sports facilities including risk management, administration of personnel, organization, and administrative efficiency.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman

KIP 3500 - Sports Medicine Practicum
This course allows students to experience current topics in sports medicine along with learning up-to-date orthopedic injury assessment, treatment, and rehabilitation.
Credits: variable to 2.0; Repeatable to a Max of 2
Semesters Offered: Fall, Spring
Pre-Requisite(s): KIP 2500
KIP 3600 - Motor Development
Designed for upper level undergraduates or graduates, this course will focus on the changes in motor behavior across a life span, and examine the study and practice of fundamental patterns within the context of development theory.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): (EH 1500 or KIP 1500) and BL 2020

KIP 3700 - Lifetime Fitness
To gain a thorough understanding in all areas of personal fitness through functional anatomy, exercise physiology, health and physical fitness, screening and evaluation, nutrition, weight management, exercise prescription and programming considerations, training instruction, and consideration for special populations.

Credits: 3.0
Lec-Rec-Lab: (2-0-2)
Semesters Offered: Summer

KIP 4000 - Sports Nutrition Seminar
Human nutrition as it specifically applies to athletes. Specific needs for proteins, carbohydrates, fats, electrolytes and micronutrients. Use of ergogenic aids is covered. Students will research, write and present orally their findings on nutrition topics.

Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2940

KIP 4100 - Exercise Physiology
Focuses on the functional changes brought by acute and chronic exercise sessions. Topics include muscle structure and function, bioenergetics, cardiovascular and respiratory adaptations, exercise training for sport, sport nutrition, ergogenic aids, and other health and fitness topics.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Co-Requisite(s): KIP 4110
Pre-Requisite(s): BL 2020 and BL 2021

KIP 4110 - Exercise Physiology Laboratory
A companion course to EH4210. Hands-on experience in making physiological measurements as related to exercise. Cardiovascular and respiratory changes during exercise will be monitored. A virtual lab is used to simulate changes in physiological measurements that cannot be performed on live subjects. A student designed laboratory project is required.

Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Co-Requisite(s): KIP 4100

KIP 4120 - Molecular Exercise Physiology
Introduces cellular and molecular mechanisms by which exercise causes adaptation. Topics include how gene variations affect human performance, signal transduction pathways involved in regulation of metabolism, and mechanism of exercise in prevention and treatment of chronic diseases.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2100 and (EH 4210 or KIP 4100)

KIP 4200 - Biomechanics of Human Movement
An in-depth view of the biomechanical properties of the musculoskeletal system. The course provides detailed analyses of the kinetics of human movement, material properties of the component tissues, and dynamic processes of adaptation to stress and strain of the system.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Co-Requisite(s): KIP 4210
Pre-Requisite(s): BL 2020 and (EH 1500 or KIP 1500) and PH 1110 and PH 1111

KIP 4210 - Biomechanics of Human Movement Laboratory
A companion course to EH4500. Hands-on experience, including data collection, analysis, and interpretation using various equipment in biomechanics.

Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall
Co-Requisite(s): KIP 4200
Pre-Requisite(s): BL 2020 and (EH 1500 or KIP 1500) and PH 1110 and PH 1111

KIP 4300 - Motor Learning and Control
This course will provide the current theories and concepts involved in the processes of motor skill acquisition and performance from a behavioral perspective.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (EH 1500 or KIP 1500) and BL 2020

KIP 4400 - Strength and Conditioning
Theory and practice in development and administration of comprehensive strength and conditioning programs for both the athlete and individual of any level. Includes knowledge, safety concerns and skill techniques necessary for teaching and administering at any strength and conditioning facility.

Credits: 3.0
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Fall
Pre-Requisite(s): BL 2020 and BL 2021

KIP 4500 - Athletic Training Capstone
Experiential learning that engages the student with mentorship and assisting certified athletic trainers.

Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Pre-Requisite(s): KIP 3500 or EH 3060

KIP 4600 - Sports and Fitness Promotions
Development and implementation of marketing plans for sports and fitness businesses. Topics include marketing of sporting events and fitness programs, use of traditional media for promotion, web-based advertising (new media), and business branding.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2011-2012 academic year
Pre-Requisite(s): MKT 3000

KIP 4610 - Legal Issues in Sports and Fitness Management
Review of legal issues that apply to sport and fitness organizations such as liability, risk management, facility concerns, and labor laws. Basic components of the U.S. legal system and guidelines, and rules of the National Collegiate Athletic Association will be covered.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2012-2013 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

KIP 4620 - Sports Media
This course examines the impact sports and the media have on each other and the sports consumer. Students will gain a greater understanding of the operation of sports media and communications at all levels of sports (amateur, collegiate, professional) and the role of sports media in American society.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): MKT 3000

KIP 4630 - Financial Aspects of Sports
The course is designed to provide the student with an understanding of the basic concepts that underlie financial management, and an ability to apply these concepts to the analysis of financial issues within the sport industry.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): ACC 2000

KIP 4690 - Coaching Practicum
Students seeking coaching endorsement assist with a sport of their choice. Subject to approval of endorsement advisor, students may assist a head coach in season during student teaching; assist MTU head coach in season; assist head coach in season at public/private school or summer camp.

Credits: 2.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required
Pre-Requisite(s): (EH 3010 or KIP 3000) and (EH 3020 or KIP 3300)
KIP 4700 - EKG Interpretation
Course is designed for students who are going to pursue future career related to cardiac rehabilitation, physical therapy and students in the Pre-Med program. Students will learn cardiac electrophysiology, the pathophysiology, the diagnosis, and treatment of cardiac arrhythmias, and related cardiovascular diseases. Class will build bridge between basic sciences and human health.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2020 and BL 2021

KIP 4710 - Sports Medicine and Ethics
Examine ethical issues in sports medicine. Topics might include the ethical responsibilities and conflicts of interest for team physicians, research on athletes, sport-related concussions, and doping. Philosophical ethical foundations, and professional ethical codes for sports medicine will be studied.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman

KIP 4720 - Exercise Pharmacology
Course will bridge between basic sciences and human health. The course focuses on understanding the fundamental concept of exercise pharmacology and pharmacological treatment of diseases of various systems including cardiovascular, respiratory, endocrine, neuronal, hormonal, and renal systems.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Spring
Pre-Requisite(s): BL 2020 and BL 2021

KIP 4730 - Physical Therapy Seminar
Seminar for students who are interested in physical therapy profession. Course will include self-directed learning and group work. Topics may include evidence based medicine, literature review writing and evaluation, healthcare reimbursement, clinical decision making, health screenings, and other current topics.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2017-2018 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2020 and BL 2021

KIP 4740 - Epidemiology
An introduction to the principles and methods of epidemiology to understand the distribution and determinants of health in a population. Topics include basic epidemiological statistics, study design, and sources/impact of bias and error.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring

KIP 4800 - Special Topics in Kinesiology
Examination of current topics in the field of exercise science. Literature and research topics are addressed.
Credits: variable to 9.0, Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required; Must be enrolled in one of the following Major(s): Sports and Fitness Management, Exercise Science; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BL 2020 and BL 2021

KIP 4900 - Internship in Exercise Science
Practical and didactic training in Exercise Science in an approved internship site. Provides experience in a variety of exercise science or medical settings. Internships must be approved by the department internship coordinator and work 42 hours for each credit earned.
Credits: variable to 9.0, Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required; Must be enrolled in one of the following Major(s): Sports and Fitness Management, Exercise Science; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): KIP 2000 or EH 2850

KIP 4910 - Internship in Sports and Fitness Management
Empirical experiences in an approved internship site. Provides practical experience in one or more work settings, assisting the upper level student in making an appropriate career choice. Internships must be approved by the department internship coordinator and work 42 hours for each credit earned.
Credits: variable to 12.0, Repeatable to a Max of 12
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required; Must be enrolled in one of the following Major(s): Sports and Fitness Management; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): KIP 2000 or EH 2850

KIP 4950 - Research in Kinesiology
A literature and laboratory research experience in kinesiology that culminates in a written report or oral presentation of the work performed.
Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required

Mathematical Sciences

MA 0010 - Development of Mathematics Skills
Individuated instruction in mathematics problem solving and general study skills from professional math coaches. Helps students with demanding college-level mathematics courses. Credits do not count toward graduation.
Credits: 0.0; May be repeated
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required

MA 1020 - Quantitative Literacy
Stresses the role of contemporary mathematical thinking and the connection between mathematics and our daily lives. Topics include the mathematics of the Census, planning and scheduling, coding theory, game theory, symmetry and patterns, logic and modeling, and political flavor topics.
Credits: 4.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Anthropology, Communication, Culture & Media, Comm and Culture Studies, Theatre & Electr. Media Perf., English, Theatre & Entertain Tech (BS), Theatre & Entertain Tech (BA), Liberal Arts, Psychology, Sports and Fitness Management, History, Social Sciences, Liberal Arts with History Opt, Scientific & Tech Comm (BA), Scientific & Tech Comm (BS), Humanities
Pre-Requisite(s): ALEKS Math Placement >= 00

MA 1030 - College Algebra I
This course is the first of a two semester sequence. It examines the behavior of linear, polynomial, and rational functions. In addition, algebraic methods commonly needed in calculus are reviewed.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Co-Requisite(s): MA 0030
Pre-Requisite(s): ALEKS Math Placement >= 00

MA 1031 - College Algebra II with Trigonometry
This course is the second of a two semester sequence. It examines the behavior of exponential, logarithmic, and trigonometric functions. Also, algebraic and trigonometric methods commonly needed in calculus are reviewed. MA1030 and MA1031 together are equivalent to MA1032.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Co-Requisite(s): MA 0031
Pre-Requisite(s): MA 1030

MA 1032 - Precalculus
This course examines the behavior of linear, polynomial, rational, exponential, logarithmic and trigonometric functions.
Credits: 4.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): ALEKS Math Placement >= 56

MA 1135 - Calculus for Life Sciences
Topics include analytic geometry, limits, continuity of functions, transcendental functions, derivatives, integrals, and applications of the derivative in the fields of economics, biological sciences, and social sciences. Extensive use of graphing calculator. (See mathematical sciences department for recommended calculator). Credit applicable only to those curricula specifying this course.
Credits: 4.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Fall, Spring, Summer

MA 1136 - Calculus for Life Sciences
Topics include analytic geometry, limits, continuity of functions, transcendental functions, derivatives, integrals, and applications of the derivative in the fields of economics, biological sciences, and social sciences. Extensive use of graphing calculator. (See mathematical sciences department for recommended calculator). Credit applicable only to those curricula specifying this course.
Credits: 4.0
Lec-Rec-Lab: (0-3-1)
Semesters Offered: Fall
Pre-Requisite(s): MA 1032 or MA 1031 or ALEKS Math Placement >= 70 or CEEB Calculus AB >= 2 or CEEB Calculus BC >= 2 or CEEB Calculus AB Subscore >= 2

MA 1160 - Calculus with Technology I
An introduction to single-variable calculus, which includes a computer laboratory. Topics include trigonometric, exponential, and logarithmic functions, differentiation and its uses, and basic integration. Integrates symbolic tools, graphical concepts, data and numerical calculations.
Credits: 4.0
Lec-Rec-Lab: (0-3-1)
Semesters Offered: Fall
Pre-Requisite(s): MA 1032 or MA 1031 or ALEKS Math Placement >= 80 or CEEB Calculus AB >= 3 or CEEB Calculus BC >= 3 or CEEB Calculus AB Subscore >= 3
MA 1161 - Calculus Plus w/ Technology I
An introduction to single-variable calculus, which includes a computer laboratory. Topics include trigonometric, exponential, logarithmic functions, differentiation and its uses, and basic integration. Integrates symbolic tools, data and numerics, and graphical concepts and is similar to MA1160, going at a different pace.
Credits: 5.0
Lec-Rec-Lab: (0-4-1)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): MA 1032 or MA 1031 or ALEKS Math Placement => 70 or CEEB Calculus AB => 2 or CEEB Calculus BC => 2 or CEEB Calculus AB Subscore => 2

MA 1600 - Introduction to Scientific Simulation
Introduction to simulation, a powerful computational tool for many scientific problems. Case studies and projects will be drawn from various fields. Prior programming experience is not required; all necessary computational skills will be developed in the course.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Pre-Requisite(s): MA 1160 or MA 1161

MA 1910 - Exploring Symmetry Groups
Mathematical discovery and invention in group theory: transformations, finite figures, strip patterns, wall patterns, finite groups, and Cayley diagrams. Develops the ability to find and describe patterns, to generalize from observations, to formulate conjectures, and to support conjectures with analysis and, when possible, formal proof.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year

MA 1920 - Exploring Knots and Surfaces
Mathematical discovery and invention in topological graph theory: networks, graphs, graph coloring, surfaces and graphs, and knots. Develops the ability to find and describe patterns, to generalize from observations, to formulate conjectures, and to support conjectures with analysis and, when possible, formal proof.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year

MA 1930 - Exploring Number Theory
Mathematical discovery and invention in number theory: number puzzles, Chinese Remainder Theorem, codes, primitive roots, and quadratic reciprocity. Develops the ability to find and describe patterns, to generalize from observations, to formulate conjectures, and to support conjectures with analysis and, when possible, formal proof.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year

MA 1940 - Exploring Non-Euclidean Geometry
Mathematical discovery and invention in Non-Euclidean geometry: definitions of straight and angle, transformations, congruence, parallel transport, projections, and finite geometries. Develops the ability to find and describe patterns, to generalize from observations, to formulate conjectures, and to support conjectures with analysis and, when possible, formal proof.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year

MA 1990 - Elementary Mathematics Topics
Students study a particular area in mathematics, ordinarily not covered in existing courses. Intended for first-year students.
Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

MA 2160 - Calculus with Technology II
Continued study of calculus, which includes a computer laboratory. Topics include integration and its uses, function approximation, vectors, and elementary modeling with differential equations.
Credits: 4.0
Lec-Rec-Lab: (0-3-1)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): MA 1160 or MA 1161 or MA 1135 or CEEB Calculus AB >= 3 or CEEB Calculus BC >= 3 or CEEB Calculus AB Subscore => 3

MA 2320 - Elementary Linear Algebra
An introduction to linear algebra and how it can be used. Topics include systems of equations, vectors, matrices, orthogonality, subspaces, and the eigenvalue problem. Not open to students with credit in MA2321 or MA2330.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Major(s): Mathematics, Software Engineering, Computer Science
Pre-Requisite(s): MA 1160 or MA 1161 or MA 1135

MA 2321 - Elementary Linear Algebra
Offered first half of semester, to be taken concurrently with MA3521. The course is an introduction to linear algebra and how it can be used. Topics include systems of equations, vectors, matrices, orthogonality, subspaces and the eigenvalue problem. Not open to students with credit in MA2320 or MA2330.
Credits: 2.0
Lec-Rec-Lab: (0-4-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Major(s): Mathematics, Software Engineering, Computer Science
Pre-Requisite(s): MA 2160

MA 2330 - Introduction to Linear Algebra
An introduction to linear algebra and how it can be used, including basic mathematical proofs. Topics include systems of equations, vectors, matrices, orthogonality, subspaces, and the eigenvalue problem. Not open to students with credit in MA2320 or MA2321.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): MA 2160

MA 2600 - Scientific Computing
Use of mathematical modeling and computer simulation to solve scientific problems. Includes introduction to elementary numerical methods (numerical integration, solution of linear systems, solution of nonlinear equations, optimization) and to computer programming. Requires programming project(s).
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Summer
Restrictions: Must be enrolled in one of the following Major(s): Statistics, Mathematics
Pre-Requisite(s): MA 1160 or MA 1161 or MA 1135

MA 2710 - Introduction to Statistical Analysis
Introduction to statistical reasoning and methods. Topics include uses and abuses of statistics, graphical and descriptive methods, correlation and regression, probability and statistical inference. The course will include a written project and an introduction to statistical software. Not open to students with credit in MA2720 or MA3710 or MA3715.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Statistics, Mathematics
Pre-Requisite(s): MA 1160 or MA 1161 or MA 1135

MA 2720 - Statistical Methods
Introduction to the design and analysis of statistical studies. Topics include methods of data collection, descriptive and graphical methods, probability, statistical inference on means, regression and correlation, and simple variable ANOVA. Not open to students with credit in MA2710, MA3710, or MA3715.
Credits: 4.0
Lec-Rec-Lab: (0-4-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Major(s): Mathematics
Pre-Requisite(s): MA 1020 or MA 1030 or ALEKS Math Placement => 50 or CEEB Calculus BC => 2 or CEEB Calculus AB Subscore => 2

MA 2910 - Mathematical Experimentation
Mathematical discovery and invention in topics such as algebra, analysis, applied mathematics, discrete mathematics, geometry, and statistics. Class projects require students to find and describe patterns, generalize from observations, formulate and support conjectures with analysis and, when possible, proof. Projects require written reports describing the student's findings, conjectures, and conclusions.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Pre-Requisite(s): MA 1160 or MA 1161

MA 2990 - Elementary Topics in Mathematics
Students study a particular area in mathematics ordinarily not covered in existing courses. Intended for first- or second-year students.
Credits: variable to 4.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

MA 3160 - Multivariable Calculus with Technology
Introduction to calculus in two and three dimensions, which includes a computer laboratory. Topics include functions of several variables, partial derivatives, the gradient, multiple integrals; introduction to vector-valued functions and vector calculus, divergence, curl, and the integration theorems of Green, Stokes, and Gauss.
Credits: 4.0
Lec-Rec-Lab: (0-3-1)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): MA 2160 or CEEB Calculus BC => 3

Undergraduate Course Descriptions, 2018-19, Page 67 of 103
MA 3202 - Introduction to Coding Theory
Transmission via noisy channels, hamming distance, linear codes, the ISBN-code, encoding and decoding, finite fields, Reed-Solomon codes, deep space communication, the compact disk code, sphere packing bound, hamming codes, hamming decoding.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MA 2320 or MA 2321 or MA 2330

MA 3203 - Introduction to Cryptography
Topics include private-key cryptography, shift substitution, permutation and stream ciphers, cryptanalysis, perfect secrecy, public-key cryptography, and the RSA cryptosystem.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring, Summer
Pre-Requisite(s): MA 2320 or MA 2321 or MA 2330

MA 3210 - Introduction to Combinatorics
Topics include set theory, mathematical induction, integers, functions and relations, counting methods, recurrence relations, generating functions, permutations, combinations, principle of inclusion and exclusion, graphs (including planar graphs). Further possible topics are graph coloring, trees and cut-sets, combinatorial designs, Boolean algebra.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Summer
Pre-Requisite(s): MA 2320 or MA 2321 or MA 2330

MA 3310 - Introduction to Abstract Algebra
Introduction to proofs in algebra. Topics include elementary number theory (induction, binomial theorem, fundamental theorem of arithmetic, Euclidean algorithm, congruences, Fermat's theorem), group theory (subgroups, cyclic groups, generators, Lagrange's theorem, normal groups, homomorphisms, quotients), ring theory (domains, fields, polynomials, homomorphisms).

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Summer
Pre-Requisite(s): MA 2320 or MA 2321 or MA 2330

MA 3450 - Introduction to Real Analysis
Whitnie calculus works: a careful study of the logical basis of calculus, with an emphasis on how to read and write proofs. Topics include set theory, real numbers, infinite sequences, continuity, derivatives and integrals for functions of one variable, sequences of functions, infinite series.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MA 2320 or MA 2321 or MA 2330

MA 3520 - Elementary Differential Equations
First order equations, linear equations, and systems of equations. Not open to students with credit in MA3521, MA3530 or MA3560.

Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Major(s): Mathematics, Computer Science
Pre-Requisite(s): MA 2160 and (MA 2320 or MA 2321 or MA 2330)

MA 3521 - Elementary Differential Equations
Offered second half of semester, to be taken concurrently with MA2321. Topics include first order equations, linear equations and systems of equations. Not open to students with credit in MA3520, MA3530 or MA3560.

Credits: 2.0
Lec-Rec-Lab: (0-4-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Major(s): Mathematics, Computer Science
Co-Requisite(s): MA 2321
Pre-Requisite(s): MA 2160

MA 3530 - Introduction to Differential Equations
First order equations, linear equations, systems of equations, and Laplace transforms. May include elementary separation of variables for partial differential equations. Not open to students with credit in MA3520, MA3521, or MA3560.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MA 2160 and (MA 2320 or MA 2321 or MA 2330)

MA 3560 - Mathematical Modeling with Differential Equations
Creating differential equation models for physical problems such as population dynamics, kinetics, mass-spring systems. Topics include nondimensionalization, numerical methods, phase-plane analysis, first-order systems, linearization, and stability. Includes modeling case studies, using a computer algebra system, and a modeling project. Not open to students with credit in MA3520, MA3521, or MA3530.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MA 2160 and (MA 2320 or MA 2321 or MA 2330)

MA 3710 - Engineering Statistics
Introduction to the design, conduct, and analysis of statistical studies aimed at solving engineering problems. Topics include methods of data collection, descriptive and graphical methods, probability and probability models, statistical inference, control charts, design of experiments. Not open to students with credit in MA2710, MA2720, or MA3715.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): MA 2160

MA 3715 - Biostatistics
Introduction to the design and analysis of statistical studies in the health and life sciences. Topics include study design, descriptive and graphical methods, probability, inference on means, categorical data analysis, and linear regression. Not open to students with credit in MA2710, MA2720, or MA3710.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): MA 1135 or MA 1160 or MA 1161

MA 3720 - Probability
Introduction to probabilistic methods. Topics include probability laws, counting rules, discrete and continuous random variables, expectation, joint distributions, and limit theorems.

Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall, Spring
Pre-Requisite(s): MA 2710 or MA 2720 or MA 3710 or MA 3715

MA 3750 - Introduction to SAS Programming
This course is a workshop focused on solving problems for SAS certified base/certified programmer computer exam. Financial calculator skills for professional exams. May include other topics on the FM exam.

Credits: 3.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Spring
Pre-Requisite(s): MA 2710 or MA 2720 or MA 3710 or MA 3715

MA 3810 - Introduction to Actuarial Mathematics
Nominal and effective rates of interest, present value, discount, annuities certain, sinking funds, bonds, yield rates, and amortization schedules. Financial calculator skills for professional exams. May include other topics on the FM exam.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MA 2160

MA 3811 - Actuarial Exam Workshop
Topics from the Society of Actuaries professional examinations, primarily financial mathematics and probability. Review, preparation, and practice using SOA exams and other materials.

