Application Process
Letter of Intent (LOI) SUBMISSION DEADLINE:
January 19, 2018

Full Proposal (by invitation) SUBMISSION DEADLINE:
March 16, 2018

The MTRAC (Michigan Translational Research and Commercialization) Innovation Hub for Applied Advanced Materials program at Michigan Tech provides resources to support materials related projects with high commercial potential. This support includes research funding for prototype and late-stage translational activities, with consultation and mentoring from an Oversight Committee with industry and investment experts. The program defines materials related projects broadly to include technologies related to nano materials, materials used in medical applications, building materials, transportation, energy transfer, energy storage or aerospace. These examples are illustrative and not meant to exclude other possible applications of advanced materials. Applicants must be associated with a Michigan research university or non-profit research institute.

Those interested in the program are strongly encouraged to contact Commercialization Program Director Brenda Da Costa (bdacosta@mtu.edu  906-487-1082) to receive assistance and guidance on proposal preparation.

MTRAC APPLIED ADVANCED MATERIALS PROCESS OVERVIEW
• December 4, 2018 – Call for proposals begins
• January 19, 2018 – Letter of Intent (LOI) due at 6:00 pm
• February 14, 2018 – Invitations to submit full proposal issued
• March 16, 2018 – Full proposal deadline
• April 11, 2018 – Invitations to present to Oversight Committee issued
• May 10, 2018 – Presentations to Oversight Committee with funding decisions announced
• July 1, 2018 – Funding in place to begin project

PROPOSAL REVIEW & EVALUATION
Proposals will be evaluated by the Oversight Committee on the basis of technical feasibility, market need and opportunity, and the potential for commercialization and obtaining additional external support. Each proposal must contain, and will also be evaluated upon, a comprehensive R&D plan towards commercialization with discrete and deliverable development milestones that greatly improve commercial interest in the technology.

ELIGIBILITY
MTRAC was developed to fund translational research of novel, commercially viable technologies. Projects with limited commercial applications are outside the mission of the program and unlikely to be funded. The project must relate directly to applications in Applied Advanced Materials. The objectives of the project should include an outcome with commercial impact. Other eligibility criteria include the following:

- The technology must be the subject of an invention disclosure from a Michigan based university, hospital or research institution and be under active management of your technology transfer office or equivalent (e.g. for Michigan Tech Innovation & Industry Engagement: http://www.mtu.edu/research/administration/iie/campus-inventors/).
The technology must be available for licensing in the relative application/field of the proposal and relevant geography(ies).

Technologies under an option agreement in the applicable field-of-use and geography(ies) are eligible for inclusion in an MTRAC Proposal.

Technologies under a license agreement in the applicable field-of-use and geography(ies) are NOT eligible for inclusion in an MTRAC Proposal.

The applicant Principal Investigator (PI) must be from a university, hospital or non-profit research institute located in Michigan.

It is important to note that the templates for the Proposal including the Budget and Signature Form (see below) include additional requirements related to matching funding, indirect cost limits, project management, etc. Additionally, the mechanism to provide funding to awardees outside of Michigan Tech is through a subcontract from Michigan Tech. The subcontract must be signed within one month of notification of award and receipt of the subcontract; otherwise, there is the potential for the award to be rescinded.

If you have any questions about eligibility, please contact Brenda Da Costa (bdacosta@mtu.edu) for guidance.

CONFIDENTIAL INFORMATION

Please note that the members of the Oversight Committee (OC) who will be reviewing the Proposals and approving the grants ARE NOT under any confidentiality agreements. Due to the nature of their work in venture capital and other commercial endeavors the majority of the OC members would not be allowed to enter into these types of agreements. Therefore, do not include proprietary information which has not been disclosed to or protected by your tech transfer office. If intellectual property (e.g. patents) related to the Proposal has not yet been filed, it is advisable to work with your technology manager on the content of the Proposal to avoid public disclosure that could affect the ability to later file for intellectual property (IP) rights. The typical approach this is to focus discussion on what the product or process does, rather than detailed information on how it does it. As the objective of this program is commercialization, the Proposal should be focused towards the commercial and business opportunity rather than the technical details. If you have any questions or concerns in this regard, please contact your technology manager at your organization.

