

Ebenezer Tumban

Research / Scholarship

Major category 1

Enhance immunogenicity of Peptide vaccines

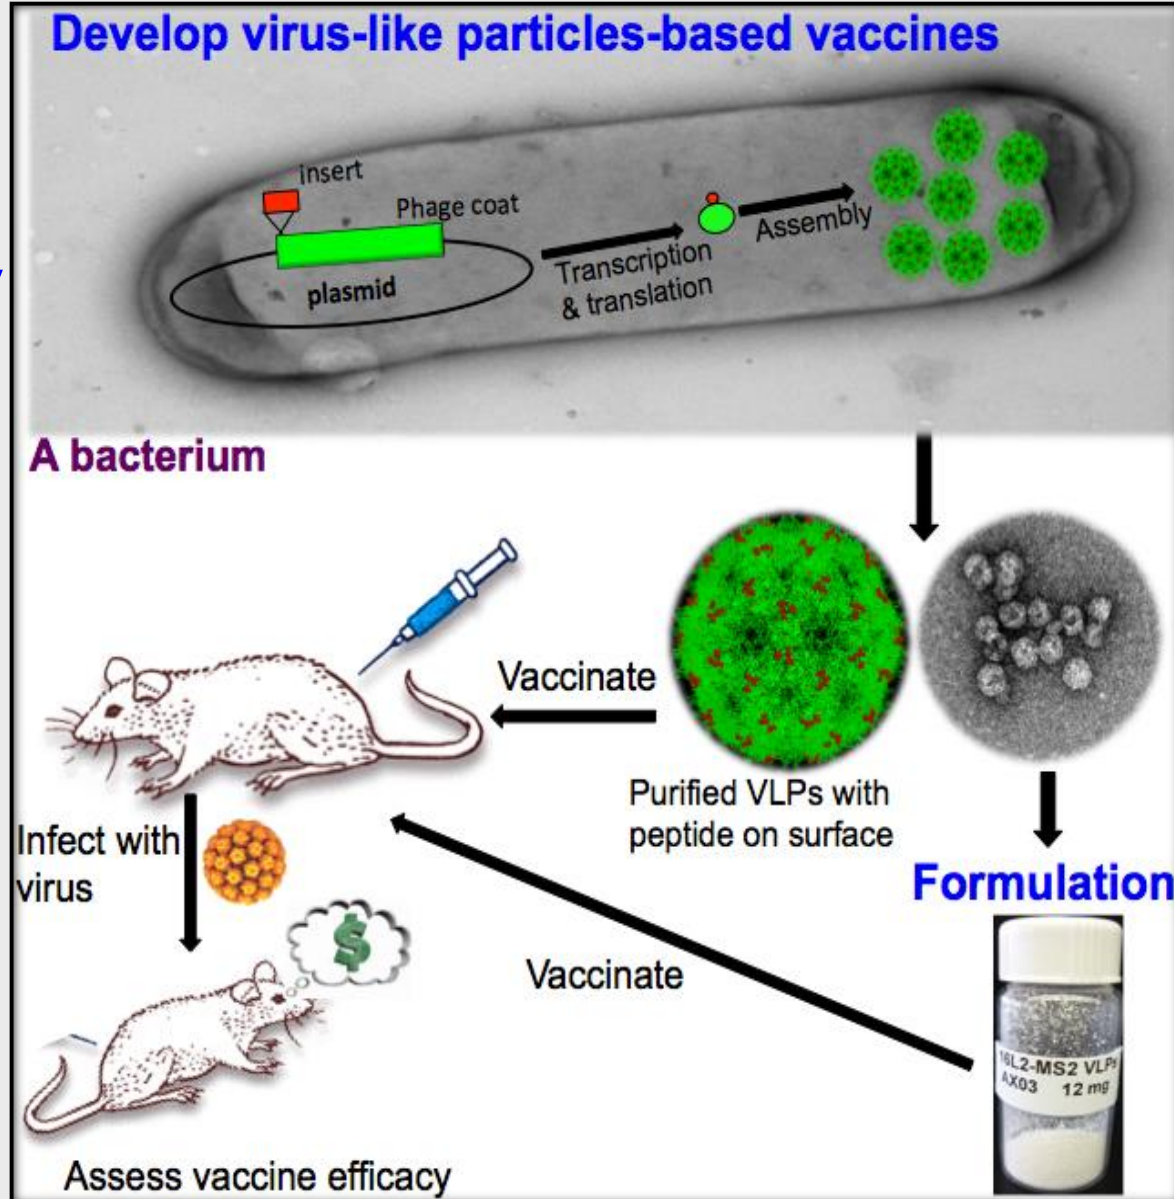

- Safe but **less immunogenic**

Major category 2

Vaccine formulation

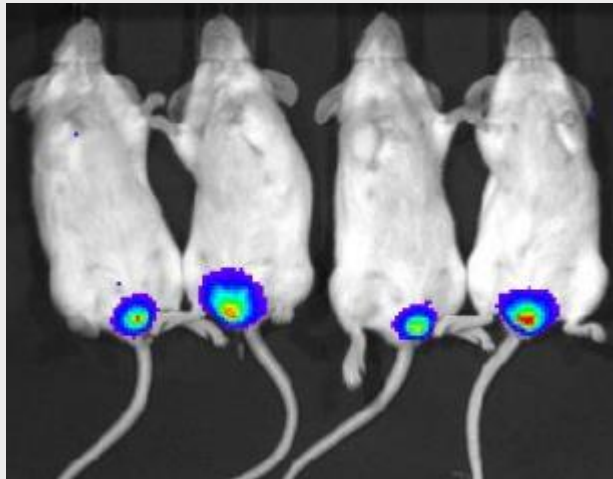

Develop virus-like particles-based vaccines

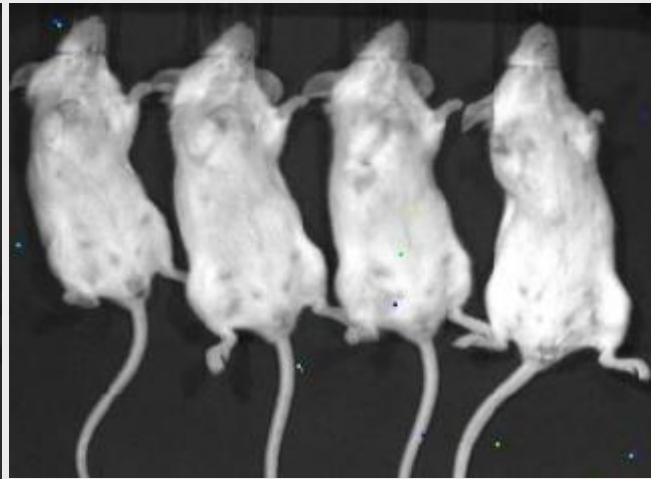