Credits: 1.0; Repeatable to a Max of 4; Graded Pass/Fail Only
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): MA 2160

MA 3924 - College Geometry with Technology
Review of Euclidean geometry. Introduction to geometric constructions, conjecturing of theorems, methods of proof, 3-D geometry, finite geometries, and non-Euclidean geometries. Integrates computer software (e.g. Geometer's Sketchpad) throughout the course.

Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): MA 2160 or MA 2330

MA 3990 - Math Sciences Teach Experience
Development of teaching skills through assisting in the instruction of a section of an entry-level undergraduate mathematics course. Students gain experience in leadership, group work, organization skills, cooperative exercise preparation, and class instruction.

Credits: variable to 4.0; Repeatable to a Max of 4; Graded Pass/Fail Only
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

</thead>
<tbody>
<tr>
<td>MA 3999</td>
<td>Intermediate Topics in Mathematics</td>
<td>Students study a particular area in mathematics, not ordinarily covered in existing courses. Intended for third-year students.</td>
<td>3.0</td>
<td></td>
<td>Fall, Spring, Summer</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4208</td>
<td>Optimization and Graph Algorithms</td>
<td>An introduction to linear and integer programming and related graph problems. Topics include simplex algorithm, duality, branch-and-bound and branch-and-cut, shortest paths, spanning trees, matchings, network flow, graph coloring, and perfect graphs.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4209</td>
<td>Combinatorics and Graph Theory</td>
<td>An introductory course in combinatorics and graph theory. Topics include designs, enumeration, extremal set theory, finite geometry, graph coloring, inclusion-exclusion, network algorithms, permutations, and trees.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4310</td>
<td>Abstract Algebra</td>
<td>Detailed study of abstract algebra: elementary number theory (congruences, quadratic residues, arithmetic functions), group theory (monoids, permutation groups, homomorphisms, quotients, Lagrange's theorem, finite abelian groups, Sylow's theorems), ring theory (domains, prime and maximal ideals, quotients, PID's), splitting fields, finite fields.</td>
<td>3.0</td>
<td></td>
<td>Spring</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4330</td>
<td>Linear Algebra</td>
<td>A study of fundamental ideas in linear algebra and its applications. Includes review of basic operations, block computations; eigensystems of normal matrices; canonical forms and factorizations; singular value decompositions, pseudo inverses, least-square applications; matrix exponentials and linear systems of ODEs; quadratic forms, extremal properties, and bilinear forms.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4410</td>
<td>Complex Variables</td>
<td>A study of complex numbers, functions of a complex variable, analytic functions, elementary functions, integrals, Taylor and Laurent series, residues and poles, and conformal mapping.</td>
<td>3.0</td>
<td></td>
<td>Spring</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4450</td>
<td>Real Analysis</td>
<td>Real analysis on Euclidean n-space. Topics include real and vector valued functions, metric and normed linear spaces; an introduction to Lebesgue measure and convergence theorems.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4515</td>
<td>Introduction to Partial Differential Equations</td>
<td>An introduction to solution techniques for linear partial differential equations. Topics include: separation of variables, eigenvalue and boundary value problems, spectral methods, fourier series, and Green's functions. Studies applications in heat and mass transfer (diffusion eqns.), and mechanical vibrations (wave and beam eqns.).</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4525</td>
<td>Applied Vector and Tensor Mathematics</td>
<td>Introduction to vector and tensor mathematics with applications. Topics include vectors; vector differential calculus, space curves; dyadic products and matrices; gradients, divergence, curl, Laplacians; Stokes' integral theorem, Gauss theorem, conservation laws; curvilinear coordinates; tensors, material derivatives; applications of potential theory in electricity and magnetism, heat transfer, solid and fluid mechanics.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4535</td>
<td>Nonlinear Dynamics and Chaos</td>
<td>Ordinary differential equations and dynamical systems via a modern geometric approach, including physical and engineering applications. May include chaotic phenomena and fractals.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4610</td>
<td>Numerical Linear Algebra</td>
<td>Derivation and analysis of algorithms for problems in linear algebra. Covers floating point arithmetic, condition numbers, error analysis; solution of linear systems (direct and iterative methods), eigenvalue problems, least squares, singular value decomposition. Includes a review of elementary linear algebra and the use of appropriate software.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4620</td>
<td>Numerical Methods for PDEs</td>
<td>Derivation, analysis, and implementation of numerical methods for partial differential equations; applications to fluid mechanics, elasticity, heat conduction, acoustics, or electromagnetism.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4710</td>
<td>Regression Analysis</td>
<td>Covers simple, multiple, and polynomial regression; estimation, testing, and prediction; weighted least squares, matrix approach, dummy variables, multicollinearity, model diagnostics and variable selection. A statistical computing package is an integral part of the course.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4720</td>
<td>Design and Analysis of Experiments</td>
<td>Covers construction and analysis of completely randomized, randomized block, incomplete block, Latin squares, factorial, fractional factorial, nested and split-plot designs. Also examines fixed, random and mixed effects models and multiple comparisons and contrasts. The SAS statistical package is an integral part of the course.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4730</td>
<td>Nonparametric Statistics</td>
<td>Introduces nonparametric techniques that require less restrictive assumptions on the data. Topics include statistical inference concerning location and dispersion parameters as well as the general distributions. Goodness-of-fit tests for count and ordinal data are also discussed.</td>
<td>3.0</td>
<td></td>
<td>Fall - Offered alternate years beginning with the 2019-2020 academic year</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4760</td>
<td>Mathematical Statistics I</td>
<td>Covers joint probability distributions, functions of random variables, sampling and limiting distributions, introduction to parameter estimation.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4770</td>
<td>Mathematical Statistics II</td>
<td>Continuation of MA4760. Theory of point and interval estimation; properties of estimators, theory of hypothesis testing, analysis of variance, analysis of categorical data and other topics as time allows.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
<tr>
<td>MA 4780</td>
<td>Time Series Analysis and Forecasting</td>
<td>Statistical modeling and inference for analyzing experimental data that have been observed at different points in time. Topics include models for stationary and nonstationary time series, model specification, parametric estimation, and time regression models.</td>
<td>3.0</td>
<td></td>
<td>Fall</td>
<td>(0-3-0)</td>
</tr>
</tbody>
</table>

Undergraduate Course Descriptions, 2018-19, Page 69 of 103
MA 4790 - Predictive Modeling
Application, construction, and evaluation of statistical models used for prediction and classification. Topics include data visualization and exploratory methods, the normal theory regression model, logistic and Poisson regression, linear and quadratic discriminant analysis, and classification with logit models.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MA 3740 or MA 4710 or MA 4720 or MA 4780

MA 4810 - Financial Markets and Actuarial Math
Derivative Securities, hedging, arbitrage, binomial and Black-Scholes pricing models. Long-term insurance coverages, life insurance and annuities. May include other topics on professional SOA exams.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2004-2005 academic year
Pre-Requisite(s): MA 3720 and MA 3810

MA 4820 - Loss Distributions and Actuarial Math
Loss distribution used for modeling insurance claims. Frequency, severity, coverage modifications, risk measures, models, credibility, short term insurance coverages. May include other topics on the C exam.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2005-2006 academic year
Pre-Requisite(s): MA 3720

MA 4900 - Mathematical Sciences Project
Independent study in an area of mathematical sciences under the guidance of a faculty member.

Credits: Variable to 4.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

MA 4905 - Methods of Teaching Mathematics
This course focuses on trends and standards in secondary school mathematics education, with an emphasis on methods and materials for effectively supporting and assessing middle and high school learning. Requires admission to teacher education program.

Credits: 2.0
Lec-Rec-Lab: (0-1-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): ED 4700(C)

MA 4908 - Theory of Numbers with Technology
Mathematical induction, Euclid’s algorithm, prime and composite integers, algebra of congruences, Chinese remainder theorem, quadratic reciprocity law, number theoretic functions, first degree Diophantine equations, Pythagorean triples, Fermat and Mersenne numbers, factoring algorithms, tests for primality and various applications. Projects use Mathematica and EXCEL software packages.

Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Pre-Requisite(s): MA 2210 or MA 3310 or MA 3924

MA 4945 - History of Mathematics
Survey of the development of mathematics from ancient times to today. How cultural, mathematical, and technological developments have influenced one another throughout history. Course provides all necessary historical background.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

MA 4990 - Topics in Mathematics
Students study in greater depth a particular area of mathematics not studied in existing courses.

Credits: Variable to 4.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

Mechanical Engineering – Engineering Mechanics

MEEM 2110 - Statics
Force systems in two and three dimensions. Includes composition and resolution of forces and force systems, principles of equilibrium applied to various bodies, simple structures, friction, centroids, and moments of inertia. Vector algebra used where appropriate. Prerequisite of MA2160 with a grade of C or better is required.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following College(s): Sch of Forest Res & Envir Sci, College of Engineering
Pre-Requisite(s): MA 2160

MEEM 2150 - Mechanics of Materials
Introduction to mechanical behavior of materials, including stress/strain at a point, principle stresses and strains, stress-strain relationships, determination of stresses and deformations in situations involving axial loading, torsional loading of circular cross sections, and flexural loading of straight members. Also covers stresses due to combined loading and buckling of columns.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following College(s): Sch of Forest Res & Envir Sci, College of Engineering
Pre-Requisite(s): MEEM 2110

MEEM 2201 - Introductory Thermodynamics
This course introduces concepts of energy, energy conversion, mechanisms of heat and work transfer in processes and in cycles. It also covers the first and the second laws of thermodynamics.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following College(s): College of Engineering
Pre-Requisite(s): MA 2160 and CH 1150 and CH 1151

MEEM 2700 - Dynamics
First course in the principles of dynamics, covering the motion of a particle, the kinematics and kinetics of plane motion of rigid bodies, the principles of work and energy, impulse and momentum. Uses vector methods.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): PH 2100 and (MEEM 2110 or ENG 2120) and MA 3160(C)

MEEM 2901 - Mechanical Engineering Practice I
Students further develop laboratory and simulation skills as they model and assess middle and high school learning. Requires admission to teacher education program.

Credits: 3.0
Lec-Rec-Lab: (0-1-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): ED 4700(C)

MEEM 2911 - Mechanical Engineering Practice II
Students study in greater depth a particular area of mechanical sciences not studied in existing courses.

Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Spring
Pre-Requisite(s): MA 2210 or MA 3310 or MA 3924

MEEM 3201 - introductory Fluid Mechanics & Heat Transfer
Course emphasizes internal flow and modes of heat transfer: control volume analysis of mass, momentum and energy, pipe and duct flow, dimensional analysis, steady and unsteady heat conduction, internal convection and application of boundary conditions, and simple heat exchanger design.

Credits: 4.0
Lec-Rec-Lab: (0-4-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering
Pre-Requisite(s): MEEM 2201 and MEEM 2911 and (MA 3520 or MA 3521 or MA 3530 or MA 3580)
MEEM 3400 - Mechanical System Design and Analysis
In this course, students learn mechanical synthesis and analysis methods. They use case studies to develop relationships between design and performance. They apply synthesis methods to the design of a new product.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering

Pre-Requisite(s): MEEM 2150 and MEEM 2700

MEEM 3600 - Introduction to Manufacturing
This course introduces manufacturing processes, including deformation, subtractive, additive, and molding processes. Students learn how things are made in both low and high production environments. It includes design for manufacturing considerations.

Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following College(s): School of Technology, College of Engineering

Pre-Requisite(s): MEEM 2150 and (MY 2100 or MSE 2100)

MEEM 3750 - Dynamic Systems
This course deals with the modeling, analysis and control of mixed physics systems. It covers differential equation generation for mechanical, thermal, and electrical systems, their simulation, and methods for analyzing their performance operating in both open and closed loop.

Credits: 4.0
Lec-Rec-Lab: (0-4-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering

Pre-Requisite(s): MEEM 2700 and MEEM 2911 and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

MEEM 3901 - Mechanical Engineering Practice III - Model Based Design
Students apply the engineering design process by combining engineering science with simulation tools to guide design decisions. They use energy-based models to determine design direction and design-based simulation to select and optimize components and subsystems to meet design requirements.

Credits: 2.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering

Pre-Requisite(s): MEEM 2911(C) and MEEM 2150 and MEEM 2700

MEEM 3911 - Mechanical Engineering Practice IV
Students further develop their skills to identify and solve ill-defined problems. They tackle a complex system problem by gathering evidence, proposing a solution, and iterating to optimize the solution.

Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering

Pre-Requisite(s): MEEM 3910 and EE 3010 and MEEM 3400(C) and MEEM 3600(C)

MEEM 3999 - Mechanical Engineering Undergraduate Research Project
An undergraduate research experience during the junior year in mechanical engineering. Students work directly with faculty on active research projects/grants. A report will be submitted and graded.

Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required; Must be enrolled in one of the following Major(s): Mechanical Engineering
May not be enrolled in one of the following Class(es): Freshman, Sophomore, Senior

MEEM 4150 - Intermediate Mechanics of Materials
Basic concepts of three-dimensional stress and strain. Inelastic behavior of axial members, circular shafts and symmetric beams. Deflections of indeterminate beams. Unsymmetrical bending, shear flow and shear center for open sections. Energy methods for structures made up of one-dimensional elements. Introduction to theories of failures.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MEEM 2150

MEEM 4170 - Failure of Materials in Mechanics
Identifies the modes of mechanical failure that are essential to prediction and prevention of mechanical failure. Discusses theories of failure in detail. Treats the topic of fatigue failure extensively and brittle fracture, impact and buckling failures at some length.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MEEM 3501 or MEEM 3400

MEEM 4180 - Engineering Biomechanics
Engineering mechanics applied to the human body in health and disease or injury, which includes mechanics of human biological materials and engineering design in musculo-skeletal system. Also studies on mechanics of posture (occupational biomechanics) and locomotion (sports biomechanics) using mathematical models of the human body.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MEEM 2150 and MEEM 2700

MEEM 4200 - Principles of Energy Conversion
Introduces fundamentals of energy conversion and storage. Topics include fossil and nuclear fuels, thermodynamic power cycles, solar energy, photovoltaics, and energy storage.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): MEEM 4201(C) or MEEM 3230(C) or CM 3230 or ENG 3200 or MY 3100 or MSE 3100

MEEM 4201 - Intermediate Thermodynamics
A study of the principles of thermodynamics, including fundamental concepts and introduction of the analytical treatments of the first and second laws. Topics include exergy, ideal and real gas mixtures, gas and vapor power cycles, psychrometry, combustion, and chemical equilibrium.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering, Mechanical Eng-Eng Mechanics, Engineering Mechanics

Pre-Requisite(s): MEEM 3201(C)

MEEM 4202 - Intermediate Fluid Mechanics and Heat Transfer
Intermediate fluid mechanics and heat transfer topics are covered. These include necessary considerations of: differential analysis of fluid flows based on Navier-Stokes equations, lift and drag, convective heat transfer in external flows, radiation, and simple considerations of condensation and boiling.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): MEEM 3201(C)

MEEM 4210 - Computational Fluids Engineering
Introduces computational methods used to solve fluid mechanics, and thermal transfer problems. Discusses theoretical and practical aspects. Modern computer-based tools are used to reinforce principles and introduce advanced topics in fluid mechanics, and thermal transport.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): MEEM 3201(C)

MEEM 4220 - Internal Combustion Engines I
This course teaches the operational principles of spark-ignition and compression-ignition internal combustion engines through the application of thermodynamics, fluid dynamics, and heat transfer. Course studies engine performance, efficiency, and emissions using cycle-based analysis, combustion thermochemistry, and compressible fluid flow.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Level(s): Graduate
Pre-Requisite(s): MEEM 4201(C)

MEEM 4230 - Compressible Flow/Gas Dynamics
Fundamentals of one-dimensional gas dynamics, including flow in nozzles and diffusers, normal shocks, frictional flows, and flows with heat transfer or energy release; introduction to oblique shocks.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MEEM 3201

MEEM 4235 - Wind Energy
Student will be introduced to the underlying principles of wind energy conversion, including wind turbine design, aerodynamics, construction, control, and operation. The evaluation of concurrent aspects such as wind resource turbine siting, grid integration, and environmental, and social impact will be covered.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MEEM 3201
MEEM 4240 - Combustion & Air Pollution
Introduces sources of emissions from combustion, applies thermo-chemical principles to model the formation of pollutants, and identifies impacts of air pollutants on the environment and human health. Addresses pollution regulation and societal impacts including emissions, climate change, and air quality.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following College(s): College of Engineering; May not be enrolled in one of the following Class(es): Sophomore, Junior
Pre-Requisite(s): MEEM 2200 or MEEM 2201

MEEM 4250 - Heating/Ventilation/Air Cond
Elements of heat transfer for buildings. Thermodynamic properties of moist air, human comfort and the environment, solar energy fundamentals and applications, water vapor transmission in building structures, heating and cooling load calculations.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2004-2005 academic year
Pre-Requisite(s): MEEM 3201

MEEM 4260 - Fuel Cell Technology
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following College(s): College of Engineering; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): MEEM 3201 or CM 3110

MEEM 4295 - Introduction to Propulsion Systems for Hybrid Electric Vehicles
Hybrid electric vehicle analysis will be developed and applied to examine the operation, integration, and design of powertrain components. Model based simulation and design is applied to determine vehicle performance measures in comparison to vehicle technical specifications. Power flows, losses, energy usage, and drive quality are examined over drive-cycles via application of these tools.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following College(s): College of Engineering; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): MEEM 2200 or ENG 3200 or MEEM 2201

MEEM 4296 - Experimental Studies in Hybrid Electric Vehicles
Hands-on course examines hybrid electric vehicles from an energy perspective. Topics include powertrain architecture, vehicle testing, fuel consumption, aerodynamics and rolling resistance, engines, batteries, electric machines and power electronics. Course culminates with study of system interactions with emphasis on idle reduction and regenerative braking.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following College(s): College of Engineering; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): MEEM 2200 or ENG 3200 or MEEM 2201

MEEM 4404 - Mechanism Synthesis/Dynamic Modeling
Students apply kinematic synthesis techniques in design and analysis of mechanical systems. They develop synthesis software to link to dynamic analysis packages such as ADAMS, I-DEAS, Unigraphics, etc. They investigate influences of process variation on system output and learn methods to minimize the variation influences.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): MEEM 3502(C) or MEEM 3400

MEEM 4405 - Intro to the Finite Element Method
Introduces the use of the finite element method in stress analysis and heat transfer. Emphasizes the modeling assumptions associated with different elements and uses the computer to solve many different types of stress analysis problems, including thermal stress analysis and introductory nonlinear analysis.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): MEEM 3400 and (MA 2320 or MA 2321 or MA 2330) and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

MEEM 4430 - Advanced Computer Aided Design and Manufacturing Methods
Students apply advanced solid modeling techniques to construct solid models of mechanical systems, document the design using GD&T conventions as per ASME standards, simulate the motion of the system, and learn the computer aided manufacturing and additive manufacturing techniques.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering, Mechanical Eng-Eng Mechanics, Engineering Mechanics; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): ENG 1102 and MEEM 3600

MEEM 4450 - Vehicle Dynamics
This course will develop the models and techniques needed to predict the performance of a road vehicle during drive off, braking, ride, and steering maneuvers. Topics to be covered include: acceleration and braking performance, power train architecture, vehicle handling, suspension modeling, tire models, and steering control. Matlab, Adams Car, and Amesim, will be used as computational tools.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following College(s): College of Engineering; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MEEM 3400 or EE 3281

MEEM 4610 - Advanced Machining Processes
Covers mechanics of 2-D and 3-D cutting and their extension to commonly used conventional processes such as turning, boring, milling, and drilling. Topics include force modeling, surface generation, heat transfer, tool life and dynamics.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MEEM 2500 or MEEM 3600

MEEM 4640 - Micromanufacturing Processes
Introduces the processes and equipment for fabricating Microsystems and the methods for measuring component size and system performance. Fabrication processes include microscale milling, drilling, diamond machining, and lithography. Measurement methods include interferometry and scanning electron microscopy.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): MEEM 3400(C)
MEEM 4650 - Quality Engineering
Introduction to the concepts and methods of quality and productivity improvement. Topics include principles of Shewhart, Deming, Taguchi; meaning of quality; control charts for variables, individuals, and attributes; process capability analysis; variation of assemblies; and computer-based workshops.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MA 3710 or MA 3720 or MA 2710 or MA 2720

MEEM 4655 - Production Planning
Provides current issues, such as just-in-time production and reengineering, while covering fundamental production planning topics as scheduling, job design, inventory and forecasting. Provides the fundamental essence of the firm—how its services and products are created and how they are delivered to customers.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Class(es): College of Engineering, School of Business & Economics; May not be enrolled in one of the following Class(es): freshman, sophomore, junior
Pre-Requisite(s): MEEM 3501(C) or MEEM 3400(C)

MEEM 4675 - Design of Material Handling Systems
Material handling deals with the handling operations and stock of material inside a warehouse. Emphasis is given to design, static and dynamic analysis and component sizing of lifts, cranes, continuous handling equipment (conveyors) and forklifts.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following College(s): College of Engineering; School of Business & Economics; May not be enrolled in one of the following Class(es): freshman, sophomore, junior
Pre-Requisite(s): MEEM 2150

MEEM 4685 - Env Resp Design & Manuf
Examines the impact of engineering and design/ manufacturing, decisions on the environment. Topics include sustainability; energy and material flows; risk assessment; life cycles, manufacturing process waste streams, and product design issues, including disassembly and post-use product handling and techniques for pollution prevention.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2001-2002 academic year
Restrictions: May not be enrolled in one of the following Class(es): freshman, sophomore, junior
Pre-Requisite(s): MEEM 3600

MEEM 4701 - Analytical and Experimental Modal Analysis
Combined experimental and analytical approach to mechanical vibration issues; characterization of the dynamic behavior of a structure in terms of its modal parameters; digital data acquisition and signal processing; experimental modal analysis procedures; parameter estimation for obtaining modal parameters; model validation and correlation with analytical models; structural dynamics modification.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall
Pre-Requisite(s): MEEM 3750

