

The University Senate of Michigan Technological University

Proposal 8-15 (Voting Units: Academic)

“Shelving the Master of Engineering Degree in Environmental Engineering (EGR4)”

I. Background

In 2013, faculty responsible for administering the Master of Engineering Degree in ~~Civil~~ **Environmental** Engineering (~~EGR3~~) (**EGR4**) determined that the needs of coursework students were better served by allowing such students to enroll in a “Plan D” option (coursework only) of the Master of Science degree program in Environmental Engineering (EEN).

II. Proposal

Hence, it is proposed that the Master of Engineering Degree in ~~Civil~~ **Environmental** Engineering (~~EGR3~~) (**EGR4**) be shelved.

The final term during which the program was open for new admits was the fall semester of 2012.

There are currently no students enrolled in this program. (Students were last enrolled in the program during the spring semester of 2013.)