REPORTING REQUIREMENTS

Awardees will hold time for bi-weekly meetings with the program director and other stakeholders to discuss the project’s progress: personnel matters, purchasing materials, budget, making progress towards milestones, IP development and any other reasonable additional information may be reviewed. There will be regular contact with home institution Office of Technology Transfer (OTT) to ensure commercialization activities are integrated with project activities.

During each award period, the awardees are requested to make quarterly presentations to the oversight committee to assess progress. Awardees will be provided a template to cover relevant aspects of the project and commercialization activities and the OC will have the opportunity to ask questions and provide constructive feedback to the project team. The OC feedback and guidance plays a critical role in the success of the MTRAC program and the individual projects. During the quarterly reviews, the OC could decide to make changes to the project’s research and commercial milestones (within budget limits) to help your project get to the market faster.
Awardees will be required to provide a written report on a six-month basis that covers the following topics (a template will be provided):

- Progress, compared to the pre-established milestones
- IP updates
- Budget updates
- Challenges or issues which prevent business and/or technical development

**Letter of Intent (LOI)**

**Step 1: LOI Submission Guidelines**

**Deadline: January 19, 2018:** Cover sheet (see final page) and one page Letter of Intent (LOI) proposals due via e-mail to Brenda Da Costa no later than 6:00 p.m. at bdacosta@mtu.edu. **Maintain 0.5-inch page margins throughout document and use no smaller than Arial 10pt. font.**

**Body of the LOI:**

The LOI is a page cover sheet and a one page narrative which must include:

1. One paragraph on the unmet or poorly met market need: This section should include a brief description of the unmet need (or market gap) together with some metrics, such as the number of companies affected annually, projected savings from introduction of the technology, likely future trends relevant to the problem, regulatory environment, etc.
2. One paragraph on the proposed solution: This paragraph must focus on the research and development (R&D) of a solution through “translational” research as opposed to “academic research” (defined as adding to the general body of knowledge). The proposed solution must be product and/or method specific.
3. Summary data or development milestones to date which support that the proposed technology would actually work safely and effectively.
4. Estimated R&D / product development timeline (i.e. “time to market”). Does the path to market for this technology involve a 1-2 year project or an 8-10 year sustained effort?
5. An estimate of one-year direct R&D costs for personnel, minor equipment, equipment use charges and supplies.
6. The intellectual property status including invention disclosures, patent applications filed, shared IP ownership with others, patents awarded and/or technologies licensed related to the proposed solution, including third party IP.

The LOIs will be screened by the Oversight Committee (OC). Proposals with the highest ranking will be invited to submit a **Full Proposal.** Investigators will be notified with the result of the LOI proposal on approximately **February 14, 2018** subject to final committee review scheduling.

**Step 2: Proposal Submission Procedure**

**Full Proposal Deadline: 6 pm March 16, 2018 (subject to change at the time of submission invitation)**

Proposal submissions must include the following information according to the format provided below and should not exceed the stated page limits. **All proposals must adhere to the specified page limits to be considered for this program.** **Maintain 0.5-inch page margins throughout document and use no smaller than Arial 10pt. font.**

1. **Cover Page (3 pages)** – Contains the project title, names of the PI(s), budget amount requested, a one-paragraph summary and the signature of the PI and
2. **Project Description (5 pages total)** – Projects will be judged on the following review criteria

*(Please use these headings in the body of your proposal and adhere to the page limits):*

- **What is the unmet need?** (1-2 paragraphs) The unmet or poorly met market need. This section should include a brief description of the unmet need together with some metrics, which could include the Total Addressable Market, Served Available Market and Target Market size, cost of technology adoption, relevant expenditures related to the technology market segment, environmental benefits, likely future trends relevant to the problem, etc.

- **Research Stage/Description of Technology** (1-2 pages) The MTRAC program is focused on translational research and designed to accelerate commercialization of promising technologies. A brief description of the technology should explain how the proposed solution works to solve a problem. Emphasize what it does and its novelty however great detail on how it works is not necessary. Provide competitive analysis and the current approaches for managing the problem as well as the known shortcomings of existing approaches. The envisioned product and the advantages it would have compared to the current solutions.