MEEM 4702 - Shock and Vibration
Theory and experimental techniques in vibration control, shock, structural health monitoring, condition based maintenance, dynamic measurements, test methods, and planning.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering; Mechanical Eng-Eng Mechanics, Engineering Mechanics
Pre-Requisite(s): MEEM 3911 and MEEM 3750 or MEEM 4775

MEEM 4704 - Acoustics and Noise Control
Analysis and solution of practical environmental noise problems. Fundamental concepts of sound generation and propagation, the unwanted effects of noise, assessment of sound quality, and source-path-receiver concepts in noise control. Lecture, measurement laboratory, and team project directed at solving a real noise problem under a client's sponsorship.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Pre-Requisite(s): MA 3160 and MEEM 2700

MEEM 4705 - Introduction to Robotics and Mechatronics
Cross-discipline system integration of sensors, actuators, and microprocessors to achieve high-level design requirements, including robotic systems. A variety of sensor and actuation types are introduced, from both a practical and a mathematical perspective. Embedded microprocessor applications are developed using the C programming language.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall, Spring
Pre-Requisite(s): MEEM 3750

MEEM 4707 - Autonomous Systems
The main concepts of autonomous systems will be introduced including motion control, navigation, and intelligent path planning and perception. This is a hands-on project based course. Students will have the opportunity to work with mobile robotics platforms.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering, Mechanical Eng-Eng Mechanics, Engineering Mechanics
Pre-Requisite(s): MEEM 3750 or MEEM 4700

MEEM 4720 - Space Mechanics
This course presents the vector-based solution of the two-body problem and the solution for Kepler's equations. The course will also cover basic orbit determination techniques, impulsive orbit transfer maneuvers, interplanetary trajectories, ground tracks, and rendezvous problems.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MEEM 2700

MEEM 4730 - Dynamic System Simulation
Methods for simulating dynamic systems described by ordinary differential equations using numerical integration are developed. Quantifying simulation errors for both batch and real-time, control system applications is covered along with numerical optimization strategies for model validation. MATLAB and Simulink are used to illustrate key concepts.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MEEM 3750

MEEM 4775 - Analysis & Design of Feedback Control Systems
This course covers topics of control systems design. Course includes a review of modeling of dynamical systems, stability, and root locus design. Also covers control systems design in the frequency domain, fundamentals of digital control and nonlinear systems.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering, Mechanical Eng-Eng Mechanics, Engineering Mechanics
Pre-Requisite(s): MEEM 3750

MEEM 4810 - Introduction to Aerospace Engineering
Introductory course on topics relevant to aerospace engineering and science. Topics include history, properties of the atmosphere, the solar system, atmospheric and space vehicles, mission design, and vehicle design and performance.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): (MEEM 2150 or ENG 2120) and (MEEM 3201 or ENG 3200)

MEEM 4820 - Introduction to Aerospace Propulsion
Principles of jet propulsion, cycle analysis and component analysis (non-rotating components, compressors, turbines). Principles of rocket propulsion, chemical rockets, propellants, turbomachinery, electrical propulsion. Review of thermodynamics for fluid flow, one-dimensional gas dynamics, and boundary layer theory included.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MEEM 4230(C)

MEEM 4850 - Naval Systems and Platforms
Concepts of semi- and fully-autonomous naval and marine sensors and sensing platforms demonstrated through classroom learning and hands-on experiences. Laboratories will focus on operating sensors and sensor packages, in oceanographic and other applications.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Pre-Requisite(s): MEEM 3201 or ENG 3200 or MY 3110 or MSE 3110
MEEM 4901 - Senior Capstone Design I
Students work in teams on "open-ended" engineering capstone design projects - most with industrial sponsors - developing original and creative solutions to real engineering problems.

Credits: 2.0
Lec-Rec-Lab: (0-0-8)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering
Pre-Requisite(s): (MEEM 3000(C) and MEEM 3502 and MEEM 3900) or (MEEM 3201(C) and MEEM 3750(C) and MEEM 3911 and MA 3710)

MEEM 4911 - Senior Capstone Design II
Design projects started in MEEM4901 are completed and evaluated using computer-aided engineering methods, physical models, and/or prototypes as appropriate.

Credits: 2.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering
Pre-Requisite(s): (MEEM 4901 and MEEM 3000(C) and MEEM 3502(C) and MEEM 3900) or (MEEM 3201 and MEEM 3750 and MEEM 4901)

MEEM 4990 - Special Topics in Mech Eng
Problems in mechanical engineering, engineering mechanics, manufacturing, or industrial engineering that are not covered in regular courses.

Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore

MEEM 4999 - Mechanical Engineering Senior Research Thesis
An undergraduate research experience during the senior year in mechanical engineering. Students begin work on an active research project grant with faculty or continue work from the previous year. A thesis will be published in the department and archived.

Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of department required; Must be enrolled in one of the following Major(s): Mechanical Eng-Eng Mechanics, Mechanical Engineering; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

**Mechanical Engineering Technology**

MET 1020 - Technology Computer Applications
Introductory course intended to develop knowledge of computer modeling techniques such as solid modeling, spreadsheet, word processing, presentation, and project time line software utilized throughout the technology curriculum.

Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall

MET 1540 - Materials Science
Introduction to the fundamentals of materials. Introduces mechanical properties, phase diagrams, thermal processing, alloying, and corrosion. Examines material selection with regard to design considerations.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): CH 1000 or (CH 1150 and CH 1151)

MET 2120 - Statics and Strength of Materials
Statics includes the study of forces, analysis of simple structures, equilibrium, moment of inertia, and friction. Materials considers stress and strain under axial, torsional, and bending loads. Laboratory exercises include materials testing and problem solving.

Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall
Pre-Requisite(s): (MA 1160(C) or MA 1161(C)) and (PH 1140 or PH 1110)

MET 2130 - Dynamics
Particle and rigid plane body kinematics and kinetics covers inertia force, work-energy-power and impulse-momentum methods. Emphasizes development of student skills in problem definition and problem solving.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MET 2120 or ENG 2120

MET 2153 - Machine Tool Fundamentals and Applications
A study of basic machining processes: including setup and operation of lathes, milling machines, drill presses, grinders and saws. Students are exposed to fundamental machining processes, nomenclature and machine operation with an overall focus on safety and quality control.

Credits: 2.0
Lec-Rec-Lab: (0-1-3)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering Tech

MET 2400 - Practical Applications in Parametric Modeling
Intermediate course intended to expand the student's knowledge of computer modeling techniques, introducing advanced assemblies and GD&T concepts. Investigates advanced concepts available to the designer.

Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Mechanical Engineering Tech
Pre-Requisite(s): MET 1020 or TE 1020

MET 3242 - Machine Design I
An introduction to mechanical design for technology students. The coursework applies principles of statics, dynamics and mechanics of materials to the design of simple mechanical components and systems.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MA 2160 and MET 2130

MET 3400 - Applied Fluid Mechanics
This course provides an introduction to the principles of fluid mechanics and their application to natural and engineering problems. Students are expected to have a good understanding of statics and dynamics. Development of engineering problem-solving skills will be emphasized.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MET 2130

MET 3451 - Machine Design II
This course extends the study of mechanical design begun in MET3242. Machine Design I and looks at more complex components and systems. Design projects are given special emphasis.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MET 3242

MET 3500 - Manufacturing Processes
Focuses on practical aspects of design and manufacturing. Covers fundamentals of manufacturing processes and includes a weekly lab to provide hands-on experience with manufacturing issues that influence component design.

Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall
Pre-Requisite(s): (MET 1020 or ENG 1102) and (MET 1540 or MY 2100 or MSE 2100)

MET 3700 - Applied Thermodynamics
Engineering thermodynamics principles including work, heat and temperature, pure substances, closed and open systems, first and second laws of thermodynamics, and power and refrigeration cycles.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MET 3250 or MET 3400

MET 4210 - Applied Quality Techniques
Basic knowledge required to improve processes in the workplace. Includes the design of simple experiments, statistical process control, lean methodologies, and corrective and preventative action.

Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): MA 2720(C) or MA 3710(C)

MET 4300 - Applied Heat Transfer
Heat transfer principles including conduction, convection and radiation heat transfer mechanisms. Practical applications include thermal insulation, heat sink and heat exchanger design.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MET 3600 or (MET 3700 and MET 4360(C)) or MEEM 2200 or MEEM 2201
MET 4350 - Principles and Application of Heating, Ventilating, and Air Conditioning Systems
This course is designed to provide an introduction to heating, ventilating, and air conditioning systems that combines design principles with real-world applications. Students will conduct heating and cooling load calculations, learn psychrometrics, and have the opportunity to work on a realistic design project. Credits: 3.0
Lec-Rec-Lab: (0-2-1)
Semesters Offered: Spring
Pre-Requisite(s): MET 4300

MET 4355 - Industrial Systems Simulation
Creating simulation models of various industrial systems in order to analyze and experiment with characteristics of real-life systems for the purpose of engineering process improvement and production design. Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring

MET 4360 - Thermal-Fluids Laboratory
This course provides hands-on experience with selected thermal-fluid laboratory experiments. Site/plant visits will be included for exposure to some of the practical aspects of the thermal-fluids area. Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall
Pre-Requisite(s): MET 3400 and MET 3700 and MET 4300(C)

MET 4377 - Applied Fluid Power
An introduction to fluid power components and systems. The course includes component selection, circuit design, electrical interfaces, and system troubleshooting and maintenance. A laboratory exposes students to system hardware and circuit simulation techniques for mobile and industrial applications. Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Pre-Requisite(s): MET 3250 or (MET 3400 and MET 4360(C))

MET 4390 - Internal Combustion Engines
An introduction to the basic principles and applications of internal combustion engines. The course covers design, development and testing of engine components and systems. A laboratory exposes students to current industry methods. Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Pre-Requisite(s): MET 3600 or MET 4300 or (MET 3700 and MET 4360(C))

MET 4460 - Product Design and Development
A treatment of design and development issues such as design for manufacturing, prototyping, industrial design, and customer needs. Presents integrated methodologies that examine marketing, manufacturing, and cross-functional teams. Includes concurrent engineering and projects utilizing CAD systems. Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MET 3451(C)

MET 4510 - Lean Manufacturing and Production Planning
Modern methods for the systematic planning and control of operations and an understanding of lean manufacturing concepts. Focus is on reduced lead times and elimination of waste. Not open to students with credit in MEEM 4855 or OSM3000. Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MET 3451(C)

MET 4550 - Computer Aided Manufacturing
Course is designed to apply techniques used in parametric modeling (CAD) and convert this information to all phases of production planning, machining, scheduling and quality control. Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MET 2153 and MET 2400

MET 4575 - Senior Project I
Research and beginning design projects using computer-aided engineering methods, physical models, and/or prototypes. Evaluation and design optimization methods for efficient and cost-effective designs. Credits: 2.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): MET 4460

MET 4585 - Facilities Layout and Safety Design
Examines the optimization concepts and safety topics necessary to design a low risk, high efficiency manufacturing facility layout. The focus will be on quantitative tools, flow analysis techniques, hazard recognition and resource selection. Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior

MET 4660 - CAE and FEA Methods
Comprehensive use of both computer derived solutions and experimental validation of analytical and finite element solutions using methods such as strain gage testing. Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MET 2400 and MET 3242(C)

MET 4670 - Senior Project II
Completion and evaluation of design projects using computer-aided engineering methods, physical models, and/or prototypes. Evaluation and design optimization methods for efficient and cost-effective designs. Credits: 2.0
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): MET 4575

MET 4780 - Advanced Manufacturing
An introduction to advanced manufacturing processes, both traditional and nontraditional. Study of both theory and practice will be tied to laboratory experiments utilizing a spectrum of unique materials and methods. Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): MEEM 2500 or MET 3500

MET 4996 - Special Topics in Mechanical Engineering Technology
Selected additional topics of interest in Mechanical Engineering Technology based on student and faculty demand and interest. May be a tutorial, seminar, workshop, project, or class study. Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Mechanical Engineering Tech; Must be enrolled in one of the following Class(es): Senior

MET 4997 - Independent Study in Mechanical Engineering Technology
Independent study of an approved topic under the guidance of a Mechanical Engineering Technology faculty member. May be either an academic, design, or research problem/project. Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Mechanical Engineering Tech; Must be enrolled in one of the following Class(es): Senior

MET 4998 - Undergraduate Research in Mechanical Engineering Technology
An undergraduate research experience in Mechanical Engineering Technology. Under the guidance of a Mechanical Engineering Technology faculty member, students work on a selected/approved research problem or work directly with faculty on active research projects/grants. May require more than one semester to complete. Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Mechanical Engineering Tech; Must be enrolled in one of the following Class(es): Senior

MET 4999 - Professional Practice Seminar
Course designed to review and evaluate the program objectives linked with industrial partners and accreditation body. Focus given to preparing the student to take the certification exam. Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Class(es): Senior

Undergraduate Course Descriptions, 2018-19, Page 75 of 103
Management

MGT 2000 - Team Dynamics and Decision Making
Develops individual and group problem-solving skills using active, hands-on learning. Emphasizes problem identification and problem solution under conditions of ambiguity and uncertainty. Stresses creativity, interpersonal skills and skill assessment, communication, group process and teamwork, and action planning.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman

MGT 3000 - Organizational Behavior
Covers concepts of human relations and organizational behavior through the study of people's behavior at work. Develop understanding, attitudes, and skills leading to increased personal effectiveness.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman

MGT 3000 - Organizational Behavior
Covers concepts of human relations and organizational behavior through the study of people's behavior at work. Develop understanding, attitudes, and skills leading to increased personal effectiveness.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman

MGT 3100 - Leadership Development
Assesses students' current knowledge, abilities and values relevant to leadership and guides students in developing and implementing plans for new leadership abilities.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman

MGT 3650 - Intellectual Property Management
Covers principles of intellectual property law, addressing managerial and policy issues in copyright, trademark, trade secret, and patents. Readings and discussions also cover how these property and legal systems impact the balance between property exclusivity, technological innovation and public access.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requirement(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

MGT 3800 - Entrepreneurship
Covers management issues associated with establishing a successful new enterprises as a small businesses or part of an existing firm. Emphasizes learning through creation of a business plan as well as case studies that develop an understanding of opportunity recognition, entrepreneurial teams, reward systems, financing alternatives, family ventures, ethical and legal contractual considerations, and resource needs.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

MGT 4000 - Strategic Management
A capstone course focusing on managing from a strategic perspective for gaining advantages in competitive and dynamic environments, emphasizing understanding of industry, business models, growth strategies, and managing business portfolios. Integrates knowledge from finance, marketing, and organizational behavior.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following College(s): School of Business & Economics; Must be enrolled in one of the following Class(es): Senior
Pre-Requirement(s): MIS 2000 and FIN 3000 and OSM 3000 and MGT 3000 and MKT 3000 and BUS 2300

MGT 4100 - International Management
Addresses the complexities and challenges faced by companies operating in an increasingly globalized world. Focuses on political, legal, ethical, cultural, economic issues, and on the entry, growth and knowledge management strategies of developed and developing country firms.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requirement(s): MGT 3000 and EC 3100(C)

MGT 4200 - Entrepreneurial Management
Draws upon the fundamental concepts of entrepreneurship covered in MGT3800 (Entrepreneurship) and enhances the understanding of these concepts from a strategic and entrepreneurial management point of view.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requirement(s): MGT 3800

MGT 4500 - Managing Change in Organizations
Studies organizational theory with an emphasis on managing change in organizations. Examines forces for change in the external environment, methods for managing change (design and implementation), the impact of change on people, and leaders as agents of change. Case studies and student projects prepare the student to manage change in organizations.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requirement(s): MGT 3000

MGT 4600 - Management of Technology and Innovation
Introduces disruptive innovation concepts and provides occasions for their application to timely and relevant cases. Provides an understanding of technology management and innovation processes as they occur inside and outside of organizations.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requirement(s): MGT 3000

MGT 4990 - Special Topics in Management
Examines additional management topics and issues in greater depth. A single offering of this course will concentrate on one or two topics which vary.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required
Pre-Requirement(s): MGT 3000

Management Information Systems

MIS 2000 - IS/IT Management
Focuses on the theory and application of the information-systems discipline within an organizational context, and identifies the roles of management, users, and information systems professionals. Covers the use of information systems and implications for decision support to improve business processes, and addresses the ethical, legal, and social issues of IT.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requirement(s): BUS 1100 or CS 1121 or CS 1131 or ENG 1101 or (ENG 1001 and ENG 1100) or SAT 1200

MIS 2100 - Introduction to Business Programming
Develops business problem solving skills through the application of a commonly used high-level business programming language. Topics include the nature of the business programming environment, fundamentals of the language (e.g., programming constructs, data manipulation, manipulation of simple data structures), structured programming concepts, desirable programming practices and design, debugging and testing techniques.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
MIS 2200 - Web Programming
Covers technologies, tools, and environments related to the development of web-enabled business solutions. Topics include the development environment for web-based solutions, key development technologies, desirable development practices, and design, programming, debugging and testing methods.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): MIS 2100 or CS 1121 or CS 1131

MIS 3000 - Business Process Analysis
Studies business decision management discipline using business rules, process models (e.g. flowcharts, unified modeling language, swim lanes), and information systems to improve efficiency and effectiveness. Emphasis on industry standards and business process management used to increase productivity.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): MIS 2000

MIS 3100 - Business Database Management
Emphasizes database principles that are constant across different database software products through concrete examples using a relational database management system. Provides a well-rounded business perspective about developing, utilizing, and managing organizational databases.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): MIS 2000(C)

MIS 3200 - Systems Analysis and Design
Provides an understanding of the IS development and modification process and the evaluation choices of a system development methodology. Emphasizes effective communication with users and team members and others associated with the development and maintenance of the information system. Stresses analysis and logical design of departmental-level information system.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MIS 2000(C)

MIS 3400 - Business Intelligence
Focuses on generation and interpretation of business analytics relative to organizational decision making. Includes core skills necessary for constructing data retrieval queries in a relational database environment.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): MIS 2000 and (MIS 3100 or CS 3425)

MIS 3500 - User-Centered Design
Studies user-centered design in development of effective interface solutions for business needs. Content may include input/output devices, user modeling, help and documentation, social issues, and usability evaluation. Emphasis on how interface design addresses human capabilities and capacities.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): MIS 2000

MIS 4000 - Advanced Information Systems
Focuses on understanding IT for competitive advantage and as an agent of transformation. Topics include managing IT infrastructure and architecture, facilitating information distribution throughout the enterprise, conducting case analyses to develop a framework for innovative Enterprise Systems to be used for sustainable competitive advantage.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): MIS 3100 and MIS 3200

MIS 4100 - Information Systems Projects
MIS capstone course. Previous completion of required MIS coursework expected. Applies IS practices and artifacts as solutions to business problems using project teams and faculty project manager supervision. Emphasizes the latter portion of the systems development life cycle project management within an IS context.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): MIS 2100 and MIS 3100 and MIS 3200

MIS 4200 - Management of Cyber Security
Review of information systems security concepts and industry best practices. Subject matter is organized to provide students a foundation to sit for the Certified Systems Security Professional (CISSP) exam after completion.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): MIS 2000 or CS 1111 or CS 1121 or CS 1131

MIS 4990 - Special Topics in Management Information Systems
Examines current IS/IT topics and issues in greater depth from a managerial perspective. A single offering of this course will concentrate on one or two topics, which will vary.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Pre-Requisite(s): MIS 2000

Marketing
MKT 3000 - Principles of Marketing
Emphasizes decisions made in developing both strategic and tactical marketing plans. Uses computer simulations, experiential learning assignments, and marketing plan development to demonstrate principles of market segmentation, product development, pricing, distribution planning, and promotion.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer

MKT 3200 - Consumer Behavior
Introduces students to the general concepts, processes, and variables pertinent to consumers' decision making and lifestyle choices. Discussions will be based on a variety of disciplines: psychology, sociology, economics, and anthropology.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): MKT 3000

MKT 3400 - Integrated Marketing Communications
Discusses how a variety of marketing communication methods, such as advertising, public relations, sales promotion, point-of-purchase, and direct marketing are developed, implemented, and evaluated in an integrative manner.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): BA 3800 or MKT 3000

MKT 3600 - Marketing Research
Focuses on the application of the marketing research in marketing decision-making. Topics include survey methodology, research design, statistical analysis of data, and report writing.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): (MA 2710 or MA 2720 or MA 3710 or BUS 2100) and MKT 3000

MKT 4100 - Sales and Sales Management
Looks at the role of the selling function as an integral part of the total marketing effort. Examines the administrative functions of sales management, the dynamics of the buying-selling process, and sales strategies and tactics.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): MKT 3000

MKT 4200 - Business to Business Marketing
Emphasis is on the firm's behavior and decision-making. Topics include the foundation of business value creation, business marketing programs development, and inter-firm relationship management.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Pre-Requisite(s): MKT 3000

MKT 4300 - Global Marketing
Discusses the critical elements of international marketing strategy: socio-politico-economic environment, global consumer culture, entry strategy, and global marketing mix. Utilizes cases and examples in order for students to better understand the globalized marketplace.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): MKT 3000
Materials Science & Engineering

MSE 2100 - Introduction to Materials Science and Engineering
Introduction to the structure, processing, properties, and performance of engineering materials, including metals, polymers, glasses, ceramics, and composites. Presents case studies covering selection of materials, component design, and analysis of component failures.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring
Pre-Requisite(s): CH 1112 or CH 1122 or (CH 1150 and CH 1151) or (CH 1160 and CH 1161)

MSE 2110 - Introduction to Materials Science and Engineering II
Course is designed to address core competencies in the materials discipline. Materials processing methods are used as a vehicle to master concepts such as crystallography, imperfections, phase diagrams, microstructure, and development of mathematical skills and introduction to computational tools.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall, Spring
Pre-Requisite(s): CH 1112 or CH 1122 or (CH 1150 and CH 1151) or (CH 1160 and CH 1161)

