

I'd like to thank President Brian Barkdoll, and in particular, Dr. Adam Wellstead for their work to move this survey to a more professional approach (I believe this is the 11th annual survey). Dr. Wellstead and others on the committee spent a great deal of time formulating the survey (including students in a class), and on the statistical analysis of the data. The approach the Senate has taken this year moves far beyond the simple averages and extraction of comments that has been done in the past. I think that increasing the rigor of the survey serves Michigan Tech well now, and will only improve as questions are refined, and more data is gathered in the future years. I believe the results speak for themselves, and we may ask for additional refinement on a few topics of special interest. Thank you all who took time to fill out the survey.