- **Impact** – If successfully completed, how would the work outcome address an unmet customer need? How would the outcome transform the target market? (1 paragraph)

- **R&D Plan** – Is the plan geared towards commercialization? How will the plan results attract follow on support? Is the commercialization plan clearly presented? Is the commercialization plan feasible? (1 page)

- **Quarterly Development Milestones** - Expected specific milestones per quarter and plan for achieving them. These should align with the R&D Plan and Budget. (1/2 page)

- **Intellectual Property** – Has an invention report been filed with your institution’s technology management group with written proof? **THIS IS A MANDATORY REQUIREMENT TO BE ELIGIBLE FOR THIS PROGRAM.** What is the IP protection strategy for the idea (patent, copyright, trade secret)? (1 paragraph)

- **Collaboration (if applicable)** – Who are the collaborators on this project (if any) and what are their roles? This includes academic and industrial collaborators. Are they contributing matching funding and/or resources? Please include letters of support, if provided (1 paragraph)

- **Follow-On Funding** - Plan for funding after M-TRAC award expires (i.e. NSF, SBIR/STTR, venture funding, license to existing company, etc.). (1 paragraph)
3. Budget and Signature Form (1-2 pages) – Please include a proposed 1-year budget, along with the provided budget template (see note below about budget template) you have the flexibility to build and justify the budget needed to succeed. We will favorably consider applications where the MTRAC budget request is $30k-$50k.

Applicants will need to provide at least 50% of the total budget as matching funds. A 50% departmental/PI cost share is expected from other institutions which cannot contain indirect costs.

These matching funds cannot originate from another MEDC (or Michigan Strategic Fund) funded program

Matching funds must be placed into an account under direct control of the PI.

There is a limit of 15% indirect costs for the MEDC award portion of the grant.

Teams are encouraged to contact the Program Director (Brenda Da Costa bdacosta@mtu.edu) to ensure the matching funds and the overall budget meets the requirements established by the MEDC

Note: There are two budget templates available – there is a separate budget template for Michigan Tech originating projects to ensure proper approvals and budgets are obtained. Applicants from other institutions must use the relevant budget template as part of their proposal.

Please note the following related to your budget:

• PI must have primary wage and effort appointment at their institution equal to or greater than the requested budgeted amount for his/her effort.
• The maximum allowable Indirect Cost Rate is 15% for MEDC contribution only.
• Allowable budget expenditures include: salary and fringe benefits for project personnel, materials and supplies, equipment, travel and other relevant costs. Budgets should be allocated to the conduct of the R&D plan and achievement of development milestones. Proposals will be partially evaluated on the appropriateness of project budget.
• The cost share cannot be “in kind” and must be resources that can be applied directly to expenses for the project. Funds must be placed in a cost share account prior to project initiation.
• Faculty release time and equipment use charges can serve as matching funds as long as funding for such expenses are transferred into the project account.
• Student tuition is not an allowable expense

For non-Michigan Tech applications:
  • A non-technical project manager is required. Their role is to manage the budget, manage the milestones, interfacing with the MTRAC Transportation Program personnel and MEDC for all necessary reporting, and providing commercialization support. A signature is required proof a person has been identified.
  • A signature from a technology manager who can verify that the proposal is non-confidential, the technology/IP listing is accurate, the technology is available for licensing in the field-of-use applicable to the proposal, and their institution controls the licensing of the IP.
  • A signature authorizing matching funds and verify the required matching funds are available from the source listed in the budget
over which he/she has authority and will be transferred to an account for the sole use of this project should an award and subsequent subcontract for the MTRAC funds be completed. Additionally, this person will verify that these funds have not originated from another program funded by the Michigan Economic Development Corporation/Michigan Strategic Fund.

The Budget and Signature Forms are available online at mtracmaterials-budget-and-signature-form-mi-org-022017.xlsx Be sure to select the correct version of the form. The correct Budget and Signature Form must be used/completed and submitted as part of your Proposal.

4. References/Literature Cited (1 page) 5. Bio sketches (2 pages each)

Bio sketches of the PI and other key personnel should be attached to this document as supplemental material.