MSE 3100 - Materials Processing I
Classical chemical thermodynamics as applied to single and multicomponent materials systems. Topics include heat and mass balance, enthalpy, entropy, free energy, chemical reactions and equilibria, mass action, solution thermodynamics, phase diagram, stability/Pourbaix diagrams and electrochemistry.
Credits: 4.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (MY 2100 or MSE 2100) and (ENG 1100 or ENG 1101)

MSE 3110 - Materials Processing II
A continuation of Materials Processing I, which introduces the fundamental theories and equations governing transport phenomena. Topics include fluid flow, heat flow, diffusion, and chemical kinetics. Discusses the relationships between these subjects and the thermodynamic concepts covered in Materials Processing I.
Credits: 4.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Spring
Pre-Requisite(s): (MY 2110 or MSE 2110) and (MY 3100 or MSE 3100) and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

MSE 3120 - Materials Characterization I
Fundamentals of microstructural and chemical characterization of materials. Examines the physical principles controlling the various basic characterization techniques. Topics include crystallography, optics, optical and electron microscopy, and diffraction. Laboratory focuses on proper operational principles of characterization equipment, which includes optical and other microscopy methods and various diffraction techniques.
Credits: 4.0
Lec-Rec-Lab: (2-1-3)
Semesters Offered: Spring
Pre-Requisite(s): (MY 2100 or MSE 2100) and (MY 2110 or MSE 2110)

MSE 3130 - Materials Characterization II
Fundamentals and application of instrumental analysis in characterization of bulk materials and powders, and their internal phases and external surfaces. Demonstrates spectroscopic and surface analysis techniques in identification of ceramics and polymers and their phases. Discusses the limitations and capabilities of elemental, chemical and structural characterization methods combined with statistical analysis of data.
Credits: 4.0
Lec-Rec-Lab: (2-1-3)
Semesters Offered: Fall
Pre-Requisite(s): MY 2100 or MSE 2100

MSE 3140 - Design of Microstructure
Relates thermodynamic and kinetic principles to phase transformations and microstructural evolution. Topics include nucleation, solidification, precipitation, recrystallization, grain growth, and sintering. Applications of these concepts (e.g., heat treatment of steel, casting, powder processing, etc.) are presented to provide a bridge between phase transformation theory and industrial/laboratory practice.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): (MY 2110 or MSE 2110) and (MY 3100 or MSE 3100) and (MY 3200(C) or MSE 3120(C))

MSE 3150 - Introduction to Semiconductor Materials & Devices
An introduction to materials science and engineering of semiconductors. Topics include: semiconductor material electronic, thermal, and optical properties; how these properties are modified, how elementary devices made from these materials operate, and how devices function in electrical circuits depends on material selection and processing.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (PH 2200 and MA 2160) or (MY 2100 or MSE 2100) and (MY 2110 or MSE 2110) and (MY 3100 or MSE 3100) and (MY 3200(C) or MSE 3120(C)) and (MY 3300(C) or MSE 3140(C) and ENG 1102)

MSE 4100 - Mechanical Behavior of Materials
An introduction to the deformation and fracture behavior of materials. Topics include multiaxial stress and strain, elastic and plastic deformation, hardening mechanisms, viscoelasticity, fracture, fatigue, creep, and microstructure/property relationships.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer
Pre-Requisite(s): (MY 2110 or MSE 2110) and (MY 2100 or MSE 2100) and (MEEM 2150 or ENG 2120)

MSE 4110 - Introduction to Polymer Engineering
Introductory study of polymeric materials and polymer engineering. Basics in polymer science including molecular characteristics, synthesis, structure and properties of polymers, with strong emphasis on thermodynamics of polymers. Various processing techniques and mechanical/structural applications of polymers.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (MY 2100 or MSE 2100) and CH 1160

MSE 4120 - Material and Process Selection in Design
The principles of materials selection for engineering design. Topics include selection based on strength, stiffness, thermal properties, high temperature behavior, corrosion resistance, formability, joinability, manufacturability, recyclability, etc. Considers ethics and economics. Presents numerous case studies and examples.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): MY 2100 or MSE 2100

MSE 4130 - Materials Science & Engineering Senior Design Project I
Conducted in teams of students working with industrial partners. Open to all engineering majors interested in interdisciplinary senior design projects. Non-MSE majors must be senior project ready as defined by their major program and obtain permission of the MSE department.
Credits: 2.0
Lec-Rec-Lab: (0-0-0)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): (MY 3100 or MSE 3110) and (MY 3200 or MSE 3210) and (MY 3210 or MSE 3130) and (MY 3300 or MSE 3310) and (MY 4940 or MSE 4910)
MSE 4131 - Capstone Professional Skills 1
This course will include practical application of contemporary engineering design methodology within the structure-processing-properties paradigm for material design project management, experimental design, written and oral communication.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Materials Science and Engrgy
Co-Requireis(s): ENT 4950
Pre-Requisite(s): MSE 3190 or MY 4940

MSE 4140 - Materials Science & Engineering Senior Design Project II
Senior design project conducted in teams of students working with an industrial partner. Open to all engineering majors interested in interdisciplinary senior design projects. Senior project ready as defined by major substitutes for prerequisites.
Credits: 2.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): MY 4920 or MSE 4130

MSE 4141 - Capstone Professional Skills 2
This course includes practical application of contemporary engineering design methodology within the structure-processing-properties paradigm for material design, project management, experimental design, written and oral communication.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Materials Science and Engrgy
Co-Requireis(s): ENT 4960
Pre-Requisite(s): MSE 4131

MSE 4235 - Fundamentals of Corrosion
Basic mechanisms of electrochemical processes and corrosion.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): CH 1150 and CH 1151

MSE 4240 - Introduction to MEMS
Fundamentals of micromachining and microfabrication techniques, including planar thin-film process technologies, photolithographic techniques, deposition and etching techniques, and the other technologies that are central to MEMS fabrication.
Credits: 4.0
Lec-Rec-Lab: (3-1-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

MSE 4292 - Light and Photonic Materials
Material properties controlling light wave propagation in optical crystals and optical wave guides, Photonic crystals and photonic devices based on electrical, magnetic, and strain effects.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Physics, Applied Physics, Electrical Engineering, Materials Science and Engrgy; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): PH 2200 or EE 2190 or EE 3140

MSE 4310 - Principles of Metal Casting
Principles of metal casting, including melting practice, casting design, mold design, heat transfer and solidification, fluid flow and gating design. Introduction to computer simulation techniques for mold filling, solidification, and development of residual stress. Structure-property relations in cast metals. Recycling and environmental issues of the cast metals industry.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): MY 2100 or MSE 2100

MSE 4320 - Corrosion and Environmental Effects
Mechanisms of corrosion processes, electrochemical and oxidation kinetics, and fundamentals of corrosion engineering.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): MY 2100 or MSE 2100

MSE 4330 - Advanced Physical Metallurgy
Examines what exactly makes a particular industrial alloy useful. From the light metals (aluminum, magnesium and titanium) to the heavy weights (nickel and high alloy steels), this course examines the structure, properties, and processing of metals into industrially useful materials. Covers internationally accepted alloy designations, heat treatment standards, modification and processing.
Credits: 3.0
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): (MY 2100 or MSE 2100) and (MY 3300 or MSE 3140)

MSE 4410 - Science of Ceramic Materials
The structure, defect chemistry, and properties of crystalline and amorphous ceramics. Utilization of these materials in a variety of applications such as electrolytes in fuel cells and as bioceramics are examined.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): MY 2100 or MSE 2100

MSE 4430 - Composite Materials
Mechanistic aspects of property development in metal, ceramic, and polymeric composites. The role of composite architecture, processing, and microstructure on properties.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): MY 2100 or MSE 2100

MSE 4520 - Materials Forensics
Probes fundamental physical principles important to various characterization techniques used to understand crystal structure, microstructure, and substructure in materials. Application of x-ray, electrons, and light to unravel the structural mystery of materials and apply techniques to material failure analysis.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Pre-Requisite(s): (MY 2100 or MSE 2100) and PH 2200 and (MA 3521 or MA 3520 or MA 3520/MAE 3520) and MEEM 2150

MSE 4525 - Introduction to Scanning Electron Microscopy
Introduction to scanning electron microscope (SEM) theory and application. Topics will include electron beam and image formation, beam-specimen interactions, and x-ray microanalysis. Course material will be of interest to biologists, chemists, and engineers. Completion of MY 4201 is required for independent use of the equipment.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

MSE 4530 - Scanning Electron Microscopy and X-ray Microanalysis
Topics include electron beam and image formation, beam-specimen interactions, and x-ray microanalysis. Course content is relevant to students of the physical sciences, engineering, and related disciplines. Includes a laboratory experience that provides hands-on practical training sufficient to enable independent use of the SEM.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior

MSE 4540 - Computational Materials Science: Theory, Modeling, Simulation, and Practice
Theories of materials science from first principles to constitutive laws. Materials modeling and computer simulation at multiple length and time scales. Laboratory practice of various computational methods.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Lec-Rec-Lab: Hydrometallurgy/Pyrometallurgy
Extraction and refining of metals and industrial chemicals from natural and recycled materials. Includes solution-chemistry processes (hydrometallurgy) and thermochemical processes (pyrometallurgy).
Credits: 4.0
Lec-Rec-Lab: 3-1-0
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): CH 1122 or (CH 1160 and CH 1161)

Lec-Rec-Lab: Environmental Engineering for Materials Processing Industries
Assessment and analysis of environmental impacts from materials processing industries. Regulations, permits, and industrial practices for monitoring and solving air, water, and solid environmental issues. Pollution prevention. Life cycle analysis. Material flow analysis.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

Lec-Rec-Lab: Distributed Additive Manufacturing Using Open-Source 3-D Printing
This course provides an overview of open-source hardware in theory and practice for an introduction to distributed additive manufacturing using open-source 3-D printing. Each student will build a customized RepRap and will learn all hardware and software for maintaining it.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following College(s): College of Engineering; Must be enrolled in one of the following Class(es): Junior, Senior

Lec-Rec-Lab: Special Topics - Materials
Special topics in materials science and engineering.
Credits: variable to 4.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

Lec-Rec-Lab: Undergraduate Research
Undergraduate research in materials science and engineering. Independent research conducted under the guidance of a faculty member.
Credits: variable to 6.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

Lec-Rec-Lab: Operations and Supply Chain Management
Fundamental principles of operations and supply chain management; includes strategic importance and relevant interrelated concepts and tools in product/process design, work systems, forecasting, inventory and materials management, just-in-time, scheduling, and capacity management.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (MA 1135 or MA 1160 or MA 1161) and (MA 2710 or MA 2720 or MA 3710 or MA 3720 or EET 2010 or BUS 2100)

Lec-Rec-Lab: Introduction to Supply Chain Management
An introduction to supply chain management to gain a perspective on integration and coordination issues. Topics include strategy, network design, facility design, sourcing, logistics, forecasting, inventory, relationship management, and global and sustainable supply chain management.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): OSM 3000(C)

Lec-Rec-Lab: Procurement and Supply Management
Addresses processes that facilitate the management of value added transactions and relationships between supplier and customer organizations. The course examines the management of the business purchasing function, including supplier selection and development, cost management, performance measures, buyer-supplier relationships, and negotiation.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

Lec-Rec-Lab: Project Management
The various stages in a project life cycle will be covered and include initiation, planning, execution, and closeout. Basic tools such as the Project Charter, Network Diagrams Gantt, and budgeting will be covered. Basics of MS Project are included.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): BUS 2100 or CEE 3710 or MA 2720 or MA 3710 or EE 3180 or CE 2100

Lec-Rec-Lab: Advanced Project Management
A project oriented business development class focused on real-life and advanced applications of project management techniques. Students participate in a competition, prepare for the PMI CAPM exam, and may sit for the exam to obtain certification.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Spring
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): OSM 3200 or ENG 4300 or OSM 4300

Lec-Rec-Lab: Six Sigma Fundamentals
Course is framed in context of six sigma methodology. Topics include principles of Shewhart, Deming, Taguchi; meaning of quality; control charts for variables, individuals, and attributes; process capability analysis; variation of assemblies; and computer-based workshops.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): MA 2710 or MA 2720 or MA 3710 or MA 3720 or BUS 2100 or CE 3710 or CEE 3710

Lec-Rec-Lab: Logistics and Transportation Management
Focusses on the transportation and distribution services that support demand fulfillment from the receipt of customer orders to order fulfillment. Topics include customer service, order fulfillment, inventory, transportation costs and modes, facility design and operation, carrier selection, and negotiation.
Credits: 3.0
Lec-Rec-Lab: 3-0-0
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): (MA 2710 or MA 2720 or MA 3710 or MA 3720 or BUS 2100 or CE 3710 or CEE 3710) and (MA 1135 or MA 1160 or MA 1161)

Lec-Rec-Lab: Special Topics in Supply Chain and Operations Management
Examines additional supply chain and/or operations management topics and issues in greater depth. A single offering of this course will concentrate on one or two topics, which vary.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): OSM 3000

Lec-Rec-Lab: Flag Football
Fundamental skills and rules will be learned for co-recreational play of flag football. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer

Lec-Rec-Lab: Bait and Fly Casting
Bait and fly casting skills. Each student must have a valid current year Michigan fishing license. Trout stamp is optional. Equipment is available if needed. Requires some additional hours outside of class. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: On Demand

Lec-Rec-Lab: Ultimate Frisbee
Fundamental skills, rules, and play of ultimate frisbee. The class is physically strenuous. Frisbees are provided. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer
PE 0105 - Beginning Bowling I
Fundamental skills, rules, and scoring of bowling. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0106 - Beginning Golf
Rules, terminology, and etiquette of golf and the individual skills of grip, stance, and swing. Equipment is supplied. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer

PE 0107 - Floor Hockey
Individual skills, team techniques, rules and strategies of floor hockey. Hockey gloves or winter gloves are highly recommended. Sticks and goalie equipment are provided. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0108 - Broomball
Students will learn the rules, strategy, and safety needed to compete in broomball. Offensive and defensive zone coverages and individual skills are stressed. Team play with officials. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0109 - Aikido
Aikido is a specific martial arts training for physical and character development. Physically strenuous. Students should wear loose sweatsuits (with long sleeves) or white martial arts uniform. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0113 - Disc Golf
Fundamental skills, rules and play of disc golf. Students will learn recreational play and organized tournament play (various formats). Students can bring their own disc (or discs); some are provided. The class meets at MTU's Disc Golf Course on Sharon Avenue by the Advanced Technology Development Complex. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0114 - Frisbockey
Fundamental skills, rules and play of frisbockey will be taught. Class is physically strenuous. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: On Demand

PE 0115 - Beginning Swimming
Non-swimmers learn to have no fear of water, to float, and to swim the four fundamental strokes. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

PE 0116 - Beginning Basketball
Theory, organization, and offensive and defensive skills of basketball. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

PE 0117 - Beginning Hockey
Individual skills, team techniques, rules, and strategies. Requires basic hockey equipment of helmet with face mask, shoulder pads, hockey pants, shin pads, elbow pads, hockey gloves, skates, supporter, jersey, hockey socks, hockey stick. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0118 - Beginning Weight Training
Training methods for physical development using stationary and free weights. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

PE 0119 - Beginning Fitness Training
This course is designed to introduce students to a variety of activities to improve their fitness and well being. Activities will include using aerobic machines and strength training. Students will learn the basic concepts of fitness and how to safely and properly use the fitness center equipment.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0120 - Beginning Alpine Skiing (Downhill)
Beginning skills of alpine skiing techniques taught, evaluated, and recommendations made for improvement. Students with skills above beginner level cannot take this class. Students must provide their own transportation to Mont Ripley. It is recommended that students provide their own equipment. Daily rental and "rent for the season" equipment available at Mont Ripley.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0121 - Beginning Snowboarding
Beginning skills of snowboarding techniques taught, evaluated, and recommendations made for improvement. Students must be a beginner or have never snowboarded to this class. Students with skills above beginner level cannot take this class. Students must provide their own transportation to Mont Ripley. It is recommended that students provide their own equipment. Daily rental and "rent for the season" equipment available at Mont Ripley. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0122 - Softball
Fundamentals of throwing, fielding, and hitting a softball. Bats, balls, and bases are provided. Each student should bring a glove. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0123 - Telemark Skiing
The beginning skills of Telemark skiing techniques will be taught, evaluated and recommendations made for improvement. Students must provide own transportation and Telemark ski equipment. A limited amount of rentals are available.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer

PE 0125 - Sand Volleyball
Sand volleyball rules, basic fundamentals and team play. Passing, setting, attacking, serving, blocking, round robin, 2 vs. 2, and 4 vs. 4 tournaments, 6 vs. 6 system and drills to improve one's overall play. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer

PE 0126 - Beginning Volleyball
Fundamental skills, rules interpretation, strategy, and conduct of tournament play. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0130 - Water Aerobics
Improvement of fitness and body measurement through water exercise. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall

PE 0132 - Beginning Soccer
Fundamental skills, techniques, terminology, and rules of soccer. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall

PE 0135 - Beginning Cross Country Skiing
Develop the skills for touring/recreational cross-country skiing. Own equipment is recommended; rental equipment available. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer

PE 0137 - Table Tennis
Fundamental skills of table tennis will be taught. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

Undergraduate Course Descriptions, 2018-19, Page 81 of 103
PE 0138 - Beginning Racquetball/Squash
Fundamentals, rules, and basic strategies of racquetball/squash. Gives students opportunity to play singles, cutthroat, and doubles. Racquets, balls, and eyewear provided. Recommend use of personal racquet. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0139 - Beginning Badminton
Fundamentals, rules, and scoring of badminton. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0140 - Beginning Tennis
Fundamentals of the game, rules, and etiquette of tennis. Meets at Gates Tennis Center. Non-marking court shoes must be worn. Tennis balls and racquets provided. Recommend use of personal racquet. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0145 - Beginning Rifle
Using precision air rifles, beginners develop an awareness of firearms safety and marksmanship. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0146 - Beginning Billiards
Introduction to the etiquette, rules, and recreational value of pocket billiards. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0148 - Beginning Skating
Fundamental skills of ice skating, including proper stroking forward and backward, edges, crossovers, stops, and other basic skills. Requires own skates and helmets.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0150 - Outdoor Lifetime Activities
This class will introduce students to a variety of recreational activities often used in a social/leisure setting (i.e., ladder golf, disc golf, croquet, etc.). May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Summer

PE 0151 - Indoor Lifetime Activities
This class will introduce students to a variety of recreational activities often used in a social/leisure setting (i.e., shuffleboard, billiards, table tennis, etc.). May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Summer

PE 0152 - Social Dance I
Fundamentals of social dance, providing the basic skills, concepts of movement, style, and fundamental step patterns. Emphasis on the development of fundamental dance skills and practice in utilizing dance techniques.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0153 - Aerobics I
Improvement of cardiovascular fitness, strength, coordination, and body mechanics through exercise. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0155 - Beginning Road Biking
Learn to be comfortable and confident while riding a regular road bike. Covers basic maintenance repair procedures. Requires own equipment and supplies, including a bike helmet. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall

PE 0156 - Beginning Mountain Biking
Learn to be comfortable and confident while riding a mountain bike off-road. Covers basic maintenance repair procedures. Requires own equipment and supplies as well as a biking helmet. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall

PE 0166 - Moving for Fitness
Introductory course to using the Student Development Complex and surrounding outdoor facilities in a variety of group and individual activities. Basic movement at your own level. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Summer

PE 0167 - Beginning Yoga
Learn the basics or compliment previous experience while improving flexibility, balance and concentration. Improve focus. Relax mentally and physically.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0168 - Beginning Pilates
Students will learn a unique approach to exercise that develops body awareness. Pilates is one of the safest forms of exercise today. Students will improve coordination, posture and flexibility, as well as, release stress. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0169 - Indoor Cycling
High energy, group cycling class. No complicated moves to learn. Upbeat music that gets your legs pumping.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0170 - TaeKwonDo and Hapkido I
Introduction to the basic kicking, blocking, punching, joint locking, and self-defense techniques of TaeKwonDo and Hapkido. Emphasizes improvement of flexibility. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0175 - Hiking
 Fundamental knowledge and skills specific to hiking will be covered. Appropriate clothing and footwear for hiking is recommended. Course meets on weekends (usually Saturdays). May be used once as a general education co-curricular course. Due to class structure, students must attend all classes - No Exceptions.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0176 - Outdoor Adventure
Students will engage in multi-day backpacking with overnight camping. Destinations are variable, possibilities include Isle Royale National Park, Porcupine Mountains, etc. Instructors will include trained wilderness guides and class/laboratory fee will cover miscellaneous costs such as park permits, transportation costs, camping gear, and group meals.
Credits: variable to 3.0; Repeatable to a Max of 3; Graded Pass/Fail Only
Semesters Offered: On Demand

PE 0205 - Bowling II
Intermediate to advanced techniques in bowling, including skills and strategy involved in tournament play. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0206 - Intermediate Golf
Intermediate to advanced individual instruction in golf techniques, terms, courtesies, and tournament regulations. Equipment needed; some rental clubs available. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer

PE 0209 - Intermediate Aikido
This course is designed to be a continuation of Aikido.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: On Demand
PE 0210 - Special Topics in Physical Education
Unconventional activity courses that address varying and changing student interests. Topics vary. Each topic may count once as a general education co-curricular course as long as the topic and course content are different than other co-curricular courses taken.
Credits: 0.5; Repeatable to a Max of 1; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

PE 0215 - Intermediate Swimming
Students learn to swim four basic strokes with proficiency. Requires ability to swim the length of pool comfortably. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0216 - Intermediate Basketball
Intermediate to advanced techniques, skills, and strategies of basketball. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0217 - Intermediate Hockey
Intermediate/advanced techniques, skills, and strategies. Requires basic hockey equipment of helmet with face mask, shoulder pads, hockey pants, shin pads, elbow pads, hockey gloves, skates, supporter, jersey, hockey socks, hockey stick. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0218 - Intermediate Weight Training
Intermediate to advanced techniques of weight lifting. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0219 - Intermediate Fitness Training
This course is designed to be a continuation of Beginning Fitness Training, providing the opportunity to continue in a variety of activities to improve fitness and well being. Activities include using aerobic machines and strength training. Students will learn fitness training concepts and how to safely and properly use fitness center equipment.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0220 - Intermediate Alpine Skiing (Downhill)
Intermediate to advanced skills of alpine skiing techniques taught, evaluated and recommendations made for improvement. Students must provide their own transportation to Mont Ripley. It is recommended that students provide their own equipment. Daily rental and "rent for the season" equipment available at Mont Ripley. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0221 - Intermediate Snowboarding
Intermediate to advanced skills of snowboarding techniques taught, evaluated, and recommendations made for improvement. Students must provide their own equipment. Daily rental and "rent for the season" equipment available at Mont Ripley. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0226 - Intermediate Volleyball
Organization and development of team competition in volleyball. Requires previous volleyball experience. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0230 - Water Polo
Fundamental skills, rules, strategy, and play of water polo. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0232 - Intermediate Soccer
Intermediate to advanced techniques, skills, and strategies involved in soccer. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

