

Sustainability & Resilience at Michigan Tech

What is Michigan Tech doing?

Sustainability & resilience are focused on how to improve the outcomes of human behavior in terms of their impacts on the earth and other people, now and in the future. Individual decisions matter, as does leadership in research and other institutional and professional activities that enhance health and wellbeing.

One of our Husky mottos - **"tomorrow needs Michigan Tech"** - echoes the reality that tomorrow needs leaders to promote sustainability and resilience as a way of life.

- ▶ **By seeking ways to enhance sustainability, Michigan Tech aims to increase the resilience of the campus and other communities locally and beyond.**

Student organizations and enterprises involve the student body³

Active research is conducted on topics of sustainability²

Multiple academic programs focus on sustainability¹

The Sustainable Demonstration House serves as an educational living experience

Tech purchases wind energy for 1/2 of its annual electricity supply

¹ e.g., BS in Sustainability Science and Society, Graduate Certificate in Sustainability

² e.g., Alternative energy, food-energy-water nexus, circular economy of plastics

³ e.g., Green Campus Enterprise, Alternative Energy Enterprise
