

Mobility > Transportation

*The ability to move or be moved
freely and easily.*

USA Today, 2/20/2017: "Cheap gas and a surging economy are taxing the nation's roads and contributing to congestion that cost U.S. motorists almost **\$300 billion** last year in wasted time and fuel ... Los Angeles had the worst traffic in the world ... INRIX."

ARPA-e NEXTCAR: Connected and Automated Control for Vehicle Dynamics and Powertrain Operation (GM Partnership)

Vehicle Platooning and Eco-Routing

Houghton/Hancock
 Detroit, Chicago, M-City

Large databases of single and multiple vehicles.

GM Volt2

L2 Autonomous vehicles controls with V2X
 5 Modes: Conventional – HEV – PHEV – EREV - EV

Bo Chen: Model based Controls

Darrell Robinette: Powertrain and Optimization

Mahdi Shahbakhti: Dynamic Models & Controls

Kuilin Zhang: Traffic Theory and Simulation

Chris Morgan / Chris Pinnow: Vehicle Instr. & Testing

Jeremy Worm / Chris Morgan: Training and outreach

Traffic Theory and Simulation

- Optimal Routing and Velocity Bounds
 - Connected and Automated Vehicle Traffic Simulation Platform
 - Real-time and Simulated Traffic with Optimal Routing and Velocity Bounds
- Integrated vehicle and traffic simulation for technology assessment