PE 0235 - Intermediate Cross Country Skiing
Development of touring, recreational, and racing skills in cross country skiing. Own equipment is recommended; rental equipment available. Basic skills evaluated to ensure proper level of skiing proficiency. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0237 - Intermediate Table Tennis
Intermediate/advanced skills of table tennis will be taught. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0238 - Intermediate Racquetball/Squash
Reviews the fundamentals and instructs the students on the intermediate/advanced skills of racquetball and squash. Gives all students the opportunity to play singles, cutthroat, and doubles. Racquets, balls, and eyewear provided. Recommend use of personal racquet. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0239 - Intermediate Badminton
Intermediate to advanced techniques, skills, and strategies involved in badminton. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0240 - Intermediate Tennis
Intermediate to advanced techniques, skills, and strategies in tennis. Class meets at Gates Tennis Center. Non-marking court shoes must be worn. Tennis balls and racquets provided. Recommend use of personal racquet. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0246 - Intermediate Billiards
Intermediate to advanced techniques, skills, and strategies in billiards. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0248 - Intermediate Skating
Intermediate to advanced techniques, including three turns, mohawk turns, jumps and spins, and drills for stops, starts, and power skating. Requires own skates. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0250 - Paintball
Students will be exposed to the sport of paintball for enjoyment and physical exercise in a relaxed outdoor setting. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0252 - Social Dance II
Continuation of developing social dance skills, concepts of movement, style, and step patterns. Emphasis on practice in utilizing dance techniques.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0253 - Aerobics II
Intermediate to advanced techniques and steps involved in aerobics. Requires previous aerobics experience. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0256 - Intermediate Mountain Biking
Intermediate to advanced techniques and skills involved in mountain biking. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall
PE 0266 - Running for Fitness
The techniques, skills, and strategies involved in running. The class is physically strenuous. Requires appropriate running shoes and attire. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

PE 0267 - Intermediate Yoga
Combined ancient Hatha yoga poses with modern fitness movement to create a total mind/body workout for all fitness levels. Improve breathing and oxygen intake.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0268 - Intermediate Pilates
Students will learn advanced techniques to build strength and flexibility while engaging the muscles of their abdominals, lower back and hips, otherwise known as the "Power House" for a more streamline shape.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0270 - Cardio Taekwondo
Improvement of kicking, blocking, punching, joint locking, and self-defense techniques. Emphasizes improvement of skills and strategies involved in Taekwondo. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0315 - Fitness Swimming
Practices the basic strokes; introduces knowledge in creating workouts to encourage swimming as a lifetime fitness activity. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0320 - Advanced Skiing
Advanced skills of skiing techniques taught, evaluated, and recommendations made for improvement. Students must provide their own transportation to Mont Ripley. It is recommended that students provide their own equipment. Daily rental and "rent for the season" equipment available at Mont Ripley. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0321 - Advanced Snowboarding
Advanced skills of snowboarding techniques taught, evaluated, and recommendations made for improvement. Students must provide their own transportation to Mont Ripley. It is recommended that students provide their own equipment. Daily rental and "rent for the season" equipment available at Mont Ripley. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring

PE 0330 - Club Sports
Club sport participation based on student interest. Group must be on the approved list of sports and all membership requirements must be up to date. Students enrolling in this course must participate in 14 hours of activity during the semester. Participation is tracked by instructor of record. No retroactive credit will be awarded for involvement in club sport activity.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required

PE 0340 - Advanced Tennis
Advanced skills and strategy to make play more efficient. Multiple spins on forehand and backhand, ground strokes, drop shots, and different types of serves. Non-marking court shoes must be worn. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring
Pre-Requisite(s): PE 0240

PE 0352 - Social Dance III
Introduction of current dance trends.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0353 - Aerobics III
Cardiovascular fitness course based on current trends in aerobics.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0355 - Advanced Road Biking
Learn advanced road biking techniques and strategies. Course requires own equipment, including road bike/wheels, bike shorts, biking shoes/peals, and a helmet. Course also requires sufficient fitness to ride continuously in excess of 15 mph for 1.5 hours. May be used once as a general education co-curricular course.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall

PE 0367 - Mindful Yoga
A restorative yoga class that is very gentle and has an emphasis on meditations/mindfulness.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 0420 - Ski Instructor Training
Students will learn how to teach ski classes. Upon completion of this course students will have the knowledge to complete the Level I certification test with the American Snowsports Education Association, if they choose.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: On Demand

PE 0421 - Snowboard Instructor Training
Students will learn to teach snowboard classes. Upon completion of this course students will have the knowledge to complete the Level I certification test with the American Snowsports Education Association, if they choose.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: On Demand

PE 0425 - Intramurals
Intramural activity that addresses varying and changing student interests. Sports vary. Students must be a member of IMLeagues.com/MTU. Students enrolling in the course must participate in 14 games/contests during the portion of the semester that the course is offered to receive a passing grade. Participation is tracked via IMLeagues.com/MTU. No retroactive credit will be awarded for involvement in intramural activities.
Credits: 0.5; Repeatable to a Max of 1; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman

PE 0430 - Club Sports Leadership
Leadership in club sport participation based on student interests. Students enrolling in this course must hold a position of leadership within the club sport. Group must be on an approved list of sports and all membership requirements must be up to date. Students must participate in 14 hours of leadership activity during the semester. Participation is tracked by instructor of record. No retroactive credit will be awarded for involvement in club sport activity.
Credits: 0.5; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
Restrictions: Permission of instructor required

PE 0450 - Physical Education Fusion-Full
Students will submit activity logs, photos, etc. to the course site. A predetermined number of points will need to be earned doing various activities through the semester. Activities with point values will be posted on the electronic course site.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring, Summer

PE 1000 - Fitness Foundations
Students will be introduced to practices and physical activities that they can incorporate into their daily life to sustain their healthy body and mind.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

PE 1028 - Ski Patrol (Hill)
National Ski Patrol training involving fitness, skiing proficiency, toboggan handling, and lift evacuation. Leads to qualifying membership test into National Ski Patrol. Requires payment of dues to become a member of National Ski Patrol. Participation in this course requires intermediate ski level. Students must provide own equipment. Some rentals available at Mont Ripley.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-4)
Semesters Offered: Spring

PE 1101 - Team Sports
Students will demonstrate fundamental skills, knowledge of rules, strategies, and safety of the following team sports necessary for participation: flag football, softball, volleyball, soccer, basketball, and floor hockey. Students should bring a glove for softball. May be used once as a general education co-curricular course.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring
**PE 1105 - Bowling**  
Students will learn skills, rules, and scoring of bowling. Including skills and strategy involved in tournament play. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1106 - Golf**  
Intermediate to advanced individual instruction in golf techniques, terms, courtesies, and tournament regulations. Equipment needed; some rental clubs available. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-4)  
**Seminesters Offered:** Fall, Spring

**PE 1107 - Disc Sports**  
Students will demonstrate fundamental skills, knowledge of rules, strategies, and safety disc golf, frisbockey, and ultimate frisbee. Equipment provided. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1118 - Weight/Fitness Training**  
This course is designed to introduce students to a variety of weight and fitness activities to improve their well-being. Activities will include using aerobic and strength training machines. Students will learn basic concepts on how to safely and properly use the fitness center equipment. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1119 - Conditioning**  
Students will demonstrate the fundamental knowledge and skills of conditioning, leading to continued enjoyment and participation as a lifelong activity. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1130 - Fundamentals of the Sport of Basketball**  
History of Log Rolling and current competitive opportunities will be covered. Log rolling is a different style of workout that works on balance, core, and endurance.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1138 - Raquet Sports**  
Students will demonstrate fundamental skills, knowledge of rules, strategies, and safety of table tennis, racquetball, and badminton. Equipment provided. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1140 - Tennis**  
Fundamentals of the game, rules, and etiquette of tennis. Non-marking court shoes must be worn. Tennis balls and racquets provided. Recommend use of personal racquet. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1170 - TaeKwonDo**  
Introduction to the basic kicking, blocking, punching, joint locking, and self-defense techniques of TaeKwonDo and Hapkido. Emphasizes improvement of flexibility, skills and strategies. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1175 - Personal Safety and Self-Defense**  
The Rape Aggression Defense System is a program of realistic, self-defense tactics and techniques. R.A.D. System is a comprehensive course for women that begins with awareness, prevention, risk reduction and avoidance, while progressing on to the basics of hands-on defense training. R.A.D. is not a martial arts program.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1180 - - Basketball**  
Fundamental knowledge and skills of rock climbing leading to continued enjoyment and participation as a lifelong activity. Students will practice/learn the basic terminology, knots, equipment, policies and procedures, and be knowledgeable in the proper care and use of equipment related to climbing, as well as safety concerns when climbing.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1193 - Physical Education for Individuals with Disabilities**  
The course is designed to introduce students to a variety of weight and fitness activities to improve their well-being. Activities will include using aerobic and strength training machines. Students will learn basic concepts on how to safely and properly use the fitness center equipment. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1210 - Special Topics**  
Unconventional activity courses that address varying and changing student interests. Topics vary. May count once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1215 - Introduction to Backcountry Travel**  
Fundamental knowledge and skills of backpacking leading to continued enjoyment and participation as a lifelong activity. Students will learn/practice on how to pack a backpack, plan food, and be knowledgeable about proper care and use of equipment related to backpacking.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-4)  
**Seminesters Offered:** Fall

**PE 1220 - Introduction to Canoeing**  
Fundamental knowledge and skills of canoeing leading to continued enjoyment and participation as a lifelong activity. Students will practice/learn the basic strokes, and be knowledgeable about proper care and use of equipment related to canoeing.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-4)  
**Seminesters Offered:** Fall

**PE 1225 - Indoor Rock Climbing**  
Fundamental knowledge and skills of rock climbing leading to continued enjoyment and participation as a lifelong activity. Students will practice/learn the basic terminology, knots, equipment, policies and procedures, and be knowledgeable in the proper care and use of equipment related to climbing, as well as safety concerns when climbing.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1230 - Introduction to Kayaking**  
Fundamental knowledge and skills of kayaking leading to continued enjoyment and participation as a lifelong activity. Students will learn/practice basic strokes, and be knowledgeable in the proper care and uses of equipment related to kayaking, as well as safety concerns when kayaking.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-4)  
**Seminesters Offered:** Fall

**PE 1235 - Introduction to Log Rolling**  
Fundamental knowledge and skills of log rolling as a sport, the different steps including front, back, and skip steps, and techniques of getting on the log. Log rolling is a different style of workout that works on balance, core, and endurance.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1240 - Snowshoeing**  
Fundamental knowledge and skills of snowshoeing leading to continued enjoyment and participation as a lifelong activity. Students will learn about equipment, proper care and storage of equipment, and basic concepts of snowshoeing.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-4)  
**Seminesters Offered:** Spring

**PE 1245 - Wilderness First Responder**  
The definitive wilderness course in medical training, leadership, and critical thinking for outdoor, low-resource, and remote professionals and leaders. This course is the ideal medical training for leaders in remote areas, as well as general recreation users in remote in wild settings.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-4)  
**Seminesters Offered:** On Demand

**PE 1435 – Self Defense for Women**  
The Rape Aggression Defense System is a program of realistic, self-defense tactics and techniques. The R.A.D. System is a comprehensive course for women that begins with awareness, prevention, risk reduction and avoidance, while progressing on to the basics of hands-on defense training. R.A.D. is not a martial arts program.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 1436 - Self Defense for Men**  
The course teaches the Rape Aggression Defense System for men (TM). Participants will have the opportunity to raise their awareness of aggressive behavior. Hands-on self-defense skills to resist and escape aggressive behavior will be practiced.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-2)  
**Seminesters Offered:** Fall, Spring

**PE 2010 - Varsity Football**  
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-5)  
**Seminesters Offered:** Fall  
**Restrictions:** Permission of department required

**PE 2020 - Varsity Basketball**  
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-5)  
**Seminesters Offered:** Fall, Spring  
**Restrictions:** Permission of department required

**PE 2030 - Varsity Hockey**  
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.  
**Credits:** 1.0; Graded Pass/Fail Only  
**Lec-Rec-Lab:** (0-0-5)  
**Seminesters Offered:** Fall, Spring  
**Restrictions:** Permission of department required
PH 1090 - The Physics Behind Music
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Spring
Restrictions: Permission of department required

PE 2040 - Varsity Nordic Skiing
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.

PE 2050 - Varsity Soccer
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.

PE 2080 - Varsity Track
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Fall, Spring
Restrictions: Permission of department required

PE 2090 - Varsity Tennis
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Fall, Spring
Restrictions: Permission of department required

PE 2130 - Varsity Volleyball
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Fall
Restrictions: Permission of department required

PE 2140 - Varsity Cross Country
Selective collegiate-level sports participation requiring an elite level of skill and extensive time commitment. May be used once as a general education co-curricular course.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Fall
Restrictions: Permission of department required

PE 2150 - Cross Training
A broad base understanding of sports cross training and activities that can be pursued as lifelong activities. May be used once as a general education co-curricular course.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-5)
Semesters Offered: Fall, Spring
Restrictions: Permission of department required

PH 1090 - The Physics Behind Music Lab
A companion hands-on lab course covering topics from PH1090.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer
Pre-Requisite(s): PH 1090(C)

PH 1100 - Physics by Inquiry I
Experiments covering kinematics, force, conservation of momentum, conservation of energy, and waves are explored through guided construction. The course emphasizes understanding physical concepts through inquiry and the scientific method.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): MA 1160(C) or MA 1161(C)

PH 1110 - College Physics I
An overview of basic principles of kinematics, dynamics, elasticity, fluids, heat, thermodynamics, mechanical waves, and interference and diffraction of mechanical waves.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following College(s): School of Technology, College of Engineering; May not be enrolled in one of the following Major(s): Physics, Applied Physics
Co-Requisite(s): PH 1111
Pre-Requisite(s): MA 1031 or MA 1032 or MA 1135(C) or MA 1160(C) or MA 1161(C) or ALEKS Math Placement >= 56 or CEEB Calculus AB >= 2 or CEEB Calculus BC >= 2 or CEEB Calculus AB Subscore >= 2

PH 1111 - College Physics I Laboratory
Experiments covering kinematics, forces, conservation of momentum and energy, waves, and thermodynamics are explored through guided construction. The course provides inquiry-based laboratory experiences for concepts explored in PH1110.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Summer
Restrictions: May not be enrolled in one of the following College(s): School of Technology, College of Engineering; May not be enrolled in one of the following Major(s): Physics, Applied Physics
Co-Requisite(s): PH 1110

PH 1140 - Applied College Physics I
An algebra-based introduction to classical mechanics and its applications. Topics include kinematics, Newton's laws, impulse and momentum, work and energy, simple harmonic motion, mechanical waves and sound, and temperature and heat.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Engineering Technology, Mechanical Engineering Tech, Electrical Eng Tech, General Technology, Theatre & Entertain Tech (BS), Computer Network & System Admin
Co-Requisite(s): PH 1141
Pre-Requisite(s): MA 1031 or MA 1032 or MA 1160(C) or MA 1161(C) and (PH 1100 or PH 1111 or PH 1141(C) or PH 1161)

PH 1141 - Applied College Physics I Laboratory
Experiments covering kinematics, forces, conservation of momentum and energy, waves, and thermodynamics are explored through guided construction. The course provides inquiry-based laboratory experiences for concepts explored in PH1140.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Engineering Technology, Mechanical Engineering Tech, Computer Network & System Admin, Electrical Eng Tech, Theatre & Entertain Tech (BS), Construction Management
Co-Requisite(s): PH 1140

PH 1160 - Honors Physics I - Mechanics
Calculus-based introduction to classical mechanics. Topics include mathematical concepts, kinematics, Newton's laws, the gravitational force, work and energy, and collisions. Also introduces departmental facilities, research within the department, and professional opportunities in physics. Intended for physics majors; highly motivated students seeking an invigorating introduction to physics may enroll with permission of the instructor.
Credits: 4.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Physics (BA), Physics, Applied Physics
Co-Requisite(s): PH 1161
Pre-Requisite(s): MA 1160(C) or MA 1161(C) or MA 2160(C)

PH 1161 - Introduction to Experimental Physics I
A laboratory complement to PH1160. Experiments covering kinematics, force, conservation of momentum, conservation of energy, waves and thermodynamics are explored through guided construction. The course emphasizes understanding physical concepts through inquiry and the scientific method.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Physics (BA), Physics, Applied Physics
Co-Requisite(s): PH 1160
PH 1200 - Physics by Inquiry II
Experiments covering Coulomb's law, electric and magnetic fields, circuits, induction, and geometric optics are explored through guided construction. The course emphasizes understanding physical concepts through inquiry and the scientific method.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): PH 1100 or PH 1111 or PH 1141 or PH 1161

PH 1210 - College Physics II
An overview of basic principles of static and dynamic electricity and magnetism, electromagnetic waves, reflection and refraction of light, interference and diffraction of light, special theory of relativity, wave theory of matter, particle theory of electromagnetic waves, theory of the atom, the nucleus, and elementary particles.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Restrictions: May not be enrolled in one of the following College(s): School of Technology, College of Engineering; May not be enrolled in one of the following Major(s): Physics, Applied Physics
Pre-Requisite(s): PH 1200(C) and (PH 1110 or PH 1100)

PH 1240 - Applied College Physics II
An overview of static and dynamic electricity and magnetism, electromagnetic waves, basic optics, and an introduction to modern and nuclear physics with an emphasis on problem solving and applications.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following College(s): School of Technology
Co-Requisite(s): PH 1200
Pre-Requisite(s): PH 1140 or PH 1110

PH 1360 - Honors Physics II - Rotation and Vibration
Continuation of PH 1160. Topics include rotational motion, simple harmonic motion and mechanical waves. Offered first half of spring semester.
Credits: 2.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Spring
Co-Requisite(s): PH 1361
Pre-Requisite(s): (PH 1160 or PH 2100) and MA 2160(C)

PH 1361 - Introductory Experimental Physics II
Laboratory complement to PH 1360. Waves and thermodynamics are explored through guided construction. The course emphasizes understanding physical concepts through inquiry and the scientific method.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Spring
Co-Requisite(s): PH 1360

PH 1500 - Extraordinary Concepts in Physics
Extraordinary concepts will be surveyed. Included will be time dilation and length contraction in Special Relativity, physics of Time Travel, curvature in General Relativity, interpretations of Uncertainty Principle, counter-intuitive examples of Two-Slit Experiment, Schrodinger's Cat, Maxwell's Demon, Bell's Inequality, curvature in cosmology, dark matter, dark energy, black hole evaporation, string theory, and gravitational lensing.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: On Demand

PH 1600 - Introductory Astronomy
Introduces fundamentals of astronomy. Topics include Kepler's and Newton's laws of motion, origin and evolution of the solar system, galactic astronomy, extra-galactic astronomy, cosmology, and modern instrumentation, including space-based astronomy.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Fall, Spring, Summer

PH 1610 - Introductory Astronomy Lab
Demonstrates fundamentals of astronomy using non-telescopic and telescopic observations, and computer simulations. Topics include angular size measurements, season-dependent measurements, phases of the moon, phases and orbits of planets, brightness of stars, introduction to the use of MTU's Observatory, instrumentation, and applications of computer programs involving cosmology.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer
Co-Requisite(s): PH 1600

PH 2020 - Introduction to Scientific Programming and Error Analysis
Compiled programming languages, command lines, and scripts will be used to solve simple physics problems. Measurement uncertainties, significant figures, probability distributions, error propagation, and data reduction will be examined in the contexts of experiments and numerical calculations.
Credits: 2.0
Lec-Rec-Lab: (1-0-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Physics (BA), Physics, Applied Physics
Pre-Requisite(s): (PH 1160 or PH 2100) and (MA 1160 or MA 1161)

PH 2100 - University Physics I-Mechanics
A calculus-based introduction to classical mechanics. Topics include kinematics, Newton's laws, impulse and momentum, work and energy, and the universal law of gravitation.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): PH 1100(C) and (MA 1160 or MA 1161 or MA 1135 or MA 2160(C))

PH 2200 - University Physics II-Electricity and Magnetism
A calculus-based introduction to electromagnetism. Topics include Coulomb's law, electric fields, Gauss's law, electric potential, capacitance, circuits, magnetic forces and fields, Ampere's law, induction, Maxwell's equations, and electromagnetic waves.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): (PH 1200(C) or PH 2261(C)) and (PH 2100 or PH 1160) and MA 2160

PH 2230 - Electronics for Scientists
An introduction to analog and digital electronics with an emphasis on their use in the laboratory. Topics include linear devices and basic linear circuit analysis; diodes; transistors; op-amps; the use of digital components, including logic gates, flip-flops, counters, clocks and microcontrollers, and analog to digital conversions.
Credits: 4.0
Lec-Rec-Lab: (3-0-3)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Major(s): Electrical Engineering, Computer Engineering
Pre-Requisite(s): PH 2200 or PH 2260

PH 2260 - Honors Physics III - Electricity and Magnetism
A calculus-based introduction to electromagnetism. Topics include Coulomb's law, electric fields, Gauss's law, electric potential, capacitance, circuits, magnetic forces and fields, Ampere's law, induction, Maxwell's equations, and electromagnetic waves.
Credits: 4.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (PH 1160 or PH 2100) and (PH 1200(C) or PH 2261(C)) and (MA 1160 or MA 1161)

