

SS3630

Environmental Policy and Politics

Online - Summer Track B - 3 credits

If you want to learn how environmental policies are developed and how real-world solutions are put into action, this course is for you!

This course explores how policies are made, who shapes them, and how they affect critical issues related to climate, energy, water, and natural resources. Through real-world examples, you will see how political debates, public opinion, and policy tools drive environmental change.