Scholarly Contributions:

- Virus-like particles (VLPs) displaying human papillomavirus (HPV) peptides protect against vaginal HPV infections

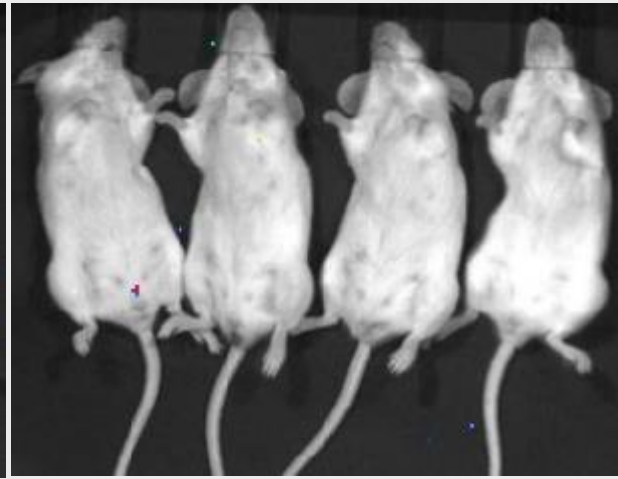

Zhai et al., *Antiviral Research*, 2017

Immunized with **control VLPs**

Immunized with **VLPs displaying HPV peptides**

Immunized with **Gardasil-9 vaccine**