PH 2261 - Introduction to Experimental Physics III
A laboratory complement to PH2260. Experimenting with Coulomb's law, electric and magnetic fields, circuits, induction, geometric optics, and modern physics are explored through guided construction. The course emphasizes understanding physical concepts through inquiry and the scientific method.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall
Co-Requisite(s): PH 2260

PH 2281 - Introduction to Experimental Physics III
A laboratory complement to PH2280. Experimenting with Coulomb's law, electric and magnetic fields, circuits, induction, geometric optics, and modern physics are explored through guided construction. The course emphasizes understanding physical concepts through inquiry and the scientific method.
Offered second half of spring semester.
Credits: 2.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Spring
Pre-Requisite(s): PH 1100 or PH 1161

PH 2300 - University Physics III-Fluids and Thermodynamics
A calculus-based introduction to fluids and thermal physics. Topics include fluid motion, propagation of heat and sound, temperature and the kinetic theory of gases, heat capacity and latent heat, first law of thermodynamics, heat engines and the second law, entropy, and an introduction to statistical mechanics. Offered second half of spring semester.
Credits: 2.0
Lec-Rec-Lab: (4-0-0)
Semesters Offered: Spring
Pre-Requisite(s): PH 1100 or PH 2100

PH 2400 - University Physics IV-Waves and Modern Physics
A calculus-based introduction to waves and modern physics. Topics include interference and diffraction, special relativity, photons and matter waves, the Bohr atom, wave mechanics, atomic physics, molecular and solid-state physics, and nuclear physics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer
Pre-Requisite(s): PH 2200 or PH 2260
PH 3110 - Theoretical Mechanics I
An intermediate study of mechanics, including the study of Newtonian mechanics of a single particle and multiple-particle systems, oscillations, motion in noninertial reference frames, gravitation and central-force motion, and Lagrangian mechanics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (PH 2200 or PH 2260) and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

PH 3111 - Theoretical Mechanics II
A continuation of PH3110. Includes the study of the rigid body motion, relativistic mechanics, and coupled oscillations. Additional topics may include chaos theory, Hamiltonian mechanics, and continuous systems.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): PH 3110

PH 3210 - Optics
An introduction to geometrical and physical optics. Topics in geometrical optics include ray analysis of mirrors, lenses, prisms, and optical systems. Topics in physical optics include polarization, interference, interferometry, and diffraction. The laboratory explores optics through experiments in imaging, fiber optics, interferometry, diffraction, polarization, and laser beam propagation.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Pre-Requisite(s): PH 2400 and (MA 3520 or MA 3521 or MA 3530(C) or MA 3560)

PH 3300 - Thermodynamics and Statistical Mechanics
Thermodynamic systems, heat, work, laws of thermodynamics, formal mathematical relations, cycles, phase equilibrium, and multicomponent systems. Elementary kinetic theory, Introduction to microscopic view of entropy, ensemble theory, and applications of statistical mechanics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): PH 3110

PH 3410 - Quantum Physics I
An introduction to the foundations of modern physics and Schrodinger's wave mechanics. Topics include thermal radiation, particle-like properties of radiation, Bohr's model of the atom, matter waves, Schrodinger's wave mechanics, quantization of angular momentum, and the one-electron atom.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): PH 2400 and (MA 3520 or MA 3521 or MA 3530 or MA 3560) and (PH 2200 or PH 2260)

PH 3411 - Quantum Physics II
A continuation of PH3410. Includes the study of spin and magnetic interactions, multi-electron atoms, quantum statistics, molecules, solids, and elementary particles.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): PH 3410

PH 3480 - Advanced Physics Laboratory
Through a series of experiments, students investigate physical phenomena that underlie modern physics. In the process, students become familiar with experimental techniques and instrumentation used in modern research laboratories.
Credits: 2.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Spring
Pre-Requisite(s): PH 2230 and PH 3210

PH 4010 - Senior Physics Colloquium I
Class discussion of the literature in the field of physics. Requires oral and written presentations.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Co-Requisite(s): PH 4080

PH 4011 - Senior Physics Colloquium II
A continuation of PH4011. Class discussion of current literature and recent advances in physics. Requires oral and written presentations.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Co-Requisite(s): PH 4081
Pre-Requisite(s): PH 4010

PH 4050 - Qualitative Methods in Physics
General methods and approaches of the physicist, including modeling, scaling, numerical estimation, and dimensional analysis as applied to the development, understanding, and solution of physics problems. Serves as an excellent preparation for students taking the GRE Subject Test in physics.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Physics. Applied Physics. May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

PH 4080 - Senior Research I
Introduction to research under the guidance of a faculty member. In addition, creative problem solving will be assessed via a student-initiated project.
Credits: 3.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Fall
Pre-Requisite(s): (PH 2200 or PH 2260) and PH 3110 and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

PH 4081 - Senior Research II
Continuation of research under the guidance of a faculty member, culminating in a written report and presentation of results at an undergraduate research forum.
Credits: 3.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Co-Requisite(s): PH 4011
Pre-Requisite(s): PH 4080

PH 4090 - Senior Thesis
Students prepare an in-depth written thesis on an approved topic in physics. Normally taken the last semester before graduation in conjunction with PH4081.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Spring
Restrictions: Permission of instructor required; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior

PH 4210 - Electricity and Magnetism I
Intermediate study of the basic theory of electricity and magnetism, including a detailed study of electrostatic field theory and an introduction to magnetostatics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): PH 3110

PH 4211 - Electricity and Magnetism II
A continuation of PH4210. Intermediate study of magnetostatics, electrodynamics, and electromagnetic waves.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): PH 4210

PH 4292 - Light and Photonic Materials
Material properties controlling light wave propagation in optical crystals and optical waveguides. Photonic crystals and photonic devices based on electrical, magnetic, and strain effects.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): PH 2200(C)

PH 4390 - Computational Methods in Physics
An overview of numerical and computer methods to analyze and visualize physics problems in mechanics, electromagnetism, and quantum mechanics. Utility and potential pitfalls of these methods, basic concepts of programming, UNIX computing environment, system libraries and computer graphics are included.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Fall
Pre-Requisite(s): PH 2020 and PH 3410
PH 4395 - Computer Simulation in Physics
Role of computer simulation in physics with emphasis on methodologies, data and error analysis, approximations, and potential pitfalls. Methodologies may include Monte Carlo simulation, molecular dynamics, and first-principles calculations for materials, astrophysics simulation, and biophysics simulations.
Credits: 3.0
Lec-Rec-Lab: (2-0-3)
Semesters Offered: Spring
Pre-Requisite(s): PH 4390 and (PH 2400 or PH 3410)

PH 4510 - Introduction to Solid State Physics
Crystal structures, X-ray diffraction, phonons, free electron theory of metals, rudiments of band theory, an overview of semiconductors, and other topics in solid-state physics.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Fall
Pre-Requisite(s): (PH 2300 or PH 1380) and PH 2400 and (CH 1150 and CH 1151) and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

PH 4610 - Stellar Astrophysics
Topics include an overview of observational astrophysics, stellar atmospheres, stellar structure, atomic properties of matter, radiation and energy transport in stellar interiors, and stellar evolution to and from the main sequence. Course offered every third year beginning 2008-09.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2008-2009 academic year
Pre-Requisite(s): PH 1600 and PH 2400 and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

PH 4620 - Galactic Astrophysics
Topics include the composition and dynamics of our galaxy, dynamics of stellar encounters, spiral density wave theory, clusters of galaxies, theoretical cosmology, physics of the early universe, and observational cosmology. Course offered every third year beginning 2009-10.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2009-2010 academic year
Pre-Requisite(s): PH 1600 and PH 2400 and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

PH 4630 - Particle Astrophysics
Introduction to the twin fields of elementary particle physics and high energy astrophysics. Topics include an overview of particles and interactions, the expanding universe, conservation laws, dark matter and dark energy, large scale structure, and cosmic particles. Course offered every third year beginning 2007-08.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2007-2008 academic year
Pre-Requisite(s): PH 2400 and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

PH 4640 - Fundamentals of Atmospheric Science
Fundamental principles of atmospheric science including thermodynamics, aerosol and cloud physics, radiative transfer, and atmospheric dynamics.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2013-2014 academic year
Pre-Requisite(s): (PH 2200 or PH 2260) and (PH 1380 or PH 2300) and MA 3160 and (MA 3520 or MA 3521 or MA 3530 or MA 3560)

PH 4710 - Methods of Teaching Physics
Hands-on exploration of physics education methods in classroom, laboratory, and tutoring environments. Students study highlights of physics education research and explore use of several tools and pedagogical techniques, including web-based homework systems, simulations, classroom feedback systems, and equipment for laboratories and lecture demonstrations.
Credits: 2.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Spring - Offered alternate years beginning with the 2010-2011 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PH 1210 or PH 2200 or PH 2260

PH 4999 - Special Topics in Physics
Selected additional topics in physics for advanced students based on interests of faculty and students. Interested students should contact the physics department.
Credits: variable to 9.0; May be repeated
Semesters Offered: Fall, Spring, Summer

Psychology

PSY 2000 - Introduction to Psychology
Introduction to the scientific study of psychological structures and processes involved in individual and group behavior. Explores theoretical accounts of the foundations of human behavior and examines empirical support. Topics may include personality, disorders, therapy, development, and social psychology, perception, learning, cognition, emotion, and states of consciousness.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer

PSY 2100 - Counseling Psychology
Major approaches used in contemporary counseling psychology, the current status of the profession, and ethical issues encountered will be examined to provide students with a broad understanding of the field. This course does not train students to be counselors.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): PSY 2000

PSY 2200 - Behavior Modification
An introduction to techniques of behavior modification through the application of learning theories such as classical and operant conditioning. Students will conduct a case study project designed to modify a personal behavior.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): PSY 2000

PSY 2300 - Health Psychology
Examines the theoretical, empirical, and historical bases for health psychology. Topics may include the effects of stress, determinants of addictive behavior, the impact of psychological factors on physical health, obesity, and the causes and treatment of chronic pain.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring, Summer
Pre-Requisite(s): PSY 2000

PSY 2400 - Developmental Psychology
A survey of human development across the life span (prenatal, infant, child, adolescent, and adult) in the areas of biological, cognitive, social, emotional, and personality development. Provides insight into both the universality of human development and the uniqueness of individuals.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Pre-Requisite(s): PSY 2000

PSY 2501 - Intro to the Psychology Major
Psychology majors examine the field of psychology and major degree requirements resulting in an undergraduate plan of study focused on graduate school admission or career preparation. Students will be introduced to department research and other opportunities.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Psychology; Must be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): PSY 2000(C)

PSY 2600 - Psychology of Death and Dying
An examination of theory, research, and issues in the psychology of death and dying. Topics may include the development of death concepts, death anxiety in society, the needs of the dying person, the psychology of grieving, and unexpected losses.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): PSY 2000

PSY 2720 - Statistics for the Behavioral Sciences
An understanding of statistical concepts and ability to conduct statistical analyses (using both hand calculation and SPSS) as used in Social and Behavioral Sciences research. Topics include descriptive statistics, correlation, and inferential statistics through ANOVA.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Social Sciences, Psychology
Pre-Requisite(s): MA 1031 or MA 1032 or MA 1160(C) or MA 1161(C) or MA 1135(C)

Credits: 2.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Spring - Offered alternate years beginning with the 2010-2011 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PH 1210 or PH 2200 or PH 2260

PH 4999 - Special Topics in Physics
Selected additional topics in physics for advanced students based on interests of faculty and students. Interested students should contact the physics department.
Credits: variable to 9.0; May be repeated
Semesters Offered: Fall, Spring, Summer

Undergraduate Course Descriptions, 2018-19, Page 89 of 103
PSY 2800 - Critical Thinking for Social and Behavioral Sciences
This course will help develop critical thinking skills central to the social and behavioral sciences. Topics may include arguments, logic, evaluating causal claims, evaluating surveys, theory evaluation, experiment evaluation, writing in psychology, and ethical considerations in the social and behavioral sciences.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): PSY 2000(C)

PSY 3000 - Research Methods & Stats
Introduction to experimental design, general research methodology, computer analysis and interpretation of data. Emphasizes issues and methods involved in psychological research. Topics include experimental design and validity, choosing appropriate data analysis techniques, statistical analysis, and APA writing style.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Psychology; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000 and (MA 2720 or PSY 2720)

PSY 3001 - Experimental Methods and Statistics II
Second course in psychological research methodology and statistics, both experimental and non-experimental. Students design, execute, interpret, and report psychological research.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Psychology; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000 and PSY 3000

PSY 3010 - Theories of Personality
Introduction to the variety of approaches to personality that underlie many clinical models. Discusses the formulation of personality theory, its purpose, and problems associated with personality theory generation. Emphasizes classical and contemporary theories of personality, their various applications to human behavior, and a review of relevant research findings.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): PSY 2000 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

PSY 3020 - Moral Psychology
This course focuses on moral behavior and reasoning informed by empirical science and philosophy. Topics may include moral motivation, moral responsibility, character traits, virtues, cross-cultural differences, reactive attitudes, moral development, and applied issues.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2014-2015 academic year
Pre-Requisite(s): PSY 2000 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

PSY 3030 - Abnormal Psychology
Helps the student build an understanding of abnormal behavior through critical examination of historical and contemporary models used in this field. The student learns the causes and treatment proposed by Cognitive-Behavioral, Psychodynamic and Socialcultural Models with particular emphasis placed on the Diagnostic and Statistical manual used by clinicians for diagnoses.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Summer
Pre-Requisite(s): PSY 2000 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

PSY 3040 - History and Systems of Psychology
Traces major historical contributions to current psychology from ancient to modern times. Examines significant ideas and discoveries from philosophy, mathematics, and the natural and medical sciences as they relate to the development of psychology. Discusses philosophical, theoretical, and methodological controversies that surfaced as part of these historical developments.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): PSY 3000

PSY 3080 - Physiological Psychology
Study of the relations between psychological manipulations and resulting physiological responses to promote understanding of mind/body interaction. Will examine psychophysiological measurement methods, research, and the application of psychophysiology.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): PSY 2000 and (BL 1020 or BL 1040 or BL 2010)

PSY 3070 - Cross-Cultural Psychology
Introduces the student to cross cultural psychology and sociocultural theory as it is applied to psychology. Examines research on cultural specific and universal behaviors. Emphasizes the benefits and challenges of diversity in organizations and diversity skills that promote interpersonal and organizational success.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Pre-Requisite(s): PSY 2000 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

PSY 3090 - Directed Research: Undergraduate Research Assistant in Psychology
Directed research in the field of Psychology through the application of research techniques.

Credits: variable to 3.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Psychology; May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000

PSY 3095 - Teaching Assistant
Undergraduate Teaching Assistant for Principles of Psychology or other Psych course, including tutoring, assessment, test construction.

Credits: variable to 3.0; May be repeated
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Psychology
Pre-Requisite(s): PSY 2000

PSY 3100 - Applied Counseling Techniques
An applied review of counseling techniques, their strengths and weaknesses, and the fundamental concepts that support the use of each type of counseling. This is a course in which students will be required to apply and practice one of the counseling techniques with a voluntary client.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000

PSY 3200 - Motivation and Emotion
Introduction to the theoretical, physiological, cognitive, and behavioral factors underlying the processes of motivated behaviors and emotional states. Emphasis is placed on methods for studying motivation and emotion and their role in human behavior.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000

PSY 3250 - Persuasion and Attitude Change
Human beings develop attitudes as a result of experience. Attitudes shape future behavior and impact perception. This course will explore how attitudes are identified, categorized and measured, and will examine many of the variables associated with changing established attitudes.

Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Pre-Requisite(s): PSY 2000

PSY 3300 - Psychology of Deviance
This course will guide the student through a scholarly study from how deviance is defined to an in-depth analysis of the numerous theories that seek to explain why individuals commit deviant acts.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year
Pre-Requisite(s): PSY 2000

PSY 3370 - Industrial Organizational Psychology
The psychology of work and organizations. Introduction to the use and application of psychology in the workplace. Focus is on the development of employees and organizational structure, and social behavior including the management of work groups and organizations.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2012-2013 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000
PSY 3720 - Social Psychology
Survey of social, cultural, and cognitive influences on individual and group behavior. Introduces attitude formation, social conformity, personal perception, aggression, cooperation, and interpersonal and intergroup relations.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring, Summer
Pre-Requisite(s): PSY 2000 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

PSY 3850 - Human Factors Psychology
Basic psychological concepts critical to the design of human-technological systems. This class provides an applied perspective of psychological research and insight into the most unpredictable and error-prone component of human-machine systems - the human! Appropriate for both psychology and engineering students.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2015-2016 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000

PSY 3860 - Human Performance
An overview of the psychology of human performance, including topics of movement, attention, perception, speech, expertise, and performance enhancement and degradation.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: Must be enrolled in one of the following Class(es): Sophomore, Junior, Senior
Pre-Requisite(s): PSY 2000

PSY 4010 - Cognitive Psychology
Through lecture, demonstrations, and participation in classic cognitive experiments, this course provides a survey of topics in human cognition, including perception, attention, mental representation and processing, the architecture of memory, knowledge, visual imagery, problem solving, reasoning, and decision making.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000

PSY 4015 - Cognitive Task Analysis Methods
Cognitive task analysis (CTA) is a cognitive-systems engineering method to unpack complex cognitive work. The results support design requirements for new systems, strategies, or training. Students will practice collecting and analyzing CTA data using several methods.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000

PSY 4060 - Cognitive Neuroscience
Topics in the field of cognitive neuroscience, examining the neural basis of cognition. Topics may include perception, attention, memory and language.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 3060

PSY 4080 - Topics in Psychology
An examination of a specific area or approach within the field of Psychology.
Credits: variable to 4.0; May be repeated
Semesters Offered: On Demand
Pre-Requisite(s): PSY 2000

PSY 4090 - Independent Study in Psychology
Designed to allow students to participate in independent readings or research in a variety of areas within psychology.
Credits: variable to 6.0; Repeatable to a Max of 9
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Psychology; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): PSY 2000

PSY 4095 - Field Experience in Psychology
Firsthand experience with the application of psychological principles in the field through volunteer placement with a community agency or business. Students are responsible for obtaining field placement site in coordination with instructor. Students complete a comprehensive paper.
Credits: variable to 3.0; Repeatable to a Max of 6; Graded Pass/Fail Only
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Psychology; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): PSY 2000

PSY 4110 - Learning and Memory
Theories of learning and memory from traditional animal research findings, human research, and more recent trends examining the neural basis of learning and memory will be examined to understand changes in behavior, including the acquisition and retention of knowledge.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000

PSY 4160 - Sensation and Perception
Examination of basic sensory mechanisms and perceptual phenomena. Sensory mechanisms reviewed will include vision, audition, olfaction, gustation, vestibular system and touch.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2000

PSY 4220 - Psychology and Law
Application of psychological principles to legal concerns and the interaction of psychology and law. Topics include perception, memory, and decision-making processes as applied to eyewitnesses, identification and evaluation of suspects, jury trials, capital punishment, and other current topics.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): BL 1040 or BL 1020

PSY 4400 - Tests and Measurements
Review of psychological tests and test theory, along with principles of construction and analysis of psychological tests.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2720 or MA 2720

PSY 4500 - Senior Seminar: Psychology Capstone
Focusing on application to graduate programs, an intensive exploration into an area (e.g., experimental, developmental, clinical) of psychology or related field, will enhance learning and synthesize career goals in an effort to transition to an advanced educational program.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Psychology; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): PSY 3000(C)

PSY 4750 - Judgment and Decision Making
How can we make better decisions? Using examples from medicine, politics, law, business, and daily life, we review "descriptive" (psychological), "normative" (rational), and "prescriptive" (decision-engineering) theory. Topics include judgment, cognition, emotion, risk, uncertainty, heuristics, biases, and applications.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2720 or MA 2720

PSY 4870 - Human-Centered Design
This course will focus on the human-system (computers, appliances, mobile devices, etc.) Interaction regarding the design and development of products. Students will experience hands-on HCI activities (analysis-design-evaluation) and practice research methods based on HCI theory and perspectives.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Sciences and Arts

SA 1000 - Exploring Majors at Michigan Tech
Exploration of majors and related career opportunities. Includes an introduction to University resources such as the Career Center, presentations by students in various majors, an examination of individual interests and abilities, opportunities for discussion and reflection, and guidance in choice of appropriate courses.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring

Systems Administration Technology

SAT 1200 - Introduction to Programming
Introductory course in C/C++ programming. Topics include top-down analysis of problems, structured programming, control statements, loops, and functions, arrays, and pointers. Basic concepts of object-oriented programming (classes, objects, function overloading) will also be introduced.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Industrial Technology, Computer Network & System Admin; Must be enrolled in one of the following Class(es): Freshman, Sophomore

SAT 1610 - Computer and Operating Systems Architecture
Fundamentals of computer organization, operating system architecture, PC/WS major subassemblies, PC and server configuration planning, power interfaces, system assembly/set-up, connection of peripherals, installing fundamental operating system software, system testing/debugging and planning and installation of application software portfolios.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Pre-Requisite(s): SAT 1200 or CS 1111

SAT 1700 - Cyber Ethics
Ethics, morality, and privacy issues when working with technology. Topics include: foundational and professional issues in cyber ethics; privacy, security, and crime in cyberspace; intellectual property and internet regulation; the digital divide and online communities; and emerging and converging technologies.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Industrial Technology, Computer Network & System Admin; Must be enrolled in one of the following Class(es): Sophomore, Junior, Senior

SAT 2343 - Network Administration I
Introduction to basic networking concepts and implementation. Topics include OSI model, subnetting, network addressing, data encapsulation, network topologies, and basic configuration of networking hardware including cabling, bridges, routers, and other communications.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall, Summer
Pre-Requisite(s): SAT 1610

SAT 2511 - Microsoft System Administration
Microsoft server installation and configuration in an enterprise environment. Topics include: planning for server deployment and management; monitoring and maintaining servers; planning application and data provisioning; and planning for business continuity and high availability.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring, Summer
Pre-Requisite(s): SAT 2343

