## Dining Services

Dining Services is partnering with Consumers Product Manufacturing to implement a returnable container program. CPM is working with the reusable container brand, Mr. Lid, to attain a more sustainable campus. Together, we are implementing the use of these containers in the Memorial Union Building to reduce the amount of single-use plastics being thrown away.

### How it works:

1. Buy into the program with a onetime \$5 Program Fee
2. Receive one of 50 program key-chains
3. At the time of check-out for your food at the North Coast Cafe (MUB), you will hand the cashier the keychain.
  - a. At this time, the cashier applies a 10% discount to your food.
4. You receive in return, your food in a reusable container
5. Once you are ready to return the container (this can be at any time), you hand the North Coast Cafe cashier the dirty container and receive your keychain in return.
6. The returned Mr.Lid is washed and sanitized by the MUB's commercial dishwashers to be reused.