SAT 2711 - Linux System Administration
Linux system installation and configuration in an enterprise environment. Topics include: Linux system architecture; Linux installation and package management; GNU and UNIX Commands; Linux file systems; hierarchy standards; shells, scripting and data management; user interfaces and desktops; administrative tasks; essential system services; and networking fundamentals and security.
Credits: 4.0
Lec-Rec-Lab: (0-3-3)
Semesters Offered: Fall, Summer
Pre-Requisite(s): SAT 1200 or CS 1111(C) or CS 1121 or CS 1131 or CS 1142 or MIS 2100

SAT 3002 - Application Programming Introduction
Students will develop problem solving skills through the application of a commonly used high-level programming language. Topics include: nature of the programming environment; fundamentals of programming languages; structured programming concepts; object-oriented programming concepts; desirable programming practices and design; and debugging and testing techniques.
Credits: 3.0
Lec-Rec-Lab: (0-2-1)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior

SAT 3200 - Storage Area Networking
Study of distributed network storage methods that include ISCSI, DAS, NAS, and SAN technologies. Other topics include configuration management, storage farms, backup, and recovery.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall, Spring
Pre-Requisite(s): SAT 2511 and SAT 2711

SAT 3210 - Database Management
Introductory course on database management. Topics include data modeling, database design, implementation techniques, SQL Language, database administration and security.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Sophomore, Junior, Senior
Pre-Requisite(s): SAT 1200 or CS 1111 or CS 1121 or CS 1131 or CS 1142 or MIS 2100

SAT 3343 - Network Administration II
Study of network devices in various architectures. Topics include routing protocols, TCP/IP, access-lists, remote network structures, network topologies, telnet and SSH authentication, switch programming, VLAN and STP configuration, IP traffic control, network troubleshooting and WAN encapsulation.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Sophomore, Junior, Senior
Pre-Requisite(s): SAT 1200 or CS 1111 or CS 1121 or CS 1131 or CS 1142 or MIS 2100

SAT 3344 - Network Administration III
Study of wireless communications, standards, and regulations in an enterprise environment. Topics include: various radio frequency and light communications; IEEE 802.11 Regulations and Standards; protocols and devices; network implementation; network security; and site surveying.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Computer Network & System Admin; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): SAT 1200 or CS 1111 or CS 1121 or CS 1131 or CS 1142 or MIS 2100

SAT 3812 - Cyber Security I
The evolution of information security into cybersecurity and its relationship to nations, organizations, society, and individuals. Exposure to multiple cybersecurity technologies, processes, and procedures; analyzing threats, vulnerabilities and risks present; and developing appropriate strategies to mitigate potential cybersecurity issues. Applied lab to develop cyber security offensive attributes and learn how to prevent and/or mitigate threats.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall, Summer
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): SAT 2511 and SAT 2711

SAT 3815 - Wireless System Administration
Study of wireless communications, standards, and regulations in an enterprise environment. Topics include: various radio frequency and light communications; IEEE 802.11 Regulations and Standards; protocols and devices; network implementation; network security; and site surveying.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall, Spring
Restrictions: Must be enrolled in one of the following Major(s): Computer Network & System Admin; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): SAT 1200 or CS 1111 or CS 1121 or CS 1131 or CS 1142 or MIS 2100

Undergraduate Course Descriptions, 2018-19, Page 92 of 103
SAT 3900 - New Technologies Seminar
Offered first half of semester, to be taken concurrently with SAT3901. Weekly seminar series in which speakers from industry, universities, and government discuss current developments in networking and computer technology. The emphasis is on open research topics and questions that may lead to collaborative work with faculty and graduate students.
Credits: 1.0; Repeatable to a Max of 6; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall
Co-Requisite(s): SAT 3901

SAT 3901 - Becoming Human - Communication and Technical Improv Seminar
Offered second half of semester, to be taken concurrently with SAT3900. Weekly seminar series aimed at developing leadership qualities, soft skills, public speaking, and reactionary skills for students in technical fields. A fun and safe environment to develop and improve communication skills through situation and scenario-based exercises that include team building and games.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall
Co-Requisite(s): SAT 3900

SAT 3940 - Voice over IP Engineering
Voice over IP (VoIP) engineering and design. Topics include call and session protocols such as SIP, H.323, IAX and MGCP; VAD and PLC; common practical issues such as call redirection; codec integration and quality of service measurements.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: On Demand - Offered alternate years beginning with the 2011-2012 academic year
Restrictions: Must be enrolled in one of the following Major(s): Computer Network & System Admn
Pre-Requisite(s): SAT 2511 and SAT 2711 and SAT 3343

SAT 3410 - Advanced Scripting Programming
Emphasizes advanced portions of scripting programming, testing, implementation and documentation (i.e. PERL, PHP, Python and Scripting). Other topics include language syntax data and file structures, input/output devices, file, database access, and graphical user interfaces.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: On Demand
Restrictions: Must be enrolled in one of the following Major(s): Computer Network & System Admn
Pre-Requisite(s): SAT 3002 or SAT 3310

SAT 3433 - Network Engineering
Topics include router and switch flow control; VoIP, compression and load balancing; VPN networks involving MPLS, IPSEC and PPP; advanced access-list configuration; AAA; Kerberos; TACACS; firewalls; and configuration of advanced routing protocols.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring - Offered alternate years beginning with the 2010-2011 academic year
Pre-Requisite(s): SAT 3343

SAT 4411 - Data Center Engineering
Data center and virtualization strategies and design for an enterprise environment. Topics include: data center planning; disaster recovery; virtualization methods; and cloud computing services to provide business continuity.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Pre-Requisite(s): (SAT 3200 and SAT 3611) or (SAT 3511 and SAT 3711)

SAT 4422 - Clinical Applications
Introduces the concepts and processes of clinical applications. Critical insight into the medical field will be provided by blending both the clinical and medical informatics perspectives. Students will gain hands-on clinical application experiences within predefined clinical settings.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Biological Sciences, Computer Network & System Admn, Exercise Science, Medical Laboratory Science, Sports and Fitness Management, Biomedical Engineering, Pharmaceutical Chemistry; May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): SAT 4480

SAT 4424 - Population Health Management
Introduces the concepts and processes of population health management with a special emphasis on clinical care coordination and case management assessment. Students will gain hands-on experience working on case management teams through MICARE and participating local healthcare organizations.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): SAT 4422 or BL 2010 or BL 3080 or EH 1500 or KIP 1500 or SAT 5121

SAT 4480 - Senior Project I
Capstone course requiring the application of knowledge gained in lower division courses. Projects are team oriented, require weekly progress reports, and culminate with a final report and oral presentation.
Credits: 3.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Computer Network & System Admn; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): SAT 3812(C)

SAT 4500 - Web Application Development
An introduction to the building and administration of web applications. Topics covered include: Apache web server development; Tomcat application server; HTML; cascading style sheets; JavaScript; JQuery; server side includes; server side application development: web services; SSL/TLS; and authentication/authorization.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Spring
Pre-Requisite(s): SAT 3002 or SAT 3310

SAT 4812 - Cyber Security II
An advanced course in cyber security that covers information assurance, cryptography and data security, and malware analysis. Key topics include: buffer overflow; security audits; cryptographic systems (symmetric and public-key algorithms); public-key certificates (X.509); message authentication; Kerberos; authentication applications; electronic mail security; IP security; and SELinux.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Computer Science, Computer Network & System Admn, Computer Engineering; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): SAT 3812

SAT 4816 - Digital Forensics
Introduction of the basic principles and technology of digital forensics, including acquisition, preservation, and recovery and investigation of the evidence stored in digital devices.
Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Computer Network & System Admn; Computer Engineering; Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): SAT 3812

SAT 4880 - Senior Project II
Capstone course requiring the application of knowledge gained in lower division courses. Projects are team oriented, require weekly progress reports, and culminate with a final report and oral presentation.
Credits: 3.0
Lec-Rec-Lab: (0-0-6)
Semesters Offered: Fall, Spring, Summer
Restrictions: Must be enrolled in one of the following Major(s): Computer Network & System Admn; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): SAT 4480

SAT 4996 - Special Topics in Computer Network Systems Administration
Selected additional topics of interest in Computer Network Systems Administration based on student and faculty demand and interest. May be a tutorial, seminar, workshop, project, or class study.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Computer Network & System Admn; Must be enrolled in one of the following Class(es): Senior

SAT 4997 - Independent Study in Computer Network Systems Administration
Independent study of an approved topic under the guidance of a Computer Network Systems Administration faculty member. May be either an academic, design, or research problem/project.
Credits: variable to 3.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of instructor required; Must be enrolled in one of the following Major(s): Computer Network & System Admn; Must be enrolled in one of the following Class(es): Senior
Social Sciences

SS 1001 - Orientation to the Social Sciences
Introduction to departmental requirements, relevant university resources, careers in social sciences and history, skill expectations, and portfolio development; assessment of current knowledge.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): History, Social Sciences, Anthropology

SS 1002 - Introduction to Law and the Legal Practice
An introduction to how one becomes an attorney, what it is like to be an attorney, and the career options available to attorneys.
Credits: 2.0
Lec-Rec-Lab: (2-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2015-2016 academic year

SS 2001 - Introduction to Social Science Research
Students are introduced to various social science research methods and design. Covers scientific reasoning, developing questions, sampling, ethics, and quantitative and qualitative data collection using experiments, content analysis, survey, interview, oral history, statistics, GIS, comparative analysis, and archaeology.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): UN 1025(C) and (SS 2100(C) or SS 2300(C) or SS 2400(C) or SS 2600(C) or SS 2700(C))

SS 2050 - Fundamentals of Geographic Information Systems and Technologies
Introduction to geospatial sciences and technologies that are widely used for mapping and analyzing geographic patterns of human activities. Students gain hands-on experience in data collection, spatial data editing, georeferencing, spatial analysis, cartography, and spatial problem solving.
Credits: 3.0
Lec-Rec-Lab: (1-0-2)
Semesters Offered: Fall

SS 2100 - Introduction to Cultural Anthropology
Introduction to the field of cultural anthropology with a focus on human diversity, patterns of culture and human organization, globalization, and social change.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall

SS 2200 - Introduction to Archaeology
Introduction to the methods of archaeology and the contributions of the discipline to understanding of world prehistory. Topics include the ways archaeologists discover and excavate sites, the analysis of archaeological artifacts and features, human evolution, and the patterns of world prehistory.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring

SS 2210 - Evolution of Cities: Their origins, growth, and future
This introductory course will explore questions by examining the physical, social, and spatial systems that influence how and where we live, work, and play in the ever-changing industrial and post-industrial city.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2015-2016 academic year

SS 2300 - Environment and Society
Examines social approaches to understanding why environmental problems happen and how environmental problems are resolved. Includes concepts such as sustainability, market-based environmental policies, property systems, and environmental justice. Case studies may include biodiversity, deforestation, climate change, water quality, and toxics.
Credits: 3.0
Lec-Rec-Lab: (2-1-0)
Semesters Offered: Fall, Spring

SS 2400 - Introduction to Human Geography
This course introduces students to concepts, problems, and case studies that make up the study of human geography: the spatial differentiation and organization of human activity, environmental sustainability, and the role of space and place in our everyday lives.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall

SS 2500 - United States History to 1877
This broad historical survey will examine the social, political, and economic development of North America and the US from initial human settlement through the civil war.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2015-2016 academic year

SS 2501 - United States History Since 1877
This broad historical survey will examine important intellectual, political, and social changes and events in the United States over the course of the twentieth century and beyond, representing the perspective of a wide variety of diverse individuals and groups.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year

SS 2502 - European History to 1650
A survey of the history of Europe from the Archaic Greek period to 1650. Covers political, social, intellectual, religious, economic, and artistic developments of the European continent.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year

SS 2503 - European History Since 1650
A survey of the history of Europe from the mid-seventeenth century to the present. Covers political, social, intellectual, religious, economic, and artistic developments on the European continent.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2013-2014 academic year

SS 2504 - World History to 1500
An introduction to the basic themes and content of world history from antiquity to 1500 CE.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2013-2014 academic year

SS 2505 - World History Since 1500
Survey of world history from 1500 CE to the present. Traces the evolution of different societies from around the world, emphasizing exchanges, interactions, and conflicts that produced global change.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year

SS 2510 - Gender and the Past
This course has two main goals: to explore the relationship between gender in the past and present; and to evaluate the actual empirical evidence that speaks to people's gendered lives in many times and places.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): UN 1015

SS 2600 - American Government & Politics
Outlines the principles and logic of American Government and politics and explores contemporary issues in national and state government.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
SS 2601 - Politics and Contemporary Issues of the European Union
A general introduction to the politics and contemporary issues of the European Union (EU). The course will explore the evolution of the EU and its expanding role in the lives of the citizens of its member states.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand

SS 2610 - Introduction to Law and Society
Examining the criminal and civil justice system to explain how law informs yet is shaped by political, economic, and social forces. This course covers issues such as individual rights, the jury system, tort law, legal reform movements and constitutional interpretation.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall

SS 2635 - Comparative Politics
Study of the government and politics of non-U.S. countries. Covers parliamentary, authoritarian, and presidential systems. Some attention to politics of the European Union.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year

SS 2700 - Introduction to Sociology
Introduces students to the way that sociologists think about different components of society. Topics include the family, religion, markets, organizations, political systems, and educational systems. Also covers the source of individual values, beliefs, and attitudes.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring

SS 3105 - Native American and Indigenous Communities
Exploration of contemporary Native American and Indigenous communities worldwide, using a cross-cultural and comparative approach, with some historical context. Topics examined include the legacy of settler colonialism, issues facing Indigenous communities today, and Indigenous renewal and resistance, with emphasis on Native North America.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3110 - Food Systems & Sustainability
Compares the embedded nature of culturally defined food production and consumption habits: the crux of nature meeting and mixing with culture. The course features classic food system scholarship as well as emerging topics and contemporary case studies.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3200 - Archaeology of the Modern World
The study of industrial heritage using archaeological and historical perspectives. Covers theories, methods, and techniques by means of lectures, readings, and case studies. Students conduct original research, generally on Copper Country industrial sites, under the guidance of the instructor.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2019-2020 academic year
Pre-Requisite(s): SS 2200 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3225 - Capitalism and the Modern World
This course explores from an anthropological perspective themes concerned with the increasing interconnectedness of world cultures and economies after 1400. Focusing on Western expansion and the establishment of global networks in the Modern Era and tracing the social, political, and economic interactions that have shaped our contemporary world.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3240 - Reading the Landscape: Anthropology, Geography, History
Landscape is a lens through which scholars study people, environment, and place. The concept transcends traditional disciplinary boundaries. Students will read and discuss different approaches to landscape, with special focus upon anthropological, geographic, and historical perspectives.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3250 - Biological Anthropology
A human evolution course focusing upon a summary of general bio- anthropological principles of evolutionary change, the current fossil record evidencing human evolution, and the consequences of human evolutionary change for modern human variability, health, and behavior.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2007-2008 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3260 - Latin American Cultural History
This course examines the diverse, but interconnected, cultures of Latin America. The class will examine the sources and patterns of particular cultural traditions, while at the same time understanding the trajectory of social, political, and economic transformations throughout the region.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3265 - Archaeology Laboratory Practicum
This hands-on lab practicum course exposes students to various stages of artifact processing and analysis in archaeological research. Projects teach best practices for cleaning, identification, data analysis, report preparation, and curation, all undertaken within critical framework structured by professional ethics.
Credits: variable to 6.0; Repeatable to a Max of 8
Semesters Offered: Summer
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3271 - Archaeological Sciences Laboratory
Introduction to the archaeological sciences, including geo/bioarchaeology and materials science. Course emphasizes connections between field and laboratory, and scientific and environmental perspectives on the world's peoples and cultures, both ancient and industrial.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Co-Requisite(s): SS 3222

SS 3272 - Archaeological Sciences Laboratory
Using hands-on exercises and project-based learning, labs include identification, analysis, and stabilization of metals, ceramics, and organics from archaeological contexts, and include elements of geo- and bioarchaeology, and materials science.
Credits: 1.0
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Co-Requisite(s): SS 3221

SS 3275 - Archaeology of Industry
The study of industrial heritage using archaeological and historical perspectives. Covers theories, methods, and techniques by means of lectures, readings, and case studies. Students conduct original research, generally on Copper Country industrial sites, under the guidance of the instructor.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2019-2020 academic year
Pre-Requisite(s): SS 2200 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3270 - Archaeology of the African Diaspora
Forced into slavery, the 'scatterlings' of Africa adapted and struggled to thrive in the New World. Archaeologists studying the Diaspora generally examine: ethnogenesis and blending of identity, migration, structural inequalities, and the construction of race and racism.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2019-2020 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3300 - Environmental Problems
An examination of local, regional, and global contemporary environmental problems. Critical consideration of underlying social, historical, and economic causes. Case studies drawn from topics such as global warming, ozone depletion, groundwater pollution, solid waste disposal, deforestation, and resource depletion. Studies proposed solutions and their impacts.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3313 - Sustainability Science
Foundational scientific concepts (dynamic systems and catastrophe theory) as applied to socioecological systems. Use of indicators and indices to track progress towards sustainability goals. Review of local, national, and global sustainability policies to avoid catastrophes and guide sustainable development.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3315 - Population and Environment
This course investigates relationships between the world's population, population change, population distribution, resource consumption, and environmental and social consequences. Addresses local and global relationships and the population processes (mortality, fertility, and migration) involved.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): (MA 1030 and MA 1031) or MA 1032 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3400 - Contemporary Europe
Examination of the landscapes and cultures of modern Europe. Emphasizes cultural patterns and diversity, environmental quality, economic development, and forces of economic and political unification. Examines urbanization, industry, population, nationalism, and political change through regional examples.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3410 - World Resources & Development
Examination of the human geography and resources of various world regions. Emphasizes factors affecting prospects for development, including population dynamics, natural resource endowment, social and cultural systems, and spatial structure of society. Case studies of individual countries supplement general concepts and theories.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3500 - Modern American History
Surveys American history since 1945 using popular literature and film as a window onto social, economic, and political change.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3505 - Military History of the U.S.
History of the American military and its place in American society in both peace and war from the colonial period until the present.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3510 - History of American Technology
Survey of the technological changes that transformed a rural, agrarian America into an urban, industrialized nation. Focuses on how America's social values and geographical situation influenced the direction taken by its technology and engineering community and how America's industrialization, in turn, had significant effects on American society.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3511 - History of Science in America
Examines the development of scientific enterprises in the U.S. from the colonial period through the present day. Emphasizes institutional bases of science and the place of scientific activities within American society.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3512 - Building America: The History of Planning, Engineering, and Development in the United States
This course surveys the landscapes and environments that Americans have designed, built, and inhabited. Students will consider how places both reflect and shape ideas, policy, technologies, and social relationships.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3513 - History of Making Things: Craft and Industry in America
Examines historical relationships between skilled tool use, embodied knowledge, and the design process in America from the colonial era to today. Includes production techniques, distribution systems, technological changes, industrialization, post-war globalization, and current craft and design.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3515 - History of American Architecture
Survey of North American architecture from prehistoric times to the present. Focuses on principal architectural styles, building types, and construction technologies. Also examines ideas about architecture to understand the American past.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3520 - U.S. Environmental History
Examines how human interaction with physical environment has changed in North America over the last four centuries. Topics include uses of land by Native Americans, changes associated with European colonization, incorporation of natural resources into industrial economy, early conservation and preservation movements, and environmental concerns accompanying urbanization and industrialization.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3521 - Energy in American History
Examines changes in energy use throughout American history, beginning with energy use by American Indians and Europeans during colonial settlement and continuing through fossil fuels and adoption of nuclear power. Helps students see energy in all we do.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand

SS 3530 - The Automobile in America
Examines the automobile in diverse ways, seeing it as a complex product to be manufactured, as a stimulus to reshaping the environment, as an object that has altered social behavior, and as a problem solver and problem maker.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3540 - History of Michigan
The history of Michigan from before European settlement to the present.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3541 - The Copper Country
Examines the social, labor, and technological history of the Copper Country from the frontier era until the shutdown of the mines.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3552 - Renaissance & Reformation
The history of Europe from 1300 to 1650.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3553 - Empires in World History
This course examines the social, political, cultural, economic, and geographical dimensions of imperialism. Students will research ancient and modern empires, with an emphasis on the long-run effects of the emergence, evolution, and collapse of empires.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3560 - History of England I
The social, economic, and political history of England from Stonehenge to 1750.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3561 - History of England II
History of England from 1750 to the present, including political, social, and economic developments in the period of Britain's greatest influence in the world.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3570 - History of Canada
Political, social, economic, and cultural development of Canada from earliest European settlement to the present.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3580 - Technology and Western Civilization
An overview of the evolution of technology in Western civilization from classical antiquity to mid-twentieth century. In addition, the course looks at ways technology influenced development of Western civilization and ways values of Western civilization have conditioned Western technology.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3581 - History of Science
A survey of the development of scientific ideas (abstractions about how nature is and behaves) from the Greeks to the modern world, including major physical and life science revolutions by natural philosophers like Copernicus, Galileo, Darwin, and Einstein.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2014-2015 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3600 - American Foreign Policy
Explores the nature, sources, and institutions associated with the making of American foreign policy, paying attention to explanations for American behavior and to current problems for policy. Reviews major events in U.S. diplomatic history.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3610 - International Law
Explores the principles, content, and logic of public international law, the law of nations. Students brief cases, prepare longer briefs to defend a side in a moot case, and engage in a moot court.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2017-2018 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3612 - International Relations
An introduction to the field and study of International Relations (IR). This course will cover major IR theories and current topics in global politics including: globalization, terrorism, human rights, and environmentalism.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3621 - Introduction to Public Policy and Public Management
Key public policy and public management concepts are introduced and applied to the student's field of interest.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3630 - Environmental Policy and Politics
A broad survey of how environmental policy making actually works in the U.S. Covers both environmental policy processes and politics, and the major environmental policies themselves for control of air pollution, water pollution, hazardous wastes, and other major environmental problems.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3636 - Perceptions of The Modern State and Governance
Classic and contemporary theories of the state and approaches to governance are examined.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3640 - Selected Topics in Cyber-Law
Applies legal and ethical principles to evolving computer technology. Explores current legal issues such as surveillance, privacy, free speech, crime, encryption, on line contracting, intellectual property and censorship, as well as legislative efforts to resolve these and other computing dilemmas.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2015-2016 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3650 - Intellectual Property Management
Covers principles of intellectual property law, addressing managerial and policy issues in copyright, trademark, trade secret, and patents. Readings and discussions also cover how these property and legal systems impact the balance between property exclusivity, technological innovation, and public access.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3660 - Constitutional Law
Introduces the U.S. Constitution and how it has been interpreted by the Supreme Court over time. Explores historical, social and political consequences of major constitutional themes such as federalism, judicial review, and evolving view of individual rights and liberties.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3661 - Civil Rights & Civil Liberties
Seminar focused on the rights and liberties guaranteed by US Constitutional amendments. Students learn constitutional theory and interpretation on topics of privacy, speech, media, religion, criminal justice, and gender/ethnic equality. Constitutional Law I is not required.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2014-2015 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3665 - Crime, Incarceration, and Social Policy
Explores criminal and social justice policies including policing and control of crimes involving violence, drugs, sexual offenses, and terrorism. Sentencing, effects of mass incarceration, and inequalities based on race and class will also be examined in student writing and debate.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3710 - Social Problems
Examines both the social construction of social problems and substantive problems confronting modern society by considering the distinct understandings of social problems offered by the two major theoretical traditions in sociology and analyzing specific macro and micro social problems.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3750 - Social Inequality
A critical assessment of social and cultural processes associated with group-based or categorical patterns of inequality. Examines the creation, persistence, and attempts at reduction of structured inequality based on categorical factors such as social class, race, ethnicity, and gender. May explore other significant sources of social inequality.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3760 - Human Dimensions of Natural Resources
Uses sociological concepts to cover facets of human relationships to natural resources, including human values, beliefs, and attitudes regarding the environment; rural resource-dependent communities; natural resource professions and expert knowledge; and the history of American perspectives on the environment.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3800 - Energy Policy and Technology
This course examines the policies and technologies affecting the production, transportation, and use of energy. It focuses on U.S. domestic energy policy and places it in the context of the global energy system. The course aims at providing a holistic view of energy systems connecting technological options with societal and environmental concerns.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3805 - Environmental Justice
This course focuses on the histories, theories, and practices of environmental justice in local, national, and global contexts. Topics to be explored include environmental racism, industrial facility siting, sustainable development, as well as food, energy, and climate justice.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Pre-Requisite(s): UN 1015 and (UN 1025)

SS 3811 - Energy Security and Justice
This course focuses on concepts that are fundamental to energy policy: energy security and energy justice. It introduces students to the three main views of energy security (supply, demand, and energy services). In addition, the course provides a critical perspective of evaluating energy decision-making through the lenses of justice.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3815 - Energy and Society
This course reviews extent that our lives are integrated with energy production and consumption, and related problems and solutions in our interwoven energy and social systems.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3910 - Histories and Cultures
Covers selected topics in world history, geography, or anthropology. Important concepts are the relationship between societies and regional geography, the sources and patterns of major cultures, and transformations of social, cultural, political, and economic institutions over time. May be repeated if topic differs.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 3920 - Topics in Anthropology/Archaeology
Survey of a major branch of American anthropology or archaeology, or a specific time period or region. Topics may include North American prehistory, experimental anthropology, applied anthropology, economic anthropology, or other specialized themes. Readings will emphasize both theoretical and substantive contributions. May be repeated if topics differ.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Pre-Requisite(s): (SS 2100 or SS 2200) and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3950 - Topics in American History
Examines an important theme, topic, or era in the development of American society, ranging from the colonial era up to the present. May include such topics as the Vietnam War, sports in America, American vernacular architecture, or urban America, all from a historical viewpoint. May be repeated if topic differs.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3951 - Topics in European History
Examines important themes, topics, or eras in European history, from late Antiquity to the present. Topics may include intellectual history, revolutions, monarchy, military history (incl. the Crusades), or migrations. May be repeated if topic differs. See department for current offering.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3952 - Topics in World History
Examines major ideas, processes, and events in world history. Topics may include trade and commodities, imperialism, slavery, migration, or other subjects with transnational significance. May be repeated if topic differs.
Credits: 3.0; Repeatable to a Max of 6
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3960 - Cultural Immersion
Course designed for students on supervised study abroad or exchange programs in which they investigate and report on cultural patterns and behaviors.
Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: Summer
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3961 - Preparing for Cross-Cultural Immersion Experiences
Preparation for study abroad, service learning, and cross-cultural research or internships. Students reflect on their cultures; explore how to live and work effectively with other cultural groups; discuss cross-cultural professional ethics; and consider holistic approaches to social problems and change.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 3990 - Topics in the Social Sciences
Examines an important theme or topic in the social sciences, such as social theory, work and society, or the engineer in American society. May be repeated if topic differs.
Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 4000 - Independent Study
Independent study of topic of special interest with assistance and supervision from appropriate faculty.
Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required

SS 4001 - History of Social Thought
An intensive survey of the literature of 19th-20th century history of social thought, including the writings of Marx, Durkheim, Weber, and other prominent anthropologists, sociologists, and political philosophers.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 4009 - Introduction to Survey Methodology
A general introduction to survey methods. Students will learn the basics of survey design from questionnaire construction to the measurement of complex social science concepts. Students will also demonstrate their ability to conduct an original survey through a class project.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

SS 4101 - Statistics for the Social Sciences
Covers basic concepts and methods used in conducting empirical research in the social sciences. Topics include research design, hypothesis testing, measurement of concepts, and computer-based data analysis. Assumes familiarity with Social Sciences concepts.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): PSY 2720 or MA 2720 or BUS 2100

SS 4200 - Methods of Teaching Social Studies
Application of learning and instructional theories and practice to the teaching of social studies. Emphasis will include application of state and national education standards and relevant assessment strategies for social studies. Requires admission in the Teacher Education program by the Department of Education.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2017-2018 academic year
Restrictions: Permission of department required; May not be enrolled in one of the following Class(es): Freshman, Sophomore, Junior
Pre-Requisite(s): ED 4700(C)

SS 4303 - Advanced Research in Anthropology
Capstone course for anthropology majors. Students examine career and graduate studies in anthropology and prepare proposal for senior research project.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior

SS 4505 - Advanced GIS Methods and Projects
Advanced application of Geographic Information Systems in social sciences as a tool to collect and analyze qualitative and quantitative data. Students gain hands-on experience in data collection, advanced spatial analysis, and scripting.
Credits: 3.0
Lec-Rec-Lab: (1-0-2)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): SS 2050 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 4120 - Anthropology of International Development
Advanced anthropology course that focuses on cultural, social structural, historical, and environmental analyses of international development. Students engage with relevant social theory and practical applications in international development case studies.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall
Pre-Requisite(s): UN 1015 and (UN 1025

SS 4200 - Environmental Anthropology
A seminar on the study of culture and politics in marginal environments and disadvantaged communities. Draws upon research in anthropology and geography to examine the interaction in the Americas, Asia, Africa, Europe, the Pacific, and the Arctic.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): SS 2100 and UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)
SS 4205 - Applied Anthropology
Course examines the ways anthropology is used outside of an academic context. Students study how anthropological theory and methods are used in a variety of contexts and how they benefit society. This course also emphasizes the impact of applied anthropology on the development of American anthropology as a whole, and how it has advanced our theoretical knowledge of culture and human behavior.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman

SS 4211 - Ethnographic Methods
Field-based course that surveys basic concepts of ethnography and applies them in a class research project. Provides practical experience in field observation, interviews, field notes, and write-up of research.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): UN 1015

SS 4220 - Archaeological Thought in Society
This course explores themes concerned with the intellectual development of archaeology, including research methods, theoretical concepts, and problems that have characterized the history of the discipline. Particular emphasis is placed on the broader social contexts in which archaeology has developed.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2009-2010 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore

SS 4230 - Archaeological Analysis and Interpretation
Course focuses on how archaeologists mobilize material data to understand everyday life in the past. Discussion, exercises, and lab time are used to cover the goals of archaeology, nature of archaeological data, research design, sampling, typology, classification, database management, and quantitative and qualitative analytical methods.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: On Demand - Offered alternate years beginning with the 2017-2018 academic year
Pre-Requisite(s): SS 2200

SS 4255 - Water Policy, History, and Governance
This course will explore the global history, politics, and governance of freshwater resources. Topics will include the effects of forestry, mining, watershed management, sanitation systems, climate change, fisheries, contaminants, and agriculture on water history, governance, and policies.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): SS 3520

SS 4380 - Landscape Ecology and Planning
Basic principles of landscape ecology, including pattern, process, and scale. Students will learn how to use quantitative tools to study landscape-scale patterns and processes, and how to apply these principles and tools to conservation, resource management, and planning issues.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman

SS 4390 - Seminar in Sustainability
This seminar in sustainability topics will cover a rotating set of topics, depending on semester offering. Topics may include energy use, justice, pollution, green design, or regulations bearing on sustainability.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 4500 - Historiography
The history of historical writing from Herodotus to the present.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2015-2016 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
SS 4553 - Material Culture Studies
Advanced reading and research in material culture studies. Learn to interpret the cultural and historical meanings in physical objects such as tools, housewares, memorials, furniture, etc. Emphasis on American craft, industry, and deindustrialization. Methodologies from archaeology, American studies, museum studies, public history, art history, etc.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2019-2020 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): SS 3513 and UN 1015 and (UN 1025)

SS 4600 - Industrial Archaeology
This course is an advanced exploration of the industrial past using archaeological perspectives. It is a seminar combining scholarship from different fields and using material evidence to examine the evolution of work and production in industrial society.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring - Offered alternate years beginning with the 2018-2019 academic year
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): SS 2200 or SS 3200 or SS 3230 or SS 3270

SS 4630 - Advanced Research in the Social Sciences
Capstone course for students to develop an original social science thesis research project in the areas of Politics, Law, Sociology, or Sustainability. Students will prepare a proposal for a senior research project.
Credits: 2.0
Lec-Rec-Lab: (0-2-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior

SS 4700 - Communities and Research
A rural sociology course analyzing the sustainability of rural communities (socially, environmentally, economically, and culturally). The course involves participatory research conducted together with a local community organization. Students practice research skills while making a difference in improving community life.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall - Offered alternate years beginning with the 2016-2017 academic year
Restrictions: May not be enrolled in one of the following Class(es): Freshman, Sophomore
Pre-Requisite(s): UN 1015 and (UN 1025 or Modern Language - 3000 level or higher)

SS 4900 - Seminar in Social Sciences
An intensive seminar study of topics of importance and special interest in the social sciences. Topics could focus on the history of anthropological theory or on world religious systems in comparison. May be repeated if topic differs.
Credits: variable to 3.0; Repeatable to a Max of 9
Semesters Offered: On Demand
Restrictions: May not be enrolled in one of the following Class(es): Freshman

SS 4910 - Professional Development for the Social Sciences
Assessment of learning and preparation for post-graduate work, professional training, or graduate school.
Credits: 1.0
Lec-Rec-Lab: (1-0-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): History, Social Sciences, Anthropology; May not be enrolled in one of the following Class(es): Freshman, Sophomore

SS 4920 - Internship Experience
Internship, on or off campus, providing appropriate practical, professional experience in an area related directly to a student's course of study. Students work under professional supervision. Requires a written evaluation of the work.
Credits: variable to 6.0; Repeatable to a Max of 6
Semesters Offered: On Demand
Restrictions: Permission of department required; Must be enrolled in one of the following Major(s): Liberal Arts with History Opt, Social Sciences

SS 4921 - Washington Internship - Professional Practicum
Practicum participants experience professional hands-on learning as intern in governmental, public-interest, non-profit, or national organization in DC or select cities abroad. Internship placements made through approved affiliate institutions providing placements, mentorship, supervision, classes, orientation, and housing for MTU's DC interns.
Credits: 3.0; Repeatable to a Max of 9
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: Permission of department required
Pre-Requisite(s): UN 1015 and (UN 1025)

SS 4990 - Directed Study in Anthropology
An original study of an anthropological problem, including literature search, data collection, and analysis, culminating in a research report.
Credits: variable to 3.0
Semesters Offered: Fall, Spring, Summer
Restrictions: Permission of instructor required; Must be enrolled in one of the following Class(es): Senior

Surveying

SU 1000 - Surveying Engineering Orientation
Introduction to the surveying engineering profession with emphasis on technology and careers. Topics include: technology, specialties, education, professional practice, life-long learning, and ethics related to surveying engineering.
Credits: 1.0
Lec-Rec-Lab: (0-1-0)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Major(s): Surveying Engineering

SU 2000 - Introduction to Surveying
Surveying topics will include distance measurements, leveling, angles, directions, traversing, horizontal and vertical curves, percent grade, and coordinate geometry.
Credits: 2.0
Lec-Rec-Lab: (0-1-2)
Semesters Offered: Fall, Spring

SU 2050 - Plane Surveying
An introductory course studying surveying instruments and their use in the measurement of angles, distances, and elevations. Topics include taping, leveling, traversing, construction surveys, route surveys, use of modern instrumentation, and computer applications.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): SU 2000(C)

SU 2220 - Route and Construction Surveying
Study of the geometry and field stake-out techniques of circular curves, spiral curves, compound curves, reverse curves, equal-tangent vertical curves, and unequal-tangent vertical curves. Other topics include horizontal and vertical alignment design, earthwork quantities and mass diagrams.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Pre-Requisite(s): SU 2050 or SU 2000

SU 3110 - Surveying Field Practice
Survey projects from field to finish using current surveying equipment and software. Basic statutes and ethics governing the practice of surveying. Projects cover level networks, horizontal control, design surveys, construction layout, section subdivision, map and report preparation.
Credits: 4.0
Lec-Rec-Lab: (0-2-6)
Semesters Offered: Fall
Pre-Requisite(s): SU 2220

SU 3180 - Boundary Surveying Principles
Interpretation of property descriptions used to establish land boundaries. Resolving conflicts in boundary descriptions as well as conflicts in evidence. Review doctrines pertaining to transferring title and the role of the surveyor in issuing opinions on boundary location in boundary disputes.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall
Pre-Requisite(s): SU 3600(C)

SU 3210 - Site Planning and Development
An examination of land development issues including: site analysis, environmental concerns, contouring, earthwork and grading, soils, route alignments, storm water management, sewer systems, zoning, and land planning. Incorporates CAD applications in the lab.
Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring
Restrictions: May not be enrolled in one of the following Class(es): Freshman
Pre-Requisite(s): SU 2000
SU 3540 - Geospatial Information Technology with Elements of Field Cartography
Application of GIS technology methods for processing surveying data obtained in the field. Concepts of interoperability and metadata organization are considered. Includes map projection review and 2D and 3D cartographic data visualization.

Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Spring
Pre-Requisite(s): MA 3710

SU 3600 - Surveying Computations and Adjustments
Basic computations and analysis of surveying measurements by adjustment theory are introduced. Students will gain the ability to use computer software to perform the computations. Analysis of measurements and errors based on statistical principles and least squares principles will be discussed.

Credits: 4.0
Lec-Rec-Lab: (0-3-2)
Semesters Offered: Fall
Pre-Requisite(s): (SU 2000 or SU 2050) and (MA 2320 or MA 2321 or MA 2330) and SU 3110(C) and MA 3160(C) and MA 3710(C)

SU 4010 - Geospatial Concepts, Technologies, and Data
High level review of geospatial data acquisition systems, sensors, and associated processing technologies. Course considers geospatial metadata generation principles, interoperability, and major tools for manipulation with geospatial data. Course may help in transition of non-geospatial majors to geospatial field.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: On Demand
Restrictions: Permission of instructor required

SU 4045 - Geospatial Data Fusion
Fundamentals of GIS data, aerial photographs, satellite imagery, airborne/terrestrial laser scanning data. Characteristics of remotely sensed data including information specific to the sensors used to obtain it. Term project on how to combine and fuse to a specific application.

Credits: 3.0
Lec-Rec-Lab: (0-2-1)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): SU 4140

SU 4060 - Geodesy
Concepts of astronomy and geodesy that are relevant to the practice of surveying. Covers theory, field techniques, and computations involved in the determination of true north, an introduction to the figure of the earth and its geometric and physical characteristics, geodetic datums, and coordinate systems.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Major(s): Surveying Engineering; Must be enrolled in one of the following Class(es): Senior
Pre-Requisite(s): SU 4140 or SU 3600(C) or SU 3250

SU 4100 - Geodetic Positioning
Introduces the instruments and procedures used in surveying projects that require a high order of accuracy. Discusses some conventional instruments and techniques but the greater emphasis is on GPS techniques.

Credits: 3.0
Lec-Rec-Lab: (0-2-3)
Semesters Offered: Fall
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): SU 4060(C)

SU 4140 - Photogrammetry
Basic principles of photogrammetry and its role as a technology for spatial data collection. Use of photogrammetry in the fields of surveying, engineering, and geographic information management will be discussed.

Credits: 3.0
Lec-Rec-Lab: (0-2-2)
Semesters Offered: Fall, Spring

SU 4142 - 3D Surveying and Modeling with Laser Scanner Data
Theory and application of terrestrial LIDAR scanning. Typical application scenarios are also included. Intensive lab component provides hands-on experience in LIDAR point cloud processing and visualization.

Credits: 3.0
Lec-Rec-Lab: (0-2-1)
Semesters Offered: On Demand
Restrictions: Must be enrolled in one of the following Class(es): Senior

SU 4180 - Land Subdivision Design
Introduces the physical, economic, and social aspects of optimum land use within the framework of state and local regulations of land divisions, condominiums, mobile home parks, and residential subdivisions.

Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Spring
Restrictions: Must be enrolled in one of the following Class(es): Junior, Senior
Pre-Requisite(s): SU 3180 and (CMG 3200 or SU 3210)
University Wide

UN 1000 - Frameworks for Success for ExSEL
Course that explores ways to become a more effective student. The course focuses on metacognition and individual learning styles, the skills and habits that support academic success, and utilizing campus resources. Counts as a free elective.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

UN 1005 - Initiatives for Success
Course that explores ways to become a more effective student. The course focuses on metacognition and individual learning styles, the skills and habits that support academic success, and utilizing campus resources. This course includes a mandatory learning center appointment assigned upon registration. Course counts as a free elective.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

UN 1010 - Creating Your Success for Themed Communities
First year seminar course that develops community among members of residential themed communities and provides an introduction for creating academic, professional, and personal success. This course is required for all first-year and transfer (with less than 30 credits) students living in a residential themed community. Course counts as a free elective.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

UN 1011 - Strategies for Success
Seminar course that provides a framework to assess the strategies a student is currently using to achieve academic, professional, and personal success. The course is designed to look at ways to improve upon a student's strategies for success or adopt new ones. This course is required for all first-year or transfer (with less than 30 credits) students who are on academic probation for the first time after fall or spring of their first year. This course is also available with permission from the Dean of Students, to any student who feels they would benefit from additional strategies for success. Course counts as a free elective.
Credits: 1.0
Lec-Rec-Lab: (0-0-2)
Semesters Offered: Fall, Spring, Summer

UN 1012 - Academic Language & Practice
This course is designed for speakers of English as a second language admitted into academic study, not native speakers of English. It assesses language ability and focuses on academic language and practices.
Credits: 1.0; Graded Pass/Fail Only
Lec-Rec-Lab: (0-0-3)
Semesters Offered: Fall, Spring

UN 1015 - Composition
Provides direct instruction in composition. Students examine and interpret communication practices and apply what they learn to their own written, aural, and visual compositions. Class projects ask students to communicate in a variety of modes and to attend to audience, purpose, and context.
Credits: 3.0
Lec-Rec-Lab: (0-3-0)
Semesters Offered: Fall, Spring, Summer

UN 1025 - Global Issues
Study of contemporary global issues, their origins, impacts, and solutions through the thematic and comparative exploration of worldview and culture, population, globalization, development, politics and global governance, environment, and sustainability. Emphasis on global literacy and information literacy.
Credits: 3.0
Lec-Rec-Lab: (3-0-0)
Semesters Offered: Fall, Spring, Summer

UN 2600 - Fundamentals of Nanoscale Science and Engineering
Team-taught introduction to the fundamentals of nanotechnology, emphasizing the interdisciplinary nature of this field. Modern instrumentation, key scientific foundations, and current and potential applications will be discussed. Real and potential societal implications of nanotechnology will be explored.
Credits: 2.0
Lec-Rec-Lab: (1-1-0)
Semesters Offered: Spring, Summer - Offered alternate years beginning with the 2007-2008 academic year

UN 3002 - Undergraduate Cooperative Education I
Credits may count as free or technical electives based on academic department. Requires good standing, registration with Career Services, and an official offer letter from the employer.
Credits: variable to 2.0; May be repeated
Semesters Offered: Fall, Spring, Summer

UN 3003 - Undergraduate Cooperative Education II
Credits may count as free or technical electives based on academic department. Requires good standing, registration with Career Services, and an official offer letter from the employer.
Credits: variable to 2.0; May be repeated
Semesters Offered: Fall, Spring, Summer

UN 3004 - Undergraduate Cooperative Education III
Credits may count as free and technical electives based on academic department. Requires good standing, registration with Career Services, and an official offer letter from the employer.
Credits: variable to 2.0; May be repeated
Semesters Offered: Fall, Spring, Summer

UN 3005 - Undergraduate Cooperative Education IV
Credits may count as free or technical electives based on academic department. Requires good standing, registration with Career Services, and an official offer letter from the employer.
Credits: variable to 2.0; May be repeated
Semesters Offered: On Demand
Restrictions: Permission of instructor required

UN 3990 - Special Topics - Interdisciplinary
Study of interdisciplinary special topics as specified by section title.
Credits: variable to 6.0; May be repeated
Restrictions: Permission of instructor required

UN 4000 - Seminar Series in Earth, Planetary, and Space Sciences
A seminar series that covers topical issues in remote sensing, ecosystem research, global change, and space sciences.
Credits: 1.0; Repeatable to a Max of 2
Lec-Rec-Lab: (0-1-0)

UN 4990 - Special Topics - Interdisciplinary
Study of interdisciplinary special topics as specified by section title.
Credits: variable to 6.0; May be repeated
Restrictions: On Demand

Undergraduate Course Descriptions, 2018-19, Page 103 of 103
